"WELL, YOU'RE HELPING SOME!"

Painted by G. J. Perritt for Cream of Wheat Co. *Copyright 1915 by Cream of Wheat Co.*

Hello Boys!

MAKE LOTS OF TOYS

I want you boys to build for me the biggest, best and most original Models produced for any construction toy. I am willing to dig deep into my pocket to pay you to make a big effort.

THINK OF IT! 300 PRIZES! WORTH *$3000*

Try hard for the Auto—but if you don't win *that*, there are 299 other prizes. Motorcycles, Bicycles, Camp Outfit, Tents, Canoe, Camera, Skates, Air Rifles; $25, $15, $10, $7.50, $5.00 and $3.00 Erector sets, etc. I want these models to use in showing other boys what can be built.

BUILD NEW MODELS and WIN PRIZES

Brand New

AUTO

Is One

ERECTOR

It Costs *Nothing* To Enter Contest

(The Toy with Girders like Structural Steel)

You do not have to buy Erector to compete. We cannot tell the full story here. Ask your toy dealer today for—

FREE FOLDER I have prepared a big, special folder full of pictures. It gives all details about the auto: its name, specifications, etc.; also illustrates and describes minutely all prizes. If your toy dealer has no folders, write me his name and I will supply you. He sells Erector in sets running from $1 to $25. There's an electric motor in all sets at $5 and over.

Yours for a dandy good time, A. C. GILBERT, President.

CURRENT EVENTS

EUROPEAN WAR

IN THE EAST

May 5.—The Austro-German forces in Galicia recapture Tarnow, on the Donajec, and drive the Russians from that and the Biala rivers. Russians in the Karpathians continue to withdraw, while the Austrian offensive at Lupkow and Uzsok passes strengthens.

May 7.—In Galicia, the Russians continue to retreat to the junction of the Donajec and the Vistula. Berlin reports that General von Mackensen, on the German right wing, comes into frequent contact with the retreating Russian forces of the Karpathians. An official résumé of the battle places the final concentration and completion of preparations of the Austro-Germans on April 30. Artillery began the attack on May 1, followed next day by a devastating fire over a four-mile front. By May 2 they had advanced ten miles and penetrated the main Russian position, taking over 20,000 prisoners. A Vienna paper announces that all credit for the recent successes in the Karpathians is due to the strategy of Field-Marshal Conrad von Hoetzendorf, Chief of Staff of the Austrian Army.

The Rockefeller Commission for Relief in Poland is informed that Western Poland, now in German possession, is in dire distress, owing to the cutting off of imports and the stopping of work in the mines. In three of the largest centers 10 per cent. of the population are wholly dependent on charity, and typhus, cholera, dysentery, and scarlet fever have raised the death-rate 12 per cent.

May 8.—German progress above the Niemen in northern Poland continues. Libau, on the coast, has suffered both land and water attacks.

IN THE WEST

May 5.—A French eye-witness with the army estimates the German loss in the last two weeks, incurred in the struggle in Belgium and against the extreme French right, to be 35,000 men.

May 7.—Berlin claims that all the Allied attempts to wrest from the Germans "Hill 60," near Ypres, have failed.

May 8.—Paris reports signal success above Arras, where four miles of trenches are taken, and, in places, as much as 2½ miles gained.

The German assault at Ypres, lax for two days, begins with renewed vigor, penetrating the Allied line at points near Frezenberg.

May 9.—The Germans break through the Allied line for some distance on the Poelcappelle road, to Westtje, where they are halted. The Allied line reforms and makes a successful stand, with counter-attacks.

May 11.—The German drive at the Allied left wing continues with unparalleled violence, from Lombaertzyde to Arras. It is termed the greatest battle of the war.

May 12.—North of Arras the Allies are hotly engaged in an attempt to break through the German line, but without immediate gain.

GENERAL WAR NEWS

May 7.—The Cunard liner *Lusitania* is torpedoed near Kinsale on the Irish coast and sinks in fifteen minutes. One thousand one hundred and fifty-

SALMON FISHING RODS

It is generally conceded that no fishing can equal the sport of angling for the lordly salmon and yet it is enjoyed by comparatively few. The word has gone forth that a man of ordinary means could not afford the luxury and this impression has been substantiated by the high prices asked by most dealers for salmon tackle. While we believe in encouraging the use of reliable fishing equipment we are frank in saying that the paying of high prices does not insure for the buyer superior quality. In the case of our "Powhatan" Salmon Rod forty or even fifty dollars cannot buy a better.

While many of the pools in the rivers of New Brunswick are controlled by clubs, there is much open water there and in Newfoundland all the rivers can be fished by anyone. We will, upon request, be glad to tell you where and when to go and what to take.

"POWHATAN" SALMON RODS

Hand made from selected six strips heavy enameled split bamboo, and is very strong and serviceable. Has three pieces, extra tip, solid German silver mountings, extra heavy welted and reinforced ferrules which are serrated to prevent breaking the rod at the joints. Double cork grip, snake guides with agate-first guide and top and wound at close intervals with silk.

No. 3S. Length 14 or 15 feet, weight about 20 ozs. . **$30.00**

The above are the standard lengths, but 16 or 17 feet will be furnished to order at the same price.

"LITTLE RIVER" SALMON ROD

An excellent rod for small or medium sized salmon or for Grilse, and appeals to the angler who visits salmon waters only occasionally and does not want to invest a larger amount.

It has a double cork grip, snake guide and all German silver mountings. Made in three pieces with extra tip.

No. 5S. 12 feet long, weight about 13 ozs. **$15.00**

"EXTRA" SALMON RODS

An inexpensive rod that will land salmon or grilse but does not have that elegance of "feel and finish" which are characteristic of our higher priced rods. It is fine for those who want an inexpensive rod and is often purchased as an "extra" for use in case of accident to a better grade of rod. Made of six strip split bamboo, solid metal reel seat, double grip, snake guides and three ring tops. For convenient carrying it is made in four pieces with extra tip.

No. 12. Length 12½ feet. weight about 17 ozs. . . . **$10.00**

We carry in stock Hardy Bros. English Salmon rods costing as high as $75.00 each particular of which will be sent upon request.

Delivery Prepaid in U. S. if Cash is Sent with Order at Above Prices

SPLIT BAMBOO RODS

"POWHATAN" EIGHT STRIP TROUT ROD

The "Powhatan" hand-made Fly Rod possesses all the fine qualities that go to make fly casting a pleasure. The balance is perfect and the distance and ease with which a line can be cast is really remarkable.

It is made in eight sections and consequently nearer round than the usual bamboo rod. For this reason a much finer action is possible, besides the eight strip construction utilizes all the outside enamel of the cane, making the rod much stronger. The German Silver mountings are hand made. The ferrules are serrated and it is next to impossible to break them. The guides are snake pattern except the first, which is agate, as are the tops. The grip is solid cork shaped to fit the hand. Furnished with a leather case, the two tips being first put up in a bamboo case.

No. **V.** 8½ feet, weight 4 to 4¾ ounces.....
No. **W.** 9 feet, weight 5 to 5¼ ounces..... } **$35.00**
No. **X.** 9½ feet, weight about 5¾ ounces.....
No. **Z.** 10 feet, weight about 6¼ ounces.....

"POWHATAN" SIX STRIP TROUT ROD

In quality, workmanship and finish this rod is equal in every way to the "Powhatan" eight strip. Six strips of selected split bamboo are used and difference in price is due to the difference in time required to construct.

No. **V6.** 8½ feet, weight 4 to 4¾ ounces.....
No. **W6.** 9 feet, weight 5 to 5¾ ounces..... } **$25.00**
No. **X6.** 9½ feet, weight about 5¾ ounces.....
No. **Z6.** 10 feet, weight about 6¼ ounces.....

THE "CHIEF" FLY OR BAIT ROD

Our "Chief" is a rod any fisherman will be proud of. It is made with the greatest care from six-strip bamboo in three pieces—butt, middle joint and tip and is supplied with an extra tip. The "hang" is just right and the resiliency well worked out from tip to butt. All styles have agate first guides and agates at end of tips. The other guides are snake pattern on the fly rods and trumpet guides on the bait rods. Welted ferrules and hand made skeleton reel seats below the grip on fly pattern and above the hand on the bait style. Full German Silver mounting and shaped cork grip.

No. **O3.**	9½ feet, weight 5¼ oz.	No. **O9.**	8½ feet, weight 8 oz.	

THE "VON" ROD

For those who want a good, well made rod at a medium price we heartily recommend the "Von." The action is quick and the balance excellent. It is hand wrapped six strip hexagonal bamboo of sleected stock with German Silver mountings. Agate first guide and tops and shaped cork hand grasp, and put up in velvet covered forms, with leather ends and canvas bag.

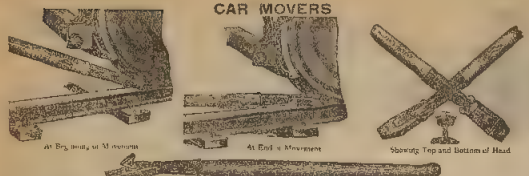
CAR MOVERS



BADGER

The Most Powerful Device Made for Handling Freight Cars

Has Two "Never-slip" Four Cornered Spurs which Grip the Outer Edge of the Rail where it is Soft and Not Affected by the Top of the Rail, which Has Become Case Hardened from Contact with Car Wheels. These Spurs Can be Removed and Turned Three Times and Ends Changed around the Edges Become Dull. By Use of the Double Spur a Double Lever from the Rail is Obtained and Thereby Double Resistance Offered against Slipping. It is also Provided with a Claw, which is Hooked to the Tongue for Main Lever in such a Way that, when the Handle is Pressed Down at Lengthens, and Pushes the Wheel, Adding an Immense Rolling Power.

So Constructed, that when the Handle is Raised to Push the Mover Forward it Raises the Spur from the Rail, thus Doing Away with All Springs which Weaken and Wear Out and Become a Source of Detriment and Trouble.

No. B Black Japanned Malleable Iron Socket and Steel Tool Steel Spurs. Hard Maple Handle, Varnished. Two Cents Length Ogee All Over Spur. Weight, each lbs. $0 60

Easy Sales. Diameter of Handle at Socket 1¼ inches. With Best Lever Set of Spurs. Weight, each lbs. $0 60

	8 00	12 50	12 50	18 50

+DOUBLE MOVEMENT

For Upper and Lower Nuts and the Ratchet Wheel and Lever are Malleable Iron, and the Screw is High Grade Machinery Steel.

The Jack Will Travel as Rapidly as the Single Screw, and has the Fast Gain. The Pressure Is Always Under the Cap of the Jack. Is Not Raised Over the Surface of the Thread of the Upper Nut, thus Greatly Increasing the Ratio of Friction, It Requires no more Power to Operate than the Single Screw.

The Screw Threads on these Jacks Are Square and Have Square Side to the Load. This Makes a Bracket Thread Which, in Connection with the Material of the Screw, is Extremely Strong and Durable.

"DIAMOND EDGE IS A QUALITY PLEDGE"

WESTLEY-RICHARDS REPEATING RIFLE

THE WORLD'S MOST POWERFUL BIG BORE RIFLE

This rifle is adapted for big game, such as the grizzly bear, lion and other dangerous animals and has a tremendous striking power combined with extreme accuracy. The mean velocity of bullet is 2350 f. s. and the energy 5022 f. lbs. Hundreds of them have been used successfully by East African hunters on elephants, rhinoceros, buffalo and smaller game.

It is highly recommended by the well-known hunter, F. C. Selous, and Edward C. Crossman, America's foremost rifle expert says: "The .425 with both capped and solid bullet blasted thru one-half inch of steel with a tensile strength of 65,000 pounds, making a hole nearly an inch across. For a light, tremendously powerful rifle this is at the head of the list. I would put more faith in this gun for a mean bear, lion or tiger than in any rifle I have seen."

SPECIFICATIONS WESTLEY-RICHARDS' "MURRAY" MODEL .425 CAL.

Take-down, round barrel, 5-shot box hinged magazine. Single trigger, bolt action. Pistol grip, checkered grip and fore end, cheek piece, rubber recoil pad. Sighted standard and 4 leaves to 500 yards, or standard and 2 leaves and tangent to 1200 yards; platina tipped bead foresight. Swivels for sling strap.

No. **M26.** 26 in. barrel, weight 9 7/16 lbs. .425 Calibre **$165.00**

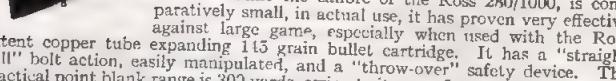
THE ROSS HIGH POWER .280 CAL. RIFLE



While the calibre of the Ross 280/1000, is comparatively small, in actual use, it has proven very effective against large game, especially when used with the Ross patent copper tube expanding 145 grain bullet cartridge. It has a "straight pull" bolt action, easily manipulated, and a "throw-over" safety device. The practical point blank range is 300 yards, owing to its very flat trajectory, which is only 14 inches at 500 yards. The magazine holds 4 cartridges. Regularly fitted with single leaf rear sight and silver bead front sight.

No. **M10.** 26 or 28 in. round barrel, solid frame, weight about 7¾ lbs. **$55.00**

Extra for Folding Peep Sight, not adjustable...$4.00 No. **44.** Ivory Bead Sight..... **$ .75**

WESTLEY-RICHARDS REPEATING RIFLE

THE WORLD'S MOST POWERFUL SMALL BORE RIFLE

This rifle represents the latest development and highest type of Sporting Accelerated Express Magazine Rifle. It is a clip-loaded with .318 calibre rimless cartridges. For a magazine rifle the rimless cartridge is undoubtedly far less likely than a rimmed cartridge to jam within the magazine. It also lends itself to a perfect clip loading system.

The .318 Accelerated Express Rifle offers an ideal combination of the enormous striking energy associated with the .400 High Velocity Cartridge, **and of even flatter trajectory,** than the Mannlicher type of small bore rifle, and consequently it has a smaller deviation in the rise or fall of the bullet, under an error in aiming, or judging the distance, with the result that in these unfavorable conditions, killing becomes less of a chance and more of a certainty.

SPECIFICATIONS WESTLEY-RICHARDS "ROBINSON" MODEL

Round "Take-down" barrel, 5-shot, hinged cover plate on magazine. Single trigger, bolt action. Walnut stock, full pistol grip, cheek piece, checkered hand and fore-end, trap heel plate with cleaning rod and brushes. Sighted standard and 4 leaves to 500 yards, or standard and 2 leaves and tangent to 1200 yards; platina tipped bead foresight. Swivels for sling strap.

No. R26. 26 in. barrel, weight 7¾ lbs. . . . .318 calibre **$110.00**

NORTHWESTERN CONE BATCH MIXERS.

The Northwestern Cone Batch Mixer combines four principles which are most in demand by contractors, through long usage and practicability. First, the conical type—second, the long cylinder—third, the closed discharge end—and fourth, the low open charging end. These principles insure speed, control of mixed materials, convenience in loading and unloading, easy access for cleaning, adjustability of paddles, and correct mix of the materials.

Drum—The drum is a tapered high carbon steel plate cylinder with conical ends, made of heavy steel castings, having wide bearings and carried on four chilled cast steel cast rollers. The drum is driven by a standard link chain on the large end. The sprocket is cast integral with the drum end. The ends are held together by means of six heavy rods.

Discharge Door—This is a new patented device, controlled by a lever within the reach of operator and free from all danger. This door permits dumping of a part of or a full load, as desired. The entire mix can be unloaded in approximately three revolutions of the drum. The material is carried to the door by means of a chute on the inside of drum, so shaped that it will aid in mixing when door is closed.

Charging End—This end is set low, and has a large opening, from 16 in. to 24 in., depending on the size of the machine. It permits three or four men to throw material directly into the machine, also permits dumping from wheelbarrows without any delay. When wheelbarrows are used a standard hopper is necessary.

Paddles—The paddles are made of steel plate and securely fastened to the ends holding the two ends together. These paddles are separated from the shell, preventing any lodging of material in pockets, and making the machine easy to clean. The paddles carry the material forward and up, dropping the mixture in a sort of spray. The chute throws the mixture back towards the charging end, creating a "whirlpool" mix.

Frame—The frame is made entirely of steel, riveted and braced, maintaining perfect alignment and insuring long life. The frame is mounted on heavy truck wheels and axles, the faces of the wheels are amply wide to carry the full load.

Chain Drive—The Northwestern Cone Mixer is driven by a chain belt, of standard type, easily replaced and very inexpensive.

Lubrication—All bearings and journals are lubricated through hard oil cups and are so arranged as to force the hard oil to the spot needed.

Power—The No. 105TE Housed Mixer, shown above, is equipped with a four cycle, hopper cooled, jump spark ignition 2½ horse power engine giving ample power to handle the full load. The engine is thoroughly reliable.

Capacity—The mixer shown is a 5 ft. size, that is, it will mix thoroughly five feet of mixed material at each batch or six feet of loose material. This machine will mix as much material as the so-called six and seven foot machines of other makes. The shape of drum gives added capacity and prevents slopping.

Portability—This machine is easily handled by two or three men and can be moved about the job without the use of a team of horses. The Northwestern Cone is furnished in the standard type with housing for engine, standard hopper for wheelbarrow and hand pole. A water tank is not needed with this machine, as water is thrown into the machine through the large open end.

"VICTOR" BICYCLES, $25.00

Every part of the Victor is constructed with a view of giving the utmost satisfaction to the rider, and the improved model is guaranteed to be fully up to the high standard established by manufacturers years ago, when high-grade bicycles were sold at from $50.00 to $100.00. New methods of manufacture and our economical system of marketing goods enables us to offer this fine bicycle at a net price of only $25.00.

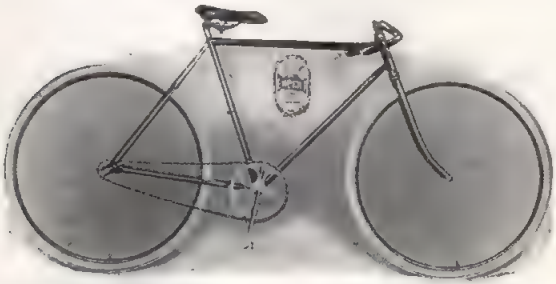
The material used is the finest that money can buy, the parts are accurately made and fitted, and the finish is excellent.

The "Victor" is built on honor, and carries our unqualified recommendation.

Dark Brown with Black Head or Shaker Gray and Orange Head
(Front and Rear Mud Guards $1.00 extra)

Supplied in Dark Brown with Black Head only
Delivery Prepaid in U. S. if Cash is Sent with Order at Above Prices

"EXPERT BICYCLES $20.00



Our improved "Expert" is a strong, reliable bicycle. The tubing is two gauges heavier than is used by most manufacturers, reinforced, and our improved system of pinning and brazing makes a perfect joint at the connections.

Special attention is called to the easily removable one piece hanger with extra large scientifically hardened cups, cones and bearings.

The frames are hand rubbed before being enameled and the nickel-plating is put on over copper, making an excellent finish.

It is a good, all round bicycle built for service and if ordered with good equipment, will give the same satisfaction as wheels costing twice its price.

MEN'S DIAMOND FRAME

Frame—Full flush joint; 1 inch tubing; height of men's frames, 20, 22 and 24. 26 inch made to order at $1.00 extra.

Fork Crown—Drop forged, three plate pattern, ribbed reinforced fork.

Wheels—28 inch; Standard No. 2 swaged spokes heavily plated; first quality enameled single piece wood rims, concave hubs.

Sprockets—Detachable front and rear.

Bearings—Large ball bearing throughout.

Chain—3/16 inch roller pattern.

Cranks—Drop forged; one piece crank and axle. Can be taken out without removing cups.

Gear—Men's 81; 26 front, 9 rear. Option, 26x10—73 or 26x8—91.

Finish—Blue with aluminum colored head or black with red head; ribbing on fork enameled to correspond.

WOMEN'S DROP FRAME

Frame—Full flush joint; drop pattern; 1 inch tubing; height of frames, 21 and 23 inches.

Fork Crown—Drop forged, extra strong, three plate pattern.

Wheels—28 inch; Standard No. 2 swaged spokes, heavily plated; first quality enameled single piece wood rims, concave hubs.

Sprockets—Detachable front and rear.

Bearings—Large ball bearing throughout.

Chain—3/16 inch roller pattern.

Cranks—Dropped forged; one piece crank and axle. Length of cranks, 6½ inches.

Mud Guards—Both mud and chain guards furnished, attractively laced.

Gear—70; 20 front, 8 rear.

Finish—Women's black finish only. All parts except frame and forks heavily nickel plated on copper.

EQUIPMENT

Following is the regular equipment on our Expert when ordered complete. When special equipment is required it will be supplied at an extra cost. Tool bag and tools cost 60c extra.

Tires—"Subway," single tube: unguaranteed. "Expert" tires $1.00 extra. Continental Single Clinch detachable tires $3 00 extra. U S. (G.&J.) Double Clinch detachable tires $4.50 extra.

Saddle—Competition, good pattern, padded, good shape.

Handle-Bars—Regular adjustable or Extension bars, as specified.

Pedals—Rat trap or combination. **Brakes**—Duck Roller Hand Brake $1.00 extra.

Coaster-Brake—$5.00 extra. To facilitate prompt shipments, we carry in stock, Expert Bicycles equipped with the Atherton Coaster-Brake, which always gives satisfaction. Other makes furnished if specified after short delay.

Delivery Prepaid in U. S. if Cash is Sent with Order at Above Prices

CANOES, ROW BOATS, OARS, ETC.

INDIAN GIRL CANOES.

Both Grades A and B have the same constructive features in common, stems of elm, steam bent, ribs and planking of white cedar, seats hand caned, polished brass stem bands, exposed fastenings, of copper or brass, ribs are 2x⅞ in. at centers, tapering to 1⅝ in. at the gunwales and spaced 2 in. apart. The planking is ⅛ in. thick, nailed with square seams and clinch-fastened with tacks. Nos. 1, 2, 3, 4, 5 and 6 are covered with No. 10 special weave duck canvas and Nos. 7 and 8 are covered with No. 8 duck canvas, painted in three shades of green, moss, each painters, and light brilliant, also tuscan red, an extra coat of $1.00 and up is made for other colors.

No. 1 Grade A Length 15 ft., beam 32 in., depth amidships 12 in., depth fore and aft 21 in., stem, ribs and planking are cut all from inside finished decks, thwart, gunwales, inwales and seat frames of selected cherry, grating of ash, one shaped thwart at center of canoe, the inwales are rabbeted for the planking and pocketed to take the ends of the ribs, the grating, six light strips fastened to skin-fitted thwartship timbers, is held in place by a brass floor button at each end, w't each 50 to 62 lbs., each★ ..... EJGE $84.60

No. 2—Grade B—Length 15 ft., beam 32 in., depth amidship 12 in., depth fore and aft 21 in., stems, ribs and planking sound, but not as select as used in Grade A, deck, thwarts, covering strips, inwales and seat frames of selected ash or oak, this grade is by no means as strong or as handsome as Grade A, but has proved to be entirely satisfactory, no grating is furnished with this grade except as an extra, w't each 56 to 60 lbs.★ each DAJE $68.40

No. 3—Grade A—Length 16 ft., beam 32 in., depth amidships 12 in., depth fore and aft 21 in., otherwise same as No. 1 Grade A, w't each 60 to 66 lbs., each★ ..... EBIJ $88.20

No. 4 B Grade Length 16 ft., beam 32 in., depth amidships 12 in., depth fore and aft 21 in., otherwise same as No. 2 Grade B, w't each 58 to 64 lbs., each★ ..... DCBJ $72.00

No. 5—Grade A Length 17 ft., beam 33 in., depth amidships 12 in., depth fore and aft 21 in., otherwise same as No. 1 Grade A, w't each 65 to 70 lbs., each★ ..... EDJ $94.00

No. 6 Grade B Length 17 ft., beam 33 in., depth amidships 12 in., depth fore and aft 21 in., otherwise same as No. 2 Grade B, w't each 60 to 66 lbs., each★ ..... DDCJ $78.00

No. 7—Grade A Length 18 ft., beam 33 in., depth amidships 12 in., depth fore and aft 21 in., otherwise same as No. 1 Grade A, w't each 75 to 85 lbs., each★ ..... EFAE $98.60

No. 8—Grade B Length 18 ft., beam 33 in., depth fore and aft 21 in., otherwise same as No. 2 Grade B, w't each 70 to 80 lbs.★..... each DFDE $77.40

Write for special Canoe Catalogue for list of extras and fittings.

MULLIN'S STEEL BOATS.

No. 316—"Sultan," length 16 ft., beam 50 in., height bow 25 in., stern 23½ in., amidships 15 in., w't about 225 lbs., rated 260 lbs., with one pair 7½ ft. straight feathered ash oars, each★ ..... DDCJ $73.80

Is modeled on perfect lines, and will make an admirable boat for family or fishing use where a good capacity is required, the best boat for children, as it is roomy and very steady. Easy to row. It will carry three grown persons on account of its durability, comfort and safety.

Finished in aluminum outside, light blue inside, natural wood trimmings, large air chambers under decks like a life boat.

No. 27—"Rustle," length 14 ft., beam 50 in., 12 in. high to top of coaming at ends, 10 in. high amidships, cock pit 9 ft. long, 30 in. wide regular fittings and air chambers on sides, w't each 120 lbs., packed for shipment 140 lbs., each★ ..... CBDJ $54.00

Is recognized wherever it is used as the standard of strength and durability, and there are very few boats in existence that can equal them as the lightest, most convenient and safest duck boats built. They are painted a dead-grass color, and are assured of a neat and tasty craft. 60 chambers at both ends like a life boat. The outfit complete consists of a bottom board, movable seat, oars and oarlocks and one long or short paddle. No. 27 carried in stock in Chicago.

Fine Hand Carved Imported Cuckoo Clocks

Imported from the Black Forest, (Schwarzwald) Germany

TRADE MARK

[illegible] Black Forest Cuckoo Clocks are stamped with above trade mark.

The carving of these clocks is done by hand by the natives of the Black Forest in solid walnut [illegible] fine. The figures are [illegible] and strong.

The fronts of these clocks are made of the choicest of wood of opposite grain and are set together to prevent warping and cracking.

The movements are made of the best tempered steel wire [illegible] with solid brass pallet pivoted wheels, new escape wheel and [illegible] pinions. The same are guaranteed to be correct time-keepers.

Every clock that leaves our establishment has been [illegible] and thoroughly tested before being sent out, and is warranted. If properly used to be a good timekeeper. Should it ever crack or split it will be exchanged or repaired without charge.

Each clock is adjusted, regulated and packed in a strong wooden box.

Breakage guaranteed.

HAY CARRIERS

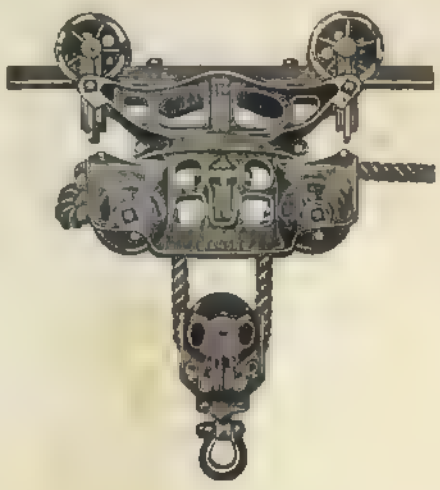
"DIAMOND"

No. 5

Wide Mouth Swivel and Reversible Swivel

This Carrier has a very wide mouth that receives the fork pulley from any direction and in entering the Carrier this pulley operates the dogs in such a manner that it is held firmly in swinging position until again released by returning to the stop. It will swing freely with the load without raising the Carrier from the track and the lock is positive and cannot fail to work under all conditions. The trucks on the Carrier are built extra strong and cannot spread when carrying a heavy load; the track wheels are bored and run on bushings properly fitted to the independent trucks, and as they have extra wide faces without flanges, will not cut or injure the track. The rope wheels have chilled hubs and run on bushings firmly recessed into the Carrier frame, taking all strain and wear from the bolt. This Carrier is reversed by the swivel and will work equally well out of either side of the stop.

No. 5 Gold bronze finish, weight complete 37 pounds, each $7.00



No. 4

Wide Mouth Swivel and Reversible Steel Track Carrier

The trucks are made of one solid piece of best malleable iron. The wide mouth receives the fork pulley, which swings with the load when locked, as it approaches from either direction. The lock is positive and is forced into action by the pulley block coming in contact with the gripping dogs, which will hold the pulley perfectly until again released by the stop. The carrier will work out of either side of the stop by simply swiveling the rope. The track wheels are bored smooth and fitted with turned steel axles. The rope wheels have chilled hubs and run on bushings, fitted into the sides of the frame, taking all wear and strain off the bolt. All parts of frame made from the very best malleable iron

No. 4 Gold bronze finish, weight complete 29 pounds, each $7.00

"DIAMOND EDGE IS A QUALITY PLEDGE"

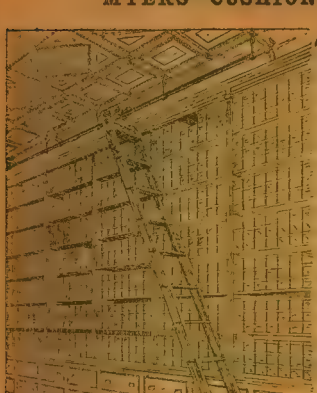
MYERS' CUSHION TIRE STORE LADDERS.



For Shipment from Factory.

Ladder and Trolley, complete, average weight 80 lbs. ..... each AABJ $20 00

Track, complete with hangers, weight per ft. 2 lbs. ..... per foot AG .80

Give height of ceiling, and we will send the ladder of proper length.

DIRECTIONS FOR FITTING.

To find the required length of store ladder for any room, subtract from the height of the room 11 in. (this being the amount of space required by hangers, track and trolley), multiply the remainder by one and one-tenth, the result will be the length of the ladder from hole at top to long point of ladder at bottom.

The track is the well known double angle steel rail, which is very neat and strong, and is suspended from ceiling by means of lag screws, either grooved or ridge or by flanged plates and wood screws. By this means the track is placed close to the ceiling and can be leveled on an uneven ceiling without the least trouble, and without any blocking or bridging, as is the case in many other tracks.

The ladder is constructed of the best clear Georgia pine, nicely finished, filled and varnished, has open panel sides 5 in. wide, with 5 in. steps. Each step is supported at each end with a special malleable dowel tee, which makes the strongest construction possible. The width of the ladder is 13 in.

The trolley is self adjusting and made of malleable iron fitted with turned steel bearings and 3 in. anti-rattler wheels turned and bored on lathe and fitted with special rubber tires.

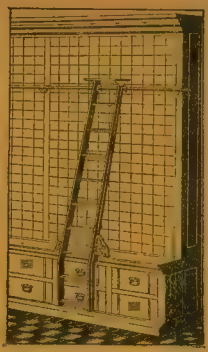
The wheels of trolley are 5 in. in diameter, composed of metal and with rubber cushion tires clamped in such a position as to be impossible to get off of track. Those wheels are placed on a steel axle which revolves with one of the wheels, the other running loose. In this manner the ladder will adjust itself to the floor. With this style trolley, which is noiseless, a great objection in other ladders is overcome.

When the ladder is not the proper length for ceiling, cut off at the bottom and replace the lower traveler shaft by boring new holes at the proper point so as to have the steps of the ladder level.

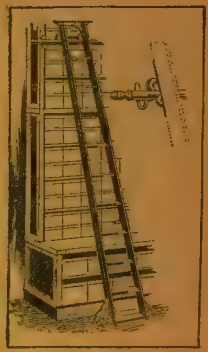
BICYCLE AND AUTO STEP LADDERS.

NEW NOISELESS TRACK.

No. 100.
Bent Floor Track Bicycle Ladder.
Can use track Nos. 22, 24 or 26.



No. 110.
Bent Base Shelf Bicycle Ladder.
Can use track Nos. 22, 24 or 26.



No. 120.
Model Six Auto Ladder.
Use track No. 28.

Straight or Bent, Selected Hardwood, Finished in Natural Colors, Extra Wide Shelf at Top, Japanned Mountings, Track at Bottom, Either on Base Shelf or on Floor, Steel or Noiseless Rail.

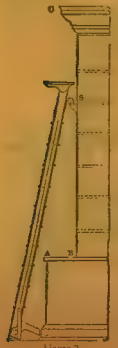


Figure 3.

	STRAIGHT	BENT
No. 100—Bicycle, oak, japanned mountings, for floor track★ ..... each	AABE $15.00	ABDJ $16.00
No. 110—Bicycle, oak, japanned mountings, for base track★ ..... "	AABE 15.00	ABDJ 16.00
No. 120—Auto, oak, japanned mountings (no floor track)★ ..... "	AABE 15.00	ABDJ 16.00
Nickel plated mountings★ ..... extra each	AGE 2.00	

Approximate weight 40 lbs.

Any combination of track will fit any of the above ladders except 120 Auto. No. 22 track always sent for floor track ladders and No. 23 for base track ladders unless otherwise specified.

Ladders can be furnished in Georgia pine at $1.00 less than oak prices.

BICYCLE LADDERS have but two wheels, the track is at the bottom, either on the base shelf or on the floor, so that the entire weight of the ladder and operator is supported from below on a solid foundation and not suspended, holding operator and ladder in perfect balance and assuming all liability of the ladder tipping on the shelving.

A light turned pole guides the upper end of the ladder in moving it. Stout hooks fit over this pole to prevent the ladder from tipping backwards, but not a pound of weight rests on the pole.

Operator stands directly over the wheels, there is no side friction at all and ladder travels as easily as any other bicycle.

The noiseless rail is yielding and resilient, absorbing all vibration due to operation of ladder.

THE AUTO LADDER requires no track but runs on flat wheels.

It can be set at any angle or pushed close to the shelving when not in use. It is particularly adapted to short runs, cramped spaces or sloping, uneven floors. The adjusting feature allows guide rail to be placed opposite a shelf regardless of being parallel with the floor.

Track.

No. 22—Steel bronze rail, japanned brackets, special pole★	per foot	BC	$0.35
No. 24—Noiseless rail, japanned brackets, special pole★	"	CJ	.45
No. 26—Noiseless or nickeled rail, nickel brackets★	"	CC	.50
No. 28—For Auto ladders, japanned brackets, special pole★	"	AG	.25

Approximate weight ¾ lb. per foot.

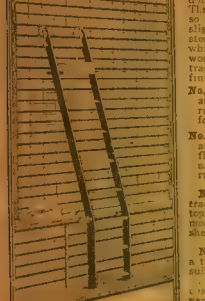
Any combination of track will fit any of the above ladders, except No. 120 Auto.

No. 22 Track is always sent for Floor Track ladders, and No. 24 for Base Track Ladders unless otherwise specified.

HOW TO ORDER BICYCLE LADDERS. Refer to Figure 3 on this page and give the following measurements: from C, Floor to A; A to B, and B to S. State whether ladders are to be straight or bent. State length of track wanted and the number of uprights of all kinds in the shelving, and any whether solid uprights, partition boards, turned spindles or iron brackets are used to support the shelving.

★ *FOR FACTORY SHIPMENT ONLY.*

MILBRADT ROLLING STORE LADDERS.



Showing No. 1 bent ladder, which runs on a track fastened to shelving near the top and runs close to wide base shelf.

The Milbradt rolling step ladders are all made to order, and to fit each particular place, of good oak lumber, in the most artistic and neatest style, handsomely finished, are durable and perfectly safe, as they cannot jump the track. They take up the least possible space, run noiselessly and so easily, either empty or with operator upon them, that a slight push will propel a ladder the length of an ordinary store. These ladders have an extra wide shelf at the top, which affords great convenience in handling stock. All iron work on ladders, as well as the brackets to hold up steel track, is malleable, artistic and strong and aluminum finished.

No. 1—Has suitable fixtures at the top to run on steel track and rubber covered rollers attached near the lower end that run against the edge of base shelf. This ladder is the best for all around purposes where shelving is reasonably strong.

No. 2—Intended for shelving that is not very strongly built, as most of the weight of ladder and operator rests on the floor. This ladder runs on a hardwood track at the top and has cushion tired wheels attached at the bottom that run on the floor, no track being required.

No. 10—Is a bent ladder that runs on a flat hard wood track that is screwed on top of original low shelving. When top of shelving is reasonably strong this is very often the most convenient way to apply a ladder to this style of shelving.

No. 15—Is a trolley or ceiling ladder that suspends from a track fastened to ceiling. Ladder has attached at the top, suitable iron in which paper filled wheels run, noiselessly on the steel track. It has attached at the bottom, cushion tired wheels that run on the floor. This ladder is very strongly built and specially adapted for hardware stores or any place of business where heavy goods are handled.

No. 1—Ladder complete with fixtures★....each **ABFE** $15.00
No. 2—Ladder complete, with fixtures★....each **ABFE** 15.00
No. 10—Ladder complete, with fixtures★....each **ABFE** 15.00
No. 15—Ladder complete, with fixtures★....each **AABJ** 14.00

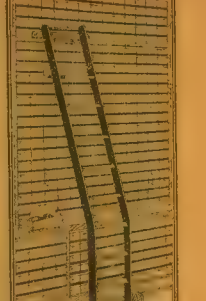
Approx. W't Ladder Crated 50 lbs.

Steel Track for No. 1, regular strength, including brackets and screws★.....per foot **BC** $0.35
Steel Track for No. 1 extra strong, including brackets and screws★.....per foot **BH** $0.45
Steel Track For No. 10, including brackets and screws, per foot★.....**BB** $0.35

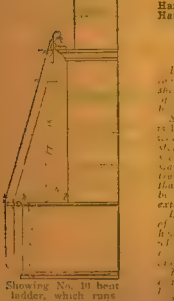
Approx. W't Steel Track 1 lb. Per Foot.

Hardwood Track—For No. 2, complete★....per foot **AG** $0.25
Hardwood Track For No. 2, complete★....per foot **AB** $0.20

Approx. W't Wood Track ½ lb. Per Foot.



Showing No. 2 bent ladder, which runs on floor.



Showing No. 10 bent ladder, which runs on track screwed on top of original shelving.

HOW TO ORDER.

Ladders as Nos. 1 and 2 give the exact height from floor to top of base shelf. The exact width of base shelf to be given, and the exact height to top of base shelf to top of wall to which track is to be fastened and the track should be screwed to wall at least 6 inches from the top. Should the ladder as No. 1, have a rail above the steps, as shown in cut, it should be stated how many steps the rail is to run over. Also the length of each flight of steps. Where ladder runs on hardwood track, as No. 2, it is necessary to use extra strong steel track to hold up the steel track, as the steel track the brackets cannot be more than 18 inches apart. When the spaces between brackets are to be different or more than 18 inches apart, it is necessary to use extra strong steel track.

Ladder No. 10, give the exact height from floor to top of shelf, width of top of base and also the exact height from the top of shelving or cornice on top of which track is to be fastened. Also state how much track is to be used on each part of shelving.

Ladder No. 15 it is also necessary to give the exact height from floor to ceiling and the exact length of each flight of steps.

Ladders Nos. 1 and 10 are supplied with steel track only unless hardwood track is required.

FOR FURTHER INFORMATION WRITE FOR SPECIAL LADDER CIRCULAR.

Showing No. 15 trolley or ceiling ladder, which suspends from a track fastened to ceiling.

Each	$120 00	145.00	180.00

External front drive gears, double triple pawl ratchets between rollers. Adjustable split bronze bearings. Best laid knife steel bottom knife.

These mowers have an attachment for raising the knives when crossing gravel walks and drives.

One in a Box

COLDWELL'S MOTOR-DRIVEN COMBINATION ROLLER AND MOWER

Direct Chain Drive Transmission, Multiple Disc Type Friction Clutch for Propelling Coldwell's Self-Releasing Friction Clutch for Driving Cutters, Speeds Up to 4 Miles an Hour, Will Negotiate 25% Grades.

Each

Model F 18 in. Roller, 40 in. Swath, Weight Each 1000 Lbs., Complete with Two Cutting Units $475.00

This Mower can be operated and cared for by ordinary labor and handled as easily as a hand lawn mower

Has bronze bearings, all bearings have direct lubrication from either oil or grease cups. The handles are not only used for guiding the machine, but for raising and lowering cutter unit over obstacles.

Coldwell's non-skid drive rollers, equipped with differential gears.

Cut Showing Propelling Drive Side.

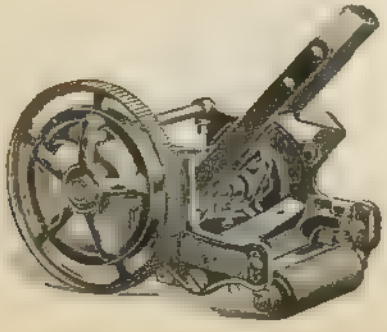
This mower besides being an efficient roller is a much handier machine for working around shrubbery, trees, etc. **It can be turned in a space of its own size, it will run backward as well as forward**

The detachable cutter unit consists of a small frame carrying simply the revolving cutter, the stationary knives and their adjustments and is made to set in main frame of the machine which carries the propelling parts

The knives of these mowers are the parts most liable to be damaged and when this happens with a detachable cutter unit machine it does not necessitate the laying up of the entire machine while repairs and adjustments are being made as another cutter unit already adjusted for use can be substituted in less than two minutes

One in a Box

LAWN TRIMMERS



TOWNSEND'S GLEANER, BALL BEARING

9 in. Drive Wheels, 5½ in. Reel, 4 Revolving Blades, Frame Finished in Gold, Heliotrope Wheel.

Width of Cut, Inches.....	8	10	12
Weight Each, Lbs.....	31	33	35
Each	$.....		

Tempered crucible steel blades, strong, light and powerful.. Only ⅛ inch of metal between the ends of blades and any obstruction to be cut around.

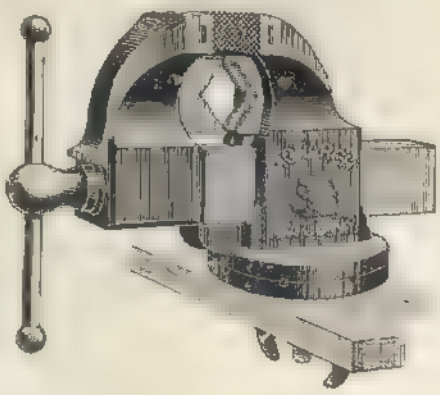
VISES

VULCAN CHAIN PIPE VISE

COMBINATION PIPE VISE



These Vises are made entirely from wrought steel and are unbreakable in service. Their compact design enables the use of smaller space in storage or operation, and their greatly less weight is an unusual feature in tools with similar capacity. The drop-forged jaws are of steel, tempered for file sharpening; the hand made chains are of unsurpassed quality.

No.	Capacity Pipe, Inches, Size	Approximate Weight, Pounds, Each	Approximate Size Folded	Complete Vise

Each

Tournament—Weights 13 to 15 Ounces **$5 00**

A racket with large playing surface, reinforced depressed walnut shoulder. Large corrugated handle, strung with best quality gut and extra center strings.

Each

Summit—Weights 13 to 15 Ounces. ..... $ ...

Each

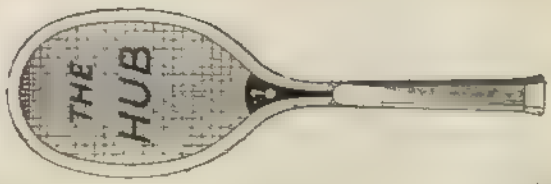
Champion—Weights 12½ to 15 Oz. **$4 50**

Ward & Wright shape, strung with fine quality gut, extra center strings, frame bound at shoulders. A good medium priced racket.

Each

Country Club—Weights 12½ to 15 Oz. **$3.00**

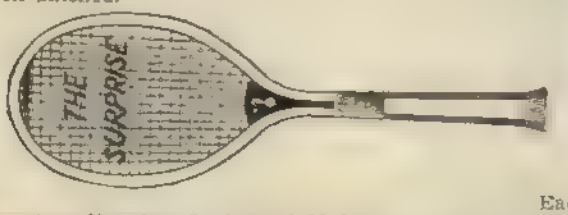
Oval shape, good quality gut, with extra center strings. Well finished.



Each

The Hub—Weights 12 to 14½ Ounces **$2 00**

A popular and new shape. Mahogany throat piece, good quality white gut.



Each

Surprise—Weights, Light and Medium **$1 50**

The latest and most popular shape. Frame is nicely made and the stringing of good quality gut.

Each

Belmont—Juvenile Racket **$1 00**

White maple throat, cedar handle. Good quality Oriental gut.

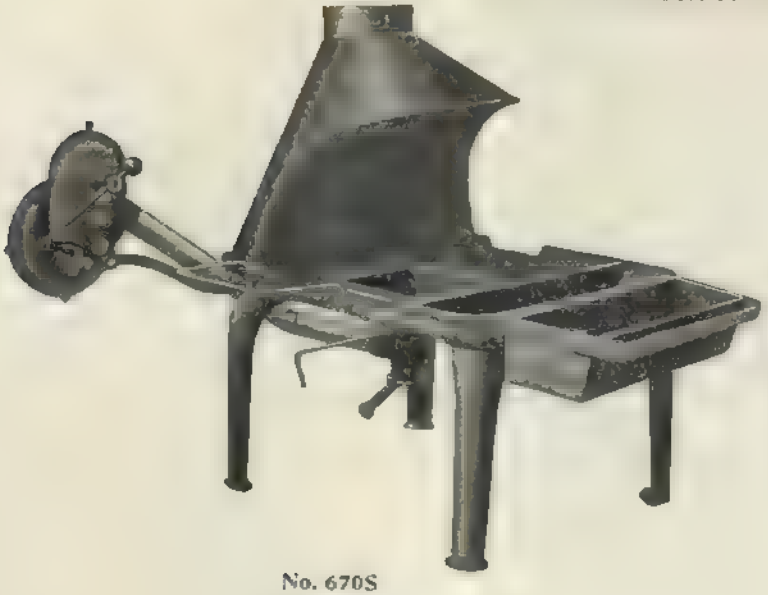
BUFFALO FORGES

CAST IRON WAGON MAKERS' FORGE



No. 670S

*No. 670S With Steel Hood and Water Tank....$76.00

Deduct $5.00 from list prices if Water Tank is not wanted

Hearth 38x42 inches. Weight 575 pounds.

Designed to meet the requirements for an extra large substantial forge in wagon and blacksmith shops generally where heavy work is handled to a large extent. Has shallow hearth. The coal box is cast into the hearth, and the legs are also of heavy cast iron. This forge is now fitted with the 1911 Model, 14 inch Buffalo 200 Silent Blower. In connection with the extra large "R. R." tuyere iron (size 12x14 inches) it enables the operator to get quick welds on the heaviest work. The legs are short to provide a low hearth for greater convenience in handling heavy work

No. 604

BUFFALO STEEL FORGES

All With Half Hood as Shown

No.	Size of Bar Width Inches	Size of Bar Length Inches	Weight Pounds	Price With Water Tank	Price Without Water Tank
601	24	24	195	$55.00	$50.00
604	30	36	245	70.00	65.00

These forges are built in several sizes, making them suitable for any range of work, light or heavy, from a jeweler's to a blacksmith's. They are used extensively by tool makers, locksmiths, makers, bridge builders, contractors, horseshoers and others who desire a forge combining lightness with the greatest strength. The rolled steel plates are of great toughness and elasticity. The hood is strongly reinforced with angle steel ribs around the edges, and the angle steel legs are cross-braced with bar steel. This makes a rigid, indestructible forge, easy to carry around without danger of breakage. Fitted with the powerful, easy running 14 inch Buffalo "200 Silent Blower" and Heavy Duty "Vulcan" tuyere. Also note hinged and balanced automatic Ash Gate

No. S50

*Not carried in stock can be shipped promptly from factory.

HEAVY BLACKSMITH FORGE

A large, heavy forge, strong and durable, suitable for general blacksmith work. The blower is operated by the easy lever motion, and will give a very powerful blast. The legs are rigidly braced with angle irons. Can be furnished with or without water tank.

Size of hearth 32x45 inches
Weight 300 pounds.

No. S50 With Water Tank . $55.00
Without Water Tank.. . 50.00

BUFFALO FORGES

RIVET FORGE

No. 625

The Standard for Railroads, Ship Builders, Boiler Makers, Machine Shops, Bridge Builders and Structural Iron Workers

No. 625 18 inch Fire Pan, weight 170 pounds . . . $35.00

The fire pan is made of heavy rolled steel plate, strongly riveted. The wind shield and blower are detachable and can be packed in the fire pan for transportation. A heavy round tuyere plate distributes the blast so as to insure the best results in heating. The steel tube legs fit closely into deep sockets cast in one with the tuyere iron and fastened by set screws. A clamp below adds further strength to the support. The Buffalo 200 Silent Blower on this forge has helical high speed gears and 12 inch fan of the most efficient design, with blast delivery along the line of least resistance. Due to the high mechanical efficiency of this type of gears—nearly double that of other types—they last twice as long and run much easier.

AGRICULTURAL FORGES

No. 301L

No. 301L Each $40.00

Equipped with a substantial 10 inch blower, operated by lever. The bearings are ring oiling, insuring easy, smooth operation without any attention but an occasional oiling. The forge is strongly built and fitted with half hood as shown in illustration. Built for use in mills, factories and on farms, and is unexcelled for sharpening tools and doing general repair work

Size of hearth 23 x 35 inches.
Weight 130 pounds.

BUFFALO BLOWERS

BUFFALO No. 200 SILENT BLOWER

No. 200 Model 1911, Silent Blower with 14 inch Blower, on legs or pedestal.....$44 00

Price includes "Vulcan" heavy duty tuyere iron shown below. Deduct $2.00 from list price if tuyere is not wanted.

Weight of blower with legs 100 pounds, with pedestal 130 pounds.

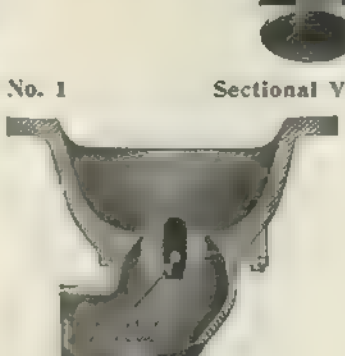
Some Details

Dust and leak proof gear case. All end thrust balanced on adjustable ball bearings. High speed pinion runs in bath of oil, lubricating all other working parts by splashing. One piece gear case insures permanent alignment of gears. Extra long journal bearings. Perfection of parts insures perfection of blower.

BUFFALO "VULCAN" TUYERE

Sectional View No. 1

Sectional View No. 2



Sectional View No. 3

Sectional View No. 1 Blast is forced into fire pot through three tapering, converging channels. The currents collide at high speed, and the blast is scattered all through the coal bed as from an explosion. The result is a large, deep, intense fire, giving the cleanest, strongest welds because of the high blast pressure

Sectional View No. 2 A quarter turn of rod brings the eccentric rod into above position, giving a small fire at either side of the fire pot, suitable for lighter work. Also note the exceptionally wide clearance for ashes and clinkers when valve is in this position.

Sectional View No. 3 Another slight turn of valve practically closes the side blast channels, so that blast is delivered through center of valve only, for a small fire in the middle of fire pot. Note the rising and falling action of the "patented" eccentric valve; a few turns of this valve therefore thoroughly breaks clinkers and clears the fire pot both of ashes and clinker, making cleaning out from the top unnecessary. The balanced and hinged ash gate opens and closes almost of itself, making the dumping of ashes very convenient

Buffalo Vulcan Tuyere Size 12[illegible] x 14 x 4[illegible] inches, weight 56 pounds, each $6 00

THE NEW CLIMAX BLOWER

Made for those who desire a particularly low priced geared hand blower. We can recommend it as the best blower made at the price. It has helical high speed gears and a compact blower-head. The fan pinion runs in a bath of oil and lubricates the other working parts by splashing. The tuyere has a revolving ball valve which affords regulation of the fire and prevents accumulation of clinker

Weight 108 pounds. Tuyere 20 pounds.

Diameter of fan case 12 inches.

List price, with tuyere and pipe, each.....$27.00

Furnished on tripod instead of pedestal at same price.

CEMENT WORKERS' TOOLS

GUTTER TOOLS

Iron, Nickel Plated.

Per Dozen

No. 8—3½ in. Wide, 6 in. Long, 1 in. Deep, Weight Per Dozen 21 Lbs. $14.40

Used in making gutters for drainage purposes. The ¼ in. guides on the sides allow the tool to finish the gutter with a uniform depth

One-sixth Dozen in a Box.

CURB TOOLS

Iron, Nickel Plated.

Per Dozen

No. 46—4 in. Wide, 6 in. Long, Weight Per Dozen 25 Lbs. $18 00

Provided with guides which run on the framework. It finishes the inside edge with ⅜ in. radius and outside with 1½ in. radius which makes a neat looking curb

One-sixth Dozen in a Box.

CORRUGATING TOOLS

Iron, Nickel Plated.

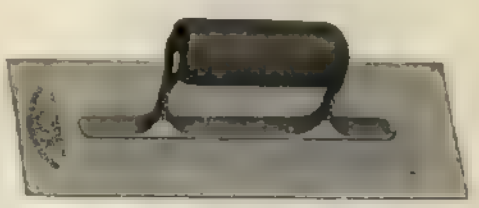
Per Dozen

No. 44—4½ in. Wide, 6 in. Long, Makes Grooves ⅛ in. Deep, ⅜ in. Apart, Weight Per Dozen 20 Lbs. $14.00

A tool for the purpose of making a rough surface to prevent slipping. Used on sidewalks, driveways and stable floors.

One-sixth Dozen in a Box.

CEMENTERS TROWELS



No. 20—Extra Heavy High Grade Crucible Steel Blade, Tempered and Accurately Ground.

Length of Blade, Inches.	11	11½	12
Width of Blade, Inches.	4⅝	4¾	5
Per Dozen	$17 00	18 25	19 75

The mounting is securely fastened, is ⅞ in. wide and extends to within 2 in. of the ends.

One-half Dozen in a Box.

RADIUS TOOLS

Iron Nickel Plated.

Per Dozen

No. 23—⅜ in. Radius, Weight Per Dozen 6 Lbs $6 00

This Tool is used in laying out and finishing curves and circles. Its shape permits the finishing of either the inside or the outside of any circular work

One sixth Dozen in a Box.

RAISED (TUCK) POINTERS

Iron, Nickel Plated.

Per Dozen

No. 12—9½ in. Long, 5 in. Long Blade, Polished Wood Handle Six Sizes, ⅛, ¼, ⅜, ½, ⅝ and ¾ in., Weight Per Dozen 4 Lbs. $6.00

Perfectly shaped and finished, used by all masons to make raised beading or points between cement blocks, stone, brick, etc. So constructed that the bead will not cling to the tool.

One Dozen in a Box.

CONVEX POINTERS

Iron, Nickel Plated.

Per Dozen

No. 61—9½ in. Long, 5 in. Long Blade, Wood Handle, Six Sizes, ⅛, ¼, ⅜, ½ and ⅝ in., Weight Per Dozen 4 Lbs $6.00

Used for pointing off brick or stone walls, etc

One Dozen in a Box

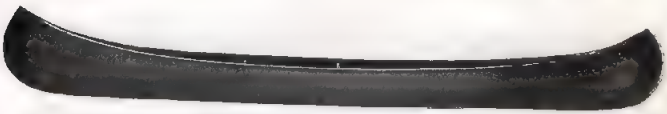
"Diamond Edge is a Quality Pledge"

E. M. WHITE & CO. CANVAS COVERED CANOES



"WHITE" CONSTRUCTION

The **"White" Canoes** are constructed with canvas cover, cedar ribs and planking, spruce gunwales, white ash or oak stems and thwarts, brass bang plates.

The way the planking is put together, the seams of which are beveled and lapped, makes a perfectly smooth and almost water tight canoe before the canvas is put on. The lapped seams prevent swelling and shrinking of the planking, and sand or gravel cannot work through to the canvas. This method of construction making it the stiffest, strongest and most durable manufactured.

A water-proof coating is put on the wood before the canvas is put on. The canvas is drawn on very tight, making a perfectly uniform surface, which is then filled and rubbed down to a smooth surface. The filling and varnish will withstand salt water. The colors are dark red, green and slate, the latter color being used on guides' canoes. The inside of the canoe is finished in natural wood.

GRADES

Grade "A." Selected cedar ribs and planking, spruce gunwales, white ash or oak stem pieces, thwarts and seat frames, two cane seats, brass bang plates, all of the material of the finest quality and finish possible.

Grade "B." The model of the second grade, also the canvas and paint, is the same as the first grade. The difference is in the weight, which is not quite so light, and in the planking, which is not quite so well matched as to color but for all practical purposes will render as much service as the first grade.

Guides' Canoe. This canoe is planned throughout for hunting and fishing, where a good, strong, serviceable canoe is desired. No money is put into ornamenting. These are carried in stock, painted drab or slate color only.

Guide's models are regularly supplied with stern set only, but caned front seat can be had for $1.50 extra.

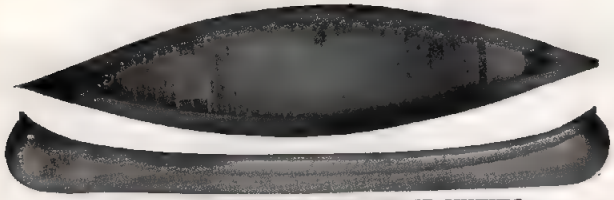
Keels $1 00 extra. For prices of paddles and equipment see page 69 to 72.

WHITE'S SPONSON CANOES



WITH AIR CHAMBERS TO PREVENT SINKING

For those who desire the extreme of safety in a canoe we suggest a sponson model, a craft which is practically impossible to upset and which even though filled with water will support a heavy weight. The sponsons are long, air chambers attached on the outer sides of the canoe just below the gunwale, and extending from bow to stern. They are not bulky or over conspicuous, and as they follow the lines of the canoe, do not detract from its gracefulness, but add 20 to 25 pounds to the weight. The sponsons do not touch the water unless the canoe is canted, so they do not retard the craft's progress. Rowlocks may be added and the canoe used as a rowboat if desired. These canoes have proved dependable under trying circumstances, but care should be taken to keep the sponson in air-tight condition.

"BIG CHIEF" CANOES, $25.00 AND $27.00

A REMARKABLE CANOE AT A LOW PRICE

The "Big Chief" canoe is thoroughly well made and will give good satisfaction. We are enabled to sell them at so favorable a price on account of contracting for their manufacture in the winter time and buying in very large quantities and limiting the assortment to two lengths and one color.

The planking is all good quality cedar, gunwales one piece of clear spruce, seats at bow and stern of ash, laced with cane, two hand finished thwarts; color, dark green only. Finished with two coats of best shellac inside and out.

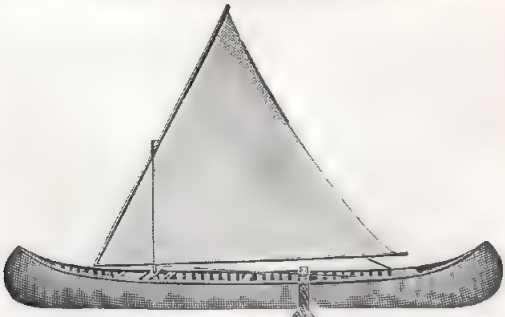
CANOE SAILING OUTFITS



This outfit can be attached with little fitting to practically all makes of canoes, and when not in use can be folded and easily carried in the bottom of canoe. The sail is made of light but strong balloon silk of much better quality than is used in the average sail. The leeboards are fitted with an adjustable cross-arm, attachable to the gunwales by grip bolts. The mast and spars are made of straight grained, well finished spruce and the fittings of brass.

Mast thwart and step.....**$1.00** Leeboard.....**$6.00**

PETERBOROUGH CANADIAN CANOES

We are special agents for this famous make of all wood canoes and carry in stock in New York the 16-foot length in three grades. This is by far the most popular length, but any length may be had after short delay. Special catalogue upon request. Prices quoted therein are f. o. b. Peterborough. The prices at New York, including payment of freight and duty are 20% higher.

CANOE EQUIPMENT

PADDLES

Our paddles are hand finished by Maine guides, who know what a good paddle is. The "A" quality is the best selection of wood and are given a special fine finish. The "B" quality is not so carefully selected and finished, but will give the same service as grade "A." The "C" quality is partly machine made and occasionally a blemish may mar the appearance only.

"Fort Dearborn" Baby Grand Piano

The "Fort Dearborn" Baby Grand Piano is constructed on the most modern and improved lines and has attained a perfection of tonal quality and capacity—a clearness and purity —not found in many of the older makes.

The workmanship is of the highest standard; the architectural design is refined, chaste and imposing; the veneers used are specially selected for their beautiful grains and are finished in their natural colors.

This Grand is finished in Circassian Walnut and Mahogany, in either polished or satin dull finish.

The rim of this Grand case is laminated of the finest quarter-sawed Poplar In other words, the rim is bent of one continuous length of material, laminated, eight-ply, cross-banded and veneered. The back rim is also laminated in the same manner. The braces of the case are of the finest Ash obtainable. Every bit of material in this case is made of the most carefully selected material. The key bottom is an innovation, on account of the assistance that it renders to volume of tone, and is so constructed that it will withstand any atmospheric changes.

The plate of this instrument is made of the best quality bell metal, scientifically proportioned throughout, and beautifully finished. The pin plank consists of 14 layers of quarter-sawed Maple, properly fitted into the plate, bolted and tapped thereto from both sides of the plate, in order to obtain absolute stability. This piano stands in tune like a rock

The sounding board is made of the finest and most carefully selected Spruce, with most carefully selected Spruce ribs, laminated treble and bass bridges.

The action and hammers in this beautiful Grand are all that can be desired. Triple repeating action with immense power, faultless repetition and eminently satisfactory touch The hammers and dampers are of the very finest imported German felt. The very finest quality imported music wire is used.

The tone of this instrument can only be realized by hearing same Experts claim this instrument has one of the finest tonal qualities ever produced. It has great resonance and sustaining power, combined with a superb singing quality of tone, which, under the hands of an artist, arouses the enthusiasm of the listener.

A really exquisite instrument of the highest grade.

Warranted for ten years. Width, 4 feet 8 inches. Length, 5 feet 7½ inches Height, 3 feet 3 inches. Weight, boxed, about 950 pounds.

Sample shipped on 10 days' approval, if desired.

Including cabinet duet bench to match, packed and boxed, on board cars factory Chicago

This Grand is finished in Circassian Walnut and Mahogany, in either polished or satin dull finish.

List Price $1130.00

PIANOS

WE challenge the world to meet our prices on pianos. It is not possible to obtain better value than we offer. We do not depend entirely on the sale of pianos. That's only one of ou many departments Dividing all the expenses of running our business among our various departments, the cost of doing business is scientifically reduced to the lowest possible point. Add to this the fact that we buy for hundreds of piano users on a spot cash basis, therefore at the lowest possible cost, and that we sell these pianos for the same margin of profit ad led to th s cost that we accept on watches, c ocks, jewelry, cut glass, sewing mach nes, etc , and you can easily understand why our prices are **less than half,** in many instances, the amount others ask for pianos of the same grade.

Our pianos are fully warranted agai .at any actual defects in material or construction for ten years. (This does not include tuning.) They are made especially for us by one of the most responsible piano factories in the United States, and we have such absolute confidence in their merits that we place our own trade brand, "Fort Dearborn," on the fall board of each piano, and we stand back of the manufacturer's warranty, and guarantee them to be exactly as represented by us in every particular. Each and every "Fort Dearborn" piano can be depended upon to be **good value.**

We, of course, prefer to sell and recommend our customers to order one of our best grade, finest toned instruments, and we particularly recommend our **Style 26,** our baby grand piano, and our **Style 24** player-piano, all of which are absolutely high grade first-class instruments in every particular

We will be glad to ship a sample of any one of these three high grade instruments on **ten days' approval,** we standing return freight charges (one way) in case of return.

This is a Copy of Our Ten Year Warranty Your Protection.

Piano Registered No. ..... is hereby Guaranteed for the term of TEN YEARS; and should the instrument, with proper use and care, prove defective in material or workmanship (the effect of extreme heat, cold or dampness excepted), we agree to put the same in good repair at our manufactory or replace it with another of the same style.

Style XI Fort Dearborn

Made in Genuine Mahogany and Quartered Oak, Double Veneered.

Tone is of excellent quality, and equal to many higher priced instruments

Scale: 7 1-3 octaves. Heavy bell metal plate bronzed.

With nice Stool and Scarf, packed and boxed, on board cars factory (near Chicago). List price . . **$407.75**

"Fort Dearborn" Player-Pianos (88 Note) 7 1-3 Octaves

Play all Standard Music Rolls—15,000 Pieces to Select From.

"Fort Dearborn" 88-Note Player-Pianos can also be played by hand in the customary manner from the keyboard—by merely sliding the small panel, inserting the music roll, and pulling out the pedals, it is ready for use as a player piano. With it, you can accomplish any expression that is obtainable with the hands.

Any man, woman or child, without previous training, with a little practice, can play the world's best music on our Player-Piano. Not merely mechanical music, but music with expression—music with feeling—music with the player's mood—in other words, real music.

General Description

(Style 24)

Plays 88 notes or entire keyboard of the piano. Uses all standard music rolls whether with pin or socket ends. Has solid brass music roll flanges recessed out to receive edges of music sheet when swollen by dampness. This prevents the tearing or wearing of the edges of the sheet.

All the metal parts of the player are of solid brass.

The entire player mechanism is made of solid mahogany thoroughly dried and then preserved, and made permanently air-tight by the forcing of chemical solutions into the parts of the wood.

The tubing (air ducts) is made of METAL instead of rubber used in other makes. These metal tubings are connected from tracker to primary action in an ingenious manner, fully covered by patents, and it is impossible for them ever to become loose.

The valve system (the heart of the player) is so constructed that it is self-adjusting to all conditions that can arise, and this fruitful cause of repairs in other players is entirely absent from ours.

Has the wonderful "Soloist" attachment, controlling the base and treble sections of the piano either individually, altogether, or in any desired combination, giving the performer control over the accompaniment, no matter in what part of the scale it may come or how many notes it may include.

DIMENSIONS.—Height, 4 ft. 7½ in.; width, 5 ft. 2 in.; depth, 2 ft. 4½ in.; weight, boxed for shipment, 900 lbs.

Style 24, Player-Piano.—Genuine figured mahogany case. An absolutely first-class, high grade instrument in every detail, with a specially fine tone quality. Including player bench to match, packed and boxed on board cars factory Chicago. List Price, **$1063.85**

A Good Value

—and—

Satisfactory Instrument

The Pedals in Style 28 fold up, and slide into the case at the bottom, beside the regular piano pedals, and when thus slid in, reveal only their very small ends. These pedals are a great improvement over most others in the matter of ease of operation, and the immense leverage exerted. Their use will not tire even a small child. They have eliminated the item of fatigue from player-pianos.

The Three Buttons, one being sustaining or "loud" pedal, the other two "soft" treble and bass—together with the tempo lever, take care of "tempo" and "intensity"; these are all very accessible to the player and extremely easy to operate. They enable the user, with but very little practice, to render most satisfying and "accented" music with delicacy of expression and nice musical effect.

Height, 4 ft. 3 in.; width, 5 ft 4½ in.; depth, 2 ft 3½ in.; weight, boxed, about 850 lbs.

This little instrument, though small in stature, is a giant in quality. It is but 4½ ft. high (a size that makes a beautifully proportioned instrument). This diminutive size has been attained without making any sacrifice whatever of either the piano movement, player action, tonal quality or volume.

Style 28, Player-Piano.—Made in mahogany, burl walnut and quartered oak. Including player bench to match, packed and boxed, on board cars factory Chicago. List price **$797.95**

"Fort Dearborn" Concert Grand

Style 26—Concert Grand 7⅓ Octaves. The Finest Piano that money and skill can produce

THE CASE: This instrument is a genuine work of art and will add to the beauty of any home. Its massiveness is impressive and stately, while its richness is typified alike by its beautiful hand-carved truss and pilaster caps; by its heavy round corners on the sides, surmounted with appropriate cornice mouldings, and by its harmonious outline in general. Nothing but the choicest, selected veneers of Burl Walnut or Mahogany of superb coloring are used, and the pilasters, trusses and heavy mouldings are veneered to match, as also are the three-inch arms and the toe-blocks which are made of built-up (laminated) stock. The whole instrument is both time and wear-enduring, inside veneered in White Maple. Equipped with Empire top and "Grand" hinges

BACK and frame construction is extremely strong and massive. Has six heavy, straight grained hardwood posts scientifically tapered. Ribs and sounding board of choicest Spruce thoroughly air-seasoned and kiln-dried, the latter being properly crowned to sustain power and pressure of strings to give tone quality; bridges, acoustic rims, pin-block and key-bottom of laminated (built-up) stock, consisting of numerous layers of Rock Maple glued up with grains running at right angles to each other.

INTERIOR: Full plate of bell metal thoroughly bronzed, beautifully finished; bushed tuning pins; fourteen pound hammers; selected ivory keys; triple repeating brass flange action; copper-wound bass strings of best German quality; music wire best imported stock; absolutely noiseless metal trap-work; three pedals; full over-strung scale, seven and one-third octaves. Has a powerful, rich and sonorous tone of great sweetness. The touch is perfect—very light and responsive.

Warranted for ten years. Height, 4 feet 10 inches. Width, 5 feet 4½ inches. Depth, 2 feet 3½ inches Weight boxed, about 900 pounds.

An absolutely high-grade, first-class piano in every particular, with a remarkably fine tone quality.

Including cabinet duet bench and scarf, packed and boxed, on board cars factory near Chicago.

Furnished in Burl Walnut or Mahogany **List Price $585.25**

Our Improved Peerless Sewing Machines

Peerless Sewing Machines

Are the simplest and the best in the world for the price. The factory in which they are made is equipped with the most modern machinery adapted to the purpose. The mechanics are all skilled in this particular line of work. The material is high grade and selected with great care. Every part is carefully inspected to see that it is perfect and each machine is thoroughly tested before being shipped to our customers. They are high grade machines, built to satisfy the most particular people. They have a full high arm, are the swiftest and lightest running machines and have the fewest number of parts of any on the market. They combine simplicity, durability, reliability, speed, strength and beauty and are unequaled for ease of management and wide range of work. They are adapted to every variety of sewing from the lightest muslin to the heaviest cloth. They are unequaled for hemming, feeling, binding, tucking, ruffling, gathering, hemstitching, seaming, etc. **In fact, they are a first-class machine in every way adapted to do the best kind of work.**

Quality---First Consideration

In offering our Improved Peerless Sewing machine we have not tried to offer the cheapest machine on earth, but rather our constant aim has been to give the greatest value, the highest quality and the best machine it is possible to produce. We know there are machines on the market that are offered for ridiculously low prices, but it is like throwing money away to purchase such machines. There is a certain price below which it is impossible to sell a first-class machine and in selecting our line of machines we have aimed to furnish only such machines as are sure to give satisfaction in service. A sewing machine if properly cared for should last a most a lifetime, and it is always cheaper to pay a little more and get a strictly high grade machine that is warranted and thoroughly reliable machine than to try to save a few dollars on the first cost by purchasing a machine offered at a ridiculously low price, and which must necessarily be made from cheap material and by unskilled hands in order to make the price so low.

Our Low Price

Is made possible by the fact that we contract for such large quantities that the cost to us is reduced to the minimum. We buy them direct from the factory. There is no middleman's profit and we buy in such large quantities that the manufacturers are satisfied with a small profit on each machine. We employ no agent and we sell the machines direct to you at factory cost with only our one small profit added. There is no jobber, wholesaler or agent's commissions to be paid by the purchaser. You get one hundred cents worth of machine for every dollar you pay us. We ship the machine direct to you from the factory near Chicago so there is no extra freight, cartage or handling expense to add to the original factory cost. You pay only our one small profit above the actual factory cost.

Easy to Operate

We claim that our Improved Peerless Machines contain fewer parts, are of simpler construction and less liable to get out of order than any other household sewing machine. They are easy to operate, light running and so simple in construction that anyone with ordinary intelligence can operate one. With each machine we furnish a complete instruction book, free of charge. This book is printed in five different languages and shows the working parts of the machine in detail with full and complete instructions of how to operate and care for the machine. The language is simple and easily understood. Anyone who follows the simple instructions given in this book will have no difficulty in operating our machines and obtaining the very best results on all kinds of material.

Prompt Shipment---Safe Delivery

Our facilities for prompt shipment enables us to give you good service, and each machine is carefully wrapped and crated and delivered on board the cars at our warehouses in Chicago or the factory, just a few miles away, in perfect condition. Each machine is so carefully packed that there is little chance for damage in transit. Examine the machine when it reaches the depot, and if at all damaged, get the freight agent to note such damage on your freight expense bill. Then send the freight bill to us and we will send you the necessary parts free of charge, or a new machine if the first one is damaged beyond reasonable repair. Our machines seldom get damaged in transit.

Remember

To consider quality of material and construction when comparing our machines with others. Only the best material and most skilled workmanship enter into the construction of our machines, and each machine is guaranteed for ten years. Is it clear to you now how we can furnish really high grade machines at the prices we quote?

Our Ten Year Guarantee

We not only claim to have the best Sewing Machine in the world, but substantiate our claim by fully guaranteeing each Sewing Machine, agreeing to duplicate any part that proves defective in ten years free of charge (shuttles, needles and bobbins excepted), thereby proving conclusively our confidence in the Improved Peerless Sewing Machine. Natural wear and tear on any of the parts is not considered as a defect in material or workmanship. As the material entering into our machines is first-class and carefully selected they will outwear many machines sold through agents at from fifty to one hundred per cent more than we charge.

Special Attachments Free

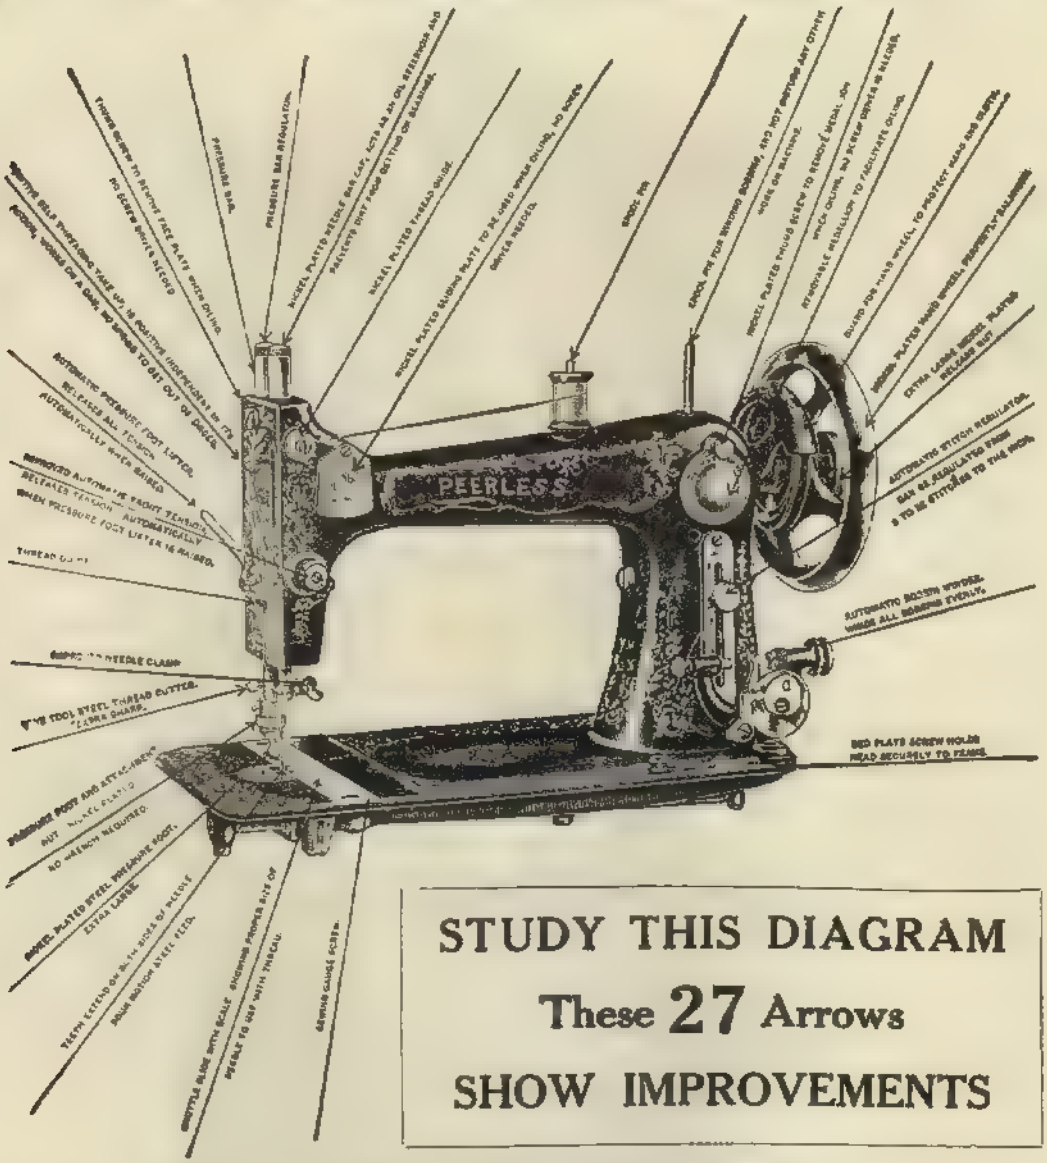
In Beautiful Velvet Lined Enameled Metal Case

On this page we show the special attachments we furnish free with our Improved Peerless Machines. They are warranted steel, highly nickel plated and superior to any other make. The full set consists of the following: Ruffler, tucker, binder, underbraider, shirring plate, 5 hemmers, different widths, special attachment foot and 1 quilter.

Above cut shows all the special attachments in the velvet lined metal case, just as furnished

This is the Standard Peerless "B" Head

THAT HAS WON PRE-EMINENCE



STUDY THIS DIAGRAM

These 27 Arrows

SHOW IMPROVEMENTS

Winning Features of the Peerless "B" Head

HIGH-ARM—Largest obtainable in any family sewing machine. Permits easy handling of bulkiest materials.

CAPPED NEEDLE-BAR AND PRESSER-FOOT-BAR—This protection insures cleanliness. Both bars the most accurate in stroke of any made.

FOUR-MOTION FEED—Extends to both sides of needle. Absolutely positive and regulated for length of stitch by "plain-figure gauge at right."

SIDE DISC TENSION—Delicate, adaptable, simple.

AUTOMATIC TENSION RELEASE Lifting the presser-foot removes all tension from thread, so that thread cannot break or strain needle as work is removed

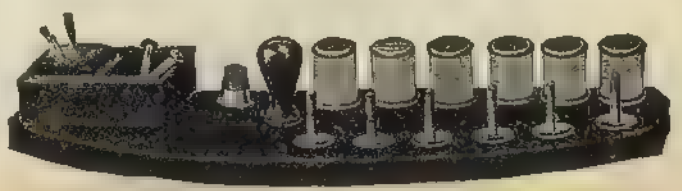
POSITIVE TAKE-UP—Operated by a cam, not by a spring. Self threading; controls perfectly any size or kind of thread.

AUTOMATIC BOBBIN-WINDER Winds bobbin as evenly as a spool of thread, and without attention. Presser-foot and needle-bar stand quiet while bobbin is winding No need to remove work from machine while winding bobbins. Extra spool pin for bobbin winding.

SELF-THREADING SHUTTLE Cylindrical, spring tension, needing little adjustment. No latch to open; no hole to thread through. Steel of highest temper; takes extra large bobbin; will last a lifetime.

With Styles 29 and 29½ Peerless "B" We Furnish Free This Patent Spool Tray

The accompanying cut illustrates our **new spool tray.** Every woman using a sewing machine will readily appreciate this convenience. It is made of hard wood, covered with blue velveteen. The spool pins are nickel plated and will hold twelve spools of thread. It has a box for buttons and bobbins, a thimble holder, needle and pin cushion, and ebony handle to remove it from the machine if necessary. It is universally conceded to be one of the **most practical improvements** ever put on a sewing machine. This tray can only be found with the Peerless "B" Styles 29 and 29½ Machines. It is made to fit the drawers of these styles only.



Peerless Top Tension Construction

Only the Best Materials and Most Skilled Workmanship Enter into These Machines

Almost any machine may present an attractive outward appearance, but the real test is in the service given by constant everyday use. The machine with defective material or interior workmanship soon tries the patience of the operator, while the machine made of reliable and tested material by the skilled hands of mechanics who are experts in this particular line, is a constant source of joy and satisfaction to the operator.

The Head

is the all important part of any sewing machine, and the large illustration herein shown gives a good idea of the simplicity of construction of our **Improved New Peerless Sewing Machine** head. There are very few working parts, thus reducing the chances of machine getting out of order. **The Bearings** are of best crucible steel, highly tempered and polished, accurately adjusted, and provided with take-up devices so that they may be tightened in years to come to take up all lost motion caused by wear. **Ball Bearings** are provided in the more important bearings, as shown in the illustration, making it the easiest running head on the market today. The main shaft is polished, case hardened steel, with a double eccentric cam which operates both feed and shuttle mechanism

Important Features

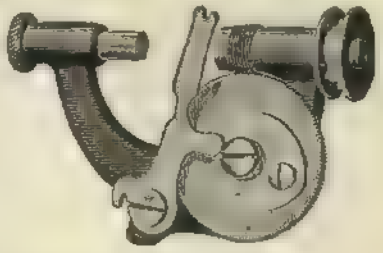
In Improved Peerless Machines shown on the following pages are the positive double tension, insuring a firm, well made stitch of uniform size, the stitch regulator, which enables the operator to regulate the number of stitches to the inch, with the utmost exactness, for coarse or fine goods; the automatic bobbin winder, and the self threading cylinder shuttle.

The Finish

The head is made of the best material, heavily enameled with seven coats of the best French enamel baked on It is hand polished, and presents a smooth, handsome surface The polished steel face plate is heavily nickel plated, as is also the tension plate, automatic bobbin winder, medallion and hand wheel. The needle bar is of bright polished steel. Taken altogether, it is one of the handsomest and best sewing machine heads in use.

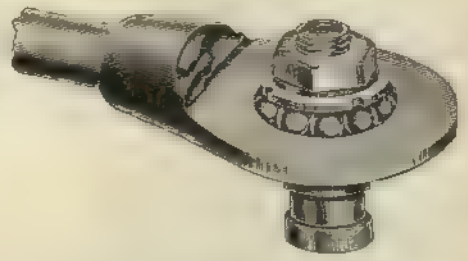
Self-Threading Shuttle

is another advantage and convenience of our Improved Peerless Machines. The shuttle is a perfect cylinder steel shuttle, open at one end to admit the bobbin, easy to put in and easily removed. There are no catches or latches to open or close, no spring to bother with, no holes for threading to try your patience. It threads itself and has an even, perfect tension.



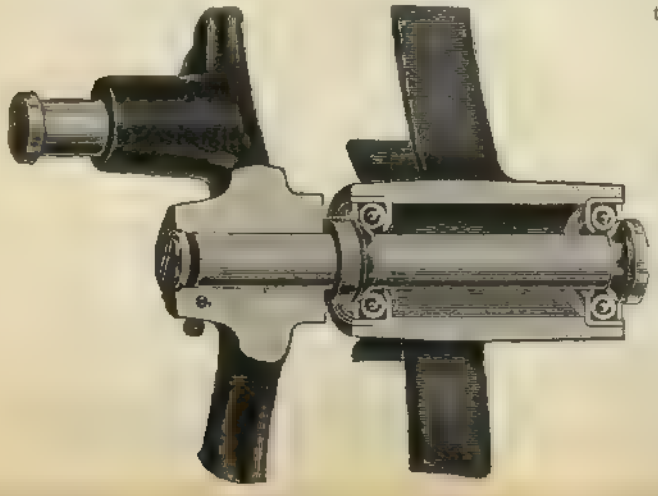
Automatic Bobbin Winder

Each of our Improved Peerless Machines is provided with our automatic bobbin winder, a device that saves much time, and insures the bobbin being smoothly and evenly wound It is so simple a child can use it and contains so few parts that it is almost impossible to get out of order It is easily swung round so that it does not run when not winding a bobbin, thus preventing unnecessary wear. The patent automatic guide attachment prevents the thread from running over the ends of the bobbin, and winds the thread evenly.



Ball Bearing Steel Pitman

Another strong feature of the Improved Peerless is the steel pitman with full ball bearing heads at both top and bottom. The larger illustration here shows a sectional view of the pitman head, with part of head cut away to show position and arrangement of the ball bearing The illustration to the right shows both ends of pitman, both of which are full ball bearing With case hardened ball bearing in pitman, balance wheel and head, the Improved Peerless is the quietest, easiest running, easiest operated, and best sewing machine made, regardless of price. It is as nearly perfect as it is possible to make a machine and every part is carefully tested by experts at the factory before and after assembling so that you are sure to get a perfect working machine.



Balance Wheel Bearings

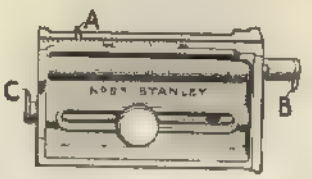
Particular attention has been given to the bearings in our balance wheel. Unlike most machines the balance wheel itself does not revolve around a shaft, but a specially constructed shaft is securely fastened in the balance wheel and the shaft revolves on ball bearings accurately fitted in the stand, as shown in the illustration on the left. Adjustable steel cones are provided for taking up any play or looseness. The extra long bearing points prevent wobbling of the balance wheel and make it the easiest running machine ever built.

GAUGES

BUTT GAUGE

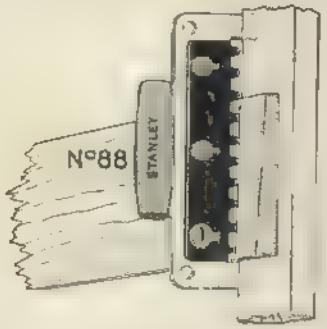
No. 94 Iron body, steel bars, nickel plated, weight per dozen 8 pounds, per dozen..... .....$12.00

BUTT GAUGE



No. 95 Iron body, steel bars, nickel plated, weight per dozen 6 pounds, per dozen.. ... ...$9 00

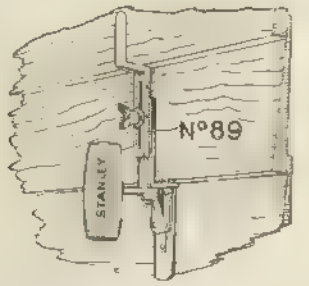
CLAPBOARD SIDING MARKER



This tool can be used with one hand, while the other is employed in holding a clapboard in position. The marking blade is easily adjusted to any thickness of clapboard or siding. The sharp edges of the teeth are just parallel with the legs when in position to mark. By moving the tool half an inch it will mark a full line across the clapboard, exactly over and conforming to the edge of the corner board.

No. 88 8¾ inches long, 4 inches wide, adjustable blade, weight per dozen 10½ pounds, per dozen.....$6.00

CLAPBOARD SIDING GAUGE



Two thin steel blades, which form a part of the base of the tool, will slide under the last clapboard already laid. When the bottom of the gauge is held firmly to the lower edge of the clapboard, press the handle over sidewise, and this will force another thin blade down into the next lower clapboard, rendering the tool immovable. The clapboard can be held any width to the weather by the graduated scale on the tool. After the tool is released the mark left is so slight that painting alone will fill it.

No. 89 8¾ inches long, 2½ inches wide, weight per dozen 21 pounds, per dozen.....$6.00

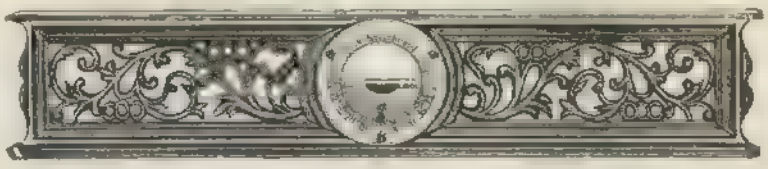
IRON PLUMBS AND LEVELS

Length, inches	6	9	12	18	24
Weight each, pounds	⅝	1¼	1⅞	3	4¾
No. 36 Japanned, nickel trimmings, per dozen	$15.00	18 00	21.00	24.00	27.00

This level can be readily attached to any straightedge or carpenter's square.

No. 40 3¼ inches long, japanned iron body and top plate, weight per dozen 1⅝ pounds, per dozen.....$1 60

Length, inches	2½	3	3½
Weight per dozen, pounds	½	1	1⅛
No. 31 Nickel plated, per dozen	$4 20	5.10	6.00

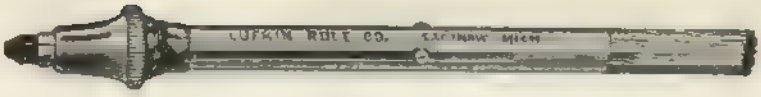


No. 1 Davis' Machinists' Iron Plumb, Level and Inclinometer, length 7 inches, weight each 1½ pounds. .. . . each, **$4.00**
No. 2 Davis' Machinists' Iron Plumb, Level and Inclinometer, length 12 inches, weight each 2 pounds .. each, **5.00**
No. 3 Davis' Machinists' Iron Plumb, Level and Inclinometer, length 18 inches, weight each 3¾ pounds . . each, **6.00**

LEVEL GLASSES

Length, inches	1¼	2	2½	3
Weight per gross, pounds	3	5	6	7
Per gross	$14.40	14.40	14.40	21.60

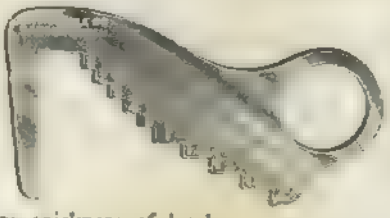
MARKING STICKS



Adapted to all regular lumber crayons, nickel plated.

With 30 inch hickory handle, per dozen $18.00

LUMBER GAUGES



For measuring thickness of lumber.

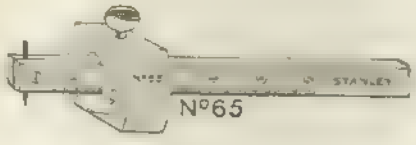
No. 0 1, 1 1 1¼, 2 inches, per dozen $6 00
No. 00 ⅜, ½, ⅝, ¾, ⅞, 1, 1¼, 1½, 1¾, 2 inches, per dozen 6 00
No. 000 ⅝, ¾, 1 1¼ 2, 2½ inches, per dozen 4 50

MARKING GAUGES

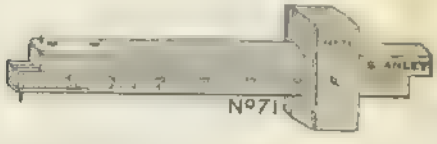
Single bar 6¼ inches long graduated in 16ths to an inch for 5 inches.
No. 97 Pin point and roller cutter, weight per dozen 6 pounds, per dozen.....$5.64

Double bar, 6 inches long graduated in 16ths to an inch for 5 inches.
No. 98 Pin points and roller cutter, weight per dozen 8 pounds, per dozen.....$8 76

No. 61 Beech, boxwood screw, square head, weight per dozen 2⅞ pounds, per dozen.. $0 95
No. 62 Beech, boxwood screw, square head, weight per dozen 2⅝ pounds, per dozen.. 3 80

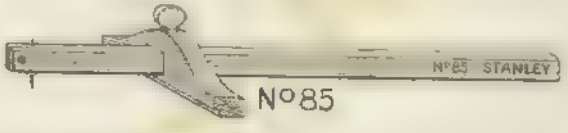


No. 65 Boxwood brass screw, square head face plates, weight per dozen 2 pounds per dozen $4 20



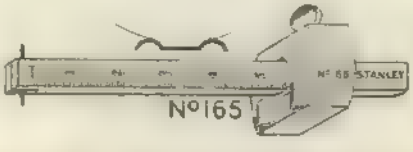
No. 71 Double bar, beech, brass screw, head plated, weight per dozen 2⅛ pounds, per dozen $4.80

No. 77 Slide gauge, rosewood, brass slide, screw adjustment, face plates, weight per dozen 2½ pounds. Per dozen $7 20



No. 85 Panel gauge, beechwood 10 inches long, adjustable points, weight per dozen 5 pounds, per dozen...$3.00

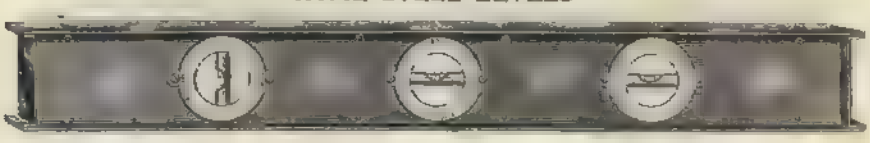
No. 92 Butt gauge, rosewood head, brass slide, screw adjustment, weight per dozen 9 pounds, per dozen....$15.00



No. 162 With circular face plate beech boxwood screw, square head weight per dozen 1¾ pounds per dozen $2 80
No. 165 With circular face plate boxwood, brass screw, square head face plate, weight per dozen 2 pounds per dozen 5.20

LEVELS

ACME STEEL LEVELS



This Level is made of cold rolled steel, the web is oxidized and the frame nickel plated and nicely finished and will not rust nor warp. The finish is almost indestructible. They are provided with vials set in metal tubes, nickel plated, which are securely fastened to vial rings made of brass and nicely finished. The ring is set in a metal casing which is fastened to the steel stock in such a manner as to allow the vial ring carrying the vial to rotate to any position desired thus allowing easy and accurate adjustment of either of the vials. It is fastened where desired by the two small screws. One of the vial rings is graduated, one half of it in degrees, and the other half into one inch rise per foot.

No. 1 24, 26 and 28 inches long with three vials..... each, **$3.50**

Weight each 24 inch 2½ pounds, 26 inch 2⅝ pounds, 28 inch 2¾ pounds

No. 3

No. 4

Same finish as No. 1. In No. 3 the vials are securely put into steel tubes nickel plated. The Plumb has good facilities for adjustment. There is a degree scale stamped into the web of the stock adjacent to the vial tube end of the tube carrying the level vial, and when the level is adjusted a fine line is made on the bevel end of the tube to correspond with the zero line in the graduation. This tube can rise on the scale from level to 50 degrees and will be found useful to all kinds of mechanics. No 4 has an extra level that is intended to be kept permanently set.

No. 3 14, 16 and 18 inches long.. each, **$2.00**
No. 4 20, 22 and 24 inches long..... each, **3.00**

Weight each 20 inch 2 pounds, 22 inch 2¼ pounds, 24 inch 2½ pounds.

No. 5 Mason's Level

Same finish as No. 1 has two plumbs, one level and one inclinometer. It is about the same weight but far more durable than a wood level of the same length.

No. 5 48 inches long, weight 4 pounds ..... each, **$5.00**

STANLEY BIT AND SQUARE LEVEL

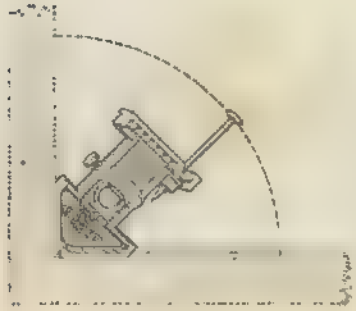
This tool has three pairs of V slots on its back edges. The shank of a bit will rest in these slots, either vertical or at an angle of 45 degrees, and boring can be done with perfect accuracy. It can also be attached to a carpenter's square making it an accurate plumb or level.

No. 44 Bit and Square Level, brass frame, weight each 2 ounces, each $0.30

STANLEY LEVEL SIGHTS

By the use of these ingenious devices, which can be attached to any level the owner has a convenient and accurate means for leveling from one given point to another, at a long distance away. When not in use the Level Sights are easily detached, and can be packed away in a small space for future use.

No. 1 Level Sights for wood levels, japanned, weight per pair ¾ pound, per pair..... $0.75
No. 2 Level Sights for iron levels, japanned, weight per pair ¾ pound, per pair..... .75

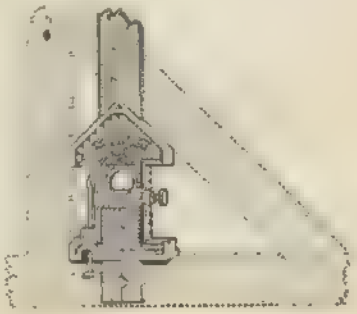


STANLEY "ODD JOBS"

This tool is well named, as with its use the owner can do all ordinary jobs with the addition of only a saw, a hammer and a plane.

It combines a level, plumb, try square, mitre square, bevel, scratch awl, depth gauge, marking gauge, mitre gauge, beam compass and a one foot rule. The rule is graduated in 16ths of inches. All parts of the tool are carefully machined so that in using same for any purpose where any of the above mentioned tools are required, sufficient accuracy may be obtained for all practical purposes. This unique tool is already favorably known to mechanics, amateurs and housekeepers.

No. 1 "Odd Jobs," 4 inches long, nickel plated, weight each ⅝ pound, each $0.75



STANLEY LEVELS

Non Adjustable, Polished Hardwood Stock, Brass Top Plate, Handy Grip Feature

No. 102 Four lengths assorted, 10, 12, 14, 16 inch, weight per dozen 11 pounds.. . per dozen, $4.80

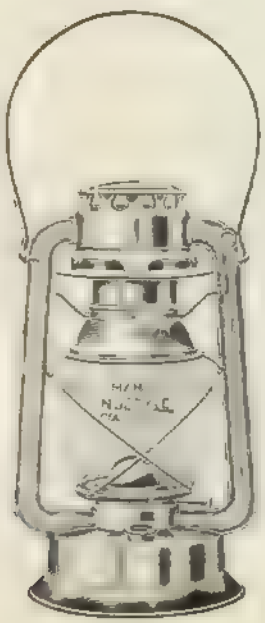
HAM'S "NUSTYLE" COLD BLAST



Nustyle Cold blast lanterns, "B" 1 inch wick with Nustyle cold blast globe, per dozen.....**$17.00**
Height of lantern only 13 inches.
Height of Nustyle globes 4¾ inches.
Nustyle, brass fount and top, per dozen..... **27.00**

Globe—The Nustyle globe is made to keep cool and eliminate breakage. The top is large, to make clearing easy. It is non-breakable and is perfectly guarded. Burner is fully exposed for lighting and trimming. A trimmed wick insures a perfect burning, smokeless flame. No burner to come out. Always in place locked and absolutely safe.

Lift—Locks down in place and holds the globe tight. Locks up for lighting and cleaning. No springs or rings to wear out. Easy to operate and cannot get out of order.

Top—Drawn from a single plate of heavy tin. No seams or springs—nothing to bend—waterproof and [illegible]

Bottom—Drawn from one piece of heavy Nustyle XX tin plate. Specially prepared tin plate. Specially prepared for a special purpose.

Fount. Holds sufficient oil to burn 24 hours. Made of heavy material. Has a large filler.

Weight per dozen 48 pounds.

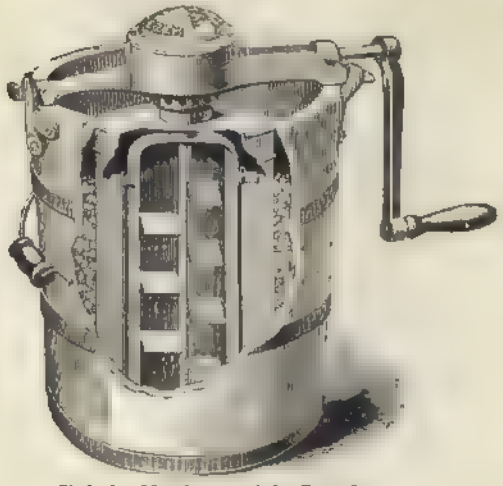
ICE CREAM FREEZERS

WHITE MOUNTAIN



Triple Motion, with Crank

1 quart size, weight each	6 pounds	$
2 quart size, weight each	12 pounds	
3 quart size, weight each	14½ pounds	
4 quart size, weight each	16 pounds	
6 quart size, weight each	24 pounds	
8 quart size, weight each	27 pounds	
10 quart size, weight each	30 pounds	

The can moves from right to left, the outside beater moves from left to right, scrapes with its wooden bars the frozen cream from the can and throws it toward the center, where it is met by the floats of the inside beater moving in an opposite direction and returned to the inside surface of the can to be re-frozen. The triple motion thus induced keeps the cream constantly moving and insures every particle being smoothly and evenly frozen.

WHITE MOUNTAIN

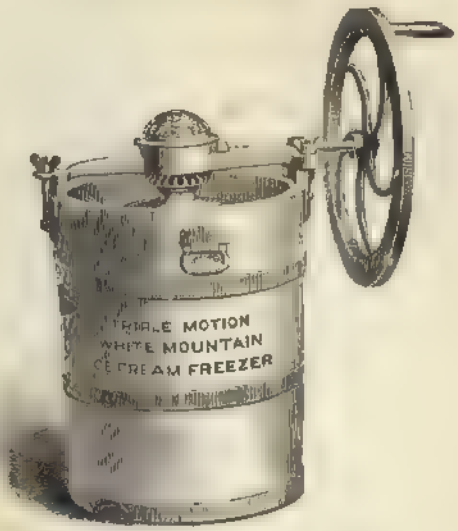
With Platform and Stand

15 quart size, weight each	160 pounds, each.	$
*20 quart size, weight each	180 pounds, each.	
*25 quart size, weight each	240 pounds, each.	

The platform and stand are cast iron, heavily galvanized to prevent rust. When in use, the gear frame is fastened by latch bolt and thumb screw. When released it can be swung to either side, so tub and can may be removed. At a slight advance in price, a pulley can be substituted for fly wheel, shown in illustration, and a good power machine produced. The pulley is 16x4¾, and the freezer should be operated at a speed of 75 revolutions per minute

*Not carried in stock; can be shipped promptly from factory.

WHITE MOUNTAIN



Triple Motion with Fly Wheel

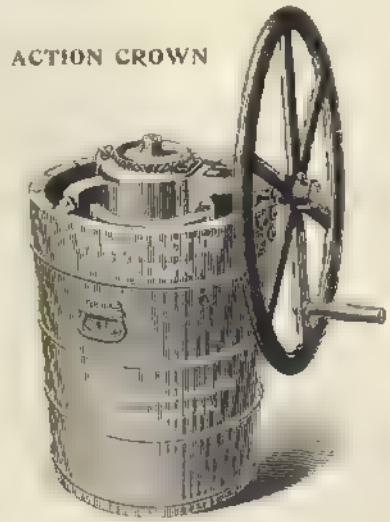
*20 quart size, weight each	95 pounds, each	$
*25 quart size, weight each	121 pounds, each	

These are durable hand freezers having all the White Mountain features, with a balance fly wheel which materially increases the operator's power, saving both labor and time during the process of freezing.

Especially adapted for the use of hotels, ice cream parlors, etc

Every White Mountain freezer part that comes in contact with the cream is heavily plated with solid block tin. This precludes the slightest possibility of poisoning

DOUBLE ACTION CROWN



With Fly Wheel

*24 quart size, weight each	111 pounds, each	$
*32 quart size, weight each	138 pounds, each	

Made heavy and strong for use of confectioners, hotels, restaurants, etc

The tubs are made of selected white cedar, and have electric welded wire hoops.

The cans are of heavy tinplate, with tinned malleable iron bottom.

The cross bar is made to swing up out of way to take out can, and may be entirely removed from freezer.

The gear and fly wheel shafts are connected by clutches, which engage or disengage by simply raising and lowering the cross bar.

The fly wheel remains stationary on side of pail.

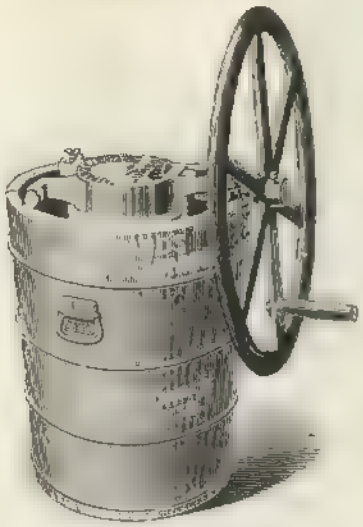
ICE CREAM FREEZERS

LIGHTNING

1 quart size, weight 7 pounds
2 quart size, weight 9¾ pounds
3 quart size, weight 11 pounds
4 quart size, weight 13¾ pounds
6 quart size, weight 18½ pounds
8 quart size, weight 22½ pounds
10 quart size, weight 29½ pounds

The pails are made of pine with electric welded wire hoops. Have automatic twin scrapers, insuring continuous scraping of frozen cream from side of can. All inside parts are heavily coated with pure block tin. All outside parts are galvanized. The gears are completely covered. The cans have drawn steel bottoms, the body is made of finest quality heavy tin plate, the top being strongly wired and turned over. The ice space is arranged to use the least possible amount of ice and salt to freeze quickly and effectually.

JUMBO LIGHTNING



14 quart size, weight 63 pounds, each
20 quart size, weight 96 pounds, each

Similar in design and construction to the Lightning freezer but made heavier and stronger, for use of confectioners, hotels, restaurants, etc.

The tubs are made of selected white cedar and have electric welded wire hoops.

The cans are of heavy tinplate with drawn steel bottoms.

The top plate is made to swing up to take out can, and may be entirely removed from freezer. The gear and fly wheel shafts are connected by clutches, which engage and disengage by simply raising and lowering the top plate.

The fly wheel remains stationary on side of pails.

BLIZZARD

1 quart size, weight 6¼ pounds
2 quart size, weight 8¾ pounds
3 quart size, weight 10¼ pounds
4 quart size, weight 12¾ pounds
6 quart size, weight 17 pounds

The Blizzard is an excellent low price freezer, is simple in the construction of the operating mechanism, being single acting that is the cans only revolve. The pail is made of pine with electric welded wire hoops. The can is the same as used in the Lightning freezer. The gears are completely covered. All inside parts coming in contact with cream are heavily coated with pure block tin. All outside parts are heavily galvanized.

*Not carried in stock but can be shipped promptly from factory.

*ICE CREAM CABINETS

Nelson's

No.	Capacity Quarts	Length Inches	Width Inches	Height Inches	Shipping Weight	Price
*2	12	34	17	30	120	$27.50
*2	20	35	18½	32	150	32.00
*2	40	46	24	36	200	46.00

The Nelson Patent Cabinets are constructed entirely of wood. Everlasting California red wood used for the outer case, and Virginia white cedar for the circular independent compartments. The compartments are separated from the outer walls and from each other by granulated cork (the best non-conductor of heat and cold known). Drain pipes are of heavy brass tubing and are secured with brass locknuts. Both are everlasting.

All stock cabinets finished in a rich mahogany color, two coats shellac, two coats of special brine proof varnish. Other colors on order only.

Guaranteed to keep ice cream in perfect condition (barring no climate) 24 to 36 hours with one packing of ice properly done.

MANNING-BOWMAN & CO.'S CHAFING DISHES WITH NEW ALCOLITE WICK FEED BURNER STOVES

Operates on same principal as those with tank. Burns denatured alcohol gas mixed with air which produces a powerful flame which can be regulated to any size. The invisible wick does not come in contact with flame, so requires no renewing. Will burn full flame for one and one-half hours. Alcohol will not evaporate when not in use. The only chafing dish stand that can be used as a stove for other cooking utensils without the use of hanger or other additional parts.

Prices Each

CHAFING DISH WITH "ALCOLITE" BURNER

CHAFING DISH WITH "ALCOLITE" BURNER.

No. 386-10S Nickel plated, diameter, 9⅛ inches; capacity, 3 pints $26.75
No. 386-10SC Same, solid copper has pierced legs. Handle and knobs of Mahognito wood 36.75

These stoves manufacture their own gas and burn a blue flame like the ordinary gas range burner. The alcohol is not burned direct as in the usual chafing dish burner, but is vaporized and mixed with air which produces a blue flame powerful enough for any cooking. It has three times the heating power of the ordinary lamp, yet regulates to a simmering flame at a touch. Costs less than two cents an hour to run. Alcohol will not evaporate when not in use. Is soutless and odorless.

NO. 58 ALCOLITE BURNER GAS STOVE.

Price of stove as shown under chafing dish as above. Has wrought iron stand and [illegible] top. [illegible] Will burn 3 hours without refilling ..... $

MANNING-BOWMAN & CO.

ELECTRIC DINING TABLE SET—FIVE PIECES.

Consists of stove, percolator, chafing dish, kettle and stand for use with the various pieces.

The advantages of cooking by electricity at the dining table are made even more manifest in the combination set shown.

Its utility is greatly increased because the pieces are interchangeable, for example, after preparing an article of food in the chafing dish the latter can then be removed and placed on the stand. The stove is then ready for making coffee in the percolator or boiling water in the tea kettle. It can also be used with any utensil which has a flat bottom of equal size or smaller, or it can be used as a toaster or grill.

Despite the many things you can do with this set only one stove is required consequently it is much more economical to buy the combination set in preference to several stoves with heaters attached. Stove can be regulated to supply three heats warm, medium or hot.

Experience has proven the superiority of the detachable stove, over the stove that is built in or permanently attached as part of the utensil. As a certain number of wires are necessary to carry the heat or electric current, the larger the stove the larger the wires used which last longer and add greatly to the life of the stove.

Chafing dishes with heaters attached can be used only in connection with the hot water pan and not for cooking that requires direct heat. With separate stove the food pan can be used as a fry pan or for anything requiring a direct heat.

No. 1298-54	Electric dining table set, complete, five pieces	$[illegible]

Capacity of Percolator, 3 pints or 6 cups; Chafing Dish, 3 pints.

ELECTRIC TOASTER.

The electric heater is set on a black enameled base handsomely finished in polished, nickel plate. On each side is a door which swings outward and downward, opening sufficient to permit placing or removing the bread without burning the fingers and when closed confining all the heat within for quick and effective work.

The "Keep Hot" rack increases its capacity by providing a place to keep the toast hot, while other toast is being made, or for drying out the bread in advance. When not in use the rack slides back into the frame out of sight. The walls of the casing are double with air space between, and all the interior surface is bright polished reflecting heat reflectors. All of this insures the minimum loss of heat and most rapid and economical operation.

110 volt carried regularly in stock other voltages made to order, which takes about two weeks

No. 1211 ELECTRIC TOASTER, 500 Watts.
Diameter of base 4½x8 inches $11 50
Be sure to state voltage when ordering

TEA BALL TEA POTS

The Last Cup as Good as the First.

Best quality imported English Pottery. Glazed, dark brown color. Nickel plated cover, aluminum Tea-Ball. These pots are especially desirable as they combine the Tea-Ball construction with the pottery body. The chain of the Tea-Ball is entirely enclosed in a pocket under the knob, not left hanging loose to bob about when the pot is in use.

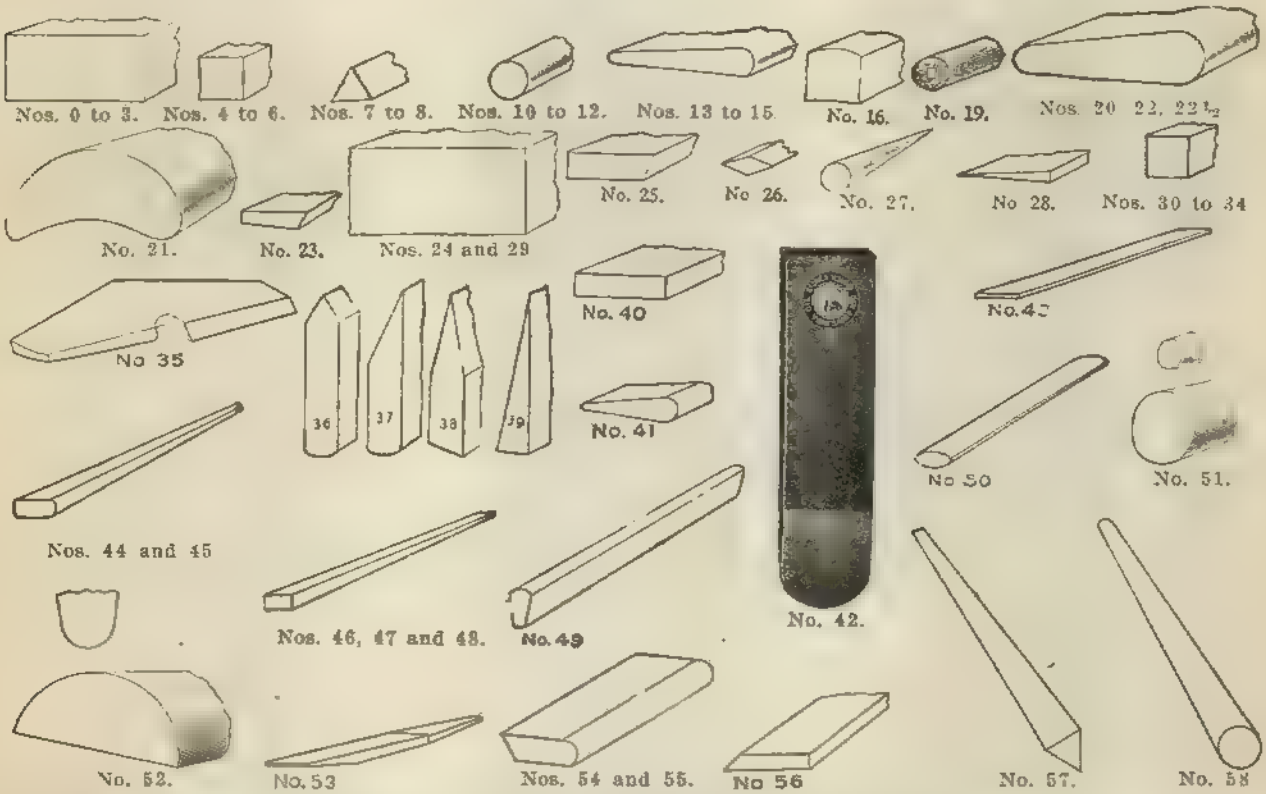
INDIA OILSTONES

India Oilstones possess the characteristics of hardness, sharpness and toughness and in addition they also possess absolute uniformity. They are especially adapted to the quick sharpening of all tools

All India Stones are filled with oil This feature insures a moist oily sharpening surface, with the use of very little oil.



Above Illustrations Show the Shapes of the Different Stones.

Coarse, Medium and Fine.

Note—When Ordering, Always State if Coarse, Medium or Fine Stones are Wanted

"REV-O-NOC" GASOLINE LIGHTING SYSTEMS.

The REV-O-NOC gasoline lighting system is the result of many years' experimenting to meet the most exacting requirements of use in different climates and of various grades of gasoline.

In operation the intense heat of the generator changes the gasoline to gas, which after mixing with the air burns at the mantle and gives an exceedingly brilliant light. The gasoline is forced to the lamps from the supply tank (which may be placed out doors) through a hollow brass wire which is no larger than an ordinary electric wire.

The generator in a gasoline system lamp is important as is equal to the main spring in a watch. The generator in every REV-O-NOC system lamp is made of extra heavy brass tubing, and shielded with a copper deflector to prevent it from cooling while the lamps burning. It is almost self-cleaning. A few turns of a thumb screw forces a steel cleaning needle through the orifice in the generator tip from the inside, and drives out any impurities that may have been in the gasoline. This is a very important feature, as the orifice is about the diameter of a human hair, and might quite easily become stopped up. It also prevents the enlargement of this orifice, which is the most frequent cause of complaint in other makes of lamps.

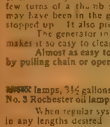
The generator in two-mantle lamps may be easily removed or replaced without disturbing the mantles. This is a patented feature, and as it makes it so easy to clean the generator, will be much appreciated by every user.

Almost as easy to operate as city gas. Generated by placing lighted alcohol torch through opening in lamp frame for about 60 seconds, and lighted by pulling chain or opening gasoline valve.

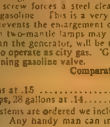
Comparative Cost of Producing 1000 Candle Power Light for 100 Hours.

	TOTAL COST.		TOTAL COST
REV-O-NOC lamps, 1½ gallons at .15	$ .23	6 ft. open gas jet, 30 M ft. at .85	$25.50
No. 3 Rochester oil lamps, 38 gallons at .14	3 92	16 C. P. Edison electric lamps, 347 K. W. at 10	34 70

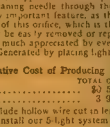
When regular systems are ordered we include hollow wire cut in lengths of 25 feet with connections brazed on, but we can supply the hollow wire in any lengths desired. Any handy man can install our 5-light system in half a day.



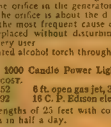
No. 141D.



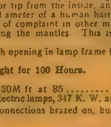
No. 127.



No. 457.



No. 417.



Nos. 138 and 114

Every REV-O-NOC system is guaranteed for five years (mantles, glassware and burner tips excepted), and with ordinary care it should last a lifetime. There is absolutely no danger involved in the use of these improved systems. REV-O-NOC lighting systems are permitted by the National Board of Fire Underwriters with out any increase in insurance rates.

One mantle lamp burns 60 hours on one gallon gasoline and produces 400 C. P.; two mantle lamp burns 36 hours on one gallon gasoline and produces 800 C. P. light.

GASOLINE LIGHTING SYSTEMS.

OVERHEAD GENERATOR SYSTEMS.

These lamps use upright gasoline system mantles (No. 8). The generator is over the globe. Lighted by placing alcohol torch across the top of globe, and after burning about one minute opening the gasoline valve. The heat from the mantle keeps the generator hot. Give 500 candle power light. Approved by the National Board of Fire Underwriters. Insurance Companies will issue permits to use these systems without increasing the rates.

GASOLINE GAS LAMPS.

These burners are constructed especially for use on cold process or machine gasoline gas. Have simple regulator which adjusts gas and air at same time. May be adjusted so that a large volume of air is supplied to a small volume of gas when the gas is rich, and a small volume or even no air, to a large volume of gas when the gas is poor.

Lock nut adjustment to hold regulator at any desired point.

These burners are made extra strong to withstand the hard use of gasoline gas.

ONE DOZEN IN A BOX.

IMPROVED READING LAMPS AND AIR-O-LANTERNS.

No. 307 REVERE—Brass, nickel plated, height 22 in., capacity 3 qts.—2 qts. gasoline, 1 qt. air—10 in. ribbed opal dome shade No. 1004, two No. 121 Junior Rag mantles, burns 25 hours to one filling, complete with pump and all accessories, w't 10 lbs., each ..... **J F J J** $10.00

No. 317 REVERE—Satin finished fancy shade with 3½ in. crystal fringe, w't 12 lbs., otherwise same as No. 307, each ..... **J F E J** $10.80

The REVERE *reading lamp is the most improved gasoline reading lamp made. The air intake is away from the center of heat, so that the gas is mixed with a large proportion of oxygen, resulting in the most perfect combustion. Really burns more air than gasoline. The filler cap and pump connection are concealed under the fount shell. Just set pump in easy seat and work plunger. No threaded connections to bother with. Ball check in the standard near the fount allows only a drop of the gasoline to get through at a time. This regulates the flow so that even if lighted lamp should be dropped or extra vigor given the pump handle the gasoline would not be forced in a solid stream. The flame can be regulated to 15 seconds without turning down the mantles. Hunt top to extend flame down to any brightness desired up to 300 C. P. Special Lanyer supplied with each lamp and is designed as a hanging instead of a table lamp.*

ONE IN A BOX.

No. 318 REVERE—Fancy decorated shade, otherwise same as No. 317, each ..... **J F E J** $10.80

ONE IN A BOX.

REPAIR PARTS FOR REVERE LAMP.

AIR-O-LANTERNS.

No. 319—Brass, nickel plated, diameter 7 in., height 16 in., capacity 1 qt., burns 12 hours, mica chimney, two No. 121 Junior Rag mantles, with extra generator, w't filled 2 lbs., each ..... **J F J J** $10.00

The Air-O-Lantern is a great outside lamp. Guaranteed storm proof. As handy as a lantern and as brilliant as a street light. Made extra heavy. Explosion is impossible. Uses two small durable mantles which usually last a long time. Light burns all right with one mantle gone. Just the thing for threshermen, contractors, campers, etc.

ONE IN A BOX.

CRUSO KERO-VAPOR LAMPS.

No. 111—Cruso, nickel plated brass, complete with 10 in. opal shade No. 1001, 12 in. Rochester chimney No. 1325½, and Kero-Vapor mantle No. 114, w't 12 lbs., each **E I J** $9.80

No. 112—Cruso, brushed brass, otherwise same as No. 111, each ..... **E I J** $9.80

No. 116—Cruso, with fancy green shade No. 181, w't 13 lbs., otherwise same as No. 111..... each **J F C J** $10.50

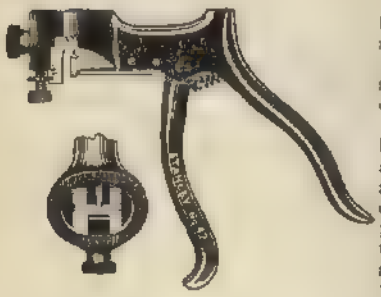
The Cruso Kero-Vapor Lamp burns ordinary kerosene and gives a positively reliable light. It burns a steady, white light, free from smoke, soot, noise and odor, and requires no attention whatever as long as there is a drop of kerosene in the tank. Burns 45 hours on one gallon of common kerosene.

The kerosene is steamed from the wick into a vapor or gas which ignites between the perforated burner tube and the mantle, producing a powerful, steady, white light of the most perfect illuminating quality. It is how flame, but a brilliant white mantle, such as those used in the best gas lamps. It is a most perfect reading light. Requires no pumping and has no delicate parts to get out of order. Requires no more care or attention than any common kerosene lamp.

ONE IN A BOX.

SAW SETS

STANLEY'S "PISTOL GRIP" ADJUSTABLE



This Saw Set embodies several unique and important features not heretofore seen in tools of this description.

The shape of the body and handle enable the user to operate the tool with great ease and with the least possible exertion, and the saw is held firmly against the gauge while the tooth is being set.

It can be readily adjusted by means of the knurled thumb screw to give a greater or less set to the teeth of the saw, according as the saw is to be used for coarse or fine work. As the anvil or part against which the plunger works is graduated, the same adjustment can be easily obtained for duplicate work.

The tool is so designed that the saw teeth are in plain view, which enables the used to quickly adjust the tool to the tooth to be set.

Per Dozen

No. 42—Tool Steel Plunger and Anvil, Hardened and Tempered, Carefully Machined Parts, Fine Black Finish $15.00

One-twelfth Dozen in a Box

SAW FILING GUIDES

DISSTON'S

Each

No. D3—12½ in. Plain Faced Jaws, Japanned Malleable Iron Clamp, Malleable Iron File Attachment and Slide, Polished Steel Wire Guide. Complete with File and Handle, Average Weight Each 20 Lbs.....$2.50

Especially designed to assist those not skilled in the art of saw filing to file a saw correctly.

The above cut shows a saw and the guide in proper position for filing. There are three marks on the upper hub of the swivel attachment. One of the three marks shows when it is in position for one side and the other designates when it is in position for filing the other side The third or center mark shows when it is in position for filing rip saws.

SAW VISES OR CLAMPS

ATKINS' AAA

Per Dozen

No. 1AAA—All Steel, Dull Japanned, Weight Per Dozen 20 Lbs. $13 50

Occupies about the same space as an ordinary chisel. Can be used for jointing, setting and filing. May be instantly attached to or detached from any square edge surface. The clamp is seated close to its work, thus preventing vibration.

The first illustration shows the clamp in use for filing and the second for jointing and setting purposes. Note that the clamp does not have to be detached for these various operations after being fastened into place.

One-quarter Dozen in a Box.

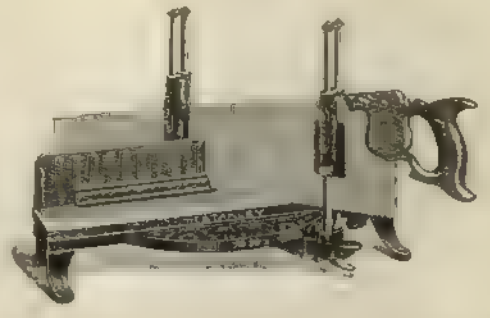
VICTOR



Each

No. 50½—Without Saw. Capacity at Right Angle 7¼ in., Capacity at Mitre 45°, 4¾ in., Weight Each 20 Lbs. $5.50

Either a back saw or a panel saw can be used in this box. The back, frame, indexed quadrant and swivel arm bearing are in one piece and accurately machined. The swivel arm can be locked at any desired point, between zero and 45°. The quadrant is indexed for cutting 4, 5 6, 8, 12 and 24 sided pieces.

One in a Box.

FISH

Eight Reasons Why It Sells:

It is the most simple in construction.

Segment and locking device interests the mechanic at sight.

All adjustments are positive, 72 instead of 9.

Scale plate is black and brass, you can see it.

Curved steel washer under swivel bolt makes tight, easy swivel at all times.

Saw guides always in position to receive saw.

One piece for adjusting cut and holding saw above work

Clamps do not interfere with any angle of saw.

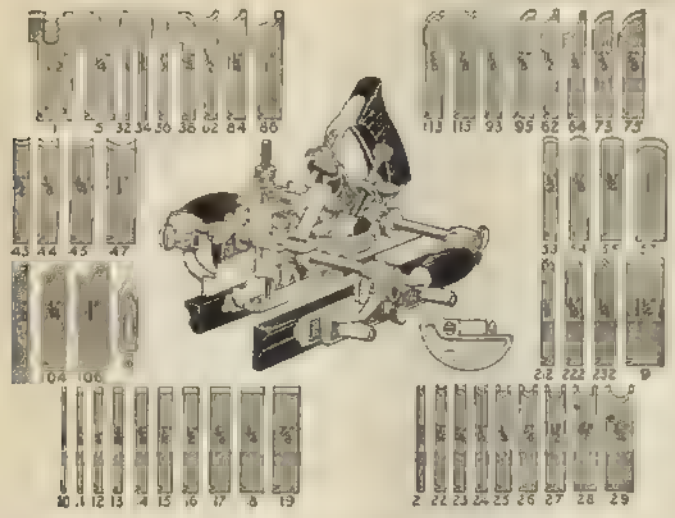
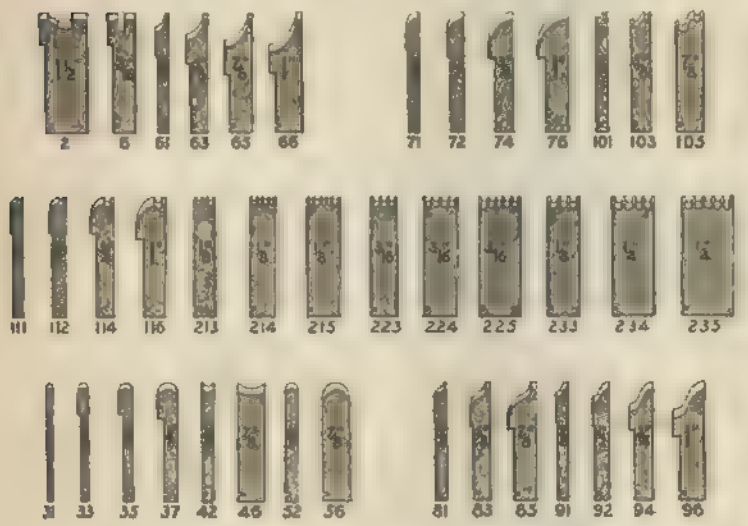
ADJUSTABLE IRON PLANES

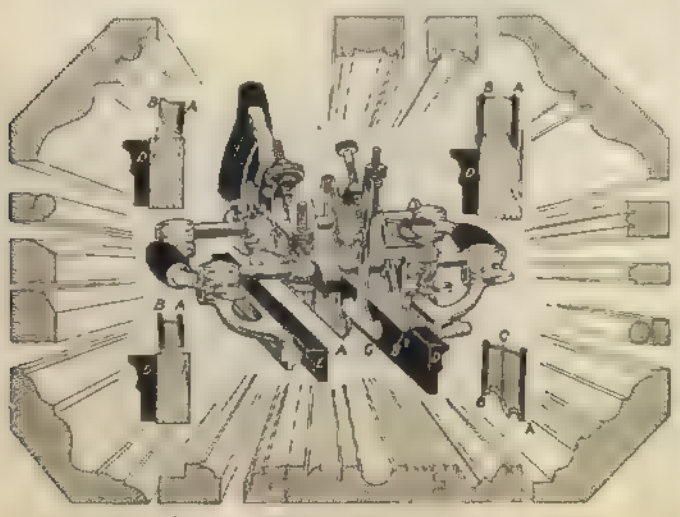
STANLEY'S "FIFTY-FIVE."



Cuts Showing No. 55 Plane and Cutters Furnished with Same.



Cuts Showing Special Cutters for No 55 Plane.



Cut Shows Some of the Mouldings that can be made with Cutters regularly furnished with No. 55 Plane.

This Tool, in addition to being a Beading and Center Beading Plane, a Plow, Dado, Rabbet, Filletster, and Match Plane, a Sash Plane and a Slitting Plane, is also a superior Moulding Plane, and will accommodate cutters of almost any shape and size. In fact, it is **"a Planing Mill within Itself."**

The Plane is fitted with Spurs for working across the grain, and a special Cam Rest, to be located on the front arm when working at a distance from the edge of the board, to keep the Fence from sagging, or on the rear arm on certain work, to prevent the possibility of the Plane rocking. All parts are interchangeable

No. 55—10 In Long Nickel Plated Stock, Rosewood Handles and Fences, Complete with 52 Cutters as Described Below, Put Up in a Neat Steel Box. Weight Each Complete 15¼ Lbs..... - **Each, $14.00**

The following cutters are furnished with each Plane The price is given in case duplicates should be required.

Note—

In several of the Planes, the Parts designated by the same name differ in form.

In these cases the corresponding Parts are given the same number; and when the Part is not shown directly opposite the number of the Plane, it will be found in another place on the plate.

NOTE—When Ordering Plane Parts, Always Give Plane Number and Part Number.

No. 8—1⅝	in. Wide, for Nos. 9½, 9¾, 15, 16, 18, 65, 65½, 131 and 220 Adjustable Planes	.17

One Dozen in a Box.

ADJUSTABLE IRON PLANES

STANLEY'S SIDE RABBET

Each

No. 98—4 in., Right Hand, ⅛ in. Cutter, Nickel Plated, Rosewood Knob Weight Each ½ Lb. **$1 00**

No. 99—4 in., Left Hand, ⅛ in. Cutter, Nickel Plated Rosewood Knob, Weight Each ½ Lb **$1 00**

A convenient tool for Side rabbeting and trimming Dados, Mouldings and Grooves of all sorts A Reversible Nose-piece will give the Tool a form by which it will work close up into corners when required.

One in a Box

STANLEY'S CABINET MAKERS' RABBET

No 90

Nos 92 and 93

Adjustable Throat, Endwise Screw Adjustment, with "Hand-y" Feature.

Each

No. 90—4 in. Long, 1 in. Cutter, Nickel Plated, Weight Each 1 Lb. **$2 20**
No. 92—5½ in. Long, ⅝ in. Cutter, Nickel Plated, Weight Each 1½ Lbs. **2.20**
No. 93—6½ in. Long, 1 in. Cutter, Nickel Plated, Weight Each 1¾ Lbs. **2.60**

Adapted for fine cabinet or other work where extreme accuracy is required The sides and bottom being square with each other, the plane will be perfectly flat on either side and can be worked with either right or left hand. With the adjustable throat the width of the throat opening or mouth can be widened or narrowed as coarse or fine work may require. **The "Hand-y" feature on the side forms a convenient grip for the hand.**

No 90 Plane is of the Bull Nose pattern so that it can be used close up into corners or other difficult places

One in a Box.

STANLEY'S CABINET MAKERS' EDGE

No 97

Each

No. 97—10 in. Long. 2¼ in. Cutter, Rosewood Knob, Endwise Screw Adjustment, Weight Each. 3¾ Lbs. **$2 20**

For Piano Makers and all Cabinet Workers. Has a cutter resting on a solid bed practically its entire length. The cutting edge being located at the extreme end of the plane gives the tool the form of a chisel No other plane can be worked in such a small space or so close up into corners.

One in a Box.

STANLEY'S CARRIAGE MAKERS' RABBET

Each

No. 101½ 9 in Long 2⅛ in Cutter, Rosewood Handle and Knob Weight Each 5 Lbs . **$2 50**

Especially designed for heavy work and framing and will be found to be an excellent tool for a wide variety of work The Cutter is of the Double Cutter type, and is adjustable endwise and laterally.

One in a Box.

STANLEY'S BUTCHERS' BLOCK

Each

No. 64—12½ in. Long, 2 in. Cutter, Complete with Extra Plane Iron Weight Each 4 Lbs . . **$2 40**

Designed especially for trueing up or resurfacing butcher blocks. The extra plane iron will enable the user to finish smooth the final surface of a block, also for planing smooth and keeping in condition the meat benches and tables ordinarily found in a butcher's establishment. With this plane blocks having the most uneven surface can be leveled up with more satisfaction than can be obtained with the use of any other tool.

One in a Box.

STANLEY'S SCRUB

No 40

Each

No. 40—9½ in. Long, 1¼ in. Cutter, Japanned Stock, Beechwood Handle and Knob, Weight Each 2 Lbs. **$1 10**

With these Planes the user can quickly plane down to a rough dimension any board that is too wide to conveniently rip with a hand saw. This is made possible by reason of the peculiar shape of the extra heavy cutter the cutting edge of which is rounded instead of square.

One in a Box.

ADJUSTABLE IRON PLANES

STANLEY'S ADJUSTABLE CIRCULAR

Each

No. 113—10 in. Long, 1⅝ in Cutter, Flexible Steel Face, Japanned Stock, with Graduated Scale for Setting the Face, Weight Each 3½ Lbs $3 00

A very superior Tool as by means of the graduated scale on the gears, the flexible face can be accurately set to work on an arch of the same circle, both concave and convex, by turning the Knob on the front of the Plane The Cutter is adjustable endwise and laterally

One in a Box

STANLEY'S FLOOR

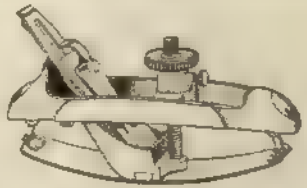
Each

No. 11½ -7 in. Long, 2⅜ in. Cutter, Japanned Iron Stock, Double Hardwood Handle, Cutter Adjustable Endwise, Weight Each 4 Lbs..... $3.15

This Plane is fitted with an adjustable throat, permitting a wide or narrow mouth, according as coarse or fine work requires. It is designed for working from a kneeling position, the double handle making it an easy tool to work under such conditions.

One in a Box.

VICTOR ADJUSTABLE CIRCULAR



Each

No. 20—10 in. Long, 1⅝ in. Cutter, Flexible Steel Face, Nickel Plated Stock, Weight Each 4 Lbs. $4.10

Designed with the object of eliminating any lost motion due to wear There are less parts subject to lost motion in this Plane than in any other Circular Plane made. The end of the Flexible Steel Bottom being fixed, and the force applied at the center, great accuracy of adjustment is possible and the Face is most firmly held in position. The Cutters are adjustable endwise and laterally.

One in a Box.

STANLEY'S HANDLED FLOOR

Each

No. 74—10½ in. Long, 2⅜ in. Cutter, Japanned Iron Stock, 45 in. Hardwood Handle with Double Grips, Weight Each 21½ Lbs..... $4.95

Designed for planing floors, bowling alleys, skating rinks, decks of vessels, etc. The handle being long, permits the plane to be worked from a standing position.

One in a Box.

STANLEY'S SINGLE HANDLE VENEER SCRAPER

Each

No. 112—9 in. Long, 3 in. Cutter, Japanned Iron Stock, Rosewood Handle and Knob, Weight Each 4 Lbs. $2 10

No. 112C—Extra 3 in. Blade for No 112 Plane..... 20

This Plane has the same form as the regular Bailey Plane and is preferred by some users to the double handle Scraper Plane. The blade is adjustable endwise and for angle, and can be firmly locked in position desired.

One in a Box

STANLEY'S DOUBLE HANDLE VENEER SCRAPER

Each

No. 12—9½ in Long, 3 in Cutter Japanned Rosewood Handle with Double Grip, Weight 5¾ Lbs. $2.40

No. 12¼ -6¼ in Long, 2 in Cutter, Otherwise Same as No 12 Weight 2½ Lbs 2 00

No. 12C Extra 3 in Blade for No. 12 Plane . 20

No. 12¼C- Extra 2 in Blade for No 12¼ Plane . .18

The handles are of rosewood with a double grip, and, being placed across the center of the tool, give it a good balance. The blade is adjustable endwise and for angle, and can be firmly locked in position desired.

One in a Box

Each

No. 12½ 9½ in Long, 3 in Cutter, Japanned, Rosewood Handle with Double Grip, Rosewood Face $3.20

No. 12½C Extra 3 in Blade for No. 12½ Plane. 20

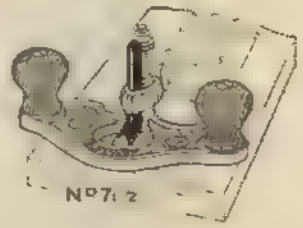
Same as No 12 Scraper Plane except that it has an extra rosewood bottom This bottom is especially adapted for use on fine work and when worn can be readily removed and a new one substituted

Weight Each 4 Pounds.

One in a Box.

ADJUSTABLE IRON PLANES

STANLEY'S ROUTER



Each

No. 71—7 ½ in. Long, Open Throat, Nickel Plated, ¼ and ½ in. Cutters, Complete with Two Attachments, One for Regulating the Thickness of the Chip, the Other for Closing the Throat for Use on Narrow Surfaces, Weight Each 2 ⅝ Lbs. $2.05

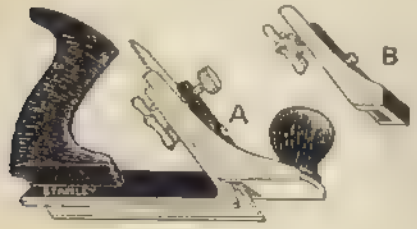
Each

No. 71 ½—7 ½ in. Long, Closed Throat, Nickel Plated, ¼ and ½ in. Cutters, the Ordinary Form of Router Plane, Weight Each 2 ⅛ Lbs. . $1.65

These Planes are for surfacing the bottom of grooves or other depressions parallel with the general surface of the work. The bottoms of both styles are dug out so that an extra wooden bottom of any size desired can be screwed on, enabling the user to router on large openings. The cutters have screw adjustment, and can be held as shown in above illustrations, or on the back of the cutter post, for bull-nose work.

One in a Box.

STANLEY'S ADJUSTABLE CHAMFER



Each

No. 72 9 in. Long, 1 ⅝ in. Cutter, Japanned Iron Stock, Rosewood Handle and Knob, Weight Each 3 ⅝ Lbs. $2.20

This Plane will do perfect chamfer or stop-chamfer work. It has a ninety degree V bottom which acts as a mitre guide. To this is attached an adjustable front "A" having a flat bottom which carries the cutter, this front can be set for different sizes of chamfer. Front "A" can be readily detached and a bull-nose front "B" (furnished with the plane) substituted, permitting the plane to be worked up close into corners.

One in a Box.

STANLEY'S IMPROVED RABBET

Japanned Iron Stock, without Spur, with Detachable Depth Gauge.

Each

No. 180—8 in. Long, 1 ½ in. Cutter, Weight Each 2 ½ Lbs. $1.10
No. 181—8 in. Long, 1 ¼ in. Cutter, Weight Each 2 ¼ Lbs. 1.10
No. 182—8 in. Long, 1 in. Cutter, Weight Each 2 Lbs. 1.10

These Planes will lie perfectly flat on either side and can be used equally as well with right or left hand while planing into corners or up against perpendicular surfaces.

One in a Box.

STANLEY'S DUPLEX, FILLETSTER AND RABBET

Each

No. 78—8 ½ in. Long, 1 ½ in. Cutter, Japanned Iron Stock, with Spur and Detachable Depth Gauge. Weight Each 3 Lbs. $1.65

This Plane has two seats for the cutter, one for regular work and the other where a bull-nose is required. It has a spur and a removable depth gauge. The adjustable fence can be used on either side and slides under the bottom, regulating the width of the cut. To work same as a rabbet plane, remove fence and arms.

One in a Box.

STANLEY'S IMPROVED DADO

Japanned Iron Stock, 8 in. long, with Skew Cutters, Adjustable Depth Gauge and Two Adjustable Spurs

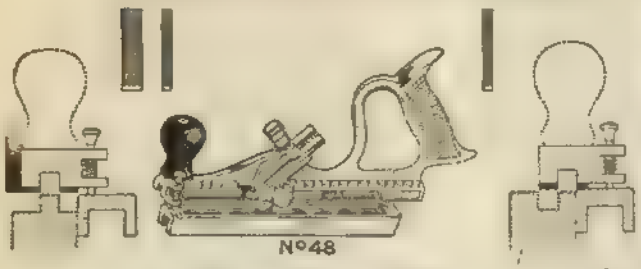
Nos.	39¾	39⅞	39—1
Cutter, Inches	¾	⅞	1
Weight Each, Lbs.	2	2 ¼	2 ¼
Each	$1.65	1.65	1.65

The great advantage of these Dado Planes over those of wood is that they will keep true under all conditions even in the narrowest widths. They have skew cutters, an adjustable depth gauge and two adjustable spurs, one on each side of the plane. This adjustable feature permits of the spurs being adjusted to take up wear, as well as for the depth of the cut.

One in a Box

ADJUSTABLE IRON PLANES

STANLEY'S SWINGING FENCE MATCHING



Nickel Plated Iron Handle and Body, Rosewood Knob.

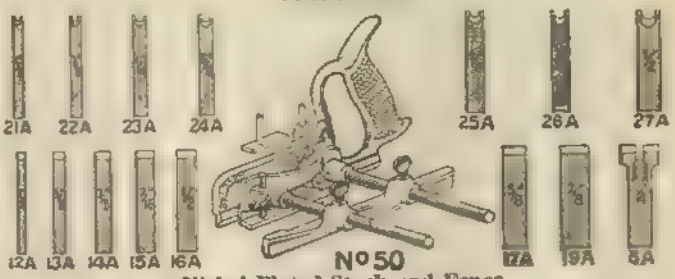
Each

No. 48—Cuts $\frac{1}{16}$ in. Grooves on $\frac{3}{4}$ to 1$\frac{1}{4}$ in. Boards, Centers on $\frac{7}{8}$ in., Weight Each 3$\frac{3}{4}$ Lbs.....$2.75

This form has two plow cutters of the same width, and one extra wide cutter. The fence in one setting exposes two cutters for cutting the tongue, and, when reversed, leaves only one exposed for cutting the groove. On thicker boards than the plane works on center, the extra wide cutter is substituted for groove cutter when cutting tongue

One in a Box.

STANLEY'S COMBINED PLOW, BEADING AND MATCHING



Nickel Plated Stock and Fence.

Each

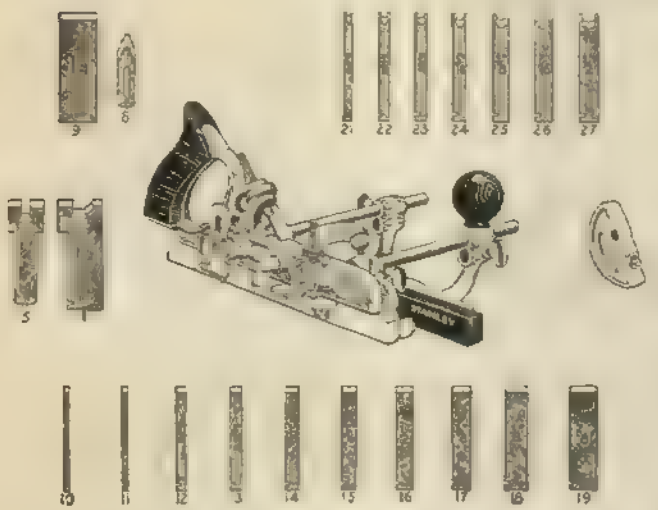
No. 50—9$\frac{1}{4}$ in. Long, Complete with 15 Cutters, Weight Each 3$\frac{1}{2}$ Lbs.....$5.00

The Cutters comprise 7 plow and dado bits one each $\frac{1}{4}$, $\frac{7}{16}$, $\frac{3}{8}$, $\frac{5}{16}$, $\frac{1}{8}$, $\frac{3}{16}$ and $\frac{1}{16}$ in.; 7 beading tools, one each $\frac{1}{8}$, $\frac{7}{32}$, $\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, $\frac{7}{16}$ and $\frac{1}{2}$ in.; and a $\frac{1}{4}$ in. tonguing tool.

A very handy tool for light work. It consists of a main stock, carrying a spur and a depth gauge, forming a support for one side of the cutter; a sliding section, carrying a spur and forming a support for the other side of the cutter and a fence with a 5 in. adjustment.

One in a Box.

STANLEY'S "FORTY-FIVE"



Seven Tools in One in Compact and Practical Form.

Each

No. 45—10 in. Long, Nickel Plated Stock and Fence, Rosewood Handle and Knob, Complete with 21 Cutters as Described Below.....$7.00

Weight Each 9$\frac{1}{2}$ Pounds.

One in a Neat Steel Box, Complete with Cutters.

This Plane embraces in a compact and practical form (1) beading and center beading plane; (2) plow; (3) dado; (4) rabbet and filletster; (5) match plane; (6) sash plane; (7) slitting plane

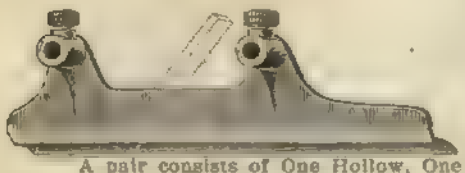
Each Plane is accompanied by seven beading tools ($\frac{1}{16}$, $\frac{7}{32}$, $\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, $\frac{7}{16}$ and $\frac{1}{2}$ in.), ten plow and dado bits ($\frac{1}{16}$, $\frac{1}{8}$, $\frac{3}{16}$, $\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, $\frac{7}{16}$, $\frac{1}{2}$, $\frac{5}{8}$, $\frac{3}{4}$ and $\frac{7}{8}$ in.), a filletster slitting, match and sash tools; twenty-one tools in all

The Plane is fitted with spurs for use across the grain, etc., and can be used either right or left hand.

CAM REST

For beading at a distance from the edge of a board, attach Cam Rest (see cut at right of plane) to the front arm between the sliding section and fence to prevent the fence sagging In certain work attach same to the rear arm to prevent the plane from rocking.

STANLEY'S HOLLOWS AND ROUNDS
For Use on No. 45 Plane Only.



Japanned Cast Iron, Polished Faces, Steel Set Screws, Complete with Cutters.

Nos.	6	8	10	12
Width of Cutters, Inches	$\frac{1}{2}$	$\frac{5}{8}$	$\frac{3}{4}$	1
Work Circle, Inches	$\frac{3}{4}$	1	1$\frac{1}{4}$	1$\frac{1}{2}$
Per Pair	$1 40	$1 40	$1 50	$1 50

A pair consists of One Hollow, One Round and Two Cutters. A Hollow and its Cutters will form a ROUND on the moulding being worked. A Round and its Cutter will form a HOLLOW.

STANLEY'S NOSING TOOL

Each

No. 5 Japanned Cast Iron Body with Polished Face Steel Set Screws, 1$\frac{1}{4}$ in. Cutter Works 1$\frac{1}{4}$ in Circle for Use on No. 45 Plane Only.....$1.00

A Nosing Tool and its Cutter will form what might be called an exaggerated Round. Used for shaping the edges of stair treads.

"DIAMOND EDGE IS A QUALITY PLEDGE"

*DIAMOND EDGE RAZORS

SQUARE POINT

ROUND POINT

HOLLOW POINT

The excellency of these Razors consists in their being made of the very best quality English Steel.

Unequalled for Private as well as for Barbers use and fully warranted.

HOW TO USE A RAZOR

Lay the Razor as nearly flat as possible on the face and cut in a sloping direction.

Those who are troubled with a strong beard or tender skin, will find it highly beneficial to wash the face with warm water and soap before shaving, as time spent in softening the beard adds materially to the comfort of the operation.

SHAPLEIGH HARDWARE COMPANY
St. Louis. U. S. A.

The Above is a Fac-Simile of the Wrapper Put Around Each DIAMOND EDGE Razor

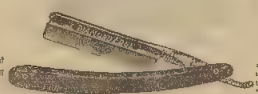
RAZORS

*DIAMOND EDGE

Diamond Edge Razors are Hand Forged from the Best English Crucible Cast Steel, Finest Hamburg Ground, Best Finish and Highest Quality Throughout. This Insures a Razor Unsurpassed for both Barbers and Private use. Fully Guaranteed.

Cut shows Non Rusting Metal Reinforcing Washers on each side of Tang next to Handle. Holds the Blade tong so that in closing the edges of Blade will never "Cross Over" and strike side of Handle

End View showing Concaved Shape Cutting Edge and Extra Stiff Reinforced Back



RAZOR

NO. DE17300

This consists of the best points of the wedge shape of the old English razor with its stiff rigid edge and the light weight and attractiveness of the more modern concaved razor

It is designed to meet the requirements of all who have difficulty in shaving with comfort owing to tender skin and a very hard beard

This Razor is giving universal satisfaction to the user who has just tough beard and tender skin It is made with a stiff ridge, much desired in the old English razor, yet, has the light weight of the new concave razor. The edge is so constructed that it will not quiver or razzle under the most trying conditions, and has stood the test of all the most exacting.

Warrant

This razor is made with that exactness which can only be attained by workmen thoroughly trained in their Art. Extreme care is given to the forging, tempering and grinding to this razor, which is followed by the most rigid inspection We warrant them to give perfect satisfaction if given reasonable care There is absolutely no excuse for a soiled or rusty razor

A dealer should not be asked to exchange such a razor.

Blade ⅝ Inch Only, Carbon Polished Back and Grooves, the Concaved Half of Blade Glazed with etched D. E. Trade Mark; Diamond Edge etched in Gold in Grooves Plain Smooth Tang Black Rubber Handle.

SPECIAL OFFER

In order to introduce the New Razor we are offering with every Dozen Razors, One Dozen of our Norleigh Diamond Shaving Stick Soap. The Soap is given absolutely free with every Dozen Razors purchased. The Soap is receiving hearty unqualified recognition as the Best Article on the Market for the purpose. Further Description below.

*** NORLEIGH DIAMOND**
SHAVING STICK—(DEMULCENT)

NO. ND300

Compounded by Expert Soap and Perfume Makers, of Purest Materials, Chemically Correct and Under Most Sanitary Conditions. It Produces a Heavy, Thick, Close and Abundant Lather, which is Lasting, Retains the Moisture and Stays Thick and Creamy on the Face. Softens the Beard and Skin, and will Positively Not Produce a Burning Sensation on the Face Highly Perfumed.

Each Stick Put up in a Finely Embossed Nickel Plated Metal Box, 3¼x1¼ inches, with Close Fitting Telescope Cover; Each of these Metal Boxes, Packed in a Carton; Six Cartons in a Handsome Display Rack for the Show Case.

No. DE17309—One Dozen Razors and One Dozen Soap as described above . . . $30.00

Packed Complete in a Box; Weight 6 lbs.

YANKEE

Designed for Use on Bench Drills or Separately Attached to Bench.

Cast Iron Body and Sliding Jaw, Hardened Steel Faces

For use in holding work to be machined. Accurately machined all over so it can be used on either side or end as well as on its base.

The sliding jaw extends through slot 1 in. wide in body of vise in one piece, fitted with two steel keys set in the same, thus securing a parallel movement, and so constructed as to cause very little wear.

Each

No. 993—Base 7¼ in. Long and 2⅝ in. Wide, Extreme Height 3 in., Jaws 2⅝ in. Wide and 1⅞ in. Deep, Jaws Open 3⅛ in., Complete with Hardened Steel Block with V Shaped Grooves of Various Sizes for Holding Round or Irregular Shaped Work in Drilling, Shaping, etc., Weight Each 9 Lbs. $4.70

One in a Fibre Box.

With Swivel Base.

Cut Showing Swivel Base.

This is the No. 993 Yankee Vise (described above) mounted on Swivel Base for use on bench, and its upper parts (No. 993) quickly detachable for use on Drill Press, Shaper, etc., and putting back again on Swivel Base.

The Swivel Base is easily and firmly locked or released in any position by short movement of lever at the side. Base is 4¾ in. diameter and has grooved bottom to give level bearing on bench.

Each

No. 1993—Extreme Length Over All 8¾ in., Extreme Height with Swivel Base 5⅝ in., Jaws 2⅝ in. Wide and 1⅞ in. Deep, Jaws Open 3⅛ in. Wide and 1⅞ in. Deep, Jaws Open 3⅛ in., Complete with Hardened Steel Block with V Shaped Grooves of Various Sizes for Holding Round or Irregular Shaped Work in Drilling, Shaping, Etc., Weight Each 13½ Lbs. $7.00

One in a Fibre Box.

"F. & R." MACHINISTS'

The "F. & R." Vise has the advantage of two complete swivels, a combination of the two giving the most desirable positions for the use of a mechanic.

The vise is locked at any angle by two separate methods. One by clamping the work within the jaws which tightens the frictions and the other by the use of the position pins. With both in use the vise is positively locked in any position.

The jaws are always held in place when work is removed by the position pins, if the operator requires, by the use of which the vise is made stationary at any angle.

Swivel Base, Welded Cast Steel Faced Jaws.

BALLAND FIELD GLASSES

Illustrations Are Reduced Size. Prices Each.

In our Balland Field Glasses introduced by us to the American market some eight years ago, and wonderfully successful since then, we have a glass of intrinsic value, sold upon its merits

The feature of a good glass, backed by a firm having a reputation for handling only the best of goods, combined with a medium selling price, is important to the merchant

Most of our customers are now well acquainted with the exceptional value and wearing qualities of this make, and to them we would say that we intend always to keep up the same high standard of this glass; and from those who have not stocked and sold them we would solicit a trial, never knowing that they will give such goods satisfaction as to warrant carrying a stock of them

BALLAND FIELD GLASS These glasses are made specially for us, according to our own designs, and we confidently believe that they are the best field glasses on the market today. Sole leather case and strap with each glass.

PRISM BINOCULARS.

All Adjustable for Pupillary Distance and with Focusing Attachment

Prism Binoculars are now almost too well known to need any special mention or explanation. It would seem sufficient to call attention to the fact that by the use of prisms in these glasses the rays of light are so bent upon themselves that it is possible to obtain the magnification given by the telescope in the compass of an ordinary opera glass by the use of powerful eye-pieces, which could not be used in such a glass were it not for the action of the prisms. They have an extremely large, and almost faultlessly flat field of view, nine or ten times as great as the ordinary binocular

One of the greatest disadvantages of using a field or opera glass has hitherto been the necessity for focusing on every object looked at. The act of focusing makes it impossible to hold the glass steadily, and the focusing apparatus adds to the weight and clumsiness of the glass. With the Prism Binoculars it is only necessary to find the proper focus for the eyes of the user once, and then the glass is focused for all objects at all distances.

(Cut Reduced Size.)

DUBOIS MAKE.

PRISM BINOCULARS CONTINUED. Prices Each.

Illustrations Are Reduced Size.

Read Interesting Note With Reference to These Binoculars on Preceding Page.

The Busch Prism Binoculars are characterized by their simple, rigid construction and superior optical qualities. Their illumination, field of view and definition are unexcelled and consequently have been adopted by the United States Government.

All glasses listed below are finished in dull black, bodies covered with black leather, and are contained in heavy sole leather carrying cases.

No. 6060

DIRECTIONS FOR USE OF BINOCULARS.

The **ADJUSTMENT FOR FOCUS** is similar to the ordinary opera glass. The right eye-piece also has a separate adjustment to provide for any difference in the observer's eyes. The simplest plan is to close the right eye and focus on some distant sharply-defined object, using the left eye only. If the right eye is not in focus, the eyes are of unequal strength. This can be corrected by adjusting the right eye-piece until the vision is the same as the left. For normal eyes the right eye-piece should be at zero.

The **ADJUSTMENT FOR EYE DISTANCE** is made by simply bending the hinged cross-bars while looking at the sky or some distant object. When correctly found, the two fields will blend into one, with a round, clearly defined margin. If incorrectly adjusted, the field will be seen in two separate rings. The washer on the upper bar above the hinge is engraved to indicate the pupillary distance in millimeters.

The cleaning of the lenses is best done with a silk handkerchief or a soft clean chamois, without unscrewing the glass or disturbing its optical adjustment.

When the glass has been properly set for Focus and Eye-Distance it may be left in this position without changing the adjustment in any particular, as the case holds the glass in any position.

THE BUSCH TERFLUX BINOCULARS.

No. 6082 Magnifying power 9, black, 36½ mm. object glass.....Each, $141.00
No. 6084 Magnifying power 12, black, 36½ mm. object glass.....Each, 146.75

Those who prefer a glass possessing less bulk and weight than the U. S. Army and Navy Model quoted below, but of a lower or slightly higher magnification, will find the above two glasses quoted admirably adapted for their requirements.

THE BUSCH TERFLUX BINOCULARS.

No. 6060 Magnifying power 10, black, 46½ mm. object glass ..... Each, $158.50

This model is known as the U. S. Army and Navy Model, which produces the broadest field and the largest illumination consistent with a given power of 10 diameters.

THE BUSCH STEREO-LYNKOP BINOCULARS.

No. 6076 Magnifying power 8, black, 20 mm. object glass .....Each, $88.00
No. 6078 Magnifying power 12, black, 20 mm. object glass .....Each, 88.00

The lenses of the Stereo Binoculars, being placed farther apart than the eyes, all objects are brought into higher relief and their actual distances, in relation to one another, are made more evident to the observer. This feature of such a glass as the Stereo-Lynkop has therefore its practical value to the hunter, the yachtsman, and the architect as well as to the tourist.

THE BUSCH STEREO-ULTRALUX BINOCULARS.

No. 6040 Magnifying power 6, black, 25 mm. object glass.....Each, $100.00
No. 6042 Magnifying power 8, black, 25 mm. object glass.....Each, 100.00

This glass is built on the same model as the Busch Stereo-Lynkop, but has object glasses of 25 mm. diameter, allowing almost twice the light of a 20 mm. object glass to reach the eye. This advantage will be particularly appreciated under adverse weather conditions.

No. 6040

LE MAIRE BINOCULARS—STEREO MODEL

These are manufactured by the famous Le Maire factory, whose ability to furnish high-grade instruments is unquestioned. The Le Maire make need no introduction whatever—they are known to all.

No. 1070 Magnifying power 8, 26 mm. object glass.....Each, $ 90.00
No. 1071 Magnifying power 10, 26 mm. object glass.....Each, 119.00
No. 1072 Combination glass with three different powers, changed by simply turning eye-piece. Powers 6, 8 and 10 diameters, giving advantage of day, night and marine glass all in one, object glass 26 mm.....Each, 166.50

WESTLEY-RICHARDS GUNS

"HIGHEST" QUALITY

For beauty of design and artistic workmanship this model stands in a class by itself—a masterpiece of modern gunnery.

A customer writes:—"It is the most beautiful weapon—that is, artistically—that I have ever seen. For quiet elegance, and for a gun beautiful in its richness, it surpasses any other that I have inspected."

No. **H.** With patent one-trigger mechanism and hand-detachable locks. Elaborately and artistically carved and engraved with game subjects.....Net **$595.00**
If with Whitworth steel barrels. Extra.....Net **40.25**
Extra pair of detachable locks to interchange, in leather case. Extra. Net **47.25**

WESTLEY-RICHARDS SINGLE BARREL TRAP GUNS

This is the gun that has become so popular among the discriminating marksmen and is the standard by which other high-grade trap guns are judged. Owing to its perfect balance, beauty of design and reliability under heavy shooting it is the first choice of all who have handled this really remarkable gun. It "goes to the shoulder" naturally, points easily and with its special choke boring makes unsurpassed killing patterns.

Top lever hammerless action, with or without automatic safety slide, extra long and thick fore-end, with an extra steadying loop, straight hand, half-pistol or full pistol grip. The elevated ventilated rib presents a level surface of aim which obviates the objection of the sloping barrel usually adopted in single barrel construction and eliminates the mirage caused by the heating of the barrel. Bends and weights as desired. Regular lengths of barrels 30 and 32 inches; 34 inch barrels $10.00 extra.

No. **A1.** Double bolt, engraved frame, non-ejector.....**$132.00**
No. **B1.** Treble bite, beautifully engraved, automatic ejector..... **175.00**
No. **C1.** Special finish and engraving, treble bite, automatic ejector.... **245.00**

EXTRAS Rubber Anti-recoil heelplate.....$ 7.00 Check Pad.....$ 5.25
34 inch Barrel extra.....10.00

"BEST" QUALITY

Hand made by the most skillful workmen in Westley Richards' factory and embodying the best features known to the art of gun making. The engraving is finely and tastefully executed and the pattern may be modified or changed to suit individual taste. Westley-Richards special steel or Damascus barrels of the highest pattern and penetration. This grade can be furnished in 12, 16, 20 or 28 gauge.

No. B. With ejector, detachable locks and one trigger ..... Net **$441.00**
If with Whitworth steel barrel. Extra ..... " **40.25**
Extra pair of interchangeable detachable locks (in leather case) Extra " **47.25**

Delivery Prepaid in U. S. if Cash is Sent with Order at Above Prices

WESTLEY-RICHARDS ENGLISH GUNS

Westley-Richards' guns are hand made throughout; no two guns are just alike, each gun has an individuality of its own, which can only be contributed by the bestowal of personal skill and trained craftsmanship—by which means alone the high standard of excellence of workmanship, which distinguished the products of the ancient Guilds was assured—and no machine ever made can give these and other desirable qualities of the English hand made weapon.

As the prices increase, in like proportion do the quality of materials and the refinement in finish of each part follow. The lowest priced weapon is a well constructed, reliable shooting gun that any sportsman may be proud to own, but it is not of such good quality and fine workmanship as the higher priced weapons, which, besides being the finest shooting guns it is possible to produce, are through their workmanship, external beauty and intrinsic merit, works of art, standing in a class by themselves, each one a masterpiece of modern gunnery.

A large assortment is carried in stock in New York or specifications will be forwarded to England for prompt execution. The most popular designs are described on the following pages, but details may be altered to conform with the purchaser's ideas.

Hand Detachable Locks

The invention enables sportsmen to take out the locks of their guns for cleaning and oiling without moving a single pin. Simply detach fore-end and bottom plate and the locks can be lifted out by hand and as easily replaced. Extra pairs of locks are supplied to interchange with those fitted in the gun, enabling a sportsman, if so disposed, to have an extra pair of locks to interchange in the event of a possible accident to the locks of his gun, and also to have an extra pair of locks with a different weight of pull. Price of duplicate locks in leather case.....**$47.25**

The Westley-Richards New Patent Improved Reliable One-Trigger Mechanism

Westley-Richards & Company are the pioneers of a successful one-trigger mechanism; one that does not balk nor double; one that is not frictional; cannot be upset by recoil; is always perfect, and always acts the same. The latest design, which fulfills all the conditions of the original conception, and at the same time achieves the limit of simplicity—an enormous gain.

Perfect selective action, firing either right-left or left-right, or as many rights or lefts first as may be desired at the will of the shooter.

The highest and most satisfactory type of one trigger mechanism.

One-Trigger Mechanism is regularly supplied on the higher grade Westley-Richards Guns.

Westley-Richards Single Barrel Trap Gun

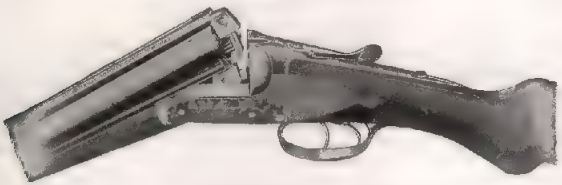
The Westley-Richards single barrel gun is the ideal arm for clay bird marksmen. It has the balance and "feel" of a double barrel gun and will successfully withstand the severe test to which a trap gun is subjected. It is not approached in quality, beauty or effectiveness by any other make.

WESTLEY-RICHARDS GUNS

Double Trigger Models

All Westley-Richards guns are made either 12, 16 or 20 gauge, full or modified choke or cylinder bore, 24 to 32 inch barrels as ordered. Weight according to length and bore.

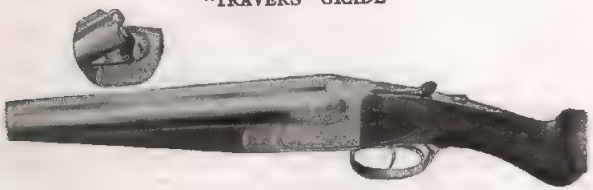
"FEDERAL" GRADE



Westley-Richards' Double Hammerless Ejector Gun, steel barrels, finely bored, fitted with Westley-Richards' celebrated ejector mechanism, automatic rocker top safety treble bite cross bolt action, solid joint-pin, Deeley-Edge fore-end bolt, plain hollow rib, neat line border engraving, straight or half-pistol grip, chequered walnut stock and fore-end, chequered horn heelplate, silver crest plate, shooting quality guaranteed. While low in price the "Federal" has the hall-marks of the famous Westley-Richards make and in balance, reliability and hard shooting qualities is unsurpassed by any other arm save only the highest grades of Westley-Richards.

No. F. With fixed locks, two triggers and ejector.....Net **$127.75**

"TRAVERS" GRADE



The Westley-Richards' "Travers" Ejector Hand Detachable lock gun is designed to meet the taste of those sportsmen who require an up-to-date hand-made English gun of moderate price, of attractive finish and embellishment, with a refined style of engraving. Fitted with steel barrels, hand detachable locks, two triggers. Anson & Deeley hammerless action, double under bolts and cross bolt, side clips or wings, on side of action, Deeley-Edge fore end snap, ornamental panels, fully engraved with scroll work, sunk checkered panels on stock with drop points and fancy checker.

No. T. Standard gauges, lengths and weights. Equipped with hand detachable locks, side clips, ejector and two triggers.....Net **$227.50**

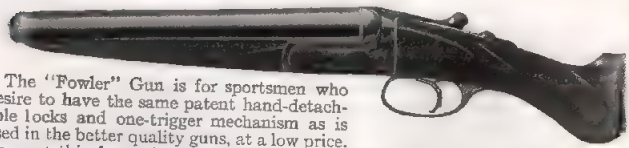
Delivery Prepaid in U. S. if Cash is Sent with Order at Above Prices

WESTLEY-RICHARDS GUNS

Single Trigger Models

12, 16 or 20 gauge, full or modified choke or cylinder bore, 24 to 32 inch barrels, weight according to length and size and individual taste. Straight or half pistol grip as ordered.

"FOWLER" GRADE, PLAIN FINISH



The "Fowler" Gun is for sportsmen who desire to have the same patent hand-detachable locks and one-trigger mechanism as is used in the better quality guns, at a low price. To meet this demand, we offer this gun, which is finished in the plainest manner, so that nearly all the cost is put into the material and actual mechanical parts. A thoroughly reliable gun in every way.

Special steel barrels, engine turned rib, line border engraving, plain checkering and finish, Deeley-Edge fore-end snap.

No. **FO.** With hand detachable locks, ejector, and one trigger **$224.00**

PLAIN ENGLISH FINISH BEST QUALITY

This gun stands in a class by itself -a masterpiece of modern gunnery. It is the ideal gun for a man of modest taste, who wants the best arm that money can buy without elaborate ornamentation. The superior quality and unobtrusive elegance of finish appeals to the sportsman of culture and refinement. LAWN MOWERS

*DIAMOND EDGE—BALL BEARING

GUARANTEE

DIAMOND EDGE Mowers are guaranteed against breakage in transit. We replace any part that breaks on account of flaw or other imperfections.

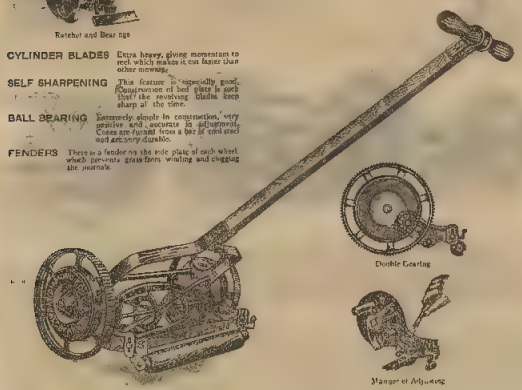
Ratchet and Bear ngs

CYLINDER BLADES Extra heavy, giving momentum to reel which makes it cut faster than other mowers.

SELF SHARPENING This feature is especially good. Construction of bed plate is such that the revolving blades keep sharp at the time.

BALL BEARING Extremely simple in construction, very positive and accurate in adjustment. Cones are formed from a bar of tool steel and are very durable.

FENDERS There is a fender on the side plate of each wheel which prevents grass from winding and clogging the journals.



Double Gearing

Manner of Adjusting

*DIAMOND EDGE—BALL BEARING

Ball Bearings: High Wheels, Self Sharpening; Gold and Seiger Reversible Blue and Crimson Trimmed

Ball Bearing Reel—With Five Extra Heavy and Wide Crucible Steel, Oil Tempered Blades, Self Sharpening. This Additional Width and Weight Gives Greater Momentum. Therefore it Cuts More Easily, and with Less Exertion than Other Machines. In Accurate Spacing and Light Running The Blades do Not Touch the Spur Reel Bearers do not come in contact with the Shear Cut. Result when the Reel Touches an Obstruction it Rebounds and in so Doing Does Not Throw the Obstruction Out of Line with the Cutting Bar.

Frame—Reliance Cast Iron Wheels Side Plates, Gear Castings and Adjustable Bed Plate, Strongly Braced and Reinforced, Malleable Iron Adjustable Bed Plate with Crucible Steel, Oil Tempered Cutting Bar. Malleable Iron Adjustable Roller Brackets. On the Inside of Each Wheel There is a Grass Shield which Revolves Direct to Keep Grass, Etc., from Winding Around the Axle.

Gears—Heavy Cast Iron Wheel Gearing, Steel Ball Bearing Box Axle Inside Geared, on Both Sides of Wheel. Enclosed Gear and Double Sliding Steel Pin Ratchet. Double Screw Adjustment for Gears and Pin Retainer. Steel Cross Shaft Roller with Steel Rod Axle. Best Steel Handle Bolts.

Handle—Made of Straight Grained Varnished Hardwood with Cross Bar Set in Malleable Iron Bracket and Bolted.

With Five Reel Knives 1¾ inches Wide; Diameter of Reel 6 inches; Diameter of Drive Wheels 30 inches; Front Bar 1¼ inch, Rear Axle ⅝ inch; Adjustable to Cut Grass to Lengths of ½ to 1 inch. Cuts Grass Standing 7 inches High.

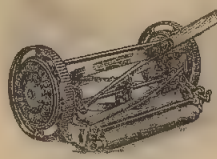
LAWN MOWERS

DIAMOND EDGE JUNIOR—BALL BEARING

High Wheel—Four Blade Reel

Bed Plate Adjustment

Ratchet and Bearings



Bed Plate Adjustment

This Machine is made in the Same High Class Material as Used in Our *DIAMOND EDGE* and is in every respect Equal in Quality. It is Fitted with the Same Style Dead Knife, the One Having the Raised edge and Giving a Clearance Back of the Edge which Prevents the Dead Knife from Becoming Dull, and this in connection with the Revolving Blades of Hardened and Tempered Crucible Steel, Results in giving the User a Self Sharpening Mower that should run in Domestic Use not less than a dozen Years without Requiring other attention than an occasional Tightening up of the Stationary or Bottom Knife.

The Machine is Fitted with 9 inch Spoked Wheels with Closed Center Protecting the Working Parts from Accumulation of Trash and Dirt. The Handle is the same as used in our Regular *DIAMOND EDGE* Machine, the Crossbar being Reinforced with Iron Braces. The Machine is Light and Strong and will Prove a Fit Companion for the well known *DIAMOND EDGE*.

Handle and Roller are of Straight Grained Hardwood, Highly Lacquered and Varnished.

Diameter of Drive Wheels 9 inches. Diameter of Reel 5 inches. Four Reel Knives, Width of Reel Knives 2 inch. Front Bar ¾ inch, Rear Axle ½ inch. Adjustable to Cut Grass ¾ to 1¾ inches. Cuts Grass Standing 8 inches High.

Handsomely Finished in Aluminum Gold and Red.

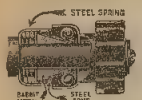
HIGH WHEEL—FIVE BLADE REEL



Automatic Ball Bearing Adjustment

Cut shows Side View of Stationary Cutter Bar and Shaft Lift

SELF SHARPENING

The Construction of the Crucible Steel Reel Knife is such that it continuously Sharpens itself against the Revolving Blades until it is completely worn Flat.

This Self Sharpening feature alone is worth its cost to the User as it saves the expense of having the Blades Resharpened.

Reel Plate Adjustment

Finish—Gold Bronze Decorated in Empire Red

The Wheels, Side Plates and Cutter Bar Ends are given a fine Coat of Gum Asphaltum Japan, and all Metal Points are Thoroughly Straightened and Reinforced in Order that there be no Excessive Weight Throughout the Carriage, which is so Detrimental to Good Mechanical Construction. Malleable Iron Rear Braces and Roller Brackets.

Frame—All Connecting Points and Bearings Perfectly Machined. A Second Cut is Taken on Each Operation to Insure Exact Dimensions to the 30th Part of an Inch. Shoulders are Milled on the Ends of the Steel Shafts Reel and Recesses are Milled in the Ends of the Cutter Bar. The Distance from Face Shoulder to the Center on the Right Reel is Precisely the Same as Given to the Ends of the Cutter Bar. Thus the Machine is "Face squared" and in Perfect Alignment able to Withstand the Hardest Service and Further Coupling Not Need.

Automatic Ball Bearing Adjustment—This is the Most Important Invention of Recent Years in Lawn Mower Construction. It Consists of a Hardened Steel Spring Working against a Collapsible Babbitt Sleeve around the Shaft and Inside Cone. At the Instant all Looseness is Taken Up the Sleeve Collapses on the Shaft thus Preventing any Further Vacant Motion, or Need for Future Adjustment so that the Reel will also Run Level Throughout the Life of the Blades. The Adjustment Continues Automatic for Years, thus Insuring the Best Operation always. Additional Ball Bearings are Used to Support the Weight on the Reel Shaft. Operating on the Sense of Touch can be any Two Inside Nuts Set Tight. Adjustment is Easy Always for the Adjustment Is to Become the Rule of Good Mowers by those who do not Understand. While the Diamond Device Is Fool Proof in Construction It is Completely Enclosed so that an Ignorant Operator can not Get at It even Though He Tries to Do So. Never Needs Oiling. Always Ready for Service

The Ball Bearing Cones are of High Speed Steel, Tempered Under a Secret Process and Guaranteed not to Show the Slightest Wear During the Life of the Mower. The Bearing is Formed by Inserting Steel Balls in a Cone Having a Steel Track, which Rotates Through a Set of Steel Balls. Simple, but Most Powerful and Durable Method in Existence. Ground on Each Cone.

Five Extra Heavy Cutting Knives of Finest Crucible Steel, Oil Tempered, Shear Cut, **Self-Sharpening** and Ground Under Water by the Same Process Used in the Manufacture of the Best Cutlery.

Patented Spring Adjusting Cutter Bar. Five Wheels. Inches Diameter of Rear Wheels. Reel Shaft Inch. Adjustable to Cut Grass to Lengths of 5-16 to 1 1/2 inches. Cuts Grass Standing 6 to 7 Inches High.

Hard Maple Handle and Roller, Carefully Shellacked and Varnished.

Automatic Ball Bearing Adjustment

*RUGBY BALL BEARING

High Wheel, Four Blade Reel

Finish—Steel Body Gold Wheels Decorated in Light Green. A Medium Priced Mowing Machine of Medium Weight and Easy Running Cut. Four Blade Reel. Frame Construction. All Parts Accessible for Cleaning, Oiling and Adjusting. Light Operation by Patent Mechanical Features. Ball Bearing Adjustment Is Easily Accessible Without the Least Particle of Dirt Getting Into It. Fine Quality Steel Bed Plate Possible Mixture of Grass and Dirt to the Wheel Side Wire. Pinion and Cutter Bar Castings Are Guaranteed Not to Separate. Bottom of Cutter Bar Is Planed to Insure Smooth Running. Mechanism Is Entirely Enclosed. Handle Is Adjustable and Is Finished in Hardwood Stained and Varnished.

Ball Bearing Adjustment—This Is the Most Important Invention of Recent Years in Lawn Mower Construction. It Consists of a Case Hardened Steel Spring Working Against a Collapsible Babbitt Sleeve Armored [illegible] Thereby Preventing Any Further Pressure than Is Necessary for Proper Adjustment, so that the Reel will Always Run Easily. The Simplicity of the Means by Which the Adjustment Is Made Is Also Noteworthy. Instead of Screwing the Bearings Ahead Nicely Adjusted and Then Locking Them in Position, the Operator, by Means of His Sense of Touch Can Screw Up the Bearings Until They Are Just Right for Hand Adjustment. Many Users Prefer This Method to Any Other Kind of Adjustment. Ball Bearing Adjustment Is Unnecessary Adjusted Nicely Adjustment Is Completely Free from Dust as Dust Cannot Enter the Bearings Even though He Tries to Do So. No Screws to Lose Out. A Sure Rule for Power.

Bed Plate Adjustment

Drive Wheels, Side Plates and Cutter Bar Castings of the Best Quality Gray Iron. Reel Blades are Malleable Iron Perfectly Fitted and Riveted. Reel Bearings Steel Balls, Cut Steel Bushings. Handle is Ash [illegible]

LAWN MOWERS

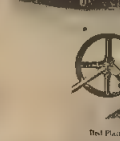
*RED CLIPPER—PLAIN BEARING



Reel Place Adjustment

This Mower is a Popular Durable and New Open Type Construction, Very Light and Easy Running, Yet Built with a Refined Casting That are Thoroughly Strengthened. Flowers are Cut Through the Center of the Side Plates. Open Type Gears to Insure Exact Dimensions. Through which the Reel Shafts Pass. Shafts are Strong Shrub Bar and Reel Shafts for Durability When Handling Heavy Lawn Grass. Between the Reel Shafts and Side Plates are Cones that Have a Contact to Play and a Set Screw Passing through the Side Plate and Bearing on the Cone to Take Up Wear. Makes a Strong and Immovable Frame Construction. Holes Bored in the Bearings are Accurately Placed so that the Bearings will Line up Right. Assures Easy Running and Exact Diameter of Frame. The Drive Wheels are Held in Place by a Malleable Lock Washer and Spring Cotter.

Adjustable Malleable Iron Roller Brackets. Reel Braces are of Malleable iron securely Riveted to the Cutting Blades and Steel Shrub Bar Passing Directly Through the Reel, Producing the Strongest and Most Rigid Reel that is Possible to Build. The Reel is Equipped with Adjustable brass Bearings and Screws for Taking Up all Wear.

Screw Adjustments Throughout. A Positive and Durable Ratchet Governs the Reel Motion. Good Quality of Materials and Workmanship. Easy Guaranteed. For Better Quality and Value for the Money is offered in Lawn Machines than any other Lawn Mower Made.

*RED CLIPPER—PLAIN BEARING

High Wheel, Four Blades

Empire Red with Gold Bronze Wheels and Decorations.

Diameter of Drive Wheels 9 inches. Diameter of Reel 8¼ inches. Shrub Rod ⅝ inch. Reel Shaft ⅝ inch. Four Cutting Blades of Crucible Steel. Careful Tempered, Accurate Grinding and Set Assuring

LAWN MOWERS

CRESTLAWN—BALL BEARING

HIGH WHEEL—FIVE BLADE REEL

BALL BEARING REEL

BALL BEARING WHEELS

In Constructing this Lawn Mower the Manufacturers have Combined the very Highest Grade of Materials with the most Scientific Methods of Construction known to Mechanical Skill. The Parts making the Frame are of Pressed Steel and the Cast Bed Plate is Machined to the Side Plates Forming an Automatic Interlocking Adjustment, which Cannot be Jarred or Twisted out of Alignment.

This Mower is made with Extra High Drive Wheels which Turn on Adjustable Ball Bearings Arranged to Run Dustproof. Reel Runners are Equipped with Self Adjusting Ball Bearings which take up the Wear Instantly without any Attention on the Part of the Operator. The Ball Bearing Reel is now Covered with a Cap to Prevent Dust and Grass.

The Reel has Special Quality High Grade Tool Steel Oil Tempered, and Self-Sharpening Steel Knives. These Knives are Securely held in Position at all Times and will always give a Clean Shear Cut.

The Steel Bed Knife is made with Raised Lips which adds Strength and Rigidity.

All Materials are First Grade and the best money can Buy.

The Front Cross Bar and Reel Shaft are made of Cold Rolled Shafting.

The Machine is Geared on Both Sides and has Double Steel Sliding Pin Ratchet. Steel Ball Bearing Cup with Ball Retainer Securely Set in the Reel Heads with Tempered Steel Cones Inserted in the Side Plates of the Machine.

Adjustable Hardwood Roller, Wrought Steel Handle Braces; 3/4 Foot Varnished Hardwood Handle with Cross Bar Set in a Malleable Iron Bracket and Bolted.

Silver and Gold Bronzed; Empire Red Decorations.

Diameter of Drive Wheels 11 inches; Diameter of Reel 8 inches; Shrub Rod Inch; Reel Shaft Inch; Adjustable to Cut Grass to Lengths 3/4 to 1¾ Inches, Cuts Grass standing 7 Inches High.

Width of Cut, Inches	14	16	18	20

Each	$18.00	18.50	20.00	22.00

Ball Bearing Drive Wheel

FENDEN—BALL BEARING

High Wheel—Four Blade Reel

Special Interlocking Frame

Shoulders are turned on the Shrub Rod forming a strong Frame construction. On the ends of this heavy Rod, which pass through the side plates, are mounted the Ball Bearing Drive Wheels. Hence the strain caused by the wheels in motion falls on the shaft and not on the side plates. This obviates the often occurring trouble of the Cutter Bar being thrown out of adjustment by vibration in the frame of the Mower.

The revolving Blades touch evenly along the entire length of the lower Knife at all times, the reel bearings being continually adjusted by a Self-Adjusting device and only in such a manner can a mower be Self Sharpening.

Finished in Green, Gold, Silver and Red

Four revolving Blades of Vanadium Crucible Steel, Oil Tempered. Stationary blade has unturned lip or edge. Cutterbar actuated by cap and bottom screws, making it impossible to spring the Bar, on which Mowers adjusted by screws on each side of the pivotal point. Extra wide case hardened Pawls, insuring a ratchet of long life and durability.

✠FENDEN HORSE MOWER

Guaranteed to give the best satisfaction of any horse power mower on the market. The frame construction is the strongest that is possible to build and is reinforced at each end with heavy steel bars. All parts accurately machined and fitted. Equipped with the only graduated raising and lowering device, enabling the operator to instantly set all the cutting heights or allow the knives to pass over a stone.

Both the bottom knife and the reel are demountable without disturbing the frame of the mower. Reel bearings turn in adjustable split brass bushings. Four revolving blades 5-16 of an inch in thickness and made of the best knife steel obtainable, vanadium-crucible analysis, oil tempered. Double riveted malleable reel braces throughout.

Fitted with a train of three gears and durable triple pawl ratchets. Diameter of drive rollers 15 inches. Reel is 8 inches in diameter and is quickly adjusted to the proficiency or bearing light, the adjusting screws being easily accessible and seldom require attention.

If desired, this mower can be furnished with five revolving knives and bottom knife with upturned edge or lip.

Fully equipped with power seat shafts and side-draft attachments.

✠PUTTING GREEN MOWERS

PENNSYLVANIA

Complete With Grass Box

Cut shows Mower with Grass Box Attached

Cut shows Mower with Grass Box Detached

Note

The Grass Boxes or Catchers which are furnished with these Mowers are composed of two parts —the Box proper and the Shield or Deflector, to deflect the Grass forward into the Box. They are made of Sheet Metal with Wood Endboard are easily Attached and Detached

The new fad of making putting greens on Golf Links wavy or undulating has revived a demand in some sections, originally in Great Britain, and more recently in this country, for the old roller type, forward cut lawn mowers.

The Pennsylvania Putting Green is an exact model of the Pennsylvania Grand Horse Mower, modified only to operate by hand.

The Stationary Knife is Bolted Rigidly to the Frame, making the Adjustment entirely with the Cylinder. The Journal Boxes or Cylinder Bearings are Self Aligning, Insuring a Perfect Cutting Edge the Entire Length of the Blades. This Mower can be set to cut 3-16ths of an inch, adapting it for Putting Greens, Tennis Courts, Cricket Crosses and other work requiring an exceptionally close and smooth cut. It can also be used as an edge trimmer for the ordinary lawn. The Front Wood Roller better supports the Machine in mowing terraces, but can be readily removed if desired leaving only the casters as supports.

All Blades of this Mower are Crucible Tool Steel, Oil Tempered and Hardened

Diameter of Rollers 7 inches; Diameter of Cylinder 6½ inches, Six Blades

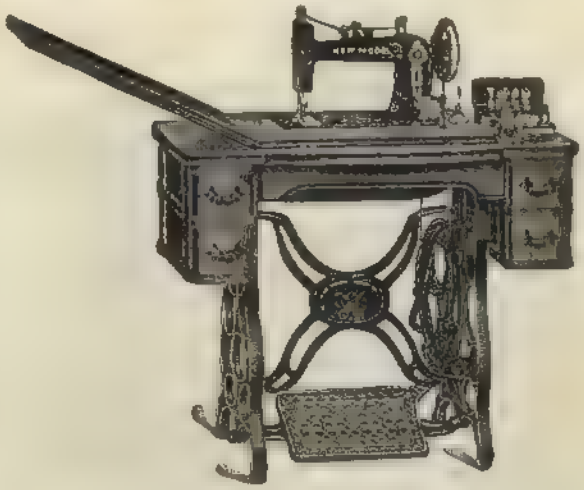
New Model Sewing Machines

The Best Constructed, Low-priced machine on the market



A Handy Machine that meets every requirement of the home

The Best Sewing Machines for the Money Ever Sold

Our No. 160, New Model

Or lowest priced machine is, in our opinion, deserving fully of its name. We believe it to be the best low priced machine ever offered Those who are in need of a substantial machine which they can sell at a very low price need not look further than our machine, as it fills the bill exactly.

The Head

Its sewing qualities are fully guaranteed for ten years, and it will do good work many years after the guarantee has expired.

Woodwork or Case

Is made of a good quality of oak, nicely polished. Has four drawers with attractive oxidized pulls, with one handy push drawer in center. Has hand lift drop head, head dropping into a dust-proof receptacle when it is lowered.

Stand

Is of the substantial Point Bearing type with efficient treadle, brace and belt guard. It is finished in black enamel.

Attachments and Accessories

A complete set of each of the well known "Greist" make are furnished free with No. 160 machine. They consist of the following: One tucker, one ruffler with shirring plate, one hemmer set (four widths), one binder, one braider, one thread cutter, one quilter and one hemmer which is also a feller.

No. 160—3 drawer

We are also in position to furnish our customers with this same machine in a three (3) instead of a five drawer case, the same being our No. 160-3 drawer.

The Accessories

Furnished Free, also one gauge, one gauge screw, one oil can (filled), one combination screw driver, six bobbins, one extra package of needles and one instruction book in five different languages. Each of these attachments and accessories are tested fully before it leaves the factory. Perfect work is thereby assured. Weight, crated ready for shipment from factory near Chicago, 120 lbs.

Guarantee

Full 10 year binding guarantee goes with this machine.

Guaranteed Ten Years

Our Peerless

No. 138 Automatic Drop-Head Sewing Machine with full set of attachments Free—guaranteed for ten years—equal to any $35.00 machine. This wonderful **PEERLESS** No. 138, is a sewing machine that will meet all the requirements of any family. It has all the latest improvements and combines simplicity, durability, speed, strength and beauty. It is unequalled for ease of management and capacity for wide range of all kinds of sewing, being fitted with the latest style head. The Head is fitted with the newest, improved automatic bobbin winder, as well as an automatic shuttle.

Quality will be remembered long after the price is forgotten

The Cabinet

Is constructed of solid oak, finished in a rich, dark golden. It has four drawers of ample size, all fitted with locks with beautiful carved fronts; also has a drop apron front. It is fitted with our automatic lift, by which the head is brought up into working position by simply raising the lid or top leaf. It automatically locks when the head is brought into position and is perfectly solid and secure. When through using, the head is again returned to the interior of the case by simply closing the top lid down.

The Stand

Is of the latest improved ball-bearing type, with ball-bearing steel pitman. The balance wheel is protected by a wide dress guard or shield. The specially hardened ball-bearings make it light running, noiseless and do away with the rattle and noise, usually found in point bearing machines. Remember, all attachments are included Free at the price quoted.

Fully Guaranteed

With each machine we send an iron clad guarantee bond, fully signed and sealed, which is an absolute protection for a period of 10 years against defects of material or workmanship. We agree to duplicate any part upon return of same to us, if it becomes defective within this period of time. This guarantee covers all parts of the machine with the exception of the shuttles, needles and bobbins, which, are of course, subject to natural wear. The 10-year guarantee is just as good as the unlimited one, because it stands to reason that if any part is defective, it is going to show its defects before the machine has been used 10 years. If your customers want a high grade, inexpensive machine, this is the one to order.

Shipping weight, 125 pounds.

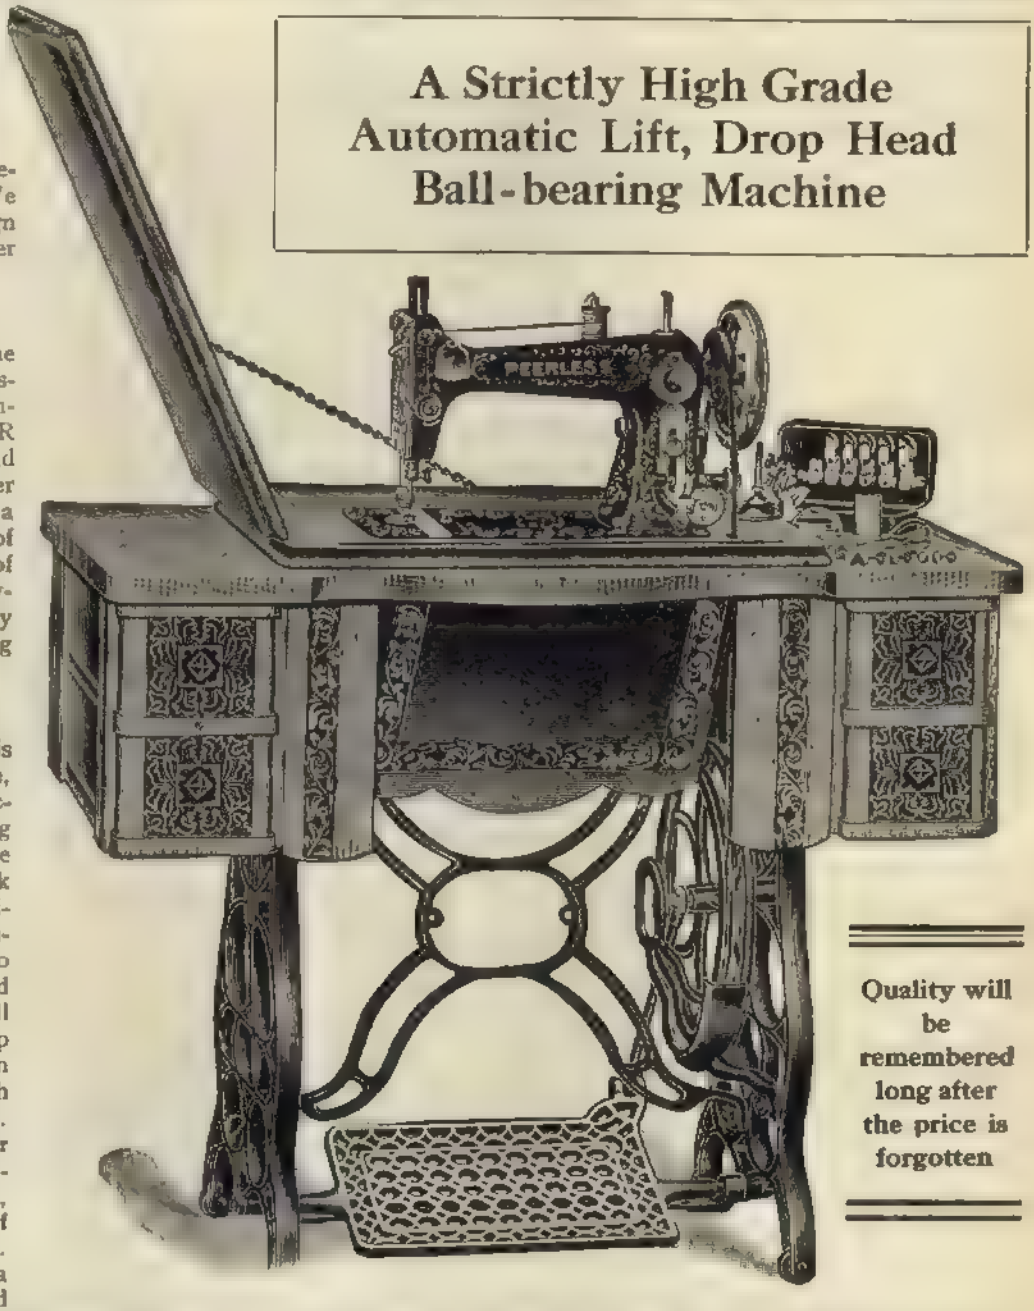
A NEW DESIGN

No. 128¼ Peerless

Machine we believe is a fitting mate to our leader PEERLESS shown on the opposite page. The PEERLESS is a brand new style specially designed and created for us. We believe that for beauty of design it is not equaled by any other machine made.

A Strictly High Grade Automatic Lift, Drop Head Ball-bearing Machine



Quality will be remembered long after the price is forgotten

Head

The PEERLESS head is the same in construction and possesses exactly the same mechanical features as OUR OTHER PEERLESS head. This head cannot be equaled by any other make for turning out steadily a perfect volume of any kind of sewing that may be required of it. Its many time and labor saving improvements immediately appeal to all purchasers, causing them to take to it at once.

Woodwork or Case

The entire table of this PEERLESS No. 128¼ machine, in finish, design and construction, we believe is deserving of particular merit. It is made throughout of quarter sawed dark Golden Oak, which has a beautiful grain. It has our special automatic steel cable lift tested to 800 pounds, four extra wide and high drawers extending the full width of the table and swell drop apron front. The drawers, apron and pilasters are all decorated with beautiful hand carved designs. The drawers being fitted with our exclusive diamond shaped oxidized drawer knobs and plates, which add greatly to the beauty of this already handsome machine.

A 22-inch tape measure in a pearl finish is conveniently placed on the table. The stand is full ball bearing in pitman and drive wheel. Pitman is all steel, highly polished and is full ball bearing, has substantial brace, extra broad treadle and an efficient dress guard The same is finished in beautiful black enamel.

Attachments and Accessories

A complete set of each of the well known "Griest" make are furnished free with our regular PEERLESS machine They consist of the following: one tucker, one ruffler, with shirring plate: one hemmer set (4 widths), one binder, one braider, one thread cutter, one quilter and one hemmer, which is also a feller.

The Accessories

An oil gauge, one gauge screw, one oil can filled, one combination screw driver, six bobbins, one extra package of needles and one instruction book in five different languages. Each of these attachments and accessories are tested fully on the machine before it leaves the factory. Perfect work is thereby assured.

Guarantee

A positive 10 year binding guarantee goes with the PEERLESS It protects fully both the seller and the purchaser. Shipping weight, 125 pounds.

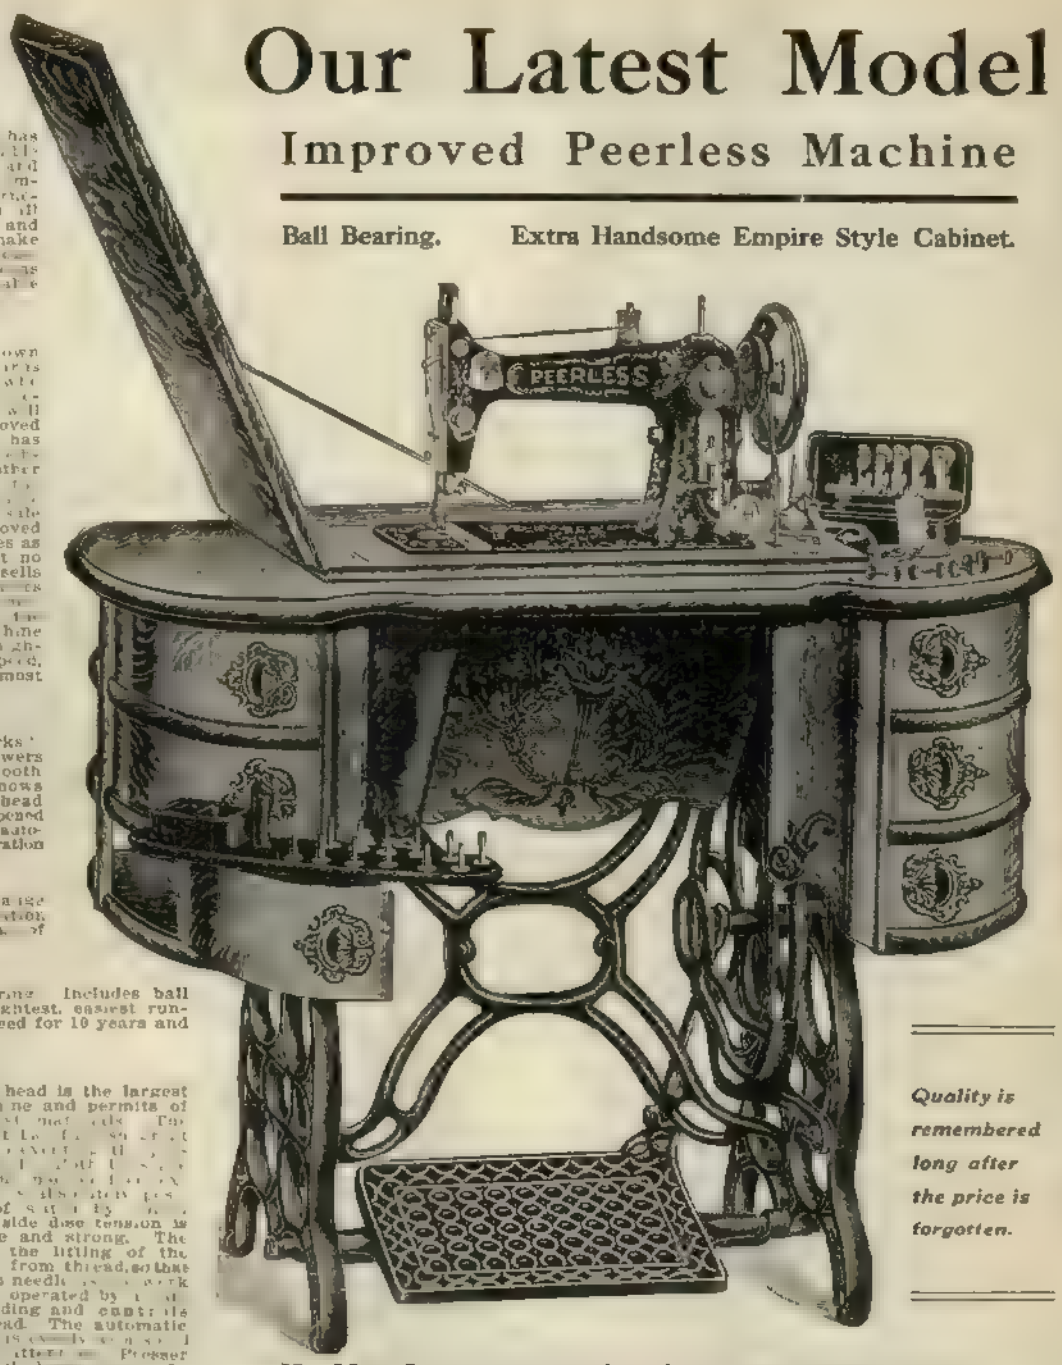
Our Latest Model

Improved Peerless Machine

Ball Bearing. **Extra Handsome Empire Style Cabinet.**



Peerless New Ball Bearing Machine

This is the famous machine that has been attracting so much favorable comment among the dressmakers and people who are interested in the improvement of sewing machine construction. Here is a machine that has all the improved up-to-date features and wonderful patents that go to make sewing a pleasure instead of a drudgery. All of the advanced ideas that have been found to make every woman to enjoy fine sewing.

Highest Efficiency

In every way it costs no more to own a Peerless than any dressmaker or tailor who is living by sewing, and no man who wants his wife to be spared all unnecessary labor in her sewing work will appreciate this wonderful improved **PEERLESS.** This line of machines has [illegible] through high efficiency [illegible] there are other high grade sewing machines [illegible] there are no other machines offered for sale today that have so many improved features, so many excellent qualities as this machine. It is also true that no other high grade sewing machine sells for so little money. **Peerless** machines are sold [illegible] The Automatic Lift, Automatic Drop, the best product of the most advanced ideas in sewing machine building. They are absolutely the highest grade, capable of the greatest speed, and the lightest running and the most durable sewing machines made.

See the Automatic Drop

Do you see how simply it works? Just close the lid and the head lowers out of sight, and you have a smooth table top. The picture here shows the lid raised part way and the head partially lowered. When the lid is opened flat, the head is up even with top and automatically locked in place ready for operation.

Free Accessories

include the following: 1 gauge, 1 gauge screw, 1 oil can (filled), 1 [illegible] screw driver, 6 bobbins, 1 package of needles, and 1 instruction book.

Ball Bearing

This machine is full ball bearing. Includes ball bearing steel pitman. It is the lightest, easiest running machine made. It is guaranteed for 10 years and will last for generations.

Sewing Mechanism

The high arm on the **Peerless** head is the largest obtainable in family sewing machine and permits of the easy and free use of the [illegible] The cuff [illegible] to the [illegible] sewing [illegible] The [illegible] stitch regulator [illegible] most [illegible] The [illegible] figure' gauge at the right. The side disc tension is [illegible] and adaptable yet simple and strong. The automatic tension release allows the lifting of the presser foot to remove all tension from thread, so that the thread can not break or strain needle when work is removed. The [illegible] take-up is operated by [illegible] and not by [illegible], is self-threading and controls perfectly any size or kind of thread. The automatic bobbin winder will wind bobbin [illegible] of thread while sewing and without [illegible] Presser foot [illegible] stand [illegible] while [illegible] winding. No [illegible] to remove work from machine when winding bobbins. The [illegible] extra steel, [illegible] The self threading shuttle [illegible] with spring tension holding little adjusting. No [illegible] to [illegible] thread through. It takes an extra [illegible] parts of the **Peerless** head are standard [illegible] the best [illegible] obtainable. This is the best sewing machine head in the world.

Quality is remembered long after the price is forgotten.

Has More Improvements than Any Other Machine Made.
THIS SIX DRAWER PEERLESS AT PRACTICALLY FACTORY COST.
Easiest Running, Handsomest and Biggest Sewing Machine Value of the Age.

The Cabinet

The beauty of the quartered oak used and the workmanship and finish of the No. 29½ sewing machine cabinet is the equal of a piano case. It is built to hold the finest sewing machine arm in the world and nothing has been spared to make it worthy of the name it bears.

Spool Tray Free

As shown on middle left drawer. Every woman using a sewing machine will readily appreciate this convenience. It is made of hard wood, [illegible] The [illegible] and holds a [illegible] It has a box for [illegible] [illegible] and [illegible] necessary. It is impossible to [illegible] Styles No. 29½ and 29 **Peerless** machines.

Automatic Door Locks

The wonderful **PEERLESS** sewing machine equipped with patented automatic drawer locking device of the makers. It is covered fully by the [illegible] **cannot be found with machines of any other make.** This is only one of the [illegible] to be gained by buying this **PEERLESS** sewing machine [illegible] with Fort Dearborn W. & C. Co.'s buying ability which gives **our** customers [illegible] impossible to secure elsewhere.

This wonderful automatic drawer locking device locks all six drawers **automatically** when lid and head are down and opens them all automatically when head is up ready for sewing and lid is raised. There is no vexatious loss of keys with this wonderful **PEERLESS** machine, and little ones who [illegible] of mind who sometimes borrow screw drivers and other accessories and attachments to repair roller skates or bicycles after [illegible] located the ordinary sewing machine key, are completely non-plused by the Famous Automatic Drawer Locks of the **PEERLESS** machines Nos. 29½ and 29.

No. 29—We are also in position to furnish this same machine in a four (4) instead of a six drawer case. The same being our No. 29. It is absolutely the same machine in every respect as No. 29½ shown in above illustration except that it has four and not six drawers. No. 29 is an exceedingly popular style and the Famous Spool Tray and Automatic Drawer Locking Device are furnished free with it same as with No. 29½.

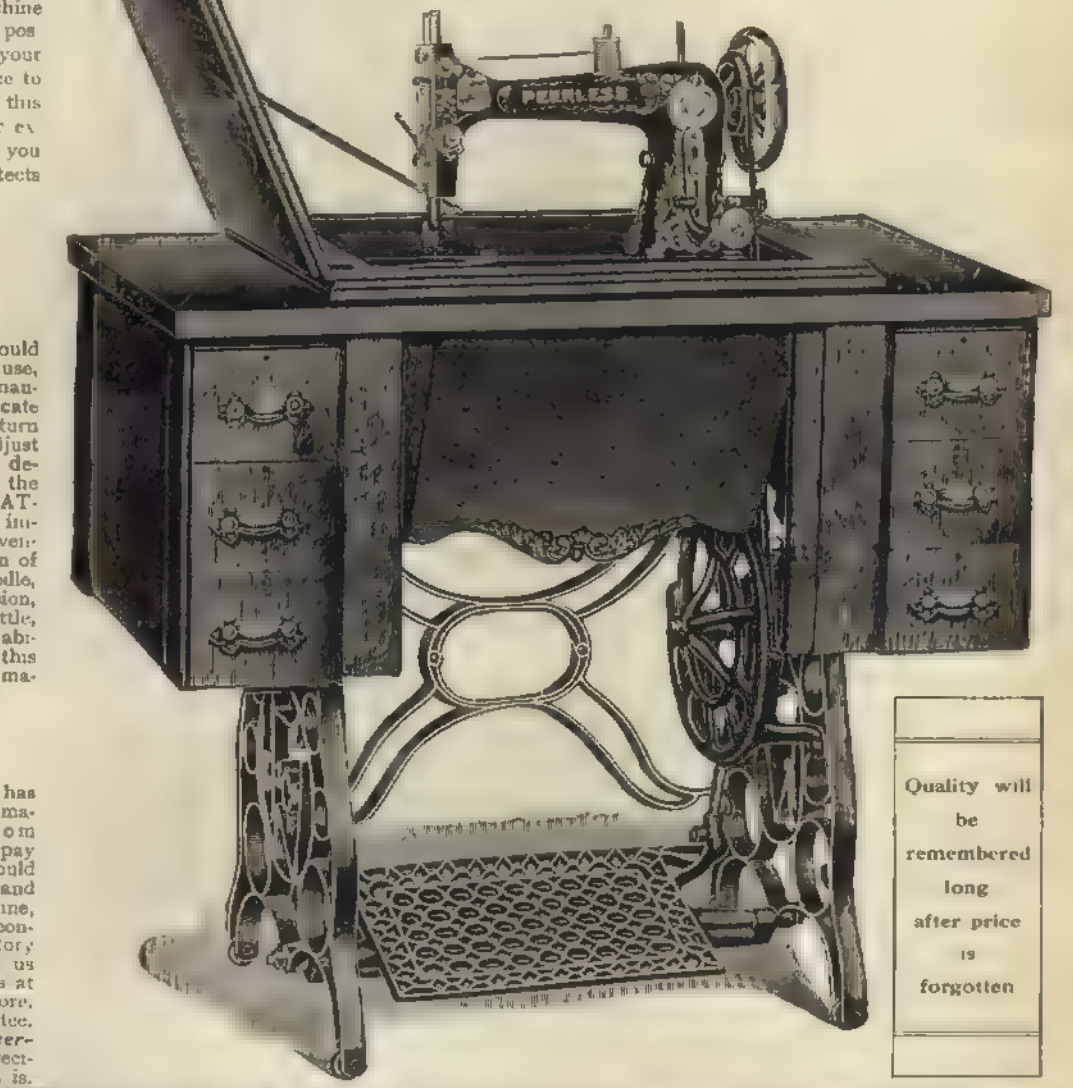
We feel absolutely positive that once in your possession your customer will select it in preference to any other. If you do not find all this to be true, ship it back at our expense and we will refund the money you have paid. Our legal guarantee protects you

Handsome Colonial Design Machine

A Beautiful Ornament A Wonderful Machine



Our Iron Clad 10 Year Guarantee

accompanies every machine. Should any machine, with proper care and use, prove defective in material or workmanship, we hereby agree to duplicate any part that proves defective on return of same, and if necessary will re-adjust at our factory, free of charge, any defective machine if returned within the time specified. HAS ALL THE LATEST IMPROVEMENTS. Every improvement that modern skill has invented is embodied in the construction of this remarkable machine. The needle, the takeup, bobbin winder, the tension, automatic tension release, the shuttle, ball bearing stand and the elegant cabinet are so perfectly made as to make this ***Peerless*** machine the best sewing machine on earth. Has automatic lift.

Our Low Price

The ***Peerless*** No. E 13 machine has more modern improvements than machines sold by canvassers at from $45.00 to $50.00. If you were to pay more than $50.00 elsewhere you would not get one as completely perfect and as high grade as our ***Peerless*** machine, No. E 13. The fabulously large contracts we made with the great factory that makes our machines enables us to place them before our customers at an actual saving of 50% or more. This we most emphatically guarantee. WE TELL YOU all about the ***Peerless***, No. E 13, so you can fully appreciate what a very fine machine it really is. It combines simplicity, durability, reliability, speed, strength and beauty. It is unequaled for ease of management and capacity for wide range of work. Any plain or fancy work that can be accomplished on the high priced canvassers machines is easily performed on our ***Peerless***, No. E 13, machine. Hemming, tucking, ruffling, binding, shirring, hemstitching, quilting, embroidery and all sorts of fancy work that is done with floss, chenille, etching, zephyr, silk, etc., are all easily done. It is a thoroughly first class high arm machine that will meet all the requirements of any family. It possesses all the late advantages and improvements such as full length arm head, patent stop dise tension with thread retainer, automatic bobbin winder positive four motion feed, large self threading cylinder shuttle, set setting flat shank needle, positive take up, improved stitch regulator all with adjustment from 8 to 32 stitches to the inch. Loose pulley device for winding bobbin without removing goods from under the needle. Ball bearing rubber stand and ball bearing steel pitman. Has beautiful quarter sawed oak cabinet and latest improved automatic lift.

Quality will be remembered long after price is forgotten

E 12. We are in a position to furnish our customers with this same machine in a four 4 drawer case instead of six drawers. The same being our No. 12 "B" type head.

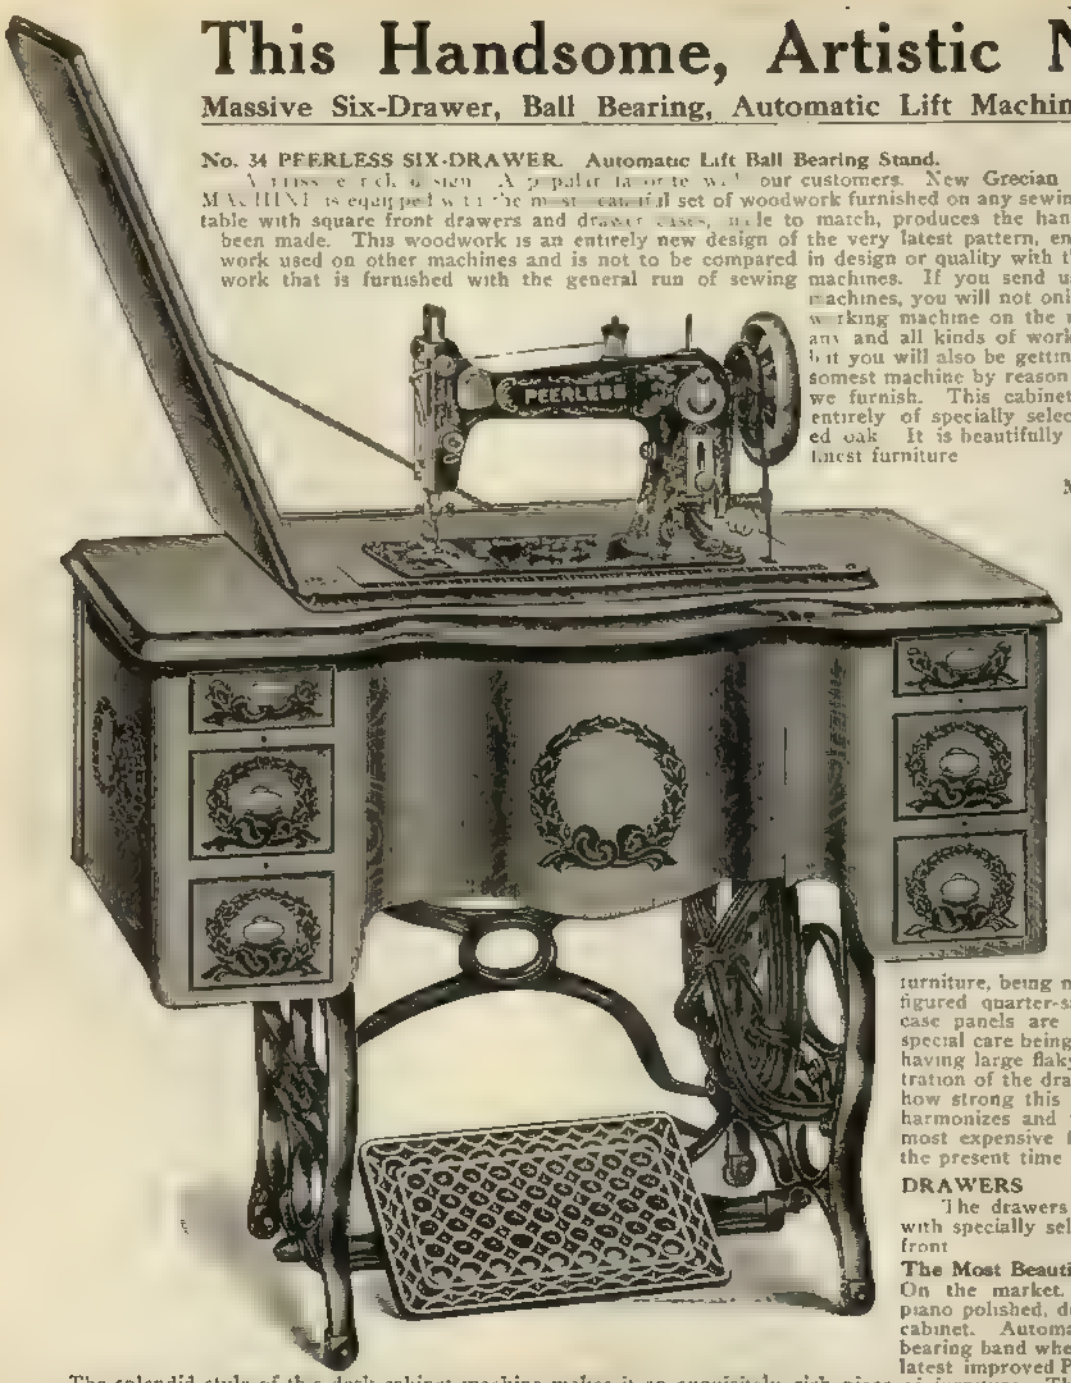
This Handsome, Artistic New Style

Massive Six-Drawer, Ball Bearing, Automatic Lift Machine, at only $55.00



No. 34 PEERLESS SIX-DRAWER. Automatic Lift Ball Bearing Stand.

A massive and rich design. A popular favorite with our customers. New Grecian style wood-work. Our No. 34 MACHINE is equipped with the most beautiful set of woodwork furnished on any sewing machine. The massive square table with square front drawers and drawer cases, made to match, produces the handsomest cabinet that has ever been made. This woodwork is an entirely new design of the very latest pattern, entirely different from the wood-work used on other machines and is not to be compared in design or quality with the cheaper and inartistic wood-work that is furnished with the general run of sewing machines. If you send us your order for one of these machines, you will not only be getting the finest and best working machine on the market, a machine that will do any and all kinds of work with the greatest satisfaction, but you will also be getting the most attractive and handsomest machine by reason of the new cabinet work which we furnish. This cabinet is a work of art, being made entirely of specially selected, nicely figured, quarter-sawed oak. It is beautifully finished, the equal of the very-finest furniture.

MATERIAL

The material is specially selected, beautifully grained, flaky figured, quarter-sawed oak, only the best of material of this kind is found on the woodwork turned out in this particular style.

THE TABLE

The table is double the thickness used on ordinary sewing machines and the French roll at each end blends harmoniously with the rounding corners and the general outline of this cabinet. The square drawer fronts with drawer cases to match give distinction in character to this handsome set of woodwork.

DRAWER CASES

The drawers are enclosed in the most handsome drawer cases ever made for sewing machine furniture, being made of specially selected, highly figured quarter-sawed oak stock. The drawer case panels are made of quarter-sawed veneer, special care being taken to use only those veneers having large flaky figures. A glance at the illustration of the drawer cases will show you at once how strong this construction is and how well it harmonizes and fits in with the very finest and most expensive furniture that is being made at the present time.

DRAWERS

The drawers are made of fine clear lumber with specially selected figured quarter-sawed oak front.

The Most Beautiful Cabinet Sewing Machine
On the market. With magnificently modeled, piano polished, double swell front, quartered oak cabinet. Automatic lift of latest design. Ball bearing band wheel and Pitman and finest quality, latest improved Peerless "B" Head.

The splendid style of this desk cabinet machine makes it an exquisitely rich piece of furniture. Think of having the most perfect sewing machine money can make, every late improvement of merit, every time and labor saving feature in a cabinet of such artistic worth and elegance that its beauty is rarely duplicated in the choicest and highest priced furniture.

CONSTRUCTION

This cabinet is made in the finest manner. The joining is perfect and adds to the artistic merit of the cabinet. While the expert artisans employed in making this cabinet kept beauty of design constantly before them as the ideal to be realized, no labor, pains or expense has been spared to make this an extremely durable cabinet suited to the hardest and longest service to which it can be put. Exquisitely finished with highest grade piano polish.

LIFT. The latest automatic type; simple, very strong and easy to operate.

HEAD

This machine has the very latest improved head with best type automatic bobbin winder; automatic tension release; delicate, simple and adaptable side disc tension; positive take-up operated by cam and self-threading and controlling perfectly any size or kind of thread, capped needle bar and presser bar absolutely accurate in stroke; positive four-motion feed extending on both sides of the needle. Shuttle is extra large, polished, gliding, self-threading, and takes an extra large bobbin. High arm, the largest used on any family machine; plenty of room for easy handling of bulkiest material. Can be oiled by swinging sliding plates in head. Nickeled, removable face plate. Automatic stitch regulator. Highest grade black enamel finish, with beautiful colored decorations. Richly nickeled trim. See illustration and complete description on another page.

BALL BEARING

The band wheel is fitted with finest ball bearings in which the best perfectly ground tempered steel balls and tempered steel cones are used. Pitman is made of best steel with best adjustable ball bearings. Hangers are securely mounted.

ATTACHMENTS FREE

With this magnificent machine a complete set of the latest improved "Gricst" nickeled steel attachments in fancy velvet lined box as described in another paragraph is also furnished. Shipped direct from factory near Chicago, Ill., securely wrapped and crated in a careful manner so that there is no danger of marring the woodwork. Shipping weight, 130 pounds.

CROSS-CUT SAWS

ATKINS SEGMENT GROUND SILVER STEEL

Made of High Grade Crucible Steel, Evenly Tempered, Carefully Ground, Sharpened and Set. Polished and Etched. Segment Grinding Consists in Grinding Away Metal on Line of Top Plate, Leaving Back of Tooth Same Thickness as Back of Saw, Except at Ends and Allowing for Wear on the Teeth Side, Without Making the Saw Thinner in the Center than at the Ends.

Made in Silver Steel Only

CROSS-CUT SAWS

SIMONDS MFG. CO. CRESCENT GROUND

Made of Highest Grade Crucible Cast Steel, Oil-Tempered, Hand Filed and Set and Highly Polished and Etched

The Improvement in the Simonds Crescent Ground Cross-Cut Saw Consists in Grinding the Saw a Crescent Lines, Parallel to the Cutting Edge, as Shown in the Cut Marked "Crescent Ground," in which case the Teeth are of Even Thickness Throughout the Entire Length of Saw while the Blade is Ground Thinner on the Back, and is Equal Thickness or Tapers Slightly from the Teeth to the Back. Being Two Gauges Heavier and Consequently Stiffer at the Ends, the Occasional Set Required for Clearance, in Felling Trees is Reduced to a Minimum, Thus Rendering it Less Liable to Buckle and Run Crooked, as well as Preventing Cracking at the "Buckle" and, for Felling Trees it Has Been Demonstrated that it is Far Superior.

No. 23—CANADA PATTERN LANCE TOOTH, PERFECTED

Tree Brand

No. 1081 Tree Brand Razor assortment, weight about 1¾ pounds.....per case, **$12.00**

Comprising this assortment are razors with fancy handles and the best possible selection of blades. The front sides of all blades are ground as polished. The display cases are handsomely made in imitation alligator with hinged glass top

1847 ROGERS BROS.

"Silver Plate That Wears"

Vintage Pattern

French Gray Finish.

One of the most popular designs in the history of silver plated flatware. The employment of the grape clusters, leaves and tendrils is in eminently good taste, affording a pleasing deviation from the conventional.

The entire line made in this celebrated pattern quoted below:

The following are put up one dozen in carton boxes. Any quantity however may be had at the per dozen price quoted.

			Per doz
No. 4188	Tea Spoons,	XS triple plate	$8.64
No. 4189	"	XS quintuple "	9.36
No. 4190	Dessert "	XS triple "	12.24

1847 ROGERS BROS.

"SILVER PLATE THAT WEARS"

Charter Oak Pattern

French Gray with Bright Bowls, Titan and Shield

This pattern possesses an unusual degree of character. The oak leaf and acorn are combined in a graceful design that lends itself readily to the somewhat unusual finish. It is a very desirable pattern to handle.

Exact Size of Tea Spoon

The entire line made in this popular pattern is quoted below:

The following are put up one dozen in carton boxes. Any quantity, however, may be had at the per dozen price quoted.

1847 ROGERS BROS.

"Silver Plate That Wears"

OLD COLONY PATTERN

French Grey with Bowls, Tines and Bevel Edges of the Handles Bright

Exact Size of Tea Spoon

The "Old Colony" is the highest achievement attained in silver plate. Note the pierced handle and the sterling effect of design, rich in character rather than ornamentation, and possessing both simplicity and individuality.

1847 ROGERS BROS.

"Silver Plate That Wears"

SHARON PATTERN

French Grey with Bright Bowls, Tines and Shield

Designs in 1847 Rogers Bros. brand are the equal of the best sterling silver, in pattern, finish and general excellence of making—the result of sixty-five years' experience, combined with the determination to produce the best at whatever cost. The "silvery" effect so pleasing to the eye and so often lacking is exemplified in these designs in all its beauty.

IMPROVED SAMSON PUNCHES

With Adjustable Gauge.

Each

No. 677—With Three Dies and Punches, viz., ¼, ⅜ and ½ in., Depth of Throat to Frame 6 in., to Gauge 5½ in., Will Punch ¼, ⅜ and ½ in. Holes in ½ in. Iron, Will Center on 12 in. Sheets, Wt Each 220 Lbs..... $

Constructed to meet a wide field of usefulness and will prove an all around punch for heavy work.

SPECIAL PUNCHES FOR No. 677 PUNCHES

Each

½	in., for ¼ in. Iron.	$
⅝	in., for ⅜ in. Iron	
1	in., for ½ in. Iron.....	
1¼	in., for ½ in. Iron.....	

HAND PUNCHES

Punches

For No. 20 Iron and Lighter.

With Adjustable Gauge.

Each

No. 790 7½ in. Long, 4 in. High, Depth of Throat 1 in., with Three Sets of Dies and Punches, viz., ⅛, ⅜ and ¼ in., Will Center on 2 in. Sheets, Weight Each 2½ Lbs. ..... $....

The toggle movement as used on this punch is powerful and works with rapidity, yet so small it may be carried in the pocket and will prove a very useful tool for outside work.

HANDY SEAMERS

Adjustable.

Each

No. 791—7½ in. Long Over All, Size of Blades 3½ in., Width of Blades ⅞ in., Adjustable for Seams from ⅛ to ⅞ in., Weight Each 1 Lb..$....

This Pocket Seamer is very useful where a large one would not be practical. Adjustable for seams of different widths. Is is light and can be carried in tool kit or pocket.

SQUARE PIPE CRIMPERS

Each

No. 787 11 in. Long Over All, Weight Each 2 Lbs.$....

Assembling square pipe joints with these crimpers is a quick and easy operation, producing tight fitting joints and improving the quality and appearance of the work.

EAVES TROUGH END CLOSING FORMS

The Tool.

The Work.

Nos.	3½	4	4½	5	5½
Inches	3½	4	4½	5	5½
Each ..... $....	....	....	....	....	

With the use of these forms, the ends of the eaves trough can be closed much neater and quicker than with any other method. The form is placed in gutter and the iron worked into grooves with a hammer, producing a corrugated closed end. Frost will not burst the end out.

TINNERS' TOOLS

HAND SHEARS OR SNIPS

HERCULES COMBINATION, STRAIGHT

Forged from Special High Grade Steel, Blued Handles, Polished Head, Beveled Jaws with Straight Cutting Edges.

Nos.	146	147	148	149
Length, Inches	15½	14½	13½	12½
Cut, Inches	4⅛	3⅛	2⅞	3
Will Cut Iron, Nos.	24	25	26	27
Weight Each, Lbs.	3⅞	3	2⅛	2
Each	$			

The jaws are beveled with straight cutting edges, which allows the material to pass freely when cutting curves or changing direction of cut.

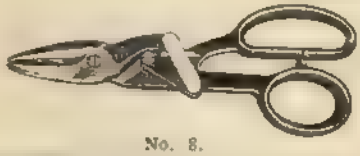
HERCULES COMBINATION CIRCULAR

Forged from Special High Grade Steel, Blued Handles, Polished Head, Beveled and Curved Blades.

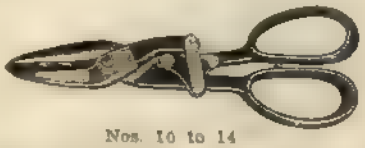
Nos.	C147	C148	C149
Length, Inches	14½	14	12¾
Cut, Inches	4	3½	
Will Cut Iron, Nos.	25	26	27
Weight Each, Lbs.	3	2⅛	2
Each	$		

The blades being curved and beveled permits material to pass more freely when cutting small curves or irregular shapes

STRAIGHT COMPOUND LEVER



No. 8.



Nos. 10 to 14

Drop Forged High Grade Crucible Tool Steel, Tempered Throughout, Polished Blades, Japanned Handles.

Nos.	8	10	12	14
Length, Inches	8	10½	13	14
Blades, Inches	2	3	3⅝	4¼
Cut, Inches	1¾	2½	3	3½
Weight Each, Lbs.	⅞	1⅜	1⅞	2⅛
Each	$2 00	3 00	4 00	4 60

The compound lever action gives an evenly distributed cutting strain from a close throat start to the finish at the point of the blade. On all sizes there are two straps or links connecting the handle and blade, one on either side firmly riveted together, making a solid frame giving perfect control of the blades, with them notching becomes an easy task

HAWK'S BILL COMBINATION SCROLL OR CIRCULAR

Forged Handles, Solid Steel Blades, Blued Handles, Polished Head.

Each

No. 15—11¾ in. Long, 3 in. Cut, Will Cut No. 28 Wire, Weight Each 1¼ Lbs. . . . $ . .

The blades have a peculiar clearance bevel between the cutting edges, which permits the blades to easily turn a sharp corner or work around a small curve without buckling.

POCKET

Solid Forged Steel, Polished Blades, Blued Head.

Each

No. 82—7 in. Long, 2 in. Cut, Weight Each ½ Lb. $

Will prove useful to the mechanic, plumber, electrician and automobilist. The tinsmith or sheet metal worker will find it a very useful vest pocket shear

HAND SLITTING

Forged Best Norway Iron, Steel Laid Blades, Blued Handles, Polished Head.

Each

No. 59 13½ in. Long, 3 in. Cut, Will Cut No. 24 Iron, Weight Each 2½ Lbs . . $

The lower jaws relieved to allow the material to slide back freely

BERRIDGE DOUBLE CUTTING SHEARS

No. 2

Forged from High Grade Steel, Carefully Tempered and Hardened, Polished Head, Black Finish Handles. Each

No. 2—13½ in. Long, with Pipe Crimper, Weight Each 2¼ Lbs . . . . . $.

No. 02—13½ in. Long, without Pipe Crimper, Weight Each 2¼ Lbs . . . . . .

No. 23—Pocket Size, 8½ in. Long, without Pipe Crimper, Weight Each 1 Lb. . . . . .

They are adapted to cutting off the bottoms of pails, cans, etc., and suitable for cutting round or square work. The crimping attachment is designed for crimping any kind of sheet metal, pipe round or square. The parts are interchangeable and the crimping jaws are of steel.

With Three Grooving and One Flattening Rolls

	Each	
+ No. 230—Length 30 inches. Size of Grooving Rolls ⅛, ¼ and ⅜ inch, Weight Each 95 lbs.	$85.70	13 50
No. 230—Length 30 inches. Size of Grooving Rolls ⅛, ¼ and ⅜ inch, Weight Each 110 lbs.	94.20	15.00

One in a Wood Box

NOTE—When the Rack is Thrown Back or the Supporting Grooving Rollers Lifted from the Lower Bar and cap Easily be Released to Change the Rolls.

+ IMPROVED
With Following Roll

The Following Roll Arbor (A Patent Attachment) is for Flattening the Seams, the Same is Grooved and Fastens in one Operation, with Three Grooving and One Flattening Rolls.

	Each	
+ No. 230—Length 30 inches. Size of Grooving Rolls ⅛, ¼ and ⅜ inch, will Groove Work up to 30 inches. Weight Each 102 lbs.	$92.30	15 00
+ No. 230—Length 30 inches. Size of Grooving Rolls ⅛, ¼ and ⅜ inch, will Groove Work up to 30 inches. Weight Each 120 lbs.	81.40	13 50

One in a Wood Box

+ STOW'S ENCASED GROOVERS

With Rotary Standard for Light Work, Adapted to Locking Seams on Metals not Heavier than 24 Gauge. Complete with Three Grooving Rolls. Sizes ⅛, ¼ and ⅜ inch

	Each	
+ No. 1—Length 26 inches. Weight 75 lbs.	$65.10	11 50
+ No. 2—Length 17 inches. Weight 64 lbs.	56.80	11 00

One in a Wood Box

+ EXTRA PARTS FOR ABOVE

	Each	
Standards	$1 30	75
Rollers (⅛, ¼ or ⅜ inch)	1.30	75
Groover Ratchet with Brass Mushing	4.70	2 50
Groover Ratchet, with Brass Mushings	5.00	3 00
Groover Pinion	90	50

Loose

PATENT BRASS MOUNTED GROOVERS

With Steel Bar and Malleable Horn. Adapted to Locking Seams on Metals up to 24 Gauge. Complete with Three Grooving Rolls Sizes ⅛, ¼ and ⅜ inch

	Each	
+ No. 00—Length 26 inches. Weight 58 lbs.	$54.30	13.50
+ No. 0—Length 17 inches. Weight 50 lbs.	10.20	11 00

One in a Wood Box

+ Groover Ratchet, without Brass Mushings	4 10	3 5

COLUMBIAN

Saves One Half of the Time of the Operator in Putting Loosely Together Form Both for Crease and Bend for Uniting the Two Sections

	Each	
No. CEES—Machine with Standard; Weight Each 25 lbs.	$20.80	10 50

One in a Wood Box

	Per Pair	
+ Extra Rolls for Forces. Weight per Pair 1 lb.	$4.50	2 50

ELBOW EDGING MACHINES

STOVE PIPE CRIMPERS AND BEADERS

P & W

Two Collars are Furnished to Substitute for Beading Rolls when Crimping Only. In no be Dones Adapted to Metals up to 22 Gauge.

	Each	
No. 7—With Standard, Spiral Rolls Weight 45 lbs.	$30.40	
+ No. 97—With Standard, Straight Rolls, Weight 45 lbs.	29.40	
+ No. 8—With Foot Lever; Spiral Rolls Weight 55 lbs.	32.00	

One in a Wood Box

PACKHAM
Adapted to Metals up to 22 Gauge

	Each	
No. PC—With Standard; Spiral Beading and Crimping Rolls, Weight Each 37 lbs.	$13.50	

One in a Wood Box

P & W

Not Back Geared. For No. 24 Iron and Lighter. Direct Acting for Speed and especially Adapted for Larger Pipe and Stove Pipe.

	Each	
No. 527—With Standard; Spiral Beading and Crimping Rolls, Weight 48 lbs.	$21 00	

Items Marked + Not Carried in Stock; Can Only be Furnished by Shipping Direct from Factory, Southington, Conn.

TINNERS TOOLS

PECK, STOW & WILCOX

TURNING MACHINES

Used in Preparing Vessels for Wiring and in Putting Stove Pipe Elbows Together. Each Set of Machine Has Two Sets of Faces, Adapting Them to the Sizes of Wire Most Commonly Used, Adapted to Metals up to 24 Gauge

CONTINUOUS CUTTING OR GAP SHEARS

With Hold Down Attachment and Top and Side Extension Tables.

Sheet Metal of any Length can be Cut into Strips from ¾ inch to 48 inches Wide, the Gauges can be Accurately Adjusted. The Hold Down Attachment can be Operated by the Front End of the Lower Sheet Metal 6 inches Wide Above Cutting Edge at any Desired Point. Gauges at the Ends of the Upper Blades are Removed to Cut Metal into Narrow Strips or 20 inches or in Extension Tables by which Increased Length is Obtained for Long Metals.

	Each
+ No. 65—With Treadle, 20 Inch Blades, Cut 18 Gauge Iron; Weight Each 1,275 lbs	$300 00
+ No. 80—With Treadle, 37 inch Blade 18 inch Throat with Cut 18 Gauge Iron; Weight Each 1,450 lbs	310 00
+ 185 Pair Power 31 inch Blade 6 inch Throat with Cut 18 Gauge Iron; Weight Each 1,900 lbs	405 00

NOTE—An Extra Charge will be Made for Boxing, when Required. Shipped from Cleveland Ohio.

ROTARY SHEARS

The Machine at Rear and the Machine and Attachment at Left are Recommended and Adapted for Cutting Circles of any Desired Size

+ VAUGHN'S PATENT REVOLVING SQUARE AND CIRCULAR SHEARS

Attachment Saturated at Right

FOR LIGHT MATERIAL
Operated by Hand

	Each
Will Cut any Square or Bevel Under 20 Inches; can be Instantly Changed to Cut Circles Adapted to Metals up to 22 Gauge.	
+ No. 1 Will Cut Circles 2½ to 15 Inches; Weight Each 60 lbs	$32 00
+ No. 1A Same as No. 1 with Squaring Attachment; Weight Each 70 lbs	66 00
+ No. 2 Will Cut Circles 4 to 20 inches; Weight Each 70 lbs	60 00
+ No. 2A Same as No. 2 with Squaring Attachment; Weight Each 80 lbs	78 00

+ EXTRA PARTS

	Per Pair
For all Above Machines	
+ No. 1D—Extra Disks	$3 00
+ No. 1C—Extra Cutters, Weight 1 lb	3 00

P. S. & W. COMBINED SHEARS AND PUNCHES

This Machine is for Both Cutting and Punching Metal will Cut ¼ inch Iron, and 3/16 and 5/16 inch Punch Larger Ears

	Each
No. 1—1½ inch Cut will Punch ¼ inch Iron and to the Center of Machine 3 inch Cut will Punch ¼ inch Iron and to the Center of Machine 5 inch Cut will Punch ¼ inch Iron and to the Center of Machine 8 inch Cut will Punch ¼ inch Iron and to the Center of Machine 12 inch Cut will Punch ¼ inch Iron and to the Center of Machine 18 inch Cut will Punch ¼ inch Iron and to the Center of Machine 24 inch Cut will Punch ¼ inch Iron and to the Center of Machine

SOLDERING FURNACES

GASOLINE

*NORLEIGH DIAMOND

LOW DOWN GASOLINE FURNACES

Heavy Galvanized Steel Tanks, Seamless Drawn Around Bottom, which is Strong, Reinforced and Protected at Handle from Being Never Leak Brass Parts with Cork Chuck and Perforated Gloves. Needle Valve Intensely Hot Flame, Free from Smoke, will Quickly Heat Heavy Irons and a Pot of Metal at the Same Time. The Vapo Burner May be Removed and the Open Flame Used as a Torch for Brazing Melting Out Lead Joints, Thawing Frozen Pipe, etc.

No. NDF5—Capacity 5 pints. Weight 12 pounds. Diameter of Base 8½ inches. Height from Chuck to Top 15 inches. Each $9 00

No. NDF7—Capacity 7 pints. Height 12½ inches. Diameter of Base 10 inches. Weight Each 16½ lbs. $13 00

One in a Wood Box

CLAYTON AND LAMBERT

Heavy Galvanized Iron Tank and Round Top Section. Brass Fittings. Flames are Protected by a Galvanized Hood with Cover. A Genuine Brass Pump is Used so Heat a Pot of Metal and a Pot of Solder or Copper at the same time. Solid Brass, Chlorided and Nickeled Iron.

Each

No. 74—Capacity Seven Pints. Weight each 18 lbs. $13 50

No. 72 Capacity Ten Pints. Weight each 18 lbs. $10 00

One in a Wood Box

GEM

The Heat is Distributed the Full Length of Coppers by a 4 inch Burner Case is Constructed With Iron. Smoke or Odor, will Take all Sizes of Coppers. Copper Rest Place as but 5 inches from Workmans Bench.

Each

No. GEM—Capacity 10 Qts. Galvanized Steel Reservoir with Regulating Valve 21x7 inch Sheet Steel Base, Black Enameled Improved Slotted Cast Iron Burner, Height Over All 34½ inches. Weight Each 20 lbs. $14.00

One in a Crate

GAS

Consumes About 8 Feet of Gas per Hour. Cast Iron Legs and Burners, Polished Steel Top. Brass Legs and Burners are Durable and are Operated with Soap Cock and Are suitable Air Mixers. Very Economical.

Each

No. GT2—One Burner. Length 11 inches. Width 5 inches. Height 7 inches. Weight Each 8 lbs. $6.00

No. GT4—Two Burners. Length 11 inches. Width 8½ inches. Height 7 inches. Weight Each 12 lbs. 8.50

One in a Box.

Shut Off Flame. Extra Heavy Pipe Coils, Height 20 inches, Diameter of Base 8½ inches. Weight Each 25 lbs. $8.50

WITH BULB

Each

No. NDFB—Capacity 3 Gallon, Heavy Galvanized Steel Tank, Removable Hood, Brass Nuts, Pilot and Fittings, Extra Heavy Pipe Coils. Height 27 inches. Diameter of Base 8½ inches. Has a Good Generating Furnace and will Give Good Satisfaction. Weight each Burner 25 lbs. $7 50

One in a Wood Box

Each

No. 13—Capacity One Gallon, Heavy Galvanized Iron Tank Riveted Galvanized Cast Iron Top Plate and Bottom Rustproof Brass Nut Plug and Fittings. Cast Steel Burner, Extra Heavy Pipe Coils, Needle Point Valves fitted with Stuffing Boxes are always Tight and Give the user Perfect Control of the Fire. Weight each 13½ lbs. $7 00

One in a Wood Box

TINNERS STOVES

For Charcoal

The Fire Pot is Constructed so that the Ashes Fall into a Pan Beneath the Coal Keeping the Fire Clear and the Draft Good, Light and Easy to Carry

Each

No. FP—Sheet Iron Body, Japanned, Cast Iron Base, Top, Legs and Door, Heavy Wrought Iron Bail. Height 15½ inches; Diameter 8 inches; Weight per Dozen 180 lbs. $6 00

Loose

GASOLINE BLOW TORCHES

*NORLEIGH DIAMOND

Fitted with Patented Air Compression Pump and Needle Point Valve, with Shoulder, Plunger Screws Down into Valve Seat out of the Way, Shut Off a Positive and Accidental Expansion is Impossible. Made with Reinforced Double Top, Extra Heavy Base with Brass Bottom, Extra Strong Throughout

For Light Brazing or Wires up to ¼ Inch in Diameter Expanding Rings that are Shrunken

Each

No. NDB1 Capacity One Quart. Polished Seamless Brass Tank and Handle. Bronze Metal Burner, Air Pump in Tank, Needle Point Valve, with Shoulder. Height Over All 8 inches. Diameter of Base 3½ inches. Weight Each 4 lbs. $5 50

One in a Wood Box

Fitted with Flat Burner, with Swivel, Flame can be Turned in any Direction Desired.

Each

No. NDPL—Capacity One Quart. Polished Seamless Brass Tank and Handle. Bronze Metal Burner, Air Pump in Tank, Needle Point Valve, Height Over All 8 inches. Diameter of Base 3½ inches. Weight Each 4 lbs. $5 50

One in a Wood Box

Fitted with Adjustable Solder Iron Holder, which can be Removed or Turned Aside when not in Use.

Each

No. NDIH—Capacity One Quart. Polished Seamless Brass Tank and Handle. Bronze Metal Burner, Air Pump in Tank. Needle Point Valve, Height Over All 11 inches. Diameter of Base 3½ inches. Weight Each 4½ lbs. $5 00

One in a Wood Box

Same as No. NDIH Torch, but without Solder Iron Holder

Each

No. NDH—Capacity One Quart. Polished Seamless Brass Tank and Handle. Bronze Metal Burner, Pump in Tank. Needle Point Valve, Height Over All 9¾ inches. Diameter of Base 3½ inches. Price Each 4½ lbs. $7 50

One in a Wood Box

Fitted with Adjustable Solder Iron Holder, which can be Removed or Turned Aside when not in Use.

Each

No. NDIH Capacity One Quart. Polished Seamless Brass Tank and Handle. Bronze Metal Burner, Air Pump in Handle. Needle Point Valve. Height Over All 9 inches. Weight Each 4½ lbs. $7 00

One in a Wood Box

Same as No. NDIH Torch without Solder Iron Holder, Polished Seamless Brass Tank and Handle. Bronze Metal Burner, Air Pump in Handle.

Each

No. NDH—Capacity Half Quart. Height Over All 8 inches. Diameter of Base 4½ inches. Weight Each 4½ lbs. $6 50

No. NDL—Capacity One Quart. Height Over All 9 inches. Diameter of Base 4½ inches. Weight each 4½ lbs. 6.50

BABBITT METAL

Time Economy in the Use of Babbitt Metal is Determined by the Service Given Rather than the Cost per Pound. Service is Determined by the Length of Time a Bearing will Run and to Wear without Destruction of the Journal. Quality is Dependent upon the Proper Percentages of Copper, Tin and Antimony Used. It is therefore Important to Select only High Grade Metal.

Our Babbitts are Made to High Standard Formulas, the Efficiency of which has been Demonstrated by Long Experience

★NORSHAP

Formula Contains a High Percentage of Copper, Tin and Antimony, Assures Use for High Speed Bearings and Heavy Pressures. Exceptionally Serviceable and Never Fails to Give Entire Satisfaction.

Per Pound

★Norshap—Ingot Bars, Weight about 4½ lbs. Each; About 54 lbs. to a Case. $0 46

★LONGWEAR

A Heavy Bearing Metal of Long Wearing Qualities, the Alloy Produces a Smooth Pouring Metal For Mill and Railway Service.

Per Pound

★Longwear—Ingot Bars, Weight about 4 lbs. Each; about 54 to 56 lbs. to a Case. $0 36

Gross Weight per Case About 60 lbs.

★XCD

Made on a Tin Base Formula Specially Suited for and Gives Excellent Service on Bearings of Moderate Speeds but Recommended for High Speeds or Extreme Pressures.

Per Pound

XCD—Five Piece Bars, Weight about 8 lbs. Each; about 160 to 168 lbs. to a Case. $0 39

A Well Known Standard Babbitt Metal, Adapted to all Bearings of Medium Speeds and Pressures and of a Serviceable Percentage of Tin and Antimony.

Per Pound

No. 1—Five Piece Bars, Weight about 8 lbs. Each; about 160 to 168 lbs. to a Case. $0 28
Gross Weight per Case About 180 lbs.

A Low Grade Babbitt Metal and Slow Speed and Light Pressures. Made to Standard Formula for this Grade.

Per Pound

No. 4—Five Piece Bars, Weigh about 8½ lbs. Each; about 160 to 168 lbs. to a Case. $0 18

SOLDER

Per Pound

No. 8080—★SHAPLEIGH'S BOSS. Strictly Half and Half Plumbers' Solder. Every Stick Guaranteed to Form 50 Parts Tin and 50 Parts Lead. Adapted to the Highest Class of Work. Will Not Burn Easily and Is Easy to Wipe. New Metal and Non-Sagging. $0 70

No. 8282—Known as Half and Half. We Specify and the Analysis Guaranteed to Be 50 Parts Tin and 50 Parts Lead. New Metal and Only Selected by Us. No Solder Is Better. 64

STOVE PIPE MACHINES

LIGHTNING

For closing the Seams or grooving Nested Stove Pipe: Absolutely Noiseless; Simple in Construction and easy to operate. Can be attached to Post, Wall or Bench of any kind. Will take all gauges and sizes of Stove Pipe and also used for closing seams on Furnace Pipe and other Sheet Metal articles. No Hammering or Malleting done. Every Joint a perfect one. To replace plain pipe or lower bar, which is provided with Rabbet to steady pipe, then lower the lever, thus closing the Seams perfectly. Release lever and the Machine is Automatically Set for the next Joint.

THE "HAND" OF SNIPS

There is Considerable Confusion Regarding the Meaning of Right and Left Hand Snips. Left Hand Means that the Work is on the Left of the Snips in Cutting and the Scraps at the Right. We Show Only Snips with Left Hand Cut, as they are Invariably Used by Right Hand Men, and are Always Sent unless Right Hand Snips are Specially Ordered.

Standard Bench Snips, However, are always Furnished Right Hand, Cut, that is the Lower Blade is on the Right Side of the Shears.

"DIAMOND EDGE IS A QUALITY PLEDGE"

STANLEY FANCY PLANES

ADJUSTABLE PLOW FILLESTER AND MATCHING PLANE
Nickel Plated with Rosewood Handles

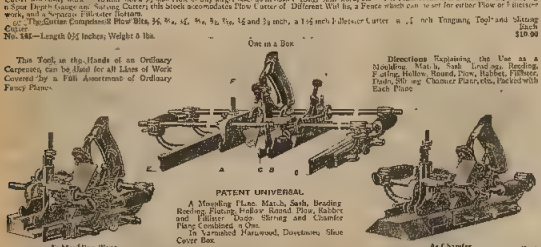
This Plane has two Interchangeable Front Parts that make it either an ordinary Plow or Ball Nose Plane. With the Ball Nose attachment the Cutter will easily work to within 1/16 inch Hole or any longer mark as in Rabbet Work. Scale work, etc. The Plow consists of a Main Stock, Carrying a Spur Depth Gauge and Slitting Cutter; this stock accomodates Plow Cutter of Different Width, and can be used for either Plow or Fillester work, with a Separate Fillester Bottom.

No. 582—The Combination Complement Plow Plane, 3/16, 5/16, 7/16, 9/16, 11/16 and 13/16 inch, 1 1/16 inch Fillester Cutter, 1 inch Tonguing Tool and Slitting Cutter. Each $19 00

One in a Box

This Tool, in the Hands of an Ordinary Carpenter, can be Used for all Lines of Work Covered by a Full Assortment of Ordinary Fancy Planes.

Directions Explaining the Use as a Moulding, Match, Sash, Beading, Reeding, Fluting, Hollow, Round, Plow, Rabbet, Fillester, Dado, Sticking, Chamfer Plane, etc., Packed with Each Plane



PATENT UNIVERSAL
A Moulding Plane, Match, Sash, Beading, Reeding, Fluting, Hollow, Round, Plow, Rabbet and Fillister Dado, Sticking and Chamfer Plane Combined in One.
In Varnished Rosewood, Dovetailed Slide Cover Box.
As Moulding Plane
As Chamfer

Each
No. 55—Nickel Plated Cast Iron Frame, Mahogany Finished Handles, Steel Adjusting Screws, with 62 Tempered and Sharpened Polished Steel Assort ed Cutters. Weight Complete about 14½ lbs $33 80

One Plane Complete in a Box

This Plane Consists of a Main Stock (A) with Two Sets of Transverse Sawing Arms, a Depth Gauge (F) Adjusted by a Screw and a Slitting Cut er with Stop.
A Sawing Section (B) moves Vertically, Adjustable Bottom.
The Auxiliary Center Section (C) is to be Placed in Front of the Cutter as an Extra Support, or Stop when Needed. This Bottom is Adjusted Both Vertically and Laterally.
Tongues (D) and (E) Fence (D) has a Lateral Adjustment by Means of a Screw for Extra Fine Work. The Fences can be Used on Either Side of the Plane, and the Rosewood Guides can be Fitted to any Desired Angle Up to 45 Degrees, by Loosen ng the Screws on the Face. Fence (E) can be Reve sed for Center Bedding Wide Boards.
An Adjustable Stop is to be Used in Beading the Edges of Matched Boards a Inserted on Left Hand Side of Sliding Section (B).

EDGE TRIMMING PLANE

Designed especially for Trimming or Smoothing the ends of Boards, such as Siding, etc., for a square or chisle fit. It may be split angle Rose or Cutter from the Cutter Edge and the Cutter works on a Screw to give an easy shaving cut. In the cut a guide and Two Screw Holes for Quick Wood Adjustment No 95—6 inches Long, ¾ inch Cutter Japanned. Weight 1¼ lbs. Each $1 75

Cut in a Box.

No 71

DOOR TRIM PLANE

This new Plane was made Necessary for Butt Door Plates Strike Plate, Escutcheon and Similar Work Where a width of Blade greater than the original Iron as the Sole of Knob, or the Cutter which can be used in the usual manner or end of the Plane as shown in the cut. In the latter position, the Cutter is cushioned by a Spring, which prevents it striking a Screw Head or Nail, and the Cutter is adjusted to the Cut by the Screw at the rear end of the Plane. A new principle for adjusting the Cutter is also introduced, which is the Cutting Iron and Cap Iron are held in position by a Screw and Nut, which passes through a Slot in the Cap Iron, and the Cutting Iron is held in position by the Screw which passes through a Hole in the Cutting Iron. The Cap Iron is then adjusted by the Nut, which is turned down on the Screw, thus holding the Cutting Iron in position. The bottom is designed so that an extra wooden bottom may be screwed on, enabling the user to use the Plane for various purposes. The two Handles are shown in the illustration part of Knob, and three Forged Steel Knobs, No. 2, will fit any of the Handles for turn Tool. Each

No. 192—13¾ Inches Long, Japanned, Weight 3¼ lbs. $4 50

STANLEY BENCH PLANES

STANLEY RULE AND LEVEL CO.

Japanned Iron Steel Frame, Varnished Rosewood Handle and Knob, Polished Steel Cap; Plain Adjusting Screw; Screw and Lever Adjustment Tempered, Ground and Polished Tool Steel Cutters.

IRON PLANES

Stanley Bed Rock Planes Combine the Utmost Simplicity and Rigidity with a Wide Range of Adjustment, the Surfaces are so Machined as to Fit Perfectly, Making it as Rigid as if Mortised Into Place of Main Body. The Frog is Planed Exact and is Designed that its Lower Bottom Rests Solidly on a Seat Formed in the Plane Body, which Gives Great Accuracy of Adjustment to the Frog and Prevents any Possibility of its Rocking. The Parts of a Screw the Plane is Shipped in Hard or Soft Steel.

BED ROCK PLAIN BOTTOM

BED ROCK CORRUGATED BOTTOM

The Corrugated Bottom Lessens Friction and Makes an Easier Running Tool than the Smooth Bottom Plane.

It may be split angle Rose or Cutter from the Cutter Edge and the Cutter works on a Screw to give an easy shaving cut. In the cut a guide and Two Screw Holes for Quick Wood Adjustment No 95—6 inches Long, ¾ inch Cutter Japanned. Weight 1¼ lbs. Each $1 75

Cut in a Box.

No 71

DOOR TRIM PLANE

This new Plane was made Necessary for Butt Door Plates Strike Plate, Escutcheon and Similar Work Where a width of Blade greater than the original Iron as the Sole of Knob, or the Cutter which can be used in the usual manner or end of the Plane as shown in the cut. In the latter position, the Cutter is cushioned by a Spring, which prevents it striking a Screw Head or Nail, and the Cutter is adjusted to the Cut by the Screw at the rear end of the Plane. A new principle for adjusting the Cutter is also introduced, which is the Cutting Iron and Cap Iron are held in position by a Screw and Nut, which passes through a Slot in the Cap Iron, and the Cutting Iron is held in position by the Screw which passes through a Hole in the Cutting Iron. The Cap Iron is then adjusted by the Nut, which is turned down on the Screw, thus holding the Cutting Iron in position. The bottom is designed so that an extra wooden bottom may be screwed on, enabling the user to use the Plane for various purposes. The two Handles are shown in the illustration part of Knob, and three Forged Steel Knobs, No. 2, will fit any of the Handles for turn Tool. Each

No. 192—13¾ Inches Long, Japanned, Weight 3¼ lbs. $4 50

One in a Box

FLOOR PLANES

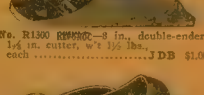
No. R2200 REVONOC—7½ in., adjustable, 1¾ in. cutter, w't 1½ lbs. ..each **DJ** $0.95

No. R1300 REVONOC—8 in., double-ender, 1⅛ in. cutter, w't 1½ lbs. ..each **JDB** $1.00



Nickel Plated Cap.

No. R6000 REVONOC—6 in., low angle, 1⅝ in. cutter, w't 1 lb. ..each **JGE** $1.75
No. R6500 REVONOC—7 in., low angle, 1⅝ in. cutter, w't 1 lb. ..each **JHJ** $1.85

With Throat and Lateral Adjustments.

No. R9½ REVONOC—6 in., 1¾ in. cutter, w't 1½ lbs. ..each **IGJ** $1.60
No. R15 REVONOC—[illegible] in., [illegible] cutter, w't [illegible] lbs. ..each **JGE** $1.75
No. R1600 REVONOC—[illegible] in., [illegible] nickel plated cap ..each **JGE** $1.75
No. R1700 REVONOC—7 in., 1¾ in. cutter, nickel plated cap ..each **JHJ** $1.85

With Throat and Lateral Adjustments.

No. R1800 REVONOC—6 in., knuckle joint, nickel plated cap, 1⅝ in. cutter, w't 1¼ lbs. .....each **JHJ** $1.85
No. R1900 REVONOC—7 in., knuckle joint, nickel plated cap, 1¾ in. cutter, w't 1½ lbs. .....each **JHE** $1.95

The knuckle joint in the cap makes it a lever top, and placing the cap in position will also clasp the cutter securely in its seat.

STANLEY PLANES.

"BAILEY" ADJUSTABLE IRON.

The handle and knob are made of highly finished, thoroughly seasoned rosewood. The English steel cutter is tempered, ground and honed, ready for use. It is adjustable both endwise and sidewise, and bedded to the heel of the rivet. The width of mouth can be varied by changing the setting of the frog. Bottoms, either flat or corrugated (see cut 7-C) as desired.

ONE IN A BOX

STANLEY "BED ROCK."

For fine work on hard and knotty wood, this plane surpasses all others. The cutter, frog and bottom are so machined and fitted that they are practically one solid piece of metal, thus preventing any chance of vibration.

The frog travels in a groove, ensuring it being square with the mouth of the plane, and preventing shifting or "wobbling."

The width of the mouth can be regulated by use of a screw driver as shown in the cut, without removing the cutter and lever.

The cutters are made of the best English steel and are adjustable both endwise and sidewise.

The shape of the sides, a distinctive feature, adds greatly to the strength of the plane.

The handles and knobs are of rosewood and finely finished.

Bottoms either flat or corrugated (see cut No. 606-C) as desired.

ONE IN A BOX.

STANLEY PLANES.

PATENT UNIVERSAL.

This tool may well be called "a planing mill within itself." It will do a greater variety of work than can be done with a full line of so-called "Fancy" planes. The regular equipment sent with the plane comprises the 82 cutters arranged in four separate cases. These cutters, together with the plane are packed in a neat wooden box.

A further line of 41 special cutters, as shown in illustration, are also made and can be furnished direct from factory.

With the complete line of cutters, there is practically no end to the variety of work which can be done.

The plane is 10 inches long, weighs only 7¾ lbs. (with 93 cutters—11 in. and replaces a full line of 93 fancy wood planes, weighing probably 90 lbs.

All metal parts are nickel plated and the handle and fences are made of selected rosewood, every part being highly finished.

Special circular, showing samples of work and directions for use, is enclosed with each tool, or will be mailed on application.

No. 85—Complete with 82 cutters.....each **ACDE** $14 00
Extra Cutters, 52 tools, bits, etc.....per set **EDJ** 6 00

ONE IN A WOOD BOX.

COMBINATION.

Seven tools in one in compact and practical form—1. beading and center beading plane; 2 plow, 3. dado; 4. rabbet and fillister; 5. match plane; 6. sash plane; 7. slitting plane.

A sliding section, with the main stock, forms a bottom giving a proper bearing for different widths of cutters.

Seven beading tools, ¾ in., ⅝ in., ½ in., ⅜ in., ¼ in., ⅛ in., and 1/16 in., ten plow and dado bits—½ in., ⅜ in., ¼ in., ⅛ in., 1/16 in., ⅛ in., 3/16 in., ¼ in., and 5/16 in., a tonguing tool, a sash tool and a slitting cutter, are regularly furnished.

Each plane has an adjustable fence, a depth gauge, spurs for use across the grain, a cane leveling or steading rest, and can be used either right or left hand.

No. 45—Nickel plated, with twenty tools.....each **FBJ** $7 00

Extra Bottoms and Cutters.

By substituting special bottoms for the sliding section, cutters as follows may be used. Special bottom required for each cutter. Prices of hollows and rounds include two cutters and two bottoms; of nosing tool, one cutter and one bottom.

		PER PAIR	
No. 6—Hollow and round	⅝ in cutters work ¾ in. circle.	**ABJ**	$1 50

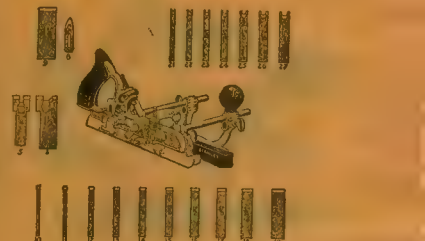
No. 12—Hollow and round	1 in. cutters work 1½ in circle.	**ABE**	1 50
No. 5	Nosing tool, 1¾ in. cutters work 1⅝ in. circle. each	**JDE**	1 10
Extra cutters, 20 tools, bits, etc.....		per set **CJJ**	3 50
Extra spurs.....		per dozen **BB**	.50

ONE IN A WOOD BOX.



Extra Screws ..... per dozen **BB** 50

BEADING, PLOW, DADO AND MATCHING.

No. 50 Combined Beading and Matching Plane for ordinary beading or for center beading cannot be surpassed. By adjustment of the fence, center beading can be done up to five inches from the edge of the board. Except for working across the grain, spurs need not be used.

With each plane are furnished beading tools, 3/16, ⅜, ½, ⅝, ¾, ⅞ and 1 inch, and a pair of ¼ inch matching tools.

No. 50—Nickel plated stock and fence.....each **CGJ** $4 50

Stanley Adjustable Dado, Plow, etc., is accompanied by eight plow and dado bits (3/16, ¼, 5/16, ⅜, ½, ⅝, ¾ and 1¼ inch), a fillet ster cutter, a slitting tool and a tonguing tool. All except the slitting blade are secured in the main stock on a skew.

No. 48—Nickel plated, with 13 tools, bits, etc .....each **DJR** $3 00

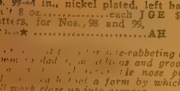
No. 98—4 in., nickel plated, right hand, wt 8 oz. ..... each JGE $1.00

No. 99—4 in., nickel plated, left hand, wt 8 oz. ..... each JGE $1.00
Cutters, for Nos. 98 and 99, ... AH .20
Cut★ .....

[illegible]-rabbeting and trimming dadoes, also cutting nibs and grooves [illegible] the nose piece [illegible] to form by which it will work close up into corners
ONE IN A BOX.

ROOFING BRACKETS.



No. 1—Stanley's, steel, japanned, 8 in., [illegible] per doz. 14 lbs., per dozen ..... BFE $3.50

So constructed that any increase of pressure or weight from above increases their security by pressing the spurs into the [illegible]. Steel spurs also hold the shingle boards. No loose parts to get lost and [illegible] no nail holes are made in the roof.
ONE-HALF DOZEN IN A BOX.

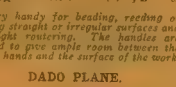
RABBET AND BLOCK PLANES.

No. 140—7 in., with detachable side, [illegible] in. cutter, wt 1¼ lbs., each ..... AAJ $1.40
Cutters, for No. 140★ ..... each AH .20
The detachable side will easily change this tool from a block plane to a rabbet plane, and vice versa. The cutter is adjustable end-wise and is set on askew.

UNIVERSAL HAND BEADERS.

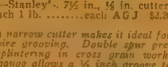
No. 66—Stanley's, width 11¼ in., nickel plated stock, 7 steel cutters and 1 blank with 2 gauges for straight or curved work, wt 1¼ lbs. each ..... JGE $1.00
Cutters or blanks for No. 66 each★ ..... JE .05
Very handy for beading, reeding or fluting straight or irregular surfaces and for light routering. The handles are curved to give ample room between the user's hands and the surface of the work.

DADO PLANE.



No. 239—Stanley's, 7½ in., ⅛ in. cutter, wt each 1 lb. ..... each AGJ $2.20
Extra narrow cutter makes it ideal for blind wire grooving. Double spur prevents splintering in cross grain work. Depth gauge allows a ⅛ inch groove to be cut.
ONE IN A BOX.

BUTCHERS' BLOCK PLANE.

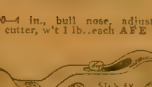


No. 64—Stanley's, 12½ in., two 2 in. cutters, wt each 4 lbs., each AHE $2.40
For trueing up [illegible] cracked [illegible] used [illegible] smoothing [illegible]
ONE IN A BOX.

★*FOR FACTORY SHIPMENT ONLY*

CABINET MAKERS' RABBET PLANES.

No. 90—4 in., bull nose, adjustable, 1 in. cutter, wt 1 lb. ..each AFE $2.20



Nickel Plated, with Adjustable Throat.
No. 92—5½ in., ¾ in. cutter, wt 1¼ lbs., each ..... AFE $2.20
No. 93—6½ in., 1 in. cutter, wt 1¾ lbs., each ..... BJJ $2.50
No 94—7½ in., 1⅛ in. cutter, wt 2 lbs., each ..... BCE $3.00
Cutters, for above ..... each BE .30
For fine cabinet or other work where extreme accuracy is required. The sides and bottom, being square with each other, the plane will be perfectly flat on either side and can be worked either right or left hand. They have adjustable throats; this means that the width of the throat opening, or mouth, can be widened or narrowed as coarse or fine work may require. They are also fitted with the side groove or "Handy" grip feature. The cutters are adjustable endwise.
ONE IN A BOX.

CORNERING TOOLS.

No. 28—5½x⅝ in., flat steel, ⅛ and ⅛ in. cutters, wt per doz. 1½ lbs. per dozen ..... BJE $4.80
No. 29—5¼x ⅞ in., flat steel, ¼ and ⅜ in. cutters, wt per doz. 1½ lbs., per dozen ..... BBJ $4.80
These tools are used by pattern makers and all wood workers for rounding sharp edges. They have a different size cutter at each end and their form is such that no depth gauge is required.
ONE-HALF DOZEN IN A BOX

CABINET SCRAPER BURNISHERS.

No. 01—Polished oval cast steel blade, wood handle with ferrule, cutting length 2½ in., wt per doz. 1½ lbs., per dozen ..... AHJ $4.00
This tool is used to put a smooth finishing edge to a cabinet scraper.
ONE-HALF DOZEN IN A BOX.

CABINET SCRAPERS.

CABINET SCRAPERS.

No. 81—Stanley's, nickel plated, raised handles, length 10 in., 2½ in. cutter, wt per doz. 30 lbs., per dozen.....**ADDJ** $18.00

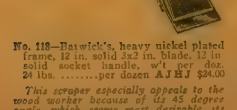
Designed to do fine scraping such as veneering, cabinet work, etc. Has a rosewood face which reduces friction and prevents marring the surface worked upon. Handles are raised to protect user's hands and are pierced for easy hanging up when not in use.

No. 80—Stanley's, japanned, raised handles, length 11 in., 2¾ in. cutter, wt per doz. 21 lbs., per dozen.....**JHIJ** $12.00
Cutters, for No. 80, per doz. **BAE** 2.40

No. 82—Stanley's, japanned with polished edges, maple handle and knob, length 14½ in., 3 in. cutter, swinging adjustment, wt per doz. 21 lbs., per dozen.....**IJFJ** $12.60
Extra Cutters, for No. 82, per dozen.....**AEF** 2.00

The adjustable handle allows the blade to be set at any angle desired. Special blades for any desired uses at widths can be securely held in any position, quickly. Has reversible end for the tool to be worked in many places inaccessible to other scrapers.

ONE IN A BOX.



No. 118—Barwick's, heavy nickel plated frame, 12 in. solid 3x2 in. blade, 12 in. solid socket handle, wt per doz. 24 lbs.....per dozen **AJHJ** $24.00

This scraper especially appeals to the wood worker because of its 45 degree angle, which seems most desirable, its weight which makes smoother and much less difficult work, and because of the variety of blades which may be used 2 to 6 inch, being the width which will work perfectly. The Barwick is the only tool of its kind which will work even lapping successfully.

ONE IN A BOX.

CABINET SCRAPERS.

No. 114—Polished steel frame, crucible steel blades, rubberoid handle, blades 3x5 in., 16 guage, wt per doz. 24 lbs.....per dozen **ABJJ** $24.00
Extra Blades.....per dozen **BAE** $4.00

The handle is adjustable to any position up or down and sidewise. Blade can be instantly removed or adjusted by releasing the lever under hand rest. The hand rest relieves strain on the wrist and prevents chattering. Will hold any blade up to 3 in. wide.

No. 116—Japanned steel frame, 3x1½ in. crucible steel blade, stained handle, adjustable to any position, wt per doz. 21 lbs., per dozen.....**JIJJ** $18.00

Blade is adjustable and handle by an ingenius ball and socket arrangement, can be instantaniously set at a wide angle to the blade in any direction.

No. 150—Bennett, adjustable, nickel plated, blade 3 in. wide, 3 in. long, 11 in. maple handle, wt per doz. 17 lbs. ..... per dozen **JHDJ** $18.00

No. 21—Ellsworth's, 6 in., adjustable 3 in. steel cutter, polished hickory handle, wt per doz. 15½ lbs. per dozen .....**JIFJ** $18.00
Extra blades .....per dozen **JHE** 1.80

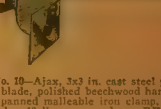
Made of selected blue grade English [illegible] steel. Blades [illegible] and [illegible] by skilled workmen.

No. 87—Stanley's, 8 in., japanned 2 in. cutter, stationary handle and knob, wt per doz. 30 lbs., per dozen.....**AHJJ** $24.00
Cutters, for No. 87, per doz. **BAE** 2.40

In use the blade springs backward from the front end of the mouth, allowing shavings to pass through. When working is finished it releases the blade springs back to its normal position.

ONE DOZEN IN A BOX.



No. 10—Ajax, 3x3 in. cast steel polished blade, polished beechwood handle, japanned malleable iron clamp, wt per doz. 10 lbs. ....per dozen **BBJ** $5.00

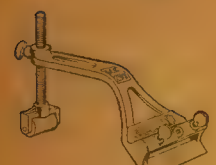
No. 11—Extra blades for No. 10 3x3 in., 16 gauge steel ..per dozen **ADJ** $2.80

A labor saving and convenient tool, relieves the fingers from the painful stiffening effect produced by the ordinary scraper. With its aid very rapid work can be done with much less than the usual effort and correct scraping angle is more easily preserved.

ONE-HALF DOZEN IN A BOX.

CUTTERS, JIGS, ANGLE DIVIDERS, GAUGES, ETC.

CUTTER AND CHISEL GRINDER.

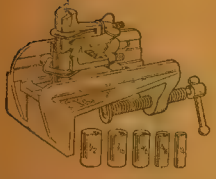


STANLEY'S, Nickel Plated, All Metal.
No. 200—W't each 1¼ lbs., each .....**JGJ** $1.75

This device is designed for holding plane irons, chisels and other similar tools so that they may be ground or honed to any desired angle or bevel, insuring an accuracy that is very difficult to obtain when the tool is held in the hand. Three screw holes and two thumb screws enable one to grind any sized blade. The tool can be adjusted to any height on the roller column at the back, thus regulating the bevel of the blade. Roller can be turned at any angle to the main body, thus obtaining the slanting stroke so commonly used when tools are sharpened without a holder

ONE IN A BOX.

DOWELING JIG.



STANLEY'S, Nickel Plated, All Metal.
No. 59—Furnished with five steel guides ⅛x⅛, ⅜x⅜ and 5/16x1¼ in. long, w't each 1½ lbs. .....each **ABE** $2.50

This tool enables the user to bore dowel holes in the edge, end or surface of any work with ease and accuracy. It is an excellent bit guide for mortising. Will take any thickness of material up to 3 in.

ANGLE DIVIDERS.

No. 31—8 in. long, rosewood handle per dozen. .....**JIJJ** $12.00

No. 30—Nickel plated, w't per doz. 8 lbs.....per dozen **ACEJ** $18.00

With this tool any angle can be found and bisected. Fitting moulding or other woodwork to odd angles can be done with ease and certainty. It is also graduated for parts of circle commonly used. A handy tool for laying out work, can also be used as a try or T square

ONE IN A BOX.

BIT GAUGES.

No. 49—Nickel plated steel, adjustable, w't per doz. 3½ lbs. ..... per dozen ..... **DHJ** $7.20

This gauge being adjustable will fit any bit and will always remain secure and accurate. To operate, loosen the thumb screws, insert the shank of the bit, turn the twist of the bit in the gauge to the required depth and tighten the thumb screws, stops on either side prevent the worm being bent or broken. Will hold bits of any size up to 1 in. in diameter.

ONE IN A BOX.

No. 36—Bottom—wood plane.

The accompanying cuts show the parts assembled in the Bailey iron and wood planes. The cuts of the block planes show how the parts are assembled for this class of plane. It will be noticed that two designs of adjustment for block plane are shown. In one the plane iron rests on a support cast solid with the bottom, and is moved backward and forward on this support, by the adjusting lever 7B, which engages with the notches in the plane iron. In the other the plane iron rests on and engages with the adjustable frog 26B, and the position of this adjustable frog is directly governed by adjusting screw No. 28B.

The collection of parts marked "Extra" for Bailey No. 7 "Y" adjustment plane includes the lever cap, No. 4, the cap screw, No. 5, the "Y" adjustment, No. 7, the brass adjusting nut, No. 8, and the lateral adjustment, No. 9. These parts are always put together before shipment from our factory.

In ordering parts for any plane, give the number and name as given on the list and also the number on the plane for which the parts are required.

We do not carry these goods in stock. All orders will be shipped from factory.

FLOOR SCRAPERS.

"Little Giant," complete with 6 blades, 7⅛ in. long, 2½ in. wide, w't crated 105 lbs. ..... each CFJJ $50.00

Extra blades, w't per doz. 2½ lbs., per dozen ..... FEJ $8.00

The Little Giant floor scraper is a device used for scraping any kind of a floor. The blade is mounted on a frame at an angle of 60 degrees, and the frame is mounted on four rollers. The large roller is a weight of 65 pounds and is used to give the pressure upon the blade when the scraper is in operation.

It has a capacity of from five to seven squares (100 square feet in a square) per day. The handle can be shortened when necessary, for small rooms. Every inch of the floor can be [illegible] along the base-board and quarter-round strip. Six blades are included with each machine. Each blade will scrape 600 square feet of floor.

Sterling Silver Deposit $\frac{999}{1000}$ Fine Glassware

WE are headquarters for this glassware, and the styles shown in this and the following pages represent the most appropriate and effective blanks for Silver designs. These decorations are strictly original patterns, white inside, the result of careful workmanship and inspection. We guarantee to maintain the excellence that has distinguished Fostoria Product for years. Every piece bears the trade mark label a guarantee of highest grade of Sterling Silver used. Illustrations on this and the following pages convey an adequate idea of the splendid variety offered at most attractive prices.

ADJUSTABLE WOOD BOTTOM PLANES

BAILEY'S BENCH

Every Carpenter needs two or more wood planes in his kit, for rough outside work.

"Bailey" Wood Planes supply the demand for a wood plane of superior quality. The bottom, handle, and knob are made from selected and well seasoned beech. The cutters are the regular "Bailey" type and are adjustable both endwise and sidewise.

The frog is held in place by two machine screws which pass through the top iron and screw into two brass lugs. These lugs are screwed and securely pinned into the wood bottom. This is far superior to other methods of fastening, as it holds together firmly the wood bottom, the top iron which strengthens the wood bottom, and the frog.

SMOOTH

	Each
No. 21—7 in. Long, 1¾ in. Cutter, Weight 2½ Lbs.	$1.50

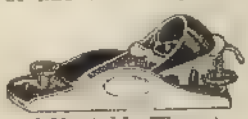
No. 34—30 in. Long, 2⅝ in. Cutter, Weight Each 8½ Lbs.	2 60

All Above, One in a Box.

IRON BLOCK PLANES

BAILEY'S

"Bailey" Block Planes are the highest type of Block Planes manufactured. They have the most improved form of adjustment, which enables the user to accurately adjust the cutter either endwise or sidewise. The cutter rests on its seat at an angle of 20 degrees as against 45 degrees in the ordinary bench planes, and the cutter bevel is made on the upper instead of on the lower side. All have adjustable throats which permit of the opening or closing of the mouth as coarse or fine work may require. The "Hand-y" feature on the sides forms a convenient grip for the hand.



Adjustable Throat.

	Each
No. 9½—6 in. Long, 1⅝ in. Cutter, Endwise Screw and Lateral Lever Adjustment, Japanned Trimmings, Weight Each 1½ Lbs.	$1.10

One in a Box.

Adjustable Throat.

	Each
No. 9¾—6 in. Long, 1⅝ in. Cutter, Rosewood Handle, Endwise Screw and Lateral Lever Adjustment, Japanned Trimmings, Weight Each 1⅝ Lbs.	$1.30

The rosewood handle enables the user to conveniently work the plane with both hands, if he so desires.

One in a Box.

Adjustable Throat.

	Each
No. 15—7 in. Long, 1⅝ in. Cutter, Endwise Screw and Lateral Lever Adjustment, Japanned Trimmings, Weight Each 1⅝ Lbs.	$1.20
No. 16—6 in. Long, 1⅝ in. Cutter, Nickel Trimmings, Otherwise Same as No. 15	1.25

One in a Box.

Knuckle Joint, Adjustable Throat, Nickel Plated Trimmings.

	Each
No. 18—6 in. Long, 1⅝ in. Cutter, Endwise Screw and Lateral Lever Adjustment, Weight Each 1½ Lbs.	$1 30

The Knuckle Joint in the cap makes it also a lever, and placing the cap in position clamps the cutter securely to its seat. One in a Box

IRON BLOCK PLANES

STANLEY'S

Black Japanned Iron Frame, Polished Face, Japanned Sides, Best Quality English Steel Cutter, Tempered and Ground, Honed Ready for Use.

No. 102—5½ in. Long, 1⅝ in. Cutter, Non-Adjustable, Weight Each ⅞ Lb.....$0.40

No. 103—5½ in. Long, 1⅝ in. Cutter, Endwise Lever Adjustment, Weight Each ⅞ Lb..... .55

One in a Box.

Black Japanned Iron Frame, Polished Face and Sides, Best Quality English Steel Cutter, Tempered and Ground, Honed Ready for Use.

No. 110.

No. 120.

No. 220.

Each

No. 110—7⅛ in. Long, 1⅝ in. Cutter, Non-Adjustable, Applewood Knob, Weight Each 1⅜ Lbs..$0.55

No. 120—7⅛ in. Long, 1⅝ in. Cutter, Endwise Lever Adjustment, Rosewood Knob, Weight Each 1⅝ Lbs..... .75

One in a Box

No. 220—7½ in. Long, 1⅝ in. Cutter, Rosewood Knob, Endwise Screw Adjustment.....$0.75

This Plane is in many ways better adapted for average use than any of the cheaper block planes made. It is ground on both bottom and sides.

Weight Each 1½ Pounds.

One in a Box.

Low Angle, Adjustable Throat, with "Hand-y" Feature.

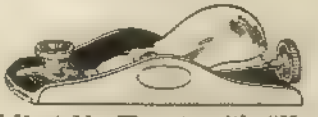
Each

No. 60—6 in. Long, 1⅝ in. Cutter, Endwise Screw Adjustment, Nickel Plated Trimmings, Weight Each 1¼ Lbs.....$1 25

No. 60½—With Japanned Trimmings. Otherwise Same as No. 60..... 1.10

In the Low-Angle Planes the cutter rests on its seat at an angle of only 12 degrees. This angle permits of great ease in working across the grain on hard woods. They have adjustable throats, which allow of the opening or closing of the mouth, as coarse or fine work may require The "Hand-y" feature aids very materially in providing a firm grip for the hand of the user.

One in a Box.



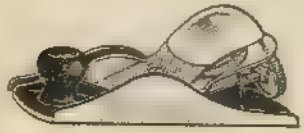
Low Angle, Adjustable Throat, with "Hand-y" Feature.

Each

No. 65—7 in. Long, 1⅝ in. Cutter, Endwise Screw Adjustment, Nickel Plated Trimmings, Weight Each 1⅜ Lbs.....$1 35

No. 65½—With Japanned Trimmings. Otherwise Same as No. 65..... 1 20

RABBET AND BLOCK



Each

No. 140—7 in Long, 1¾ in Cutter, Rosewood Knob, Nickel Plated Trimmings, with Detachable Side, Weight Each 1⅛ Lbs..... $1 40

The detachable side will easily change this tool from a Block Plane to a Rabbet Plane, or vice versa The cutter is set on a skew and is adjustable endwise.

One in a Box

Double End.

Each

No. 130—8 in. Long, 1⅝ in. Cutter, Hardwood Knob, Weight Each 1⅝ Lbs $0 75

This Plane has two Slots and two Cutter Seats. By reversing the position of the Cutter and the Clamping Wedge, it can be used close up into the corners, or other difficult places.

One in a Box.

Adjustable Double End.

Each

No. 131—8 in. Long, 1⅝ in. Cutter, Rosewood Knob, Endwise Screw Adjustment, Weight Each 1½ Lbs. $1 50

A combination Block and Bull Nose Plane Has two slots and a movable cutter seat. Use center cutter seat and slot for ordinary block plane work. For use as a bull nose plane remove the cap and cutter, reverse the cutter seat by throwing over the adjusting wheel, replace the cap and cutter in the new position. Fitted with the well known "Hand-y" feature on the sides, forming a convenient grip for the hand.

One in a Box.

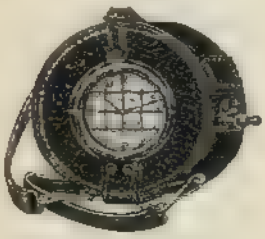
WATCHMAN'S PORTABLE CLOCK SYSTEM

"ALERT"

Labeled by the National Board of Fire Underwriters.

The Associated Factory Mutual Fire Ins. Co.'s.

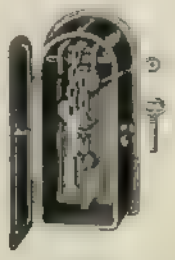
The purpose of a Watchman's Clock is twofold: insurance and assurance. The Fire Insurance Underwriters allow a considerable reduction in rate where a watchman is employed equipped with an approved Watchman's Clock. The "Alert" Watchman's Clock is an assurance to you that your watchman actually renders the service for which he is paid.



No. 15 Alert Clock.

No. 15—Model "B" Station.

No. 17—Model "C" Station.



No. 14—Model "A" Station

The case of the **"Alert"** clock is aluminum making it light and durable and preventing tarnish or injury from grease and acids. It is provided with a patented detective lock which makes it impossible to lock or unlock the clock without detection.

The movement is designed and manufactured in accordance with the most stringent requirements for accuracy and endurance. It has an 8 even-jewel escapement which assures correct time keeping. It has a patented spring-driven dial carrier which prevents the watchman from stopping the movement by leaving the recording key in the clock.

The movement is interchangeable, meaning that an extra one may be kept on hand to prevent interruption of the service or that one may be sent from the factory for use while the original one is being cleaned and oiled. This feature is exclusive; and it is indispensable for maintaining continuous service.

Unless otherwise ordered, clocks are arranged for 12-hour dials. Clocks may be arranged for 24 hour dials without extra cost.

The installation of the system consists merely of fastening the stations in their respective position with screws and patented metal seal. There is no wiring. With the "Alert" Clock three models of stations are optional (as described below). There is only one size and model of Alert Clocks regardless of the number of stations used with it.

The cost of a complete system is arrived at by adding to the price of the clock the required number of stations at the price of the model selected for your requirements.

Each

No. 12—"Alert" Clock, Size 5½x5½x2½ in., with Leather Pouch and Wire Grills to Protect Crystal and One Year's Supply of Paper Dials. Weight 2¾ Lbs.....$45.00

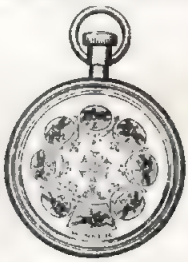
PEDOMETERS, COUNTERS, ETC.

No. 5½



No. 10

No. 8

THE AMERICAN PEDOMETER

A pedometer measures and registers every step you take. All sportsmen, golf players, pedestrians, in fact everybody that walks, wants one. It is carried on the waist band or attached to the pocket. It resembles a watch in size and appearance. Regulated to accord with the step. Each one is guaranteed.

No. 5. With 10-mile dial. Each $ .85 **No. 5½.** With 100-mile dial, Each **$1.00**

No. 7. Extra high-grade. Made with 100-mile dial. Adjustments are fine and accuracy is assured. Has porcelain dial and hinge back....Each **1.75**

WHICH HORSE WINS?

Eight horses spin when you press the crown and there is no telling which will win. After the dial stops the lucky number appears at the bottom.

No. 10. A popular new pocket game. Watch size, nickel plated....Each $ .75

POCKET ROULETTE

This miniature roulette wheel, marked and numbered in red and black is the size of an ordinary watch, with nickel plated case. It is a stem winder and when you press the crown the hand spins. It stops by releasing the crown quickly.

No. 8. No telling in advance where the pointer will indicate.....Each $ .75

WATCH MODEL AUTOMATIC COUNTERS

No. 9

It counts consecutively from 1 to 9999 and repeats. Operated by pressing the crown, and can be set back to "0" from the back. Useful in many ways. It is the size of an ordinary watch and finished in triple nickel plate.

No. 9. Each.....$1 25

No. 6

BENTON'S TALLY REGISTER

They are very simple in construction, can be carried in the pocket, are the size of an ordinary watch, and weigh about four ounces. They can be set to zero any time a new count is desired by turning a knob or key. They can be used for any purpose where a correct count is desired.

No. 6. 1 to 1,000.....Each **$2.50** **No. 1.** 1 to 10,000.....Each **$3.50**

Delivery Prepaid If Cash is Sent with Order at Above Prices

Postage on cards, per deck, 5c.

"AMERICAN" STEEL SPLIT PULLEYS

Flat "X" braced arms (edge on) give perfect rigidity and least air resistance
Grooved air escape improves belt contact, yet the face is not weakened
Rim One thickness of steel Snugly doweled at the joints Combines lightness with durability
Tight clamping hub eliminates key-way and set screw. Fits different shafts by use of interchangeable bushings, which are immovably fixed by interlocking device.
Inside flange, to which ends of arms are riveted, secures extraordinary strength and trueness
No need to strip the shaft Fit two halves of pulley together, then tighten clamping bolts evenly.
Arm rivets do not go through face, with possible protrusion of rivets.
Rolled bead on rim, strengthens face at edge

This illustration shows some of the points that make "American" pulleys power, time, and money savers "American" pulleys of 3 inch, 4 inch and 5 inch diameters are the smallest metal split pulleys made in standard sizes. The illustration shows a type used in diameters from 25 to 42 inches "American" pulleys having diameters from 44 to 60 inches are constructed with 8 arms instead of 6. Large sized pulleys, with faces wider than 10 inches, up to and including 28 inch face, are made with a double set of 8 arms. Pulleys with 30 inch face, up to and including 36 inch face, are made with triple sets of arms

BUSHINGS FOR TIGHT AND LOOSE PULLEYS

For running "American" pulleys tight and loose, we recommend the use of our Split Loose Bushing, fitted with Hart's Positive Lubricator, or Roberts' Patent Self Oiling Bushing

Roberts' Patent Self Oiling Loose Bushings
Made for
The American Pulley Co. Only

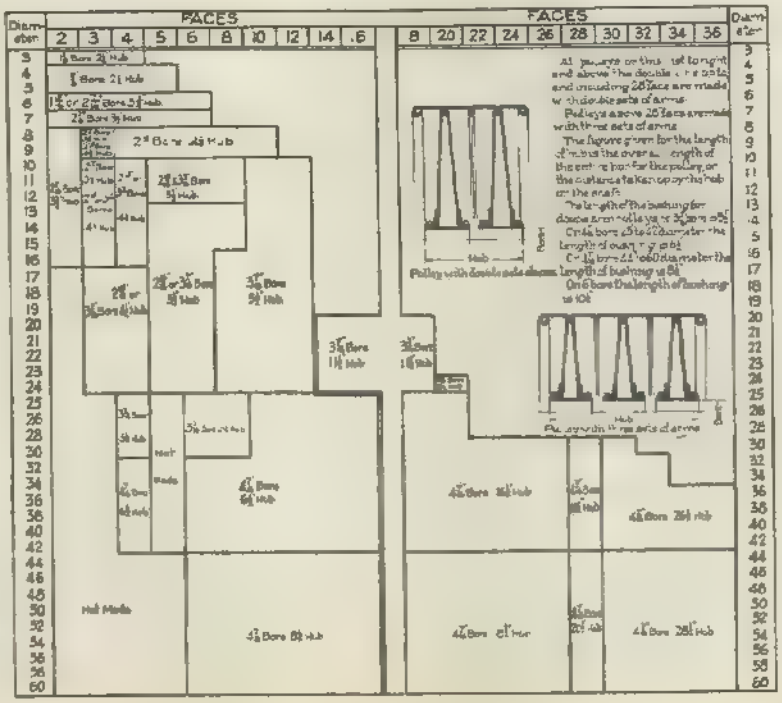
TABLE OF "AMERICAN" HUBS AND BORES



*AMERICAN WOOD TURNING LATHES

Our **Wood Lathes** possess every desirable improvement and convenience; they are well built, neatly finished and will stand the hardest kind of turning

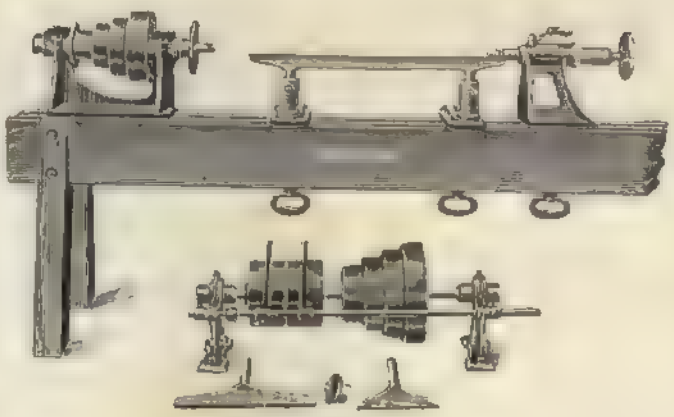
The Head and Tail Stocks are made heavy and rigid, so as not to spring or chatter when running. The bottoms of the head and tail stocks are planed on a mandrel, so that the centers come exactly in line when fitted to the shears.

The Spindles and Centers are made of the best steel The cone driving pulleys are made of iron. The bearings of the head stock spindle are lined with genuine babbitt

The Countershaft is complete with shifter, and will be furnished with iron or wood cone pulleys

The Parts Furnished with a single end lathe are the head and tail stocks, one each spur and conical center, one face plate, one screw face plate, two rest steps and three tool rests of different lengths, three clamps, legs for the stands and tail stock countershaft with shifter

The Double End Lathe, besides the above parts, is furnished with a floor stand with adjustable rest and one large rear face plate for turning large circles. Prices cover irons only



Single End Lathe

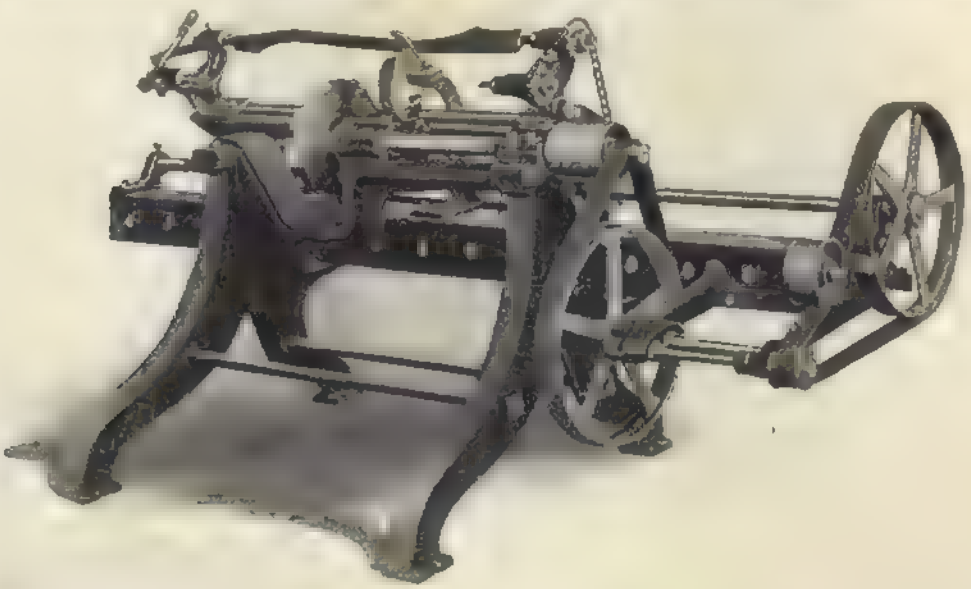
*THE OBER LATHES

FOR HANDLES, SPOKES, WHIFFLETREES AND OTHER KINDS OF IRREGULAR WORK



No. 11..... .. each, $

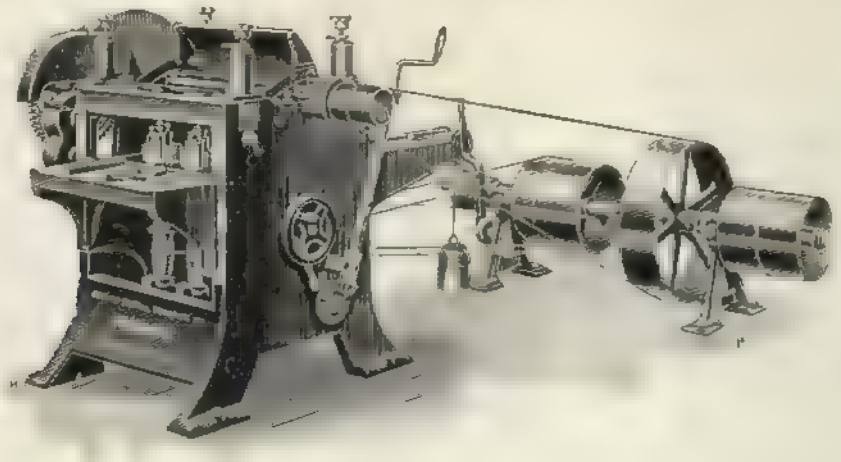
Approximate weight net, 1,350 pounds

Crated for shipment, 1,500 pounds.

A good countershaft is furnished with each lathe. It is all iron and steel, and requires about two horsepower. It is very simple, strong and durable. The regular lathe will turn from 8 to 36 inches in length. A special lathe is made to turn up to 42 inches. The tight and loose pulleys on the countershaft are 10 inches in diameter for 3 inch belt and should turn 1,000 revolutions per minute. The carriage is moved forward by lever and rack. When the work is mashed the carriage is moved out instantly, and is moved from the head by a lever and another lever draws back to its place. The head is so constructed that the knives will not gouge into the work nor all we sticks to get at them and break them. It will turn like a pattern, and can be made to turn larger or smaller by loosening a set nut and moving the pattern rest from or toward the head. The turning center on the pattern is in eccentric so that one end of the work can be made larger or smaller without changing the other end. It will turn from 27 to 30 crooked axe handles per hour and other work accordingly. Axe handles are finished in the lathe and are ready to go to the carver. This lathe will not turn porch spindles, table legs and that class of work.

*Not carried in stock; can be shipped promptly from factory.

*AMERICAN "TRIUMPH" PLANER, MATCHER AND MOULDER



This is a very compact, rigid machine and is designed to economize space and withstand the hardest usage as well as to do the best class of work. There is an entire absence of vibration so common in small planers of this class; hence, the work turned out is uniform and equal in quality to that of large, expensive machines. The workmanship and material throughout are of the highest grade. It is adapted to the use of saw mills and small planing mills having limited room and power where a machine is required for a large variety of work, such as planing and matching, beading, working flooring, ceiling, siding, casing, wainscoting, and a large variety of moulding and trim.

The Main Frame is amply proportioned and strongly ribbed, insuring the greatest strength and stiffness.

The Table is cast in one piece and is deep and strong, being heavily ribbed and braced on the under side. It is planed on top and has raised edges to prevent the material from slipping against the side frames. The sides are long and placed far apart, being fitted to the outer edges of the main frame to which they are gibbed, thus securing the greatest rigidity and least possible wear.

The Cylinder is made of special grade steel and is accurately milled on four sides, two of the sides being slotted to carry beading and moulding knives in addition to the regular planing knives which do not have to be removed when beading and moulding is being cut.

Matcher Spindles are usually large and run in long babbitted boxes, ample provision being made for thorough lubrication. The matcher frames are also very strong and are carried on 1⅛ inch round steel guides at top and bottom, provision being made to easily take up any wear or lost motion. One of the matcher spindles is adjustable by means of a hand wheel at the side of the machine and has an eccentric clamp for instantly securing it in any desired position.

Matcher Heads are made of a size of standard design and will carry matcher edges or moulding knives ⅛ inch thick and up to 2⅝ inches wide. Shimer heads can be used when desired. Moulding knives can also be used on the main cylinder where the cut is not over ⅜ inch deep.

Chip Breakers. A heavy adjustable chip breaker is located in front of the cylinder which also acts as a hood. It may be swung back to expose the knives. Each matcher head has a chip breaker, one of which is self adjusting.

Pressure Bar is adjustable and prevents any vibration of material between the cylinder and matcher heads. This bar and the front chip breaker may be set close to the cylinder for special smooth surfacing or can be set out as far as to clear moulding bits when used.

The Feed is simple, powerful and positive, with steel rolls 3 inches diameter, turned from the solid, the top feeding in rolls being fluted. It is driven by a belt from the countershaft to which a belt tightener is attached so that the operator can stop or start the feed at will. Two rates of feed are provided, namely 35 feet and 42 feet per minute, and the change from one to the other can be quickly and easily made.

Each planer and matcher is furnished with one pair of planer knives, one pair beading bits and one set standard matcher bits for 1 inch flooring.

The cut shows the machine Double Geared with both top and bottom rolls driven, but it is also furnished Single Geared with the top rolls only driven; see price list.

BUCKETS AND CANTEENS

FOLDING CANVAS BUCKETS

No. 3C

No. 65S

No. 4D

No. 50

No. **3C.** Made of brown waterproof duck. Will fold into a very small space and has a capacity of 3 gallons. Weight 8 ounces..... $ .50

No. **65.** These buckets tie at the top which prevents contents from slopping out. Made of brown canvas, and hold 2½ gallons..... .65

No. **65S.** Like No. 65 but with spout..... .85

No. **4D.** Folding bucket of heavy canvas, fitted with metal frame, making it as stiff and rigid as a wooden bucket. Folds into a very small space. When open will stand alone Capacity 6 quarts..... *1.00

No. **12D.** Like No. 4 but holding 10 quarts..... *1 50

No. **50.** Water jar or bottle. Made of brown duck and watertight. Fitted with cork at the neck. Weighs ½ lb., holds 22 pints..... *1.00

CANTEEN, ARMY STANDARD

Made of heavy block tin, retinned, covered with thick absorbent felt, which should be soaked with water at time of filling. A heavy, dry canvas covering is then drawn down and laced over the soaked felt confining the moisture, thus reducing the temperature. Can be used as a hot water bag.

No. **47.** Capacity about ½ gal..... *$2.00

No. **47G.** Capacity about 1 gal..... *3.15

HIKER'S CANTEEN

This canteen is made of tin and covered with Khaki colored canvas. The straps are made of Khaki webbing, fitted with detachable snaps engaging rings on each side of the canteen. A metal capped stopper with finger piece is provided.

Designed specially for Boy Scouts to whom thousands have been sold.

No **P.** Capacity 2½ pints. Weight ½ lb.....$ .50

SELF-COOLING WATER BAG

Evaporation is the underlying principle of nearly all refrigerating processes. This fact has been applied as the working basis of the Improved Water Bottle. The material of which the bag is made has the peculiar property of holding water, and yet exuding just enough to present a continuous water surface to the warm air.

It's a blessing to hot, tired, thirsty humanity.

No. **1A.** Capacity about 1 gallon; weight ½ lb.....*$1 00

No. **2A.** Capacity about 2½ gallons; weight 1 lb..... *1.25

No. **5A.** Capacity about 5 gallons; weight 1½ lbs..... *2.00

For other canteens see page 221.

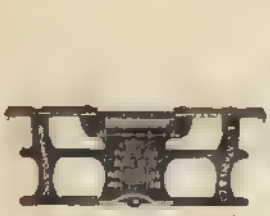
SAW TOOLS

For Jointing, Gauging, Side Filing and Setting Cross Cut Saws.

ATKINS' EXCELSIOR



Excelsior Saw Tool

Tool Used as a Side File.

Tooth Set Gauge

Setting Block.

Per Dozen Sets

No. 2 5⅜ in Long, 2¼ in High, Cast Iron Frame Natural Finish Used as a Jointer a Raker Gauge or as a Side File, Complete with Tooth Set Gauge and Ordinary Setting Block Weight Per Dozen Sets 19 Lbs. . **$6 50**

One Set in a Box

ATKINS' PERFECTION

Perfection Saw Tool.

Tool Used as a Raker Gauge.

Tool Used as a Jointer.

Tool Used as a Side File.

Tooth Set Gauge

Criterion Saw Set.

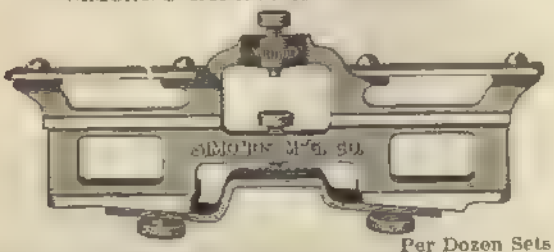
Per Dozen Sets

No. P—Cast Iron Frame Natural Finish, Used as a Raker Gauge Jointer or as a Side File, Complete with Tooth Set Gauge Criterion Saw Set and Highly Polished Cast Steel Setting Hammer with Hardwood Handle, Weight Per Dozen Sets 30 Lbs. **$15 00**

The Criterion Saw Set, furnished with this tool, has a die which rests on the top of the tooth. The hammer blow comes in contact with this die instead of the tool itself. This imparts a more even set and removes the liability of breakage. It is also possible to adjust the Criterion Saw Set so as to secure any degree of set by raising or lowering the set screw on the opposite end

One Set in a Box.

SIMONDS IMPROVED CRESCENT



Per Dozen Sets

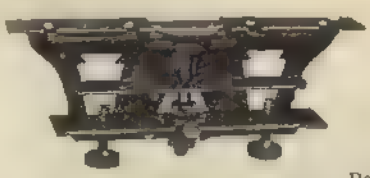
No. 342—Iron Frame, Hardened Steel Plates and Screws, Used for Jointing, Filing Raker or Cleaner Teeth, Gauging Raker Teeth and Setting Teeth, Complete with Tooth Set Gauge and Setting Block, Weight Per Dozen Sets 18 Lbs. **$14.40**

Advantages.

Quick, accurate and rigid adjustment of raker gauge. No chance to dislocate slide when once in position—a feature not to be found in any other saw tool. Easy and rigid adjustment of joining file. Depth of raker tooth can be varied from ⅛ to 1/1000 of an inch.

One Set in a Box.

DISSTON'S IMPERIAL



Per Dozen Sets

No. 15—Malleable Iron Frame, Steel Wearing Parts, Used as a Jointer or Raker Tooth Gauge, Complete with Tooth Set Gauge and Setting Block, Weight Per Dozen Sets 21 Lbs. **$15 00**

All wearing parts are made of high grade steel, specially hardened, giving great durability, and are also easily detached by the mere loosening of a screw. This, while holding parts firmly, also permits of renewal, thus prolonging efficiency of tool indefinitely. The Raker Gauge is also made of steel and hardened to such a degree that the best superfine file will not cut it.

One Set in a Box

SAW SETS

For Cross Cut Saws.

Per Dozen

No. 50—Genuine Whiting, 3½ in. Long, Forged and Tempered Tool Steel, Polished, Patent Anti-Splitting Collar, Weight Per Dozen 3 Lbs. **$10.00**

No. 51—Woodman, Same Style as No. 50, but Cheaper Grade. **9 00**

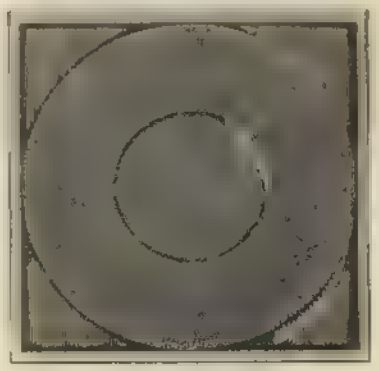
One-twelfth Dozen in a Box.

NARROW BAND SAWS

DISSTON'S, IN COILS

Order all Saws by Number of Points to the Inch.

In One Inch Space there is One Tooth Less than Points.



Give Full Particulars when Ordering.

For Saws of Heavier Gauge than Listed, Add 5 Per Cent to List for Each Gauge Heavier.

Set and Filed, Not Joined.

One-quarter Dozen in a Box.

SAW HAMMER AND ANVIL

DISSTON'S

For Setting the Teeth of Cross Cut Saws.

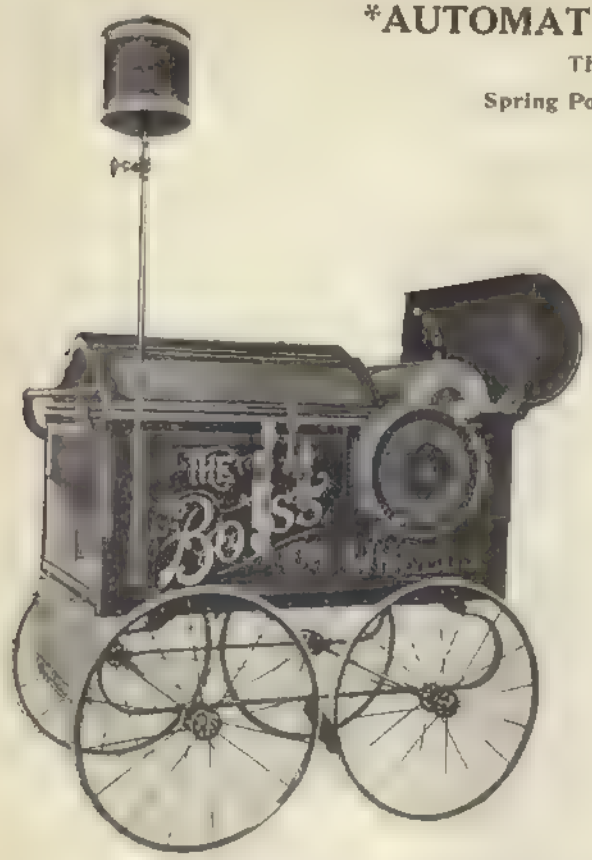
	Per Dozen.
No. 1—Setting Hammer, Tool Steel Head, Hardwood Handle	**$9.00**
Anvil—5 in. Long, 1½ in Diameter, Tool Steel Octagon Shape	**7.50**

These tools are the simplest and best on the market for setting Cross Cut Saws.

*AUTOMATIC PEANUT ROASTERS

THE BOSS ON WHEELS

Spring Power. Gas or Gasoline Burners



The Boss with glass cover, each $69.00
The Boss without cover, each 65.00

The illustration shows The Boss equipped with a cover made of sheet steel and glass to fit over the warming pan. The cover will keep the dust out when the machine is used out doors and prevents pilfering. It has a hinged lid, giving ready access to the contents of the pan.

Dimensions—Width 32 inches, length 40½ inches, height to top of dome, 39½ inches, to top of gasoline tank 61½ inches.

The peanut cylinder is 8x19 inches, will roast 10 to 12 quarts per roasting. Warming pan is 2½x22x24 inches, will hold over 3 pecks of peanuts. The running gear is steel springs on steel axles and 20 inch wheels with ½ inch solid rubber tires. Shipping weight without cover 235 pounds, with cover 260 pounds, shipped crated.

*AUTOMATIC PEANUT ROASTER AND CORN POPPER

THE BONANZA

Spring Power. Gas or Gasoline Burners

The Bonanza, each $100.00

Dimensions—Width 33½ inches, length 52 inches, height to top of dome 80 inches, to top of gasoline tank 84 inches.

Show case (inside) 21x44½x33 inches high, with divisor panel in center.

Capacity—Peanut cylinder 10x19 inches, will roast about 10 pounds per roasting.

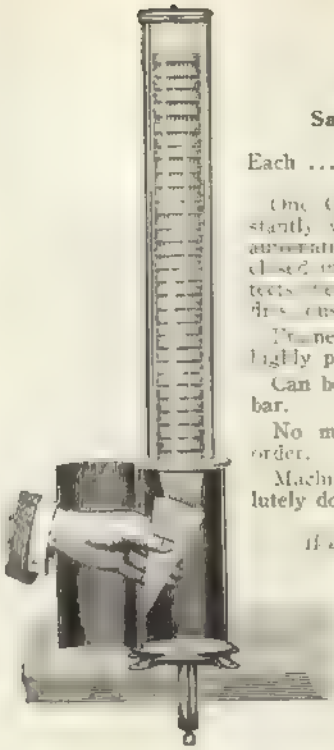
Skillet popper (inside) 1¾ inches deep by 11 inches in diameter, will pop from 2 to 3 bushels of corn per hour.

Running Gear—Steel springs on steel axles and 20 inch steel wheels with ¾ inch solid rubber tires.

Net weight 300 pounds, crated for shipment, 550 pounds.

*Not carried in stock; can be shipped promptly from factory

CONE DISPENSERS



CHEROKEE

Sanitary Cone Dispenser

Each $6.00

One Cone at a time is removed instantly with [illegible]. Door closes automatically leaving all the Cones enclosed in a dust-proof case, which protects them from coming in contact with dirt, dust and microbes.

Frame is made of metal, plated and highly polished.

Can be set or clamped on counter or bar.

No mechanical parts to get out of order.

Machine is constructed so it absolutely does not break or mar the Cones.

Weight per dozen 190 pounds

STRAW DISPENSERS

CHEROKEE

Cherokee Sanitary Straw Dispenser

Each $5.50

Made entirely of metal, except a display slot on both sides of the machine, which is lined with celluloid through which the straws may be seen.

Has the very best quality of plating and will not rust. Holds 500 Straws at one filling.

No spring mechanism to clog the straws or get out of order. Dispensing levers are inside the base of machine and are not in the way.

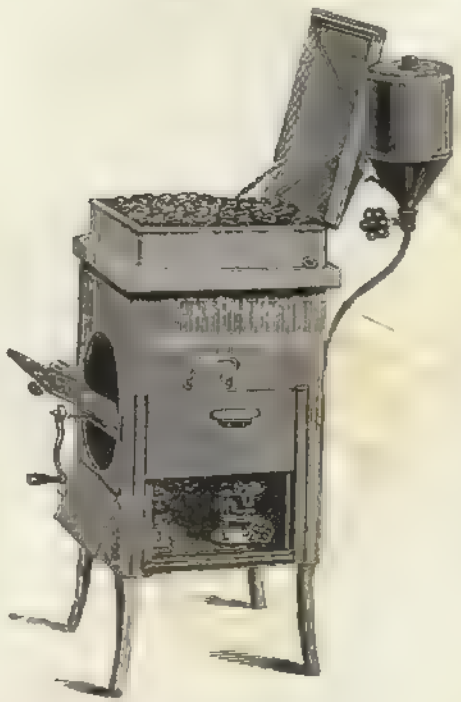
Occupies but little space and is an ornament as well as a necessity.

This Dispenser protects the straws from flies, dust, microbes etc., and by pressing the lever it dispenses one straw at a time on either side of the machine.

Weight per dozen 80 pounds

PEANUT ROASTERS

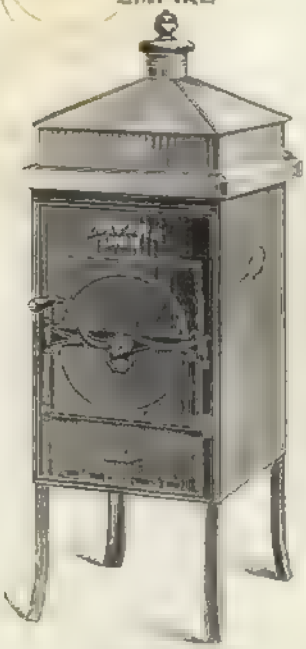
EMPIRE



Roaster Open For Gasoline

16 inches high, 16 inches wide, roasting capacity one half bushel. Top of XXXX Tin, Copper and Brass trimming.

EMPIRE



For Charcoal

Empire Peanut Roaster for Charcoal, each $25.00

Empire Peanut Roaster for Gasoline, each..... $28.00

The gasoline roaster has no smoke, no smell, no dust. Heat is regular and quickly started. Weight 80 pounds. Full directions sent with each roaster.

LITTLE GEM

For Charcoal

Little Gem Peanut Roaster for charcoal, each..... $8.50

22 inches high, 14 inches wide, 20 inches long. Roasting capacity, half bushel. Weight 20 pounds.

EXERCISERS AND CHEST PULLS

GRIP EXERCISER

This exerciser may be used separately or attached in place of ordinary handles to any pulley or weight machine.

It strengthens the fingers, the hands, the wrists the arms, and develops the muscles there. Less time is required for practice than with any other gym apparatus.

No. **14.** ..... Each **$ .25** Delivered $ .30
No. **14.** ..... Pair **.50** Delivered .60

WHITELY CHEST PULLS

The best thing known for developing the chest. It is made with three or five strands of elastic cable, adjustable so that the cables can be attached or detached in an instant, enabling the user to exercise with as many cables as desired, according to the strength of the user. Finely nickeled parts, with charts showing different exercises.

No. **3M.** Medium, tension 3 strand..... **$ .75**
No. **3H.** Heavy, tension 3 strand..... **1.00**
No. **5H.** Heavy, tension 5 strand..... **1.50**
No. **5X.** Extra heavy tension, 5 strand..... **2.00**

WHITELY SPRING EXERCISER

Made of coiled spring wire and quickly transposed, from an exerciser to a chest pull or visa versa in a few seconds.

As a chest pull attach the handles to each end of both strands as shown in "Figure A" or one strand may be attached if light tension is required.

Instructions for Using as an Exerciser

Insert one screw hook and one screw eye at about your own height. Hang the exerciser on the hook and snap the safety line into the eye as shown in figure "B". For reverse movements place hook and eye a few inches above, attach exerciser and safety line.

Caution—Under no circumstances should the spring exerciser be used until the safety line is securely attached.

FIRE EXTINGUISHERS

BADGER

Badger is approved by the Board of Supervising Inspectors of the Steam Boat Inspection Service, National Board of Fire Underwriters, Underwriters Laboratories, Inc., and National Fire Protection Association.

	Each
Badger—24 in. High, Extra Heavy Special Cold Rolled Copper Tank, Thoroughly Coated on Inside with Lead, when Charged Ready for Use it Contains 1½ Pounds of Bi-Carbonate of Soda Dissolved in 2½ Gallons of Water, Bottle in Cage at Top Just Under Cover Holds 4 Oz. of Sulphuric Acid, Tested to a Cold Water Pressure of 350 Lbs. Per Square Inch..... $.....	

When the Badger Fire Extinguisher is reversed, the sulphuric acid is fed automatically into the soda solution. Instantly carbonic acid gas is formed and within five seconds a pressure is generated of 90 pounds to the square inch. This pressure drives the water and gas through the hose straight at the fire and puts it out. As the gas itself will smother a fire independently of the water, the stream from the Badger is immensely more effective in extinguishing a blaze than the same amount of water alone. In other words, to equal the results of one pail of water thrown from the extinguisher you would have to use forty pails of ordinary water.

The seam of the tank is double-lock joint, reinforced on the inside by a patented bronze stay, all thoroughly sweated together and soldered, thus making a smooth, strong joint, giving the maximum strength with the minimum weight.

The stopper holder is so designed that the feeding of the acid is under perfect control, giving even flow of acid and an even pressure of gas. By thus regulating the flow, the acid becomes thoroughly neutralized, so that the stream causes no damage to any fabric with which it may come in contact.

PYRENE LIQUID

Vehicle Bracket.

Wall Bracket.

Approved by the U. S. Steamboat Inspection Service and by Fire Insurance Exchanges.

	Each
No. 1B—Polished Brass, Height 14 in., Diameter 3 in., Weight Filled for Use 6 Lbs.....	$7.00

Wall Brackets—Brass, Lacquered	.50
Wall Brackets—Brass, Nickel Plated...	.75

	Per Can
Pyrene Liquid—In 1 Quart Can.....	$1.00

Pyrene Liquid is a combination of purely organic materials, having an aromatic odor and a high specific gravity. Pyrene contains neither acid, alkali, salts nor moisture and will not stain the most delicate fabric or injure anything with which it may come in contact. **Pyrene Liquid** does not lose its strength or deteriorate with age. **Pyrene** will not free at a temperature of 50 degrees F. below zero, and is good until used, because it does not deteriorate nor evaporate.

When **Pyrene Liquid** is subjected to a temperature of 200 degrees F. or over, it is immediately transformed into a heavy, dry, cohering, non-poisonous gas blanket, which surrounds the burning material, cutting off the air supply necessary for the life of the fire, and thereby extinguishing it.

CHEMICAL FIRE ENGINES

BADGER

The steel tank is lined with sheet lead ⅛ of an inch thick, thoroughly sweated to the steel body, having the strength of the steel shell, the sheet lead being impervious to acid or water.

Specially constructed gun metal valves.

Lead acid bottle protected with a copper jacket thoroughly lead coated to prevent corrosion.

Occupies a space of 3x4 ft. It is 39 in. wide from outside of hubs

When not in use it stands on end on three short legs in a vertical position with weight off the wheels

Operation—Pull tank over onto wheels. Push to fire. Drop handle to floor. Turn valve in end of tank wide open and the discharge comes at once Can be regulated by stop nozzle on end of hose.

Approved and made under the specifications of the National Board of Fire Underwriters.

Each

Badger Steel Tank Capacity 40 Gallons, Forged Steel Frame 48 in Sarven Patent Wheels with Brass Capped Hubs Heavy Diamond Netting Wire Basket, with Wrought Angle Frame, Complete with 50 ft. COLUMBIA ACETYLENE LAMP

This acetylene lamp compact and adapted for camp use. It has a flanged base to prevent upsetting and a wire handle which folds out of the way when not in use. It is easily operated, very simple in construction and the size of the flame can be regulated, turning it up or down, the same as an oil lamp. Burns carbide which can be secured in practically any hardware or sporting goods store. Height 5 inches.

No. **CB.** Gun metal finish..... **$3.00**
No. **27.** 2-lb. cans, carbide..... **.25**

BALDWIN CAMP LAMPS

No. 30

These lamps burn acetyline gas generated from carbide and water and throw a brilliant light. An automatic sparker, attached to the reflector, makes lighting possible without the use of a match.

MODEL 30

A reliable little, inexpensive lamp, especially suitable for camp use. Burns three hours at one filling, at a cost for carbide of ½ cent per hour. Weight, fully charged only 6 ounces. Height 4 inches.

No. **30.** Brass finish.....**$1.00**

No. 29

MODEL 29

Practically same as Model 30 excepting that it has a highly polished, nickel finish and has both cap hook and hinged handles.

No. **29.** Height 4 inches, weight 6 ozs.....**$1.50**

No. 38

MODEL 28

This lamp is larger than the other models, and burns for five hours on one charge, nickel finish, with hook and hinged handles so that it can be hung up or carried in the hand.

No. **38.** Height 5 ins., weight 10 ozs.....**$2.00**

No. **XC.** Extra Carbide Containers.....**.15**

BALDWIN CAMP LIGHTING OUTFIT

It consists of a water tank, carbide container, gas bracket and connections and 6 feet tubing packed in a nicely finished wooden box 7x7x9 ins. weighing 4 lbs. The generator is made to hang on a nail in the tent pole or tree or placed on the ground. A table lamp, with tin shade can be connected to this generator with tubing, either separately or along with the wall bracket.

No. **B1.** Generator outfit complete with gas bracket.....**$5.00**

No. **X1.** Table lamp for above extra.... **1.00**

SOLAR BOAT, CANOE AND CAMP LAMP

A combined canoe or boat light and hand lantern for use on inland rivers and lakes. Has pedestal base for fastening to deck and is adjustable or detachable from same for use as a lantern, having handle for carrying. Burns acetylene gas 5 hours and will not jar or blow out. Is of the same construction as the Solar Gas Cycle Lamp except that it has 1½ inch red light to port and 1½ inch green light to starboard set at a 45 degree angle so as to show both to front and side.

No. **S68.** Nickel plated, weight 3 lbs.....**$3.50**

BASEBALL BATS

Ty Cobb Made from second growth ash, straight grain, hand turned, made from model used by the famous slugger, flame burnt finish, highly polished with glossy 'Trade Mark' transfer of the celebrated batter, length 32 to 36 inches, one in a paper bag, three dozen in a crate, weight 110 pounds.....per dozen, **$15.00**

"DIAMOND EDGE IS A QUALITY PLEDGE"

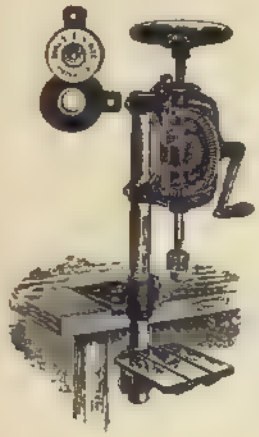
BENCH DRILLS



GOODELL-PRATT

With Patent Automatic Feed.

Two Speeds, Cut Gears, Polished Steel Tubing Upright Shaft, 1¼ in. Diameter, 24 in. Long.

Each

No. 491—Red and Black Enameled Iron Parts, Polished Steel Parts, 6x6½ in. Milled and T-Slotted Table Adjustable Up or Down and Right or Left, All Steel Chuck Holding 0 to ½ in. Round Shank Drills, Weight Each Boxed 45 Lbs..... $22.00

The Patent Automatic Feed is controlled by a nut on top of the frame which may be set on the dial to regulate the proper pressure for the size of drill which is to be used. The feed does not operate until the point of the drill actually comes in contact with the work. Reversing the handle instantly releases the feed and runs the feed screw back to its original position. Great care should be exercised when this machine is used with a drill under ⅛ in. in size.

YANKEE, BALL BEARINGS

With Automatic Friction and Ratchet Feeds.

Dead Black Finished Frame, Nickel Plated Chuck, Complete with Wrench, Steel Spindle, Steel Chuck with Hardened Jaws, Gears Cut from the Solid Metal, Steel Feed Screw with Ball Bearings at End, Tempered Wearing Parts.

Each

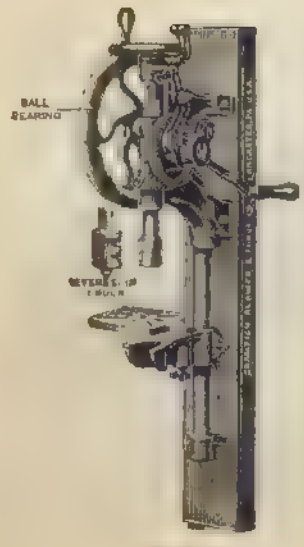
No. 1003—**Single Speed**, Traverse of Automatic Feed 1½ in., Diameter of Table 4¾ in., Adjustment of Table in Bracket 1¼ in., Adjustment of Bracket 2¾ in., Extends Below Top of Bench 4¼ in., Extends Above Top of Bench 14½ in., Length Over All 18¾ in., Chuck Holds Up to ¼ in., Net Weight 10¼ Lbs., Gross Weight 20 Lbs. . $10 00

No. 1005—**Double Speed**, Traverse of Automatic Feed 2 in., Diameter of Table 6¾ in., Adjustment of Table in Bracket 1¾ in., Adjustment of Bracket 5 in., Extends Below Top of Bench 6 in., Extends Above Top of Bench 22 in., Length Over All 28 in., Chuck Holds Up to ½ in., Net Weight 29 Lbs., Gross Weight 57 Lbs..... 16.50

These Drills have two feeds, friction for rapid movement of spindle and ratchet to feed drill. Feed adjusted for drills from No. 45 up, to work without breaking and is thrown off automatically top or bottom to prevent jamming. Table has vertical adjustment on bracket also adjustable bracket, both are removable.

One in a Box.

POST DRILLS



No. 90.

CHAMPION BLACKSMITHS'

Automatic Self-Feed, Back Gears, One Speed.

Each

No. 90—43 in. High, Drills Holes up to 1 in., Drills to Center of 14½ in. Circle, 1½ in. Diameter Spindle, Up and Down Run of Spindle 3 in., Up and Down Run of Table 11¾ in., Spindle Bored Like "Neverslip" Chuck for ½ in. Round Shank Drills, Weight Each 100 Lbs..... $8 50

WESTERN CHIEF BLACKSMITHS'

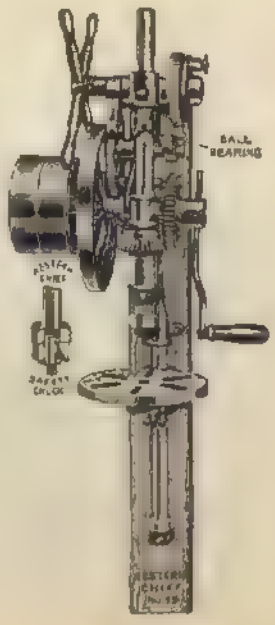
Combined Hand and Self-Feed.

Each

No. 19—49 in. High, Drills Holes Up to 1¼ in., Drills to Center of 16½ in. Circle, Up and Down Run of Spindle 5½ in., Up and Down Run of Table 11 in., Greatest Distance from Table to Spindle 14 in., Ball Bearing and Safety Chuck, Spindle Bored for ½ or ⅝ in. Round Shank Drills, **(Always State Size when Ordering)**, Weight Each 130 Lbs..... $20.00

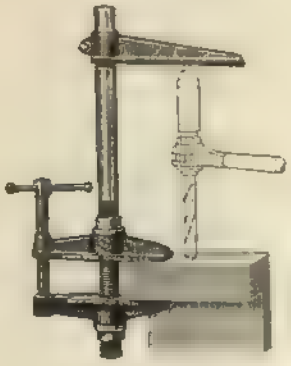
No. 19P—Same as No. 19, but with 8x2 in. Tight and Loose Pulleys, for Hand and Power Use, Pulleys Should Run 190 to 200 Revolutions Per Minute, Weight Each 114 Lbs..... 22 50

The Hand and Self-Feed are independent of each other, and for quick work, such as wood boring, the drill is unsurpassed, as bit is quick-lifted.



No. 19P

DRILLING POSTS



ARMSTRONG Adjustable Clamp. For Use with Ratchet Drills.

Drop Forged Steel.

Exceptionally Well Designed and Made from Drop Forged and Bar Steel Throughout, with Alloy Steel Heel Screw, Collar Screw and Nuts are Hardened.

Each

No. C10—Height of Post 20 in., Diameter of Post 1¼ in., Arm Radius 10 in., Clamp Capacity 4½ in., Weight Each 27 Lbs.... .... **$8.00**

The nuts have convex bearing surface fitting concave seat in clamp jaws and holes through jaws have ample clearance, thus permitting the clamp jaws to tilt freely without danger of bending the post. Especially adapted for bridge and structural iron workers.

One in a Box

BENCH DRILLS

MILLERS FALLS

Consists of the standard and fixtures that convert a hand drill into an effective small bench drill.

Simple and strong in construction.

Makes a most convenient tool.

Hand drill is easily inserted and removed. A sensitive compound lever feeds drill into the work rapidly for wood or more slowly for metal as may be desired.

Steel and Iron Construction, Japanned.

Each

No. 22—Height Above Bench 15½ in., Distance Between Chuck and Table when Former is Raised to its Highest Point 6⅛ to 7⅛ in. According to Hand Drill Used, Sensitive Compound Lever Feed, without Drill, Weight Each Boxed 8 Lbs. **$8.25**

Holds Nos. 1, 01, 2, 2B, 02, 5, 05, 105 and 107 Millers Falls Drills

Each

No. 21 24 in. High, Changeable Speed from Even to 3 to 1, Extension Crank with Radius from 5 to 6½ in., with Star Chuck for Round Shanks from 0 to ⅛ in. Diameter, Complete with Vise, Weight Each Boxed 30 Lbs. **$11.00**

Vise swings on pin off center, permitting its use in many positions; may be used horizontally, on an angle, or reversed and table turned uppermost.

One in a Box.

BENCH DRILLS

MILLERS FALLS

This standard and fixtures readily converts a breast drill into an efficient bench drill for metal drilling.

A thoroughly practical tool that makes a breast drill serve a double purpose

The drill may be swiveled into many positions and clamped at varying heights either above or below bench.

The vise is swung on a pin off center and so can be used in any position or at any angle with the frame, vertical to horizontal, or completely reversed and the table turned uppermost.

Hand feed with side handle conveniently located at top gives quick feed action.

Each

No. 20—Height of Standard 24 in., Steel Feed Gears, Polished Steel Post and Machined Parts, Other Metal Parts Japanned, without Drill, Weight Each Boxed 28 Lbs. **$7.50**

This tool can be used with all Millers Falls Breast Drills except Nos. 13, 13A, 19, 019, 29, 029, 112, 130, 190, 191, 212, 290, 291 and 312.

One in a Box.

GOODELL-PRATT

With Patent Automatic Feed.

This drill has an Intermittent Friction Feed controlled by a nut on top of frame. This nut can be set to regulate the pressure properly for the size of drill in use, saving much drill breakage where operator is inexperienced. The feed does not operate until the drill actually strikes the work. Reversing the handle instantly releases the feed and runs the feed screw back rapidly to its original position. The steel spindle is topped by a balance wheel that equalizes its movement. There are two speeds that are easily changed by turning the shifter knob on front of frame All gears are cut from solid blanks

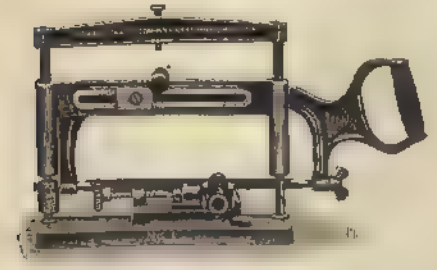
Each

No. 490—Height Above Table 18 in., Black and Red Enameled Iron Parts, Polished Steel Parts, Adjustable Table with Turned and Polished Top, All Steel Chuck Holding 0 to ⅜ in. Round Shank Drills, Complete with 8 Fluted Tool Steel Drill Points, 1/16 to 1/4 in., Weight Each Boxed 20 Lbs. **$11.00**

One in a Box

BENCH HACK SAWS

GOODELL-PRATT



Very useful in any shop where power is not available. By its use even an unskilled operator can cut metal rods or tubing rapidly and smoothly without breaking blades. The vise attached to the bed can be set to saw at any desired angle.

Made entirely of iron and steel, this machine is capable of long service under hard use Finished in red and black enamel.

Each

No. 1—Takes 8 or 9 in. Blades, 10¼ in. High, 10¾x3¾ in. Base, 6¾ in. Stroke, Vise has 2¼ in. Jaws Opening 2 in., Extreme Capacity 2x2 in., Complete with One 9 in. Blade, Net Weight 10¾ Lbs., Shipping Weight 16 Lbs $4 50

One in a Box

POWER HACK SAWS

MILFORD

Special Features:

Quick Return Stroke.

Automatic Lifting Device.

The Quick Return feature saves time, while the Automatic Lifting Device prolongs the life of the blade.

Each

No. 4—Height Over All 41 in., Height of Work Table 27 in., Stroke 5¾ in., Takes 10, 11 or 12 in. Blades, Covered Machine Cut Gears, 6x1⅝ in. THE NEW MODEL "BETZLER" PATENTED SELF-FILLER FOUNTAIN PENS

PERFECTED MODEL BETZLER PATENTED SELF-FILLING, SELF-CLEANING FOUNTAIN PENS the result of years of studied effort to meet the demand of discriminating pen users. A pen that insures the Test of Time for exacting and severe service.

Every Pen is guaranteed. Scientifically correct. Mechanically perfected. Fast thread screw cap, one turn removes or replaces cap—maintains gold pen in airtight chamber—prevents ink drying on the feed or the breaking of cap. Large ink capacity. FINGER PRESSURE FILLS IT CLEANS IT

SHOWING SIMPLE DEVICE COMPLETELY READY TO TAKE INK 2/3 SIZE

SHOWING PEN FILLED 2/3 SIZE

WILL NOT DROP INK—BETZLER PENS ARE LEAK PROOF.

THE BETZLER SELF-FILLING PENS will not leak or drop ink, will feed steadily and evenly, always ready to write the instant pen touches paper.

No metal parts, no holes, slots, levers or bars. No projections, depressions or exposed parts. No locks or parts to obstruct the fingers. No mechanism to rust, corrode bend, warp, expand, contract. No parts that leak.

Can be carried in any position in pocket, bag or trunk, and pen will remain clean, bright and ready to write at first stroke

Our gold pen points are 14 karat solid gold, with the hardest and best quality Iridium points, and can satisfy any demand for smooth, easy writing pens, stiff, medium or soft

Betzler holders are the best quality turned rubber. No molded goods made in Betzler plant.
The Betzler will not drop ink.
Construction scientifically correct.

WRENCHES ON DISPLAY SALES-BOARDS

BILLINGS & SPENCER.

These Boards are designed to carry a stock of Wrenches of the styles and sizes most in demand and to give the largest variety of openings with the fewest duplications.

The dealer is entitled to one of these boards free on condition that he purchase the wrenches complete as per list and in lots of six each of a size.

A printed card carrying full information is furnished with each board.

All Wrenches are milled slightly larger than listed in tables to allow for proper clearance and variations.

Number of Wrench is always stamped on the handle of Wrench.

The heads of Wrenches are stamped to show purpose for which the wrench can be used.

"Finished" Wrenches have milled openings, are polished all over, and are hardened and treated with a special black finish.

No. 2 DISPLAY SALES-BOARD, 48¼ in. Long, 10⅞ in. Wide.

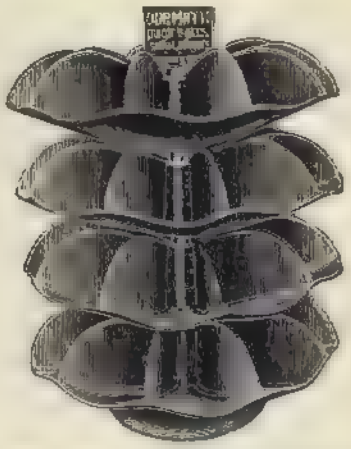
⅝ x 3, 3½, 4, 4½, 5, 6, 7, 8, 9, 10.

* ECLIPSE SECTIONAL REVOLVING NAIL BINS

IMPROVED **ORDINARY**

These bins are recommended for nails only. Each bin will hold 140 pounds of nails.

Nail bins equipped with scale cost $10.00 extra



These bins are made exactly like the Improved except they have no protections at end of partitions between bins. Handy for strap hinges, horse shoes, etc.

Each section works independently, and is hung on best steel balls. The stem on which all sections rest and revolve is molded solidly in the base, giving it sufficient strength to stand what is placed upon it.

Improved Revolving Nail Bins

No.	Sections	Bins	Height Feet	Weight, Lbs	Each
23	3	15	3	275	$70.00
24	4	20	4	335	83.00

No. 14 White handle, polished, length 9 inches, weight per dozen 7 ½ pounds . . . . . per dozen, $5 50

One dozen in a box

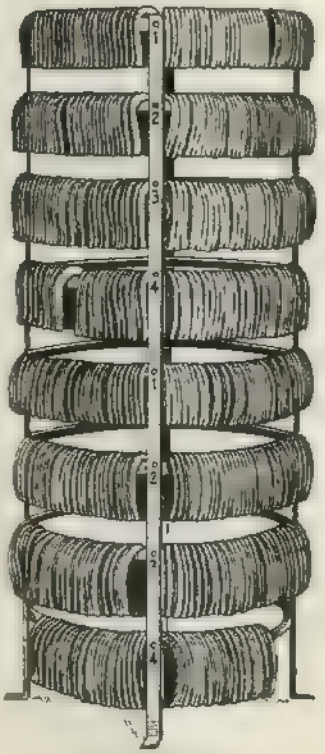
*HORSE AND MULE SHOE RACK

Rack Empty

No. 12 Rack holds 12 kegs of horse and mule shoes, is 5⅛ feet in height and 2 feet in diameter, weight 95 pounds, each $10 00

No. 15 Rack holds 15 kegs of horse and mule shoes, is 5¹ feet in height and 2½ feet in diameter, weight 100 pounds, each 12 00

This rack does away with kegs entirely for retailing and covers very little floor space, thereby saving valuable room, scratched hands and torn sleeves. The racks are numbered for the various sizes of shoes, separating the sizes as they are wanted. They make an indispensable fixture for all up to date dealers in horse shoes.



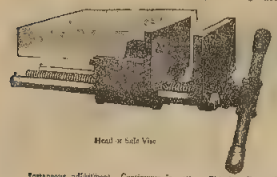
Rack Filled

*Not carried in stock; can be shipped promptly from factory

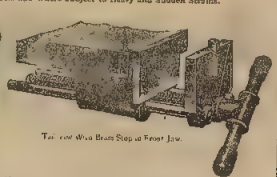
BENCH VISES

RICHARDS-WILCOX

Especially Suitable for Use in Manual Training Schools and Where Subject to Heavy and Sudden Strains.



Head or Tail Vise



Tail Vise With Beam Stop in Front Jaw

Instantaneous adjustment. Continuous in action. Phosphor Bronze Nut operates entire length of screw. No pawls, racks or triggers to break or wear. Nut is released and completely disengaged when pressure on work is removed by slight reverse movement of handle. No stripping or cutting of threads. When pressure is applied it screws the nut to engage and lock the screw firmly and is not held in position by any external mechanism. Screw is cut with single thread four to one inch, hence has double the power or pressure of one having screw cut with double thread. Guides are of cold rolled steel. Jaws are of best grey iron with working surfaces ground and finished. Special design of ribs on jaws secures minimum deflection or spring under pressure, as well as minimum weight.

	Each
‡No. 226½—Jaws 7x6 inches; Jaws open 10 inches; Screw 1 inch in Diameter, 4 Threads to the inch. Length over all 17 inches. Weight 29½ lbs.	37 00 5 00

*DIAMOND EDGE

Diamond Edge Vises are made especially for Jewelers and Makers of Small Tools. They are Strong and Substantial. Only the Best Materials are Employed in their construction great care being taken to see that all Parts Fit Accurately.

The Screw (Body, Head and Collar) is turned from one piece of Cold Rolled Steel and has a Square Lathe Cut Thread. The Jaws are Steel Faced, Hardened and are Ground to Insure that they Meet Squarely when Tightened. Both Back and Front Jaws are Filed to Fit.

These Vises are Made with two styles of Bases as follows:

A **Stationary Base**, in which the Vise is designed to be permanently Screwed to the Bench and a Clamp Base, which permits of the Vise being Clamped to benches of varying thickness up to 3 inches.

CARLETON CANOES

The Carlton Model Canvas Covered Canoe is a reproduction from a birch bark canoe belong to the Penobscot or Tarratine tribe of Indians, having been on the market for more than twenty-five years.

Ribs and Planking—Selected cedar free from unsound or shaky imperfections, planking is fastened to the ribs with copper tacks, solidly clinched.

Gunwales and Finish Rails—Are selected straight grained eastern spruce

Stems—Are shaped from white ash.

Seat Frames, Thwarts and Decks—From ash, birch and maple.

Bow Seats—Are dropped on 4 in bolts. Bow and stern seats of cane, detachable, and two thwarts, detachable, furnished with each canoe. Third thwart, in center, is removable in all canoes 17 ft. long and up.

Fastenings—Copper, brass, and galvanized iron.

Hardwood Keel—⅞ in. deep, runs entire length of canoe.

Finish—Special paint is used in filling the canvas, all pores being well filled.

Colors—Dark green (always in stock), dark red, light green, light red.

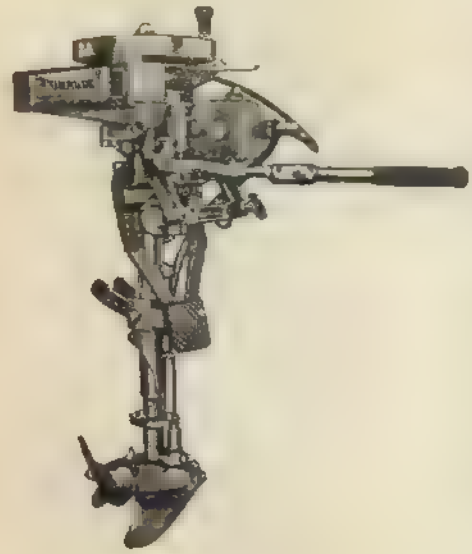
ROWBOAT MOTORS



EVINRUDE TWO-HORSE POWER, DETACHABLE

Easily attached to any rowboat or canoe; drop it over the stern-board and turn up thumbscrew with your fingers. There are no connections to make, no holes to be bored, no extra tools required.

Beautiful Enamel Finish, "Evinrude Gray" Enamel Baked on, Not Painted. Tank Capacity 8 Pints.

	Each
No. 2HP—Two Horse Power (One Cylinder Two Cycle) with Magneto, Evinrude Silencer and Automatic Reverse. Complete. Net Weight 70 Lbs., Boxed 130 Lbs.	$
No. 02HP—Same as Above, but without Automatic Reverse. Net Weight 67¾ Lbs	

Note—For installation in canoes, the above can be furnished with special bracket at same price

The Little Evinrude will drive the ordinary rowboat faster than the usual launch engines of twice its power. Every bit of power developed in the cylinder is delivered at the propeller. The speed of 6 to 8 miles an hour has enabled Evinrude owners to carry away many prizes against boats of greater horse power.

The cost of operation is very slight, as a tank of gasoline and oil, mixed, lasts from three to four hours of steady running at full speed.

GENERAL DESCRIPTION

Ignition The Evinrude Magneto—Built In Fly Wheel Type is standard equipment on all **Evinrudes.** The magneto is built into and made part of, the fly wheel. The armature and all connections are waterproofed and insulated so that moisture or spray cannot affect the spark.

Electrical Connections—The high tension cable, leading from the armature to the spark plug, has a heavy coating of pure rubber. Over the spark plug is fitted a removable hood to prevent any short circuit and also to protect the operator in the stern from shock.

Speed Control Right in front of the operator is the timer lever. To speed up, push it to the Right; to slow down shove it to the Left; to stop head press the little brass button at your fingers end. Everything within reach simple and easily understood. For a very slow, trolling speed the **Evinrude** "Sure Catch" Trolley Attachment may be fitted to the propeller in a minute's time—or as quickly detached.

Gasoline Tank—Special care is exercised in the making of our gasoline tanks; the best 4X tin is used, all seams reinforced by an extra fold of metal and carefully soldered. There is absolutely no danger of fire, in any case as the gasoline would drop into the water and not into the boat.

A sieve-strainer at the bottom prevents dirt from getting down into the carburetor and a strainer plug, easily removed, permits cleaning at any time.

Lubricating oil and gasoline are mixed together and placed in the tank; directions for mixing being stamped right on the tank. With the filler cap for the gasoline tank is combined a cup for the measurement of the correct quantity of lubrication.

Carburetor An efficient, little mixing valve, which operates equally well at high or low speed, is used. Once set it requires no further adjustment, as the gasoline flow is controlled from the shut-off valve. It is economical of fuel, and does not get out of order unless abused. The valves are set after testing at the factory and if directions are followed, there's no chance for trouble.

Gear Housing The housing for the driving gears is of bronze cast in one piece with the fin skeg which rides over snags and shallows, protecting the propeller and assisting in steering.

Propeller Wheel Just the right diameter and pitch, to develop the full speed and power, hard enough to prevent bending when striking rocks and still not so brittle as to break a fluke.

Automatic Reverse—With the Automatic Reverse, the boat is under absolute control at all times. Without stopping the motor the change can be made from Forward to Reverse, or from Reverse to Forward, almost instantly. Turn the boat in its own length; go ahead; "back up"; manœuver at will, even in crowded quarters.

Mechanically speaking the motor proper is not reversed. The propeller sleeve hangs, figuratively, in a swivel. A simple twist of the steering handle releases a dog, the propeller sleeve swings through a half circle and is "pointed" in the opposite direction. The natural reaction or "thrust" of the propeller against the water is utilized to swing it to its opposite direction automatically, where it is locked into place. This naturally changes the direction of rotation and the push of the propeller against the water exerts a backward thrust on the boat equal in force to that which was previously used in driving it forward.

ONE DOZEN IN A BUNDLE

CARPET BEATERS.

No. 12—Cruso, 12 gauge tinned steel wire, hardwood handle, length 28 in., head 9½x12 in., w't per doz. 6 lbs., per dozen .....**AAJ** $2.00
No. 11—Cruso, 11 gauge tinned steel wire, hardwood handle, length 32 in., head 10x14 in., w't per doz. 7½ lbs., per dozen .....**ABJ** $2.50
No. 10—Cruso, 10 gauge tinned steel wire, hardwood handle, length 35 in., head 10x14 in., w't per doz. 11 lbs., per dozen .....**BAJ** $3.50

This "Cleaner" rug beater has six wires in the beater head and the blow is evenly divided over the large surface. There are only four wires in the handle so it is elastic, while its strength is increased by these wires being twisted directly at the handle. Only the best furniture wire used in these beaters.
ONE DOZEN IN A BUNDLE.

No. 45—3 separate pieces of No. 12 coppered spring steel wire, securely held by strong iron braces, wood handle, length 36 in., w't per doz. 9 lbs., per dozen .....**BGJ** $4.00

An ideal carpet whip. It removes the dust quickly, as it strikes a large surface with its strong wire loops at every stroke, doing no damage to the carpet and so hung in the handle as to be perfectly balanced in the hand. Does not strain the wrist of the beater. Impossible to get loose in the handle.
ONE-HALF DOZEN IN A BUNDLE.

No. 42—Rattan, three strand, 12x8½ in. blade, twisted rattan handle, wire wrapped in three places, extreme length 31 in., w't per doz. 5½ lbs., per dozen .....**BDJ** $4.00
ONE DOZEN IN A BUNDLE

No. 14—Polished spring wire, smoothly woven, length 28 in., hard maple handle, brass ferrule, w't per doz. 4 lbs. .....per dozen **BBJ** $3.30

The reinforcement of rattan running through core and into handle preserves the shape, gives desired flexibility and prevents wires breaking and tearing fabrics.
ONE DOZEN IN A BUNDLE.

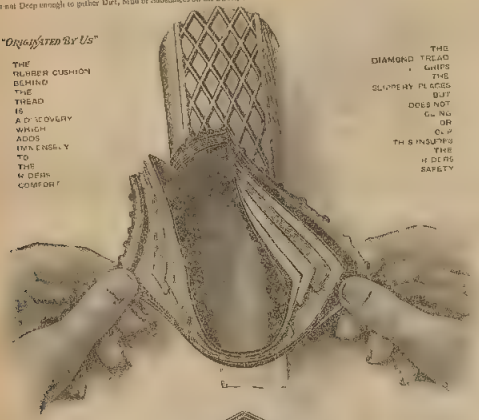
BICYCLE TIRES
SINGLE TUBE

The Dissection of a Rugby Diamond Tread Tire Reveals the One Secret of its Superiority—GOODNESS.
Cuts and Dogs enough to gather Dirt, Mud or Substances on the Street, but not Constructed Properly to make it a perfect Non-Skid Tire.

"ORIGINATED BY US"

THE RUBBER CUSHION BEHIND THE TREAD IS A DISCOVERY WHICH ADDS IMMENSELY TO THE EASE AND COMFORT

THE DIAMOND TREAD GRIPS THE SLIPPERY PLACES BUT DOES NOT CLING OR CLOG THE SPOKES THUS INSURING THE HIGHEST SAFETY



RUGBY

DIAMOND TREAD TIRES

Provided with Cotton Flannel Rim Strip which is inserted into the Rubber, this Strip will positively prevent Tires from creeping and protect the inner tubes against Accidents caused by Tires pulling off in Ruts, etc. This Strip prevents Rim Cuts and Wear.

***RUGBY—DIAMOND TREAD**

Has a Thick on the Tread. Patent Non-Skidding Diamond Cap Tread of our own design, Tread

Cover—Made of Pure Upper River Para Gum [illegible] Rubber is a Solid Cushion.
Tube—Best Quality Pure Upper River Para Gum Tube, [illegible] Thick on Walls, Extra Heavy Reinforcing Strip on Rim side.
Fabric—Compound Four Ply consisting of the best Sea Island Fabric and Friction Cloth, [illegible] Fabric.
Friction—The very best obtainable Friction is used, so strong that it is impossible to separate or ravel [illegible] Fabric. It is practically indestructible, being Sealed In a Solid Base of pure Para Gum.
Valve—Valve construction is the best used on any Tire. This is the same construction that has been used on Bulky Tires for many years.
Cement—Made of Heavy Liquid Cement and carefully Vulcanized in the Base of the Tire.
Quality—The very Highest Grade [illegible] obtainable to manufacture. Every Hard to Find [illegible] Tire Easy to Repair
Guarantee—Full Season. See Page [illegible]

	Per Pair
No. 884—28x2½ inches. Weight per pair 2½ lbs.	$12.00
No. 885—28x2¼ inches. Weight per Pair 6 lbs.	10.00

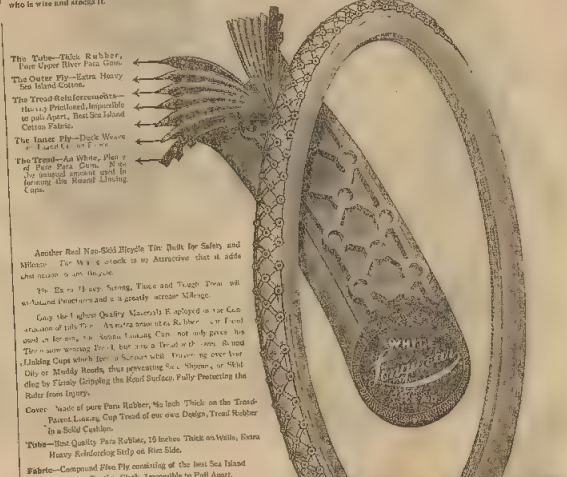
Prices do not include Pumps or Kits

BICYCLE TIRES
SINGLE TUBE

"ORIGINATED BY US"

The Beauty and the unusually LONG WEARING quality of this Tire makes it the source of much profit and pleasure to the dealer who is wise and sells it.



The Tube—Thick Rubber, Pure Upper River Para Gum.
The Outer Ply—Extra Heavy Sea Island Cotton.
The Tread Reinforcements—Heavy Pricktard, impossible to pull Apart, Best Sea Island Cotton Fabric.
The Inner Ply—Duck Weave of Sea Island Cotton Fabric.
The Tread—An White, Pliable of Pure Para Gum. Nothing unusual about this in forming the Beautiful Looking Cups.
WHITE Longwear

Another Real Non-Skid Bicycle Tire Built for Safety and Mileage. The White stock is so Attractive that it adds that classy appearance.

The Extra Heavy Strong, Tough and Tough Tread will withstand Punctures and is greatly increase Mileage.

Only the Highest Quality Materials Employed in the Construction of this Tire. A extra amount of Rubber is used in forming the Beautiful Looking Cups, not only gives this Tire more wearing Power, but also a Tread which does not Holding Cups which form a Suction with Tread to over Wet Oily or Muddy Roads, thus preventing Side Slipping or Skidding by Firmly Gripping the Road Surface, Fully Protecting the Rider from Injury.

Cover—Made of pure Para Rubber, ⅜ inch Thick on the Tread. Patent Looking Cup Tread of our own Design, Tread Rubber is a Solid Cushion.
Tube—Best Quality Para Rubber, 1⅛ inches Thick on Walls, Extra Heavy Reinforcing Strip on Rim Side.
Fabric—Compound Five Ply consisting of the best Sea Island Fabric and Friction Cloth. Impossible to Pull Apart.
Friction—The very best Obtainable Friction is used, so Strong that it is Impossible to Separate the Different Plies of Fabric.
Valve—Valve Construction is the Best used on any Tire. It is practically indestructible, being Sealed In a Solid Base of pure Para Gum.
Quality—The very Best that is possible to Produce for the Price.
Guarantee—Full Season. See Page [illegible]

VULCAN BIJAW

These Wrenches combine the merits of all other chain pipe wrenches as well as special advantages of their own. Wholly made from drop forged and otherwise wrought steel they are fully guaranteed and recommended as the most efficient and serviceable chain pipe wrenches made.

The double ended reversible jaws which may be quickly changed end for end as teeth first in use wear, greatly extend the life of the wrench and assure the service of "two tools at the price of one."

The fastening of jaws to handle with two unusually tough steel studs makes repairs possible in emergencies, insures uninterrupted service of tool and prevents the jaws from spreading. One stud will withstand full working strength of tool, when necessary.

In the "straight cut" teeth there is thorough distribution of gripping pressure; the tearing of pipe and one spot wear of teeth will therefore be wholly prevented.

The chains, actually proof tested to two thirds of their breaking strain, are hand made from steel manufactured expressly for them; they swing from the center and can be used on either side of the jaws, thus reducing to the minimum the wear upon specific teeth.

The handle design provides for the maximum of strength in the minimum of weight.

Proof Testing. To insure proper service, each flat link chain is "proof tested" in a standard tesing machine up to two thirds of the breaking strain stated in table. Each chain so tested, is stamped on the drop forged swinging link, thus absolutely establishing the safety factor and reliability of every wrench.

PIPE CUTTERS

BARNES' THREE WHEEL

Nos. 1 and 2

Nos. 3 to 7

Especially suited to use in that class of close work where it is impossible to revolve the cutter entirely around the pipe. Interchangeable with all other standard makes of this type. The cutter wheels and pins are made from the best grade of crucible steel carefully machined and oil hardened, frame and all parts strong and well proportioned.

COLT'S AUTOMATIC PISTOLS

POCKET MODEL, HAMMERLESS

This Model is now fitted with a Safety Disconnector, which when the magazine is withdrawn positively breaks all connection between trigger and sear so that if a cartridge is left in the barrel the arm can not be fired even if the trigger is pulled

For the .25 Rimless Smokeless Cartridges.

Each

No. 125—.25 Caliber, Full Blued, Case-Hardened Trigger, Slide Lock Safety and Grip Safety, Rubber Stock, 2 in. Barrel, 6 Shots, Length Over All 4½ in., Weight 13 Oz.....$....

Equipped with Colt Automatic Grip Safety which prevents accidental discharge.

POCKET MODEL, HAMMERLESS

For the .32 and .380 Rimless Smokeless Cartridge.

Each

No. 132—.32 Caliber, Full Blued, 8 Shots, 3¾ in. Barrel, Rubber Stock, Length Over All 6¾ in., Weight 23 Oz.....$ . .

No. 380—.380 Caliber, Full Blued, 7 Shots, 3¾ in. Barrel, Rubber Stock, Length Over All 6¾ in., Weight 23 Oz.....

Equipped with Colt Automatic Grip Safety. The action of this pistol is automatic except that the trigger must be pulled to fire each shot.

POCKET MODEL, HAMMER

For the .38 Rimless Smokeless Cartridges.

Each

No. 138—.38 Caliber, Full Blued, 7 Shots, 4½ in. Barrel, Rubber Stock, Length Over All 7½ in., Weight 32 Oz.....$ . .

GOVERNMENT MODEL

With Grip Safety and Safety Lock. The Most Powerful Automatic Pistol Made

For the .45 Rimless, Smokeless Cartridges.

Each

No. 145—.45 Caliber, Blued Finish, 7 Shots, 5 in. Barrel, Checked Walnut Stock, Length Over All 8½ in., Weight 39 Oz.....$....

Adopted by the U. S. Government. In this model the slide remains open after firing the last cartridge

SAVAGE AUTOMATIC PISTOLS

MODEL 1907

Rimless, Smokeless, 10 Shots.

Adapted to .32 Automatic Savage, or .32 Automatic Colt or 7.65 M. M. Automatic Browning Rimless, Smokeless Pistol Ammunition. These are all Different Names for Exactly the Same Cartridge

Each

No. 32-SA—.32 Caliber, 3¾ in. Hi-Pressure Smokeless Steel Barrel, Length Over All 6½ in., Blued, Rubber Stock, Weight 19 Oz.....$. .

Extra Magazines .....

The Magazine contains 10 cartridges, putting an additional cartridge in the chamber places 11 shots at the command of the shooter

The mechanism is Semi-Automatic or Self-Loading The recoil of firing the cartridge extracts and ejects the empty shell, cocks the firing pin and loads the barrel for the next shot. The trigger must be pulled to fire each shot.

A very small, light, compact pocket gun, but its great accuracy high speed of fire and absolute reliability and safety make it rank with the military pistols It has been adopted and is in use as the Service Pistol of the Portugese army and navy. The only pistol using the above mentioned ammunition in which the breech mechanism is positively locked to the barrel while the bullet is passing through the bore.

This prevents waste of gas at the breech and gives greater accuracy, velocity and penetration than the other pistols which use this ammunition.

IVER JOHNSON REVOLVERS

A thoroughly satisfactory line of high grade Revolvers at a moderate price. Double positive cylinder locks, perfectly rifled. They are equipped throughout with the finest piano Wire Coil Springs replacing the old flat springs. Has a perfect Safety Device, it can be dropped on the floor, thrown about or you can "Hammer the Hammer" without fear of accidental discharge.

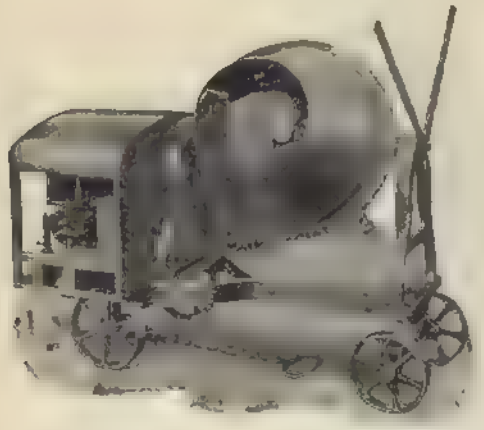
1099	Aisha, Two step—John Lindsay
1100	If love is dying—Octave Cremieux.

New Music Issued from time to time.

CONCRETE MIXERS

VAN DUZEN



TYPE "A", ON HAND PORTABLE TRUCK

The Van Duzen Mixer is what is commonly known as the drum type batch mixer and gives a positive mixing of all the aggregates, in the batch, and does this in plain view of the operator.

It will thoroughly mix concrete, grout, facings, mortar or plaster of any consistency.

The large opening in the tub allows the operator to see the exact condition of the batch and he can make it as wet or dry as desired. This is guess work with other types as the openings must of necessity be small or the drum would have to be so large that the machine could not be moved without considerable inconvenience.

It is the easiest type to clean as there is no possibility of the mixture adhering to the drum or the mixing plows.

It is of convenient height for dumping into a wheelbarrow.

For foundation work the batch can be dumped into a chute and run right into the forms; thus obviating the necessity of handling the material the second time.

The bottom half of drum is semi-cast steel and the upper half of drum is plate steel. The frame and trucks are all steel and iron, and the wheels are steel with staggered spokes. There is not a piece of wood on it.

Each

Type "A" Capacity 3 to 4 cu. ft. Per Batch, Equipped with 1¾ Horse Power Van Duzen Engine, Mounted on Hand Portable Truck. Shipping Weight 1000 Lbs..... $.....

SPECIFICATIONS

Length Over All 6 ft.
Length of Trucks 5½ ft.

Face of Fly Wheel 4 in.
Weight 475 pounds

DOG CLAMPS FOR CONCRETE FORMS

Light in weight, yet very stiff and strong, this clamp will outlast many wooden clamps and any similar iron clamp. The bar is special steel -tough, stiff and durable. The foot and clutch are designed to give maximum strength and resistance to wear. They are built so that, once applied, they cannot slip off the work.

Light, 1⅛ x ¼ in. Bar, 4 in. Deep from Bar to End of Jaw.

PORTABLE FORGES

CHICAGO

A light, move-about Forge.

Adapted to Light Work

Suited to Quarries, Mines, etc.

Popular as a Low Priced Article.

Cast Iron Hearth, with Windshield.

	Each
No. 150—30 in. High, 18 in. Diameter Hearth, 8 in. Diameter Blower, Net Weight Each 80 Lbs.	$13.00

BUFFALO AGRICULTURAL

Equipped with Climax Blower.

The gears of the Climax Blower are machine cut and consist of two spur gear wheels and two helical gear wheels properly proportioned to produce several thousand revolutions per minute of the fan with the crank being turned at a very moderate speed.

The crank can be turned forward or backward with equally good results.

The hearth is a strong bowl shaped casting. The tuyere gives an even spread of blast

Cast Iron Hearth, with Windshield.

	Each
No. 30—30 in. High, 22 in. Diameter Hearth, 12 in. Diameter Fan. Shipping Weight Each 110 Lbs.	$27.00

ROYAL WESTERN CHIEF

Royal Type Blower.

Crank Turns Forward or Backward.

Capacity to Heat 3½ in. Iron

The most serviceable forge constructed for outdoor repair or construction work

Cast Iron Hearth, with Windshield.

	Each
No. 104—33 in. High, 22 in. Diameter Hearth, 10 in. Diameter Blower, Net Weight Each 120 Lbs.	$33.00

BUFFALO RIVET

Largest Capacity.

Quickest Heats.

Easiest Operation.

Equipped with Buffalo No. 300 Silent Blower with 12 in. Fan.

Repairs are reduced fully 50 per cent with this Forge.

The Blower has helical high-speed gears and full size 12 in. fan of the most efficient design, with blast delivery along the line of least resistance.

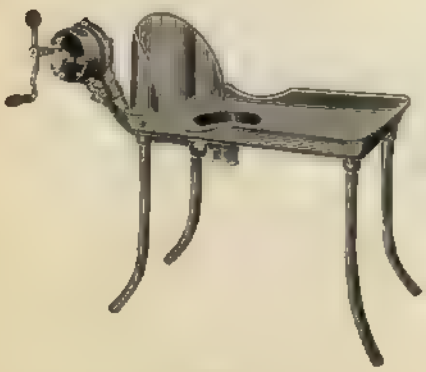
The fire pan is made of heavy rolled steel plate, strongly riveted.

The windshield and blower are detachable and can be packed in the fire pan for transportation.

Steel Hearth, with Windshield.

	Each
No. 625—18 in. Diameter Hearth, 12 in. Diameter Fan, Net Weight Each 110 Lbs.	$35.00

TIGER



No. 252

An Unusually Popular Line in Universal Demand.

With Windshield and Crank Gear.

	Each
No. 252—30 in High 25x36 in. Hearth 9 in. Diameter Blower, Net Weight Each 180 Lbs	$27.00

With Half Hood and Crank Gear.

	Each
No. 253—30 in. High, 25x36 in. Hearth, 9 in. Diameter Blower, Net Weight Each 180 Lbs.	$31.00

No. 253.

These Forges have a large roomy fire pot, conveniently shaped hearth, and splendid blast. They are very serviceable forges at low cost.

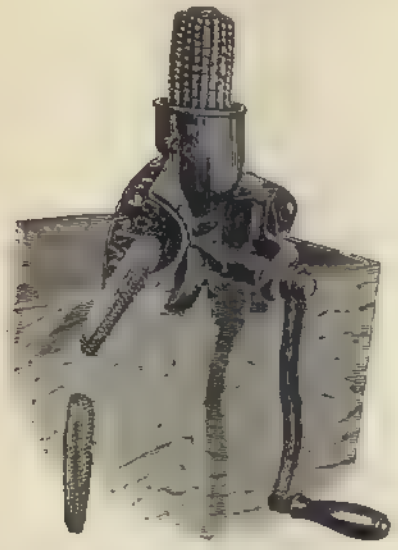
CORN SHELLERS

RED CHIEF



Per Dozen

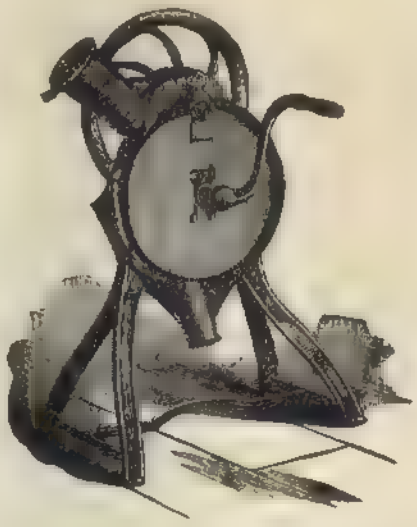
Red Chief Japanned Malleable Iron, Cold Rolled Steel Axle with 4½ in. Bearing on Hub Preventing Rapid Wear, Oval Shaped Teeth, Capacity 8 to 12 Bushels Per Hour.....$25 00

The oval shaped teeth go between the rows of grain and press them off without bruising or cracking the grain. The tooth wheel expands with the ear of corn as it goes through the machine and adjusts itself to any size ear.

It throws the cobs outside every time, no matter whether used on box or barrel bolts on barrel or any round vessel as easily as on a box.

Weight Per Dozen 140 Pounds

BURRALL



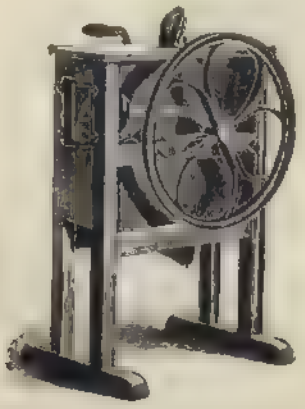
Each

Burrall All Iron Painted Green, Capacity 10 Bushels Per Hour, Cold Rolled Steel Shaft...$.

Well braced. The feed spout is adjustable for large or small ears of corn.

Weight Each 145 Pounds.

CHICOPEE



Each

Chicopee—Hardwood Frame, Well Mortised and Neatly Painted, Heavy Fly Wheel, with Cold Rolled Steel Shaft, Smooth Running Large Hopper, Adjustable to Shell All Sizes of Ears, with Separator and Chaff Sieve.....$8.75

The separator on the front of the machine separates the ears from the shelled corn. The chaff sieve assists in screening the corn which passes out through the small spout at the top

Weight Each 125 Pounds

RIGHT HAND

Each

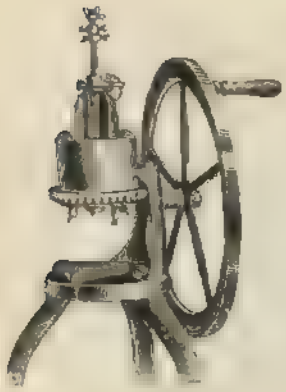
No. A—Hardwood Frame, Well Mortised and Neatly Painted, Good Weight Balance Wheel, Cold Rolled Steel Shaft, Smooth Running, Large Hopper, Adjustable to Shell All Sizes of Ears..$8.75

The cob is separated from the corn and passes through the opening on side of sheller.

Weight Each 125 Pounds.

BONE CUTTERS

IMPROVED MANN'S PATTERN



No 5BM.

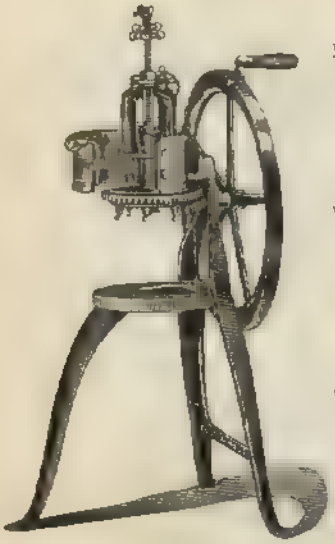
The improved automatic feed is used on all Improved Mann's Pattern Bone Cutters.

This feed mechanism can be regulated by the turning of a wing nut at the top by hand, without the use of tools

It can be set to feed slowly when cutting hard bone or fast for vegetables, etc. When the pressure gets too great the governors slip past each other, thereby stopping the feed until the knives have cut enough bone out of the hopper to reduce the pressure when it will start to feed again. It will stop feeding when the hopper is empty.

The follower cannot run down and come in contact with the cutters. It can be taken out of the hopper at any point by taking out the pin on the chain and opening the split nut.

Each machine is furnished with knife holder and knife gauge. Also directions for operating and illustrated price list of parts.



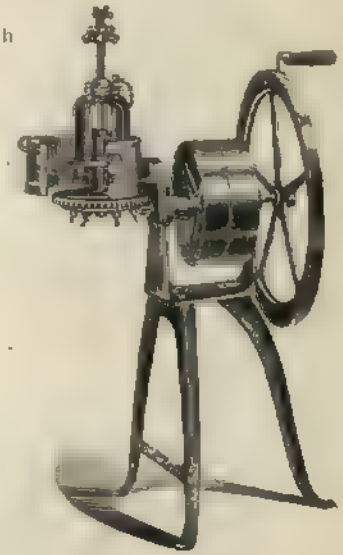
No 7.

Each

No. 5BM—6 in. Diameter Cylinder, 4 in. Deep, 4 Tempered Steel Knives, Large Heavy Balance Wheel, Improved Automatic Feed, Mounted on a Strong Stand with Shelf, Intended for Flocks up to 100 Hens, Weight Each Complete 85 Lbs . . . . . .

No. 7—7¼ in. Diameter Cylinder, 5¼ in. Deep, 6 Tempered Steel Knives, Capacity ½ to 1 Lb Per Minute, Hinged Hopper, Strong Iron Stand with Hopper to Hold the Receptacle for Cut Bone, Heavy Balance Wheel, Can be Profitably Used for Flocks Up to 200 Hens, Weight Each Complete 110 Lbs. . . . . .

No. 7½—Same Size and Construction as No 7, but may be Used for Either Hand or Power Use without Changing or Adjusting in Any Way. Complete with 11⅛x2½ in. Tight and Loose Pulleys, Should be Run at 300 Revolutions Per Minute to Obtain Best Results, Weight Each Complete 150 Lbs . . . . . .



No 7½.

HAND GRINDING MILLS

These mills are fitted with force feed or worm to deliver the grain to the burrs automatically. They are equipped with adjusting wheel to gauge the quality of feed which can be locked in position after the desired fineness is secured.

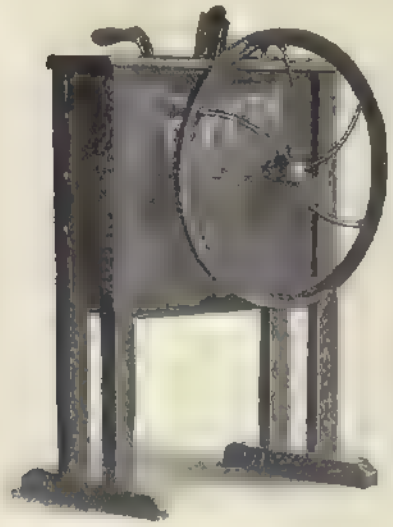
They can be adjusted to merely crack corn as it is fed to large chickens or fine for mash for chicks or will grind corn sufficiently fine for table meal, also dry bones and oyster shells providing the pieces are not too large, in which event they can be readily broken by a stamper, an axe or some other available tool and placed in the hopper a few pieces at a time.

Each

No. 32—16 in. Diameter Fly Wheel, Capacity 1 to 2 Bushels Per Hour, Chemically Analyzed Special Metal Burrs, High Grade Castings, Nicely Painted Weight Each 40 Lbs. . . . . .

CORN SHELLERS

TIFFIN ONE HOLE SHELLER

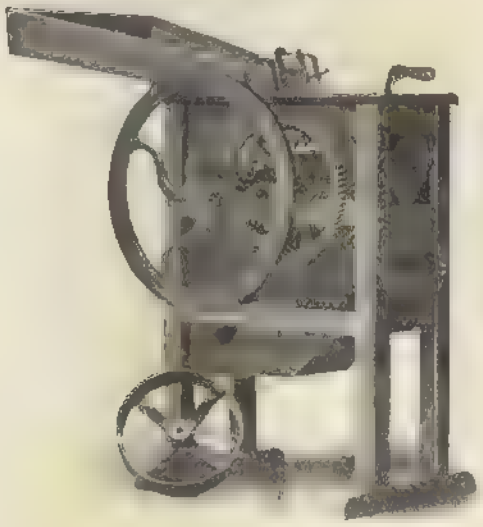


Tiffin One Hole Sheller, without fan, each.. ..$13.00
Tiffin One Hole Sheller, with fan, each.... . 14.00

This is a right hand sheller with end hole, has cast balance wheel with wrought spokes. Frame is made of hardwood and shafts are wrought iron. Well finished and attractive in appearance. All gearing is carefully fitted and placed inside, thus preventing accidents and breakage. The hopper is adjustable to large or small corn.

Weight 127 pounds.

TIFFIN TWO HOLE SHELLER

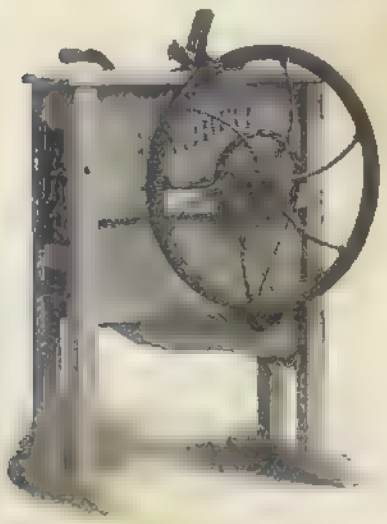


Tiffin Two Hole Sheller, with fan, feed table and pulley, each $30.00

This sheller is made of hardwood and finished in same handsome manner as the one hole. The capacity is double that of the one hole. It can be used by hand or power.

Weight 210 pounds.

FAVORITE ONE HOLE SHELLER

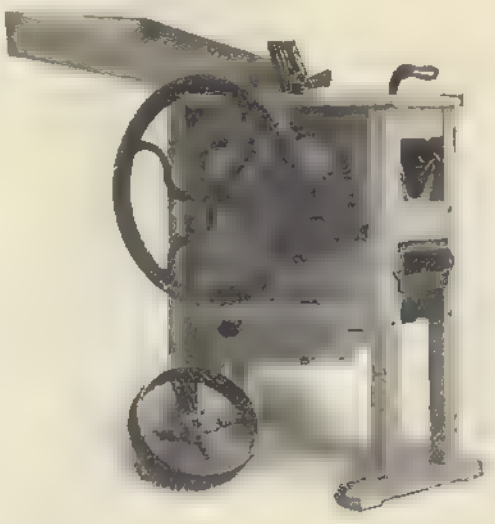


Favorite One Hole Sheller, without fan, e .. $13.00
Favorite One Hole Sheller, with fan, each. . . 14.00

This is a right hand sheller with end hole delivery. It is very similar to the Tiffin in size and weight and well finished in the same attractive manner. Varies only in the adjustment by the use of a coil spring instead of a flat spring. Has perfect adjustment and is easy to operate.

Weight 127 pounds.

FAVORITE TWO HOLE SHELLER

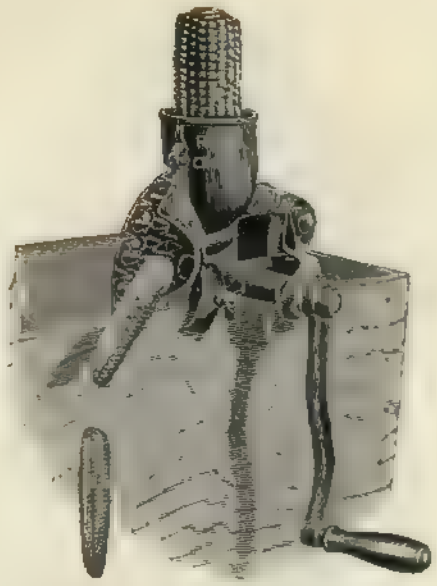


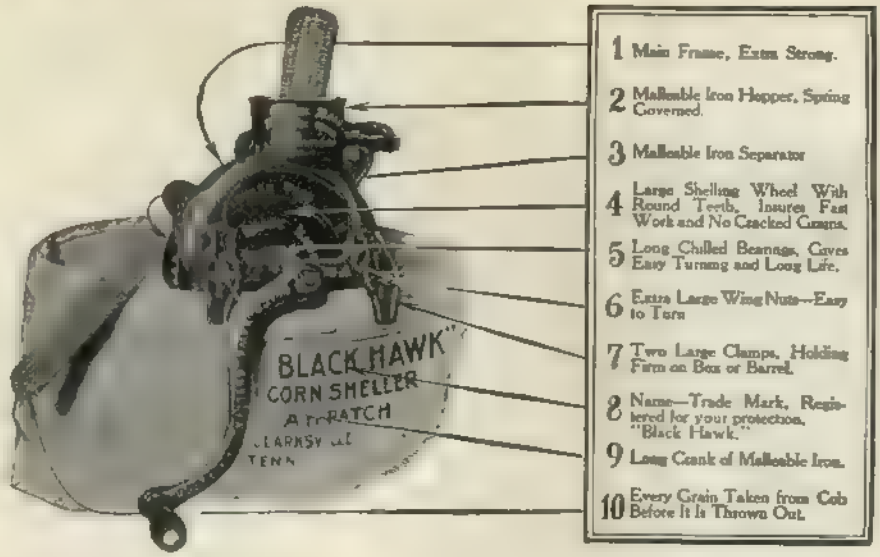
Favorite Two Hole Sheller, with fan, feed table and pulley, each $30.00

Built on the same lines as the Tiffin two hole, the exception being the coil spring adjustment instead of flat spring. It is double the capacity of the one hole. Strongly made of hardwood, well painted and finished in the same manner as the Tiffin. Has a heavy cast balance wheel.

Weight 210 pounds

CORN SHELLERS





BLACK HAWK
CORN SHELLER
1 Main Frame, Extra Strong.
2 Malleable Iron Hopper, Spring Governed.
3 Malleable Iron Separator
4 Large Shelling Wheel With Round Teeth, Insures Fast Work and No Cracked Grains.
5 Long Chilled Bearings, Gives Easy Turning and Long Life.
6 Extra Large Wing Nuts—Easy to Turn
7 Two Large Clamps, Holding Firm on Box or Barrel.
8 Name—Trade Mark, Registered for your protection, "Black Hawk."
9 Long Crank of Malleable Iron.
10 Every Grain Taken from Cob Before It Is Thrown Out.

Red Chief Corn Sheller, weight 132 pounds per dozen. **$27.00**

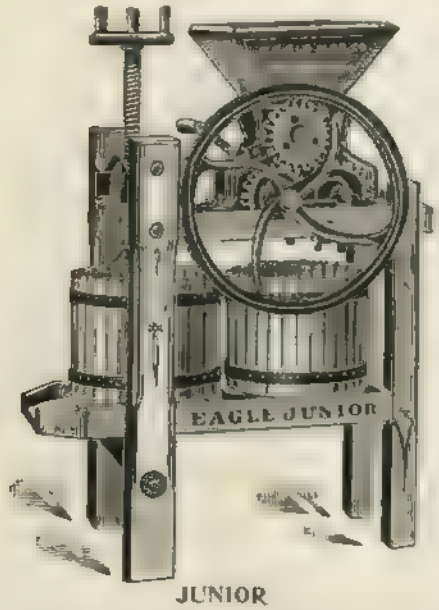
Adjusts itself to any size ear, shells clean, easy to run Clamps on barrel or box. Shells the corn without cracking the grains

Black Hawk Corn Sheller weight 162 pounds, per doz.. **$32.00**

A fast and easy running sheller favorably known to the trade.

CIDER MILLS

JUNIOR AND MEDIUM



JUNIOR

Junior Cider Mills, posts are 36 x 3½ x 2¾ inch, furnished with two tubs 10 inches high x 10½ inches inside diameter. The press screw is 1⅛ x 18½ inches long, capacity 2 to 4 barrels of cider per day, each **$20.00**

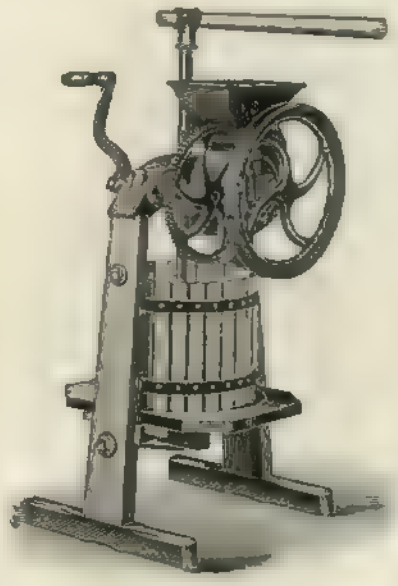
Weight 190 pounds

MEDIUM

Medium Cider Mills posts are 40 x 3⅜ x 2¼ inch, furnished with two tubs 12 inches high x 12 inches inside diameter. The press screw is 1½ x 20 inches long, hopper is 14 x 14 inches inside capacity 3 to 6 barrels of cider per day, each..... **26.00**

Weight 238 pounds.

CANT-CLOG



Cant-Clog Cider Mills, each **$16.00**

This is a first class single tub cider mill and wine press for family use. It grinds apples either large or small, and is the only single tub mill on the market that will accomplish this work. It will not be necessary to halve or quarter the apples for this mill. The best results are obtained by feeding steadily, and not overcrowding the hopper. The mill is easy to keep clean, as the roller can be removed for washing, by simply removing the two cap screws and sliding the roller out. Capacity one to two barrels a day. Tube 12 inches high, 12 inches inside diameter, 1½ inch steel press screws. It is strongly constructed of the best material, neatly finished.

Weight 145 pounds

*Not carried in stock, can be shipped promptly from factory

*QUICK WEIGHING DIALS

For use in connection with "The Standard" scales for weighing coal in draughts up to 5,000 pounds, by 50 pounds. For various purposes, within a reasonable limit of accuracy of 1 per cent it can be applied to portable, dormant, depot, warehouse and wagon scales. Dials 2500 x 25 pounds.

The action of indicating the weight is automatic. The hand on dial points in quiet and steady motion to the proper figure, without that vibration common to spring scales, and returns to the zero mark when the load leaves the platform of scale. A dash pot at the end of beam takes care of all vibration arising from rapid use of scale.

Price with scale, $55.00 extra.

"DIAMOND EDGE IS A QUALITY PLEDGE"

HAMMOCKS

ECLAT

We Especially Call Your Attention to Our New Line of Hammocks, which Includes Many Entirely New Patterns and Colorings of the Very Highest Achievements, which will do Much to Emphasize Our Individuality. We are Presenting a Large and Well Chosen Assortment of Patterns and Harmonious Colorings of the very Latest Designs.

All Eclat Hammocks Incorporate Exclusive Features of Mechanical Construction. Three Extra Stringing Cords, Patent Millforde Spreader Fasteners, Superior Workmanship.

DETAILS OF OUR CONSTRUCTION

Often of Apparently Minor Importance but All Important in Strength and Finish

Cut No. 3 Its Application as it Appears from the Front. Patent Secured

Cut No. 1 The Casting. Patent Secured

Cut No. 2 Its Application as it Appears from the Back. Patent Secured

WE CAN RIGHTLY CLAIM THAT THESE METHODS ARE THE VERY BEST ON THE MARKET. THEY HAVE STOOD THE TEST

One of Our Greatest Improvements is the Remedying of that Common Trouble, the Pulling Away of the Hammock Cloth from the Wide Head Spreader. This Defect Not Only Causes a Slovenly Appearance, But Also Very Much Weakens the Entire Hammock by the Loss of the End Support.

The Illustration Here Given Shows You the Value of this Improvement.

Cut No. 1 Shows You the Casting, which is of the Best Malleable Iron, Nickel Plated. The Prongs are Driven Through the Cloth, Grasping Spreader Holding the Cloth and Spreader Together in Four Distinct Places.

They are Closely Beat Together, Making it Impossible to Pull the Cloth and Spreader Apart.

Cut No. 4. Correct Method of Stringing

Thus the Reinforcing of the Stringing Cords is a Necessity, You Can Well See. We Have Studied this and the Result is Three Extra Stringing Cords Attached to the Spreader End Castings, and the Doubling of the Center Cords.

In Addition, on Each Hammock with Divided Suspension We have the Center Pull-Thru, the Angle Pull on the Warp Pulley Threads, which is the Universal Method, Causes Additional Tension, is Readily Apparent. We Have Brought the Tension on the Doubled Stringing Ropes, where it Belongs.

Illustration No. 4 Fully Shows You Our Excellent Stringing Method

WASHING MACHINES

DAUNTLESS WATER MOTOR

Each

Dauntless—Family Size, Selected Red Cypress Tub, Varnished, Corrugated Inside Sides and Bottom, Strong Brass Motor, Bolted Hardwood Legs, Strong Two-Ply Lid, Three Extra Heavy Steel Hoops, Complete with Inlet and Outlet Hose.....$.

This machine is equipped with a low-pressure, gearless motor, strongly built from brass and placed centrally over the load. The great leverage obtained allows the motor to carry the load with ease on a low water pressure. The water, after passing through the motor is perfectly clean and may be used for rinsing, bluing, etc

The outlet hose is provided with a weight which holds it in the sink or tub while motor is in operation.

The Dasher in this machine is of the non-tearing type and there is no danger of clothes getting cut or torn.

Weight Each Crated 75 Pounds

EXTRA PARTS FOR DAUNTLESS WATER MOTOR WASHING MACHINES

WASHING MACHINES

MAGIC WATER MOTOR

Each

Magic Motor—Family Size, Selected Louisiana Cypress Tub, Varnished, Corrugated Inside Sides and Bottom. Brass Motor is Perfectly Machined and has Black Enameled Gear Guard, Bolted Hardwood Legs, Two-Ply Over-Lapping Lid, Galvanized Tub Trimmings, Three Extra Heavy Steel Hoops, Complete with Wire Wound Inlet and Outlet Hose . . . . . $ . .

Will operate successfully with a pressure of 30 pounds or over. The motor is made of brass and is perfectly machined. There are no small parts to get out of order and all parts are easily accessible. A large roller keeps the rack bar, which operates the agitator shaft, firmly in line. The top of this roller is concaved slightly in order to retain a small quantity of oil, thus keeping the shaft upon which it turns constantly lubricated. There are but three places that require oiling on this motor. A simple device for draining the motor is provided for use when it is necessary to keep the machine where it is apt to freeze during cold weather.

All working parts are carefully guarded so that there is not the least danger of the operator's clothes coming in contact with them.

Weight Each Crated 76 Pounds

SHARP, VERY SHARP, AND SHARP WHEN YOU BUY IT

That is what DIAMOND EDGE means on Cutlery. If the man who makes cutlery can't make it sharp, why should you try? When you buy DIAMOND EDGE Cutlery the first lushly sharp edge will be the first thing that appeals to you, and it has the metal quality which ensures that this edge can be made sharp again and again.

HANDY ELECTRIC LAMP

This lamp is useful for many purposes and is popular owing to its low cost and the fact that the batteries—ordinary No. 6 dry cells—can be secured in practically every town in the United States. It is made of sheet metal, black japaned finished with handle at back and wire carrrying bail. The switch is conveniently placed, and is easily operated. The weight of lamp without battery is about 12 ounces and the battery weighs 2¼ to 2½ pounds.

No. **4718.** Lamp without battery.....**$1.75**
No. **1451.** Renewal Mazda Bulb..... **.21**

No. **6.** Batteries will be furnished by us for 25c extra but on account of their weight and consequent cost of transportation in small lots we recommend that they be purchased from your local dealer.

Delivery Prepaid on Lamps and Bulbs if Cash is Sent with Order at Above Prices
Batteries will be mailed if postage is enclosed at parcel post rate

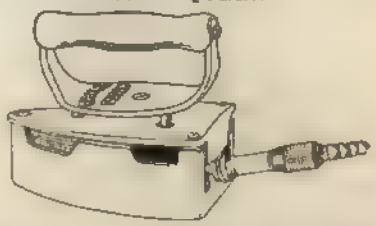
GAS HEATED SAD IRONS

FAIRY QUEEN



Complete with 6 ft. Tubing and Asbestos Mat.

Each

Fairy Queen—6¼x3⅞ in. Bottom, Enameled Wood Handle, Steel Handle Guard, Fully Nickel Plated and Polished, Odorless and Smokeless, for Natural or Artificial Gas, Weight Each 5½ Lbs...$.....

This iron becomes hot enough to iron in 3 minutes. Can be connected to any gas fixture or gas stove and costs but one-half cent an hour to operate

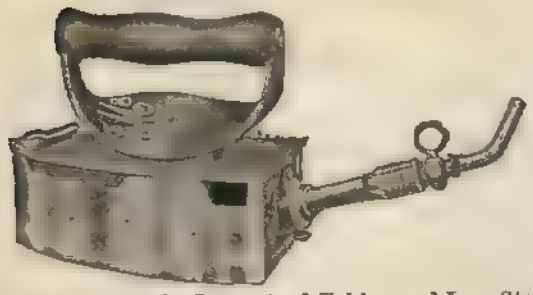
Note—When ordering, state whether for Natural or Artificial Gas

One in a Box.

GAS HEATED SAD IRONS

I. M. E.

DOMESTIC AND LAUNDRY



Complete with 6 ft. Guaranteed Tubing and Iron Stand.

Each

No. 9—6x3½ in. Bottom, Enameled Wood Handle, Absolutely Odorless and Smokeless, for Natural or Artificial Gas, Weight Each 5¾ Lbs.....$....

In this iron the heat is not taken up by cold air passing through the bottom. Heats in three minutes and stays hot. The heat is under perfect control; a gentle heat for light fabrics or intense heat for wet goods. The cost for gas is about two cents for four hours' ironing.

One in a Box.

TAILORS' GOOSE

Enameled Wood Handle, 10x4 in. Bottom, with Stand, for Natural or Artificial Gas.

Note—When ordering, state whether for Natural or Artificial Gas.

GASOLINE SAD IRONS

ROYAL

Nickel Plated, Handsomely Finished.

Each

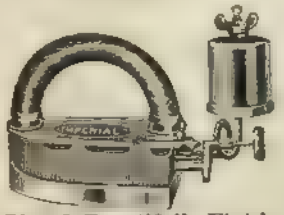
Royal—Nickel Plated, Perfectly Balanced, Strong Fuel Tank Strong Wood Handle, Weight Each 6¼ Lbs.....$....

The heat is easily regulated to suit the wishes of the operator. The burner extends the full length of the iron, giving the entire bottom an even temperature.

The gases and odors which are naturally formed by combustion are transformed and avoided by the patented ventilating lid. The handle is always cool, no matter how hot you heat the iron.

One in a Box

IMPERIAL



Nickel Plated, Beautifully Finished.

Each

Imperial—Nickel Plated, Heavy Fuel Tank, Strong Wood Handle, Burns Either Gasoline or Alcohol, Complete with Independent Air Pump, Weight Each 5½ Lbs.....$....

The Imperial burns 90 per cent air and 10 per cent gas. An even continuous heat can be maintained at a cost of one-fifth of a cent per hour.

The operator can instantly and easily regulate the heat to suit requirements, by the simple turning of a knob with the fingers.

One in a Box.

COMFORT

Best Grade Iron, Nickel Plated and Polished, Heavy Seamless Brass Reservoir, Nickel Plated.

Each

Comfort—Capacity ¾ Pint, Double Pointed, Ebonized Cool Handle, 18½ Square Inches of Ironing Surface, Operates 3 Hours on One Filling, Complete with Pump and Lighter, Weight Each 6½ Lbs. .....$....

The Comfort is a two-point style and can be operated either forward or backward; has self-cleaning generator, positive shut-off against pressure, perfect regulation and all parts are interchangeable. Generates with less than a teaspoonful of alcohol in about one minute.

One-half Dozen in a Case.

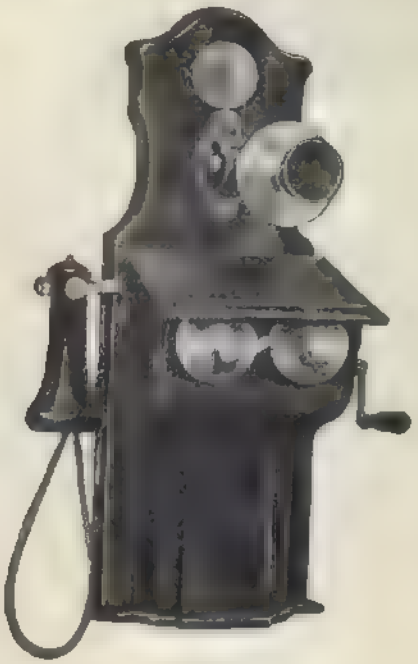
ERICSSON ALL STEEL TELEPHONES



Ericsson

The handsome steel cabinet is drawn from 16 gauge cold rolled steel. The parts making up the cabinet are then securely riveted together, and the assembled cabinet heavily copper plated to absolutely prevent rusting. Then comes the enameling process, which consists of dipping the cabinet and baking on the enamel three separate times. By this means the smooth, glossy indestructible finish is produced.

The Generator is bolted to a fibre mounting plate which is securely fastened to the steel frame. This fibre is made moisture proof by a special process, and thoroughly insulates the generator from the surrounding steel frame.

The Transmitter is the new No. 5 Ericsson Multicellular Capsule Transmitter which never packs, and for clearness of articulation, ability to talk over long distances and small battery consumption, has never been equaled.

The Receiver is the widely known Ericsson Bi-Polar Receiver with all connections concealed.

The Ringer is carefully constructed, and two magnets are used so as to produce a strong magnetic field and thus a very sensitive ringer. By using only one screw an effective and permanent adjustment is obtained.

The Lightning Arrester is especially designed for the steel set, is enclosed in a steel cup, and covered with a nickeled plate. This plate is removed by simply loosening two screws, which are fastened to the cabinet so that they cannot be lost.

No. 315L	Bridging, 3 bar generator, 300-ohm ringer	each,	**$19.50**
No. 317	Bridging, 4 bar generator, 1600-ohm ringer	each,	**21.50**

"DIAMOND EDGE IS A QUALITY PLEDGE"

DECOYS

WOOD DUCK DECOYS

Our "Challenge" decoys are all made of selected wood, painted in most natural colors, and are excellent imitations of the "real thing." Made in the following varieties: Mallard, Black Mallard, Red Head, Blue Bill, Blue Wing Teal, Shell Drake, Canvas Back. Sold only in dozen lots, 8 males and 4 females. To avoid delay in shipping kindly give us first and second choice in the matter of specie wanted.

No. **1.** "Challenge" Model. Good quality with glass eyes.....Doz. **$7.50**
No. **2.** "Detroit," Model, fair quality with tack eyes.....Doz. **5.00**

FITTINGS FOR DUCK DECOYS

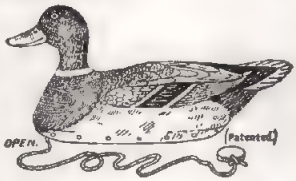
No. **13.** Oval Body Weights, extra heavy	**1.30**	No. **16.** Anchor Cords.....	**.30**

FOLDING CANVAS DUCK DECOYS



The chief advantage of these folding decoys is their light weight and the fact that when folded they occupy very little space and can be easily carried. They are made of waterproof canvas and in appearance are most life-like. They are not pneumatic and therefore if struck by stray shot no damage is done. The frame which holds the decoys in shape is wire and is automatic in operation. Always float right side up no matter how carelessly thrown into the water. As there are no delicate parts to get out of order, they will give long service. Mallard and Black Duck carried in stock.

No. **RD.** Duck decoys complete with cords and anchors, packed 1 doz. in a box, 6 males, 6 females, per doz.....**$7.75**

FOLDING TIN POLVER DECOYS

These decoys are made of two oval shaped parts or sections which when closed together make the exact form of the bird. Are nicely painted, life-like and natural. They pack or nest one into another so that a box containing one dozen measures only 10 in. x 9 in. x 2½ inches. Sticks or mounts are provided with each lot. Not sold in less than dozen lots.

No. **5.** Plover.....Doz..**$4.00**
No. **6.** Yellow Leg..... " ... **4.00**

CROW DECOYS

These crow decoys are made of paper, are hollow, full-shaped, and waterproofed. They are correct in every detail, natural in appearance, glass eyes and steel wire for a leg. Packed one dozen in crate, weighing about 24 lbs., gross.

No. **23.** Crow Decoys.....Each **$ .40** Doz **$4.00**

OILERS AND OILS

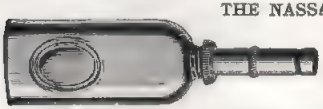
"NEVER LEAK" OIL CAN

In oiling the action of your gun, only a drop is necessary. The "Never leak" oiler puts the quantity needed just where you want it. It can't leak.
No. **53.** Nickel-plated.....$ .15

PERFECT POCKET OILER

If you want an oiler that you can carry without fear of leaking try the "Perfect." Besides the leak-proof cap there is an automatic stop that prevents flow of oil. This stop also regulates the flow to a drop. Nickel-plated.
No. **52.** .....Each $ .20

THE NASSAU OILER



This oiler is fitted with a cap to prevent leaking. Flows a drop at a time or faster by simply pressing on side. Nickel plated finish.
No. **50.** .....Each $ .10

Delivery Prepaid in U. S. if Cash is Sent with Order at Above Prices

MANY-USE OIL

"Many-use" oil not only lubricates but prevents rust, cleans and polishes. The oval cans are fitted with a ball-bearing adjustable spout which may be turned down out of the way.
No. **2C.** 2-oz. round can...Each $ .10
No. **4C.** 4-oz. round can...Each .15
No. **5C.** 3½-oz. oval can..Each .20

THREE-IN-ONE

"Three-in-One" does three things: cleans, lubricates, prevents rust, and does each perfectly. It is favorably known wherever oil is used.
No. **32.** Small bot. (1 oz.).....$ .10

RADIO BATTERIES ALWAYS TRIED

Our Radio Batteries are surpassed by none. One trial will convince more quickly than printed assertions. Every battery packed in sealed carton with printed guarantee.

With every $10.00 Net Purchase We will allow an extra 5 per cent discount

New Franco Electric Flashlights

With this issue we offer for the first time an improved line of FRANCO FLASHLIGHTS. The new FRANCO WIRELESS cases embody several newly patented improvements such as the invisible connections resulting in the name "Wireless," the feature being that all the electrical connections formerly exposed on the inside of the case are now imbedded in a solid wall of fibre which prevents accidents to connections and gives extreme durability to the cases. These cases are so constructed that it is impossible to get a short circuit or make accidental contact should they be put in a tool box or pocket with wrenches, keys, etc. Light can be secured only by pushing up the FRANCO contact. With old style cases the battery is often exhausted when they touch metal, which positively cannot occur with "Wireless" cases. Always a light when wanted, as battery is never exhausted except from service or age. A trial order will quickly convince you of the superiority of the FRANCO line.

WITH EVERY $10.00 NET PURCHASE WE WILL ALLOW AN EXTRA 5 PER CENT DISCOUNT.

PORTABLE CRANE AND HOIST

FRANKLIN

It will be noted that in the operation of this Portable Crane and Hoist the relation of the various parts are such as to insure the proper distribution of the weight and to maintain a perfect equilibrium under all variations of load up to the full capacity of machine.

The yoke rests on the axle. The axle is thrown back by raising the handle against the arms and the weight of the machine rests on the front wheels.

When the handle is pulled down the crank axle lifts the weight from the wheels and the entire load is carried by the yoke.

Cast Iron Body of Crane Base, Wheels and Projecting Arms, Cast Steel Front Axle Having a Tensile Strength of 42,000 Pounds Per Square Inch, Roller Bushed.

A wide heavy band of wrought iron reinforces the projecting arms and is bolted through the hook plate and extends through the base. Absolute tests are made of each machine before shipment and capacities are facts not theories.

Nos.	8A	8B	8C	8E
Height of Crane	7 ft. 6 in.	8 ft. 4 in.	8 ft. 5 in.	11 ft. 4 in.
Height of Hoist	6 ft. 3 in.	7 ft. 3 in.	8 ft. 4 in.	10 ft

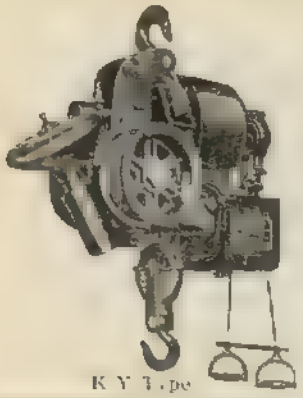
Weight Each, Lbs.	785	1000	1240	1500
Each	$112.50	125.00	150 00	175 00

Designed for use in shops, factories and all places where it is ever necessary to lift heavy bodies or to transfer them from place to place, and this with the least expenditure of time and labor and with safety

It is easily handled by two men. It is easily moved and every point in the shop is accessible. Its great lifting capacity, in conjunction with its portability, makes it, in many cases a great deal better than either an overhead crane or an industrial railway.

The many uses for the Portable Crane and Hoist must be obvious. One man alone, with its help, can lift a large casting or any piece weighing up to 2 tons and convey it to any part of the works and place it in or on a machine, or deposit it as may be required.

This hoist is ever ready, it goes anywhere, everywhere. It aids in reducing the expenditure of labor, and time to the desired minimum.



K Y Type

YALE ELECTRIC HOISTS

Electric Hoists give from five to ten times the speed of hand hoists and their cost is only a fractional part of electric traveling cranes. For constant lifting they are economical, even when substituted for the cheapest labor.

In choosing an electric hoist it is never safe to sacrifice quality to price. The best is cheapest in the end.

Simplicity should be one of the first considerations in the choice of an Electric Hoist.

Yale Electric Hoists have few and strong moving parts.

The automatic emergency stop safeguards the careless operator.

Direct and Alternating Current Hoists are supplied. For varying speeds the direct hoist is the best. Enquiries and orders should specify kind of hoisting work, voltage of current, and if for alternating current, give phases and cycles.

Before shipment each Hoist is carefully tested and required to lift a 50% overload.

Capacity in Tons	Size Motors, H. P.	Parts Hoisting Rope	Lift in Feet		Standard Weight		Standard Lift Each
			Standard	Maximum	Direct Lbs.	Alternating Lbs.	
1	3	2	15	45	640	560	$ . . . . .

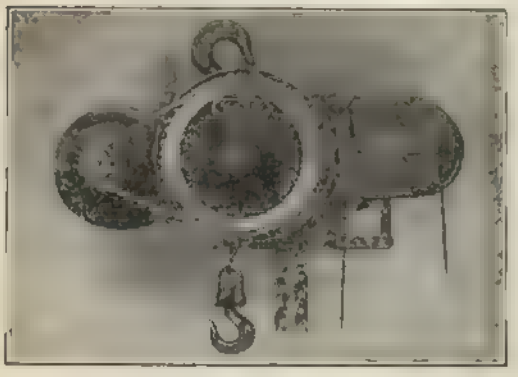
5	7	2	15	45	1740	1680	. . . . .
6	3	6	10	15	900	820	. . . . .

Drums for extra lift up to maximum given above can be supplied at an extra list price of $15.00.
The graduated speed foundry controller can be supplied for direct current only at an extra list price of $75.00.
Prices on Application.

YALE ELECTRIC TRIPLEX HOISTS



This Hoist takes the place of chain block at moderate additional cost, and gives from five to ten times the speed.

Where any quantity of material from 50 to 4000 pounds has to be repeatedly lifted and lowered, as in serving machine tools, this is the hoist to use.

End View of Electric Triplex Hoist.

The balanced train of spur gears insure high operating efficiency and consequent minimum current consumption and with this type of gearing satisfactory speeds are obtained. A Weston brake with silent pawl is used to sustain the load.

Capacity Tons	Dimensions			Standard Lift, Feet	Weight Each, Lbs	Hoist with Standard Lift, Direct Current Each	Hoist with Standard Lift, Alternating Current Each	Extra List Per Foot
	Min. Dis. Between Hooks, Inches	Width Over All Inches	Length Over All, Inches

2	32	18	38½	10	410	. . . .	. . . .	. . . .

The 1 and 2 ton hoist for direct current service can be furnished with a variable speed controller at an additional list price of $24.00.

Prices on Application.

ELECTRIC AND GAS LAMPS.

ELECTROBOLA LAMPS.

The body, reflector and supporting lugs of this lamp are combined in one solid aluminum casting, which is lightest and whitest metal possible for this purpose. This construction gives great strength, maximum reflecting surface and at the same time makes them practically indestructible. Collisions and bumps which would demolish the ordinary lamp, have no effect on "Electrobolas." The reflecting surface is accurately ground, highly polished and will absolutely not tarnish. The brilliancy of the "Electrobola" is unexcelled and is so great that it will cast a clear, bright light a distance of 700 feet. A pair of Tail Lamps, "Electrobola" Head Lights with 16 candle power Mazda bulbs (which are furnished with these lamps) will light up the roadway for a distance of 700 feet. When used with a general outfit the cost of maintenance is virtually nothing. When used in connection with a battery, the operating expense is less than one-half that of a gas outfit. The construction and method of fastening the lens make them dust and moisture proof, non-vibrating and noiseless, at the same time projecting a steady, non-flaring, penetrating white light. "Electrobola" lights also do away with fire risks and disagreeable, gaseous odors. "Electrobolas" are regularly equipped with hard rubber plug connectors and the celebrated Edi-Swan bayonet sockets which hold the bulbs firmly in place, eliminating the possibility of their coming loose and breaking.

Nos. 5671, 5670, 5663 and 5645 Lamps are finished regularly in Black Enamel with Nickel Trimming. They can be supplied without additional cost in black enamel finish with brass trimming or in the polished aluminum finish.

No. 5671—Headlight, diam. of reflector and lens 8 in., 6 volt, 12 candle power, per pair★ .....**AEJ** $26.68

No. 5670 Headlight, diam. of reflector and lens 6 in., 6 volt, 12 candle power, per pair★ .....**BJJ** $17.74

No. 5663—Sidelight, diam. of reflector and lens 6 in., 6 volt, 6 candle power, per pair★ .....**AABJ** $18.68

No. 5645—Tail light, diam. of reflector and lens 3½ in., 6 volt, 4 candle power★ .....each **CBE** $5.39

FRENCH STYLE TAIL LAMPS.

No. 5706—Heavy gauge steel body, 4 in. diam. fresnal white lens to illuminate license pad, red fresnal lens to rear combination bracket, w't each 2 lbs., each .....**DDJ** $4.00

These lamps are used as regular equipment on several of the best cars, being patterned after the French style. Body made of steel, body is solidly built throughout. Will not jar or rattle loose and are specially adopted for use on trucks.

FRENCH STYLE STEEL BODY SIDE LAMPS.

No. 5705—Heavy gauge steel, 4 in. diam. round body, fresnal lens, combination bracket, black enamel, nickel trimmed, w't per pr. 3 lbs., per pair .....**DHJ** $8.00

★*FOR FACTORY SHIPMENT ONLY.*

ELECTRIC INSERT COWL DASH LAMPS.

No. 5695—5 in. diam., white semaphone with frosted rosette, sunken glass, lamp sets in dash being held by 3 screws, opens from rear, Edi-swan socket, w't per pr. 2 lbs., per pair .....**CFJ** $6.00

This price does not include bulb.

These lamps have a nickel rim setting flush with the dash and are fastened from the inside of the dash, where there is a highly silvered hinged reflector. Adapted to cowl form of dash making a very stylish appearance.

ELECTRIC TAIL LAMP.

No. 5698—Electric tail lamp, fitted with Edi-swan switch socket, convex red semaphone lens, white glass at side, combination bracket, black enamel, w't each 1½ lbs. .....each **AHJ** $3.00

BATTERIES, AMMETERS. SWITCHES, TESTERS, ETC.

DRY BATTERIES.

No. 700-G RAYBESTOS 2½ volts, 2½x6 in., 15 to 18 amperes, for use with telephones, gas engines, automobiles and wherever intermittent service is needed, w't 2 lbs.....each **BJ** $0.31

No. 406-G—160-JG. No. 1406-G.

No. 406-G—160-JG—Ever Ready, round carton, style "J," 4½6 in., 1 6-10 volts, 22 to 25 amperes, for use on automobiles, gas and gasoline engines, motorcycles, telephone work, etc., w't 1¼ lbs.....each **BE** $0.38

No 407-G 170 KG, Ever Ready, round carton, style "K," 5¼ in., 1 6-10 volts, 22 to 25 amperes, for use on automobiles, gas and gasoline engines, motor cycles, etc., w't 2 lbs.....each **DH** $0.80

No 1406-G—Ever Ready, square carton, 2½x2½ in., 1 6-10 volts, 22 to 25 amperes, for use on automobiles, gas and gasoline engines, motorcycles, telephone work, etc., w't 2½ lbs., each.....**BE** $0.38

A-N 700-G, 1700-G AND 1800-G, ONE HUNDRED AND TWENTY-FIVE; NO. 407-G, SEVENTY-FIVE IN A BARREL.

CHARGOMETERS.

No. 6265—Tycos, all parts interchangeable, hydrometer sealed from 1.150 to 1.300 specific gravity, in .001 degree graduations and standardized at 60 deg. F., which is ordinary air temperature, a fully charged cell should show about 1.280 specific gravity and a completely discharged cell about 1.150 specific gravity, rubber and glass, length over all 15 in., w't each 1 lb.....each **CBJ** $5.30

The surest and simplest method of determining the condition of a storage battery is to obtain the specific gravity of the liquid or electrolyte. The chargometer is so constructed that a test of the gravity of the electrolyte may be quickly and accurately made. To assemble the chargometer fasten tube to the bulb and rubber shipper by means of the screw and cap. Be careful not to allow the bulb to collapse. To use the chargometer, insert in the

SWITCHES.

No. 5131—Acme, rubber base, phosphor bronze removable lever, adapted for lighting purposes.....each **CJ** $0.50

GASOLINE HYDROMETERS.

No. 6263. No. 6264.

No. 6263—Taylor's improved, w't each 3 oz.....each **ABJ** $2.00

For automobile lists, combined with thermometer and correction scale, for variations in temperature, complete with test jar. Wrapped in a soft red flannel pouch and packed in a nickel brass case 1x6 in., so that when not in use it may be safely carried in kit of tools carried by autoists or motor cyclists.

No. 6264—W't 2 oz.....each **CJ** $0.50

This instrument covers a range of Baume Scale from 60 to 82 or 85 degrees. It is contained in a flannel bag, inclosed in a glass testing jar, and encased in a round wooden carrying case 4½ in. long by 1 in. in diameter.

AMMETERS.

For Reading Current in Amperes.

No. 1002-G—1-G—Ammeter, 0-35 amperes, 2 in. nickel plated metal dial, each.....**JLJ** $1.50

For Reading Current in Both Amperes and Volts

No. 1003 G 8-G Voltammeter, 0-35 amperes 1-10 volt, 2 in. nickel plated metal dial, each **ABJ** $2.00

IGNITION BATTERIES.

No. 5180—Vesta, 6 volt Standard, 60 ampere hour, size 9½x5¼x7 in., each.....**ADFJ** $23.30

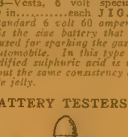
No. 5181 6 volt 80 ampere hour lighting and ignition, size 9½x9 in., each.....**AGJJ** $28.34

No. 5182—Vesta, 6 volt, 160 ampere hour special lighting battery, size 9½x9½x9 in.....each **BDCJ** $40.50

No. 5183—Vesta, 6 volt special, size 8x5½x9 in.....each **JIGJ** $16.20

The standard 6 volt 60 ampere hour battery is the one battery that is universally used for sparking the gas engine in the automobile. In this type of battery solidified sulphuric acid is used, it being about the same consistency as ordinary table jelly.

BATTERY TESTERS.



No. 6266—Metal, with glass tube, rubber bulb, w't each 4 oz., each **ABJ** $2.00

The gauge in the storometer indicates the specific gravity of the fluid when it is withdrawn by pressure on the bulb after pointed tube is inserted in the opening of the storage cell. The proper density of the fluid when battery is fully charged should be from 1215 to 1250. Assuming that a reading is to be taken at full charge and it is 1225, then starting to discharge at 1225: 80 per cent of charge is left when gauge indicates 1200. 60 per cent of charge is left when gauge indicates 1175. 40 per cent of charge is left when gauge indicates 1150. 20 per cent of charge is left when gauge indicates 1125. Practically exhausted when gauge indicates 1100. These figures are not absolutely accurate, but will serve approximately in every case.

SAFETY RAZORS

GEM DAMASKEENE

Each

Gem Damaskeene—Steel Gem Damaskeene Razor Frame with Finely Knurled Handle, with Extra Stropping Handle, Highly Polished and Nickel Plated, Complete with 7 Damaskeene Steel Blades, All in Moire, Velvet and Satin Lined Case, 3¾x1½x2 in., with Catch Button Lock..**$1.00**

These coolers are made of indurated fibre, moulded in one piece without hoops or bands. Indurated fibre is a non-conductor of heat, and therefore these coolers are very economical in ice consumption. It is tasteless and odorless, and very easily cleaned, as there are no joints or cracks to collect impurities.

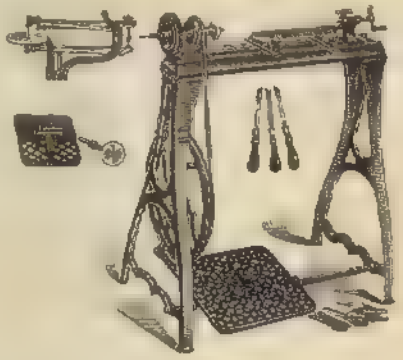
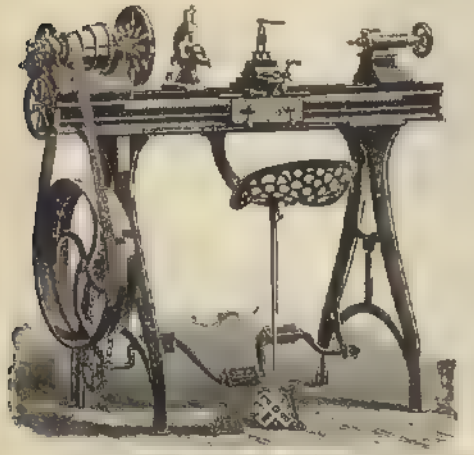
Note—When Ordering, Always State Whether Either or Both of the Saw Attachments are Wanted.



No. 327.

SCREW CUTTING LATHES



11 INCH SWING

This Lathe swings 11 in. on the face plate, 6⅝ in. over the tool carriage, and is 34 in between centers.

The Head Stock has a steel spindle with ⅝ in. hole through its entire length.

The Boxes are accurately fitted to the spindle with provision to keep them true and take up wear.

The Tail Stock can be readily set at any desired point or taken altogether from the lathe bed, thus leaving it free for face plate or chuck-work. It can also be set over for turning tapers.

The Spindles of both head and tail stocks are of steel, with positively true taper holes for the reception of the centers, and the tail stock center is self-discharging

The Tool Carriage is a model of convenience and accuracy and is gibbed to the bed.

The Tool Carriage swivels so that the tool can be set to work at any desired angle, and it also adapts the lathe for taper boring.

All the works are securely protected from chips and dirt, thus insuring long wear and durability to the most costly and vital parts of the lathe.

Indexed for threads 4 to 40, and the change gears furnished can be combined for many other threads.

As a right or left screw cutting lathe it is simply perfect.

All the gearing is cut from solid metal in the best machinery known for gear cutting, and is as true and noiseless as is possible for metal gearing to be.

Each

No. 5—11 in. Swing, with Foot Power or Countershaft, Weight Each Boxed 500 Lbs. $115.00

EXTRA PARTS

	Each		Each

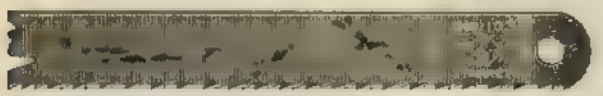
Hand Rest	3.50		

NOTE—When Ordering Lathes, be Particular to State Whether Wanted with Foot Power or Countershaft; if with Foot Power, State Whether Velocipede or Stand-Up Treadle.

HACK SAW BLADES

STARRETT'S

Starrett's Hack Saw Blades are made of the finest grade of steel, tempered by an improved process, which leaves them hard and tough, so that they will not "shell off," and uniform in temper. They are too hard to file. The teeth are sharp, with square cutting points, set evenly and in such a manner that every tooth cuts.



No. 103—With Regular Tooth, 18 to the Inch, for General Use in Hand Frames.

For Sawing all Solids, Tool Steel, Wrought Iron, Cast Iron and Slate.

Length, Inches	8	9	10	12
Width, Inches	7/16	7/16	½	½

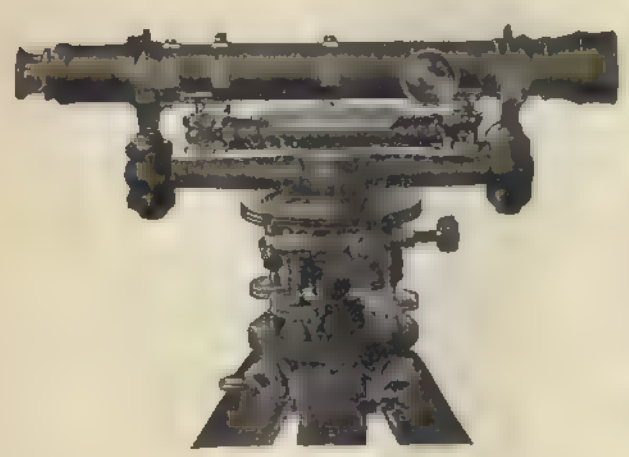
ARCHITECTS' LEVELS

GURLEY



Each

No. 381—Gurley Architects' Level.... ....$65.00

SPECIFICATIONS

Centers—Long bronze spindle and socket.

Leveling Head—Arms strongly ribbed, with four leveling screws protected from dust. Clamp and tangent.

Bar and Wyes—Bar of bell metal, shaped for greatest strength in the parts most subject to strain. Wyes with adjustable nuts. One Wye clip, fitted with stop which maintains cross wires in true horizontal and vertical position.

Telescope—12 in. long, power about 19 diameters, aperture of objective 1.19 inches. Erecting eyepiece. Platinum cross wires. Pinion movement to objective slide. Spiral movement to eyepiece slide. Detachable sunshade and objective cap. Objects clearly visible 6.5 feet from center of instrument

Extensively used by intelligent and enterprising architects, builders and millwrights on construction and building work, as well as by engineers and surveyors in the grading of streets, sewers, irrigation ditches and drains.

BUILDERS' TRANSITS

GURLEY

Each

No. 105—5 in. Limb. 9 in. Telescope. Complete as Specified $80 00

SPECIFICATIONS

Centers—Compound

Leveling Head—Arms strongly ribbed, with four leveling screws. Clamp and tangent. Shifting center

Horizontal Limb—5 in. diameter. Strongly ribbed, depth increasing towards center. Graduated to degrees, figured in one row 0 to 90 each way, and reading by index mark at 30 degrees to line of sight. Clamp and tangent.

Plate—Strongly ribbed, depth increasing towards center. Two graduated plate levels. Flush index cover, waterproof

Telescope—9 in. long, power 18 diameters, aperture of objective 0.69 inch. Erecting eyepiece. Balanced; reverses either end; center point top. Pinion movement to objective slide. Dust guard to objective slide, detachable sunshade and cap. Clamp and tangent to telescope axis

Telescope Level—4.3 in. long, graduated on the vial

Finish Bronze; screws and small parts bright.

Equipment—Mahogany box, with hinged cover, lock and strap. Accessories of trivet plate, to enable setting the instrument upon the walls or girders of a building, when it is impossible to use a tripod; 6 oz. plain plummet, etc

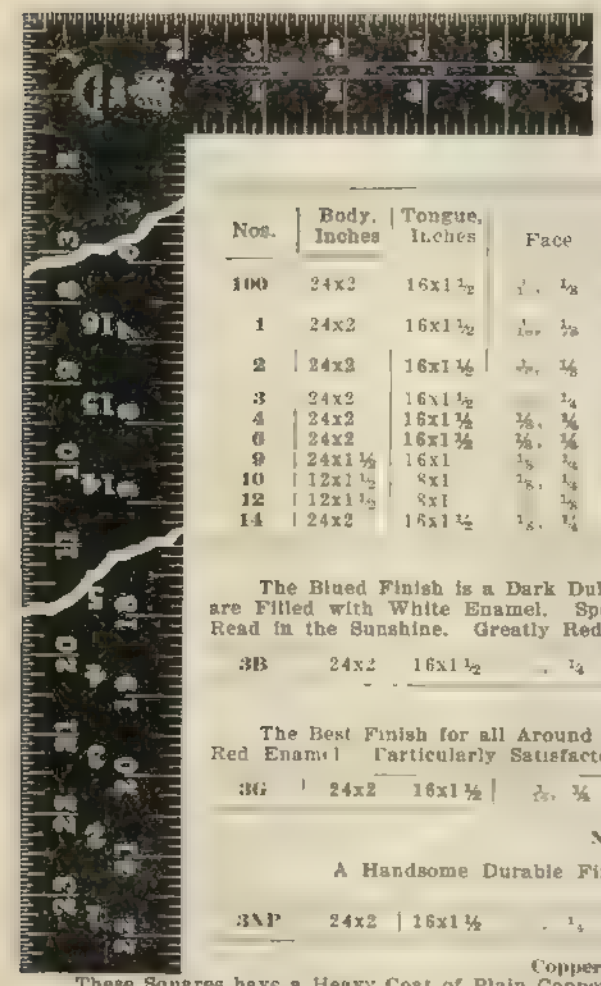
Tripod—No. 400, with solid round legs, and cap; weighs about 7 lbs.

Weight—Transit only, about 7 lbs.; transit including box and accessories, about 12 lbs.

Shipping Weight—Transit and tripod, in two boxes, for domestic shipment, about 50 lbs.; for export, about 75 lbs

STEEL SQUARES

EAGLE.



Made of a Single Piece of Special Analysis Steel, Tough, Springy and Durable

All Polished Squares are Brought to a High Finish on Fine Grade Emery Wheels. If they are Wiped with an Oily Cloth before Putting Away After Using they will not Rust and will Remain Serviceable for a Lifetime.

Full Polished.

DISH WASHERS

WHIRLPOOL SANITARY

White Enameled Heavy Tin Body, Black Enameled Heavy Stamped Steel Legs, Jointed Wood Handle.

Each

Whirlpool Sanitary—31¼ in. High Over All, 18 in. in Diameter, Holds 40 to 55 Dishes, the Average Number of Pieces Used in Families of 6 to 8 People, Weight Each Complete 22½ Lbs. . . . . $. . .

The dishes are first placed in the wire rack, the perforated cover put on, then the water poured in which falls over the dishes with a raining effect loosening the grease and dirt, and greatly shortening the time required to clean them.

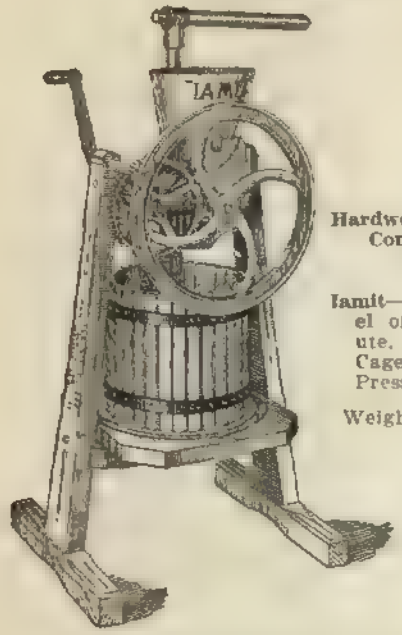
Hot, soapy water is required and not more than eight quarts should be used. The operator's hands never touch the water, which permits the use of water of the highest temperature and soap of strong grease cutting character, with absolute protection against injury to hands or complexion. Moving the handle forward and backward revolves the propeller in the bottom, which dashes the water with a swirling effect around, through and over all the dishes, cleansing them perfectly on all sides.

Perfect sterilization, so necessary to prevent infection, is impossible when the dish pan is used. The **Whirlpool**, however, which permits the use of scalding water perfectly sterilizes all dishes and removes every danger of contagion.

One in a Wooden Box

CIDER MILLS

IAMIT



Hardwood Frame, Strongly Constructed, Natural Wood Finish.

Each

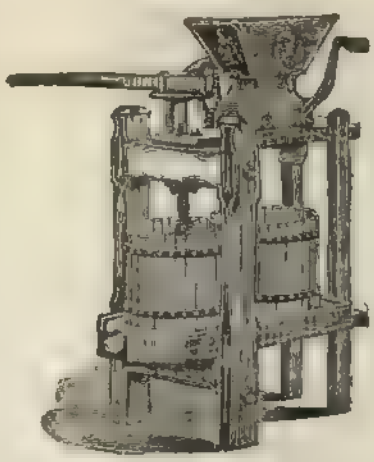
Iamit—Capacity ½ Bushel of Apples Per Minute. 12¼x13¾ in. Cage, 24x1¼ in. Steel Press Screw..... $.. .

Weight Each 138 Pounds.

The Iamit is a Geared Cylinder Mill, cutting and scraping apples very rapidly, and being made with adjustable concave, the cutting and scraping can be done as desired—either coarse or fine.

In from five to eight minutes a peck or more of apples can be gathered and from one to two gallons of cider made. It is a self-feed—you need not poke apples to the grinding disc. Every owner of one or more apple trees should have one.

MEDIUM



Hardwood Frame, Securely Bolted, Attractively Finished.

Each

Medium—Capacity 4 to 6 Barrels of Cider Per Day, Two 12x12¼ in. Cages, 22x1¼ in. Steel Press Screw, Weight Each 240 Lbs.....$.. .

The Medium Cider Mill is a good size for family use. It is built with iron beam and heavy gearing and is perfectly adjustable for all kinds of fruit.

It is a well known fact that hand mills produce a better quality of cider than power mills.

BARREL HEADERS OR FRUIT PRESSES

CLIMAX LEVER

Per Dozen

No. 6—One Piece Steel Side Clamps, Steel Lever, Wt. Per Dozen 180 Lbs.....$.....

The Side Clamps are of one piece, there being no joints to bind. It stands upright and can be operated from either side of barrel. The sides are adjustable to different lengths of barrels, and its movement is quick and powerful.

IRON SCREW

Per Dozen

No. 1—1 in. Iron Screw, Wood Handle, Steel Side Clamps, Weight Per Dozen 170 Lbs.....$.....

This press has the follower attached to the screw.. The follower attached thus can revolve, and is taken up with the screw after the barrel is headed. The side clamps are of steel and are fastened with two bolts.

BARREL SWINGS

SARGENT

Per Dozen Sets

No. 13—Iron, Japanned, for Barrels of Any Size, Can be Used in Any Space, Weight Per Dozen Sets 40 Lbs. . . . . $.

For swinging barrels of any size under counter or shelves of any height.

Barrels can be swung out without physical exertion, as a touch of the hand will move it.

HAND CARS

WITH STEEL FRAMES

Steel frame, well reinforced at all points subject to any strain. Frame enameled black

Gear drive construction; absolutely no dead centers

Wheels enameled red and fitted with ⅜ inch rubber tires

No. 116 (Junior Size)

WITH WOOD FRAMES

Frame and handle are made from perfect hardwood, entirely free from knots, finished in red and striped in gold and black

Seat board made of hardwood, natural finish and very neatly striped and decorated

Gear drive construction. Gear wheels are covered in rear to prevent injury to child's fingers.

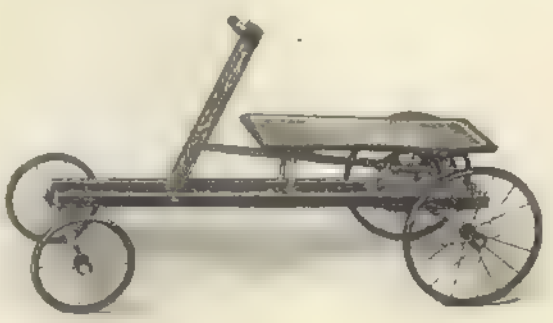
Wheels are enameled black and fitted with ½ inch rubber tires

Seatboard is so attached to frame that no screw or bolt heads are visible. This adds much to the finish of the car

Note—No. 121 is fitted with coasting attachment, controlled by a lever attached to side of frame. It is a very desirable feature, and adds much to the pleasure of hand car riding, especially on down grades

No.	Front Wheels Inches	Rear Wheels Inches	Length Over All Inches	Size of Seat Inches	Shipping Weight Pounds	Each
121	8	12	41	20 x 9	34	$11.00

Packed one in crate



No. 121 (Full Size with Coaster Attachment)

BALL BEARING HAND CARS

Ball bearing throughout and exceptionally easy running.

Frame and trucks are made from selected hardwood, finished in dark maroon with silver striping.

Seat board made from hardwood, natural finish, with neat design in center. Is attached to frame from bottom so finish is not marred by screws or bolts going through top.

Wheels are made up with nickel-plated hubs, nickel plated bent spokes, rims enameled in maroon and striped in silver. Wheels ball bearing and fitted with ⅜ inch rubber tires.

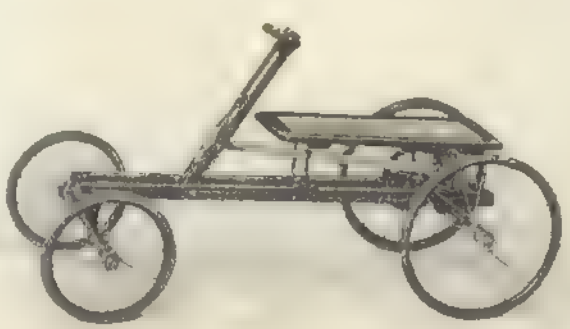
Gear drive and very easy running; gears are covered in rear to prevent injury to youngster's fingers.

Spokes, hubs, bolts, propelling rod, nuts, etc., heavily nickel plated.

No. 214 is made with steering column of steel tubing, to which is fitted an auto steering wheel with wood rim. It is also fitted with coaster attachment controlled by lever attached to side of frame. This is an admirable feature, and adds much to the youngster's pleasure.

No.	Front Wheels Inches	Rear Wheels Inches	Length Over All Inches	Size of Seat Inches	Shipping Weight Pounds	Each
214	10	14	42	20 x 9	49	$22.50

Packed one in crate



No. 214 (With Steering Wheel and Coaster Attachment)

SIDEWALK SULKIES

No. 124

Handle made of selected hardwood, natural finish, fitted with loop hand grip. Note from illustration that handle breaks and folds back, which permits of the cart being stored in small space when not in use. Handle extends out far enough in back to prevent cart from tipping over. Fitted with adjustable foot rest.

Seat is very roomy, is finished in red, striped in gold and fitted with high railing enameled black.

Gears are light and very strongly constructed.

Wheels are 10 inches in diameter, fitted with ⅜ inch rubber tires, and finished in black enamel. Weight 8½ pounds.

No. 124 Each **$2.25**

No. 123, Reversible Back

Handle made of selected hardwood, natural finish.

Has reversible back, adjustable footrests front and rear and anti-tip rear extension.

Gears are made very strong and as light as consistent with required strength. Finished in black enamel.

Wheels are 10 inches in diameter, fitted with ⅜ inch rubber tires and enameled black.

Seat is roomy, with high side rails. Finished in rich red, striped in gold. Weight 10½ pounds.

No. 123 Each **$2.50**

No. 125

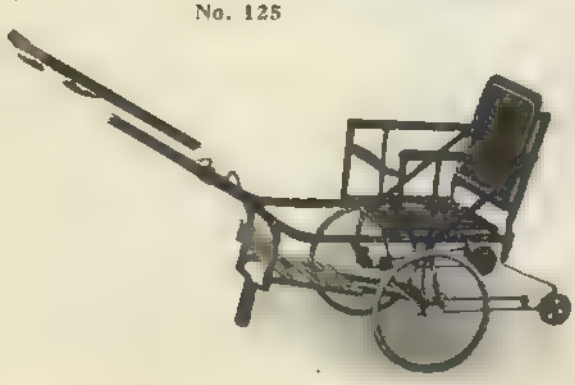
Body made with wooden bottom, sheet steel sides, very roomy and much more comfortable to ride in than body with steel railing. Enameled in rich red with gold striping.

"Ledig-Line" patent handle construction, breaks in center and folds back, taking up much less space than sulkies with one piece handle. Made from perfect hardwood, natural finish, and fitted with loop handhold, enameled black. Handle extends out quite far in rear to prevent tipping over backward. Fitted with black enameled, adjustable foot rest.

Wheels 10 inches diameter, enameled black, and fitted with ⅜ inch rubber tires.

Gears are strongly constructed and finished in black enamel. Weight 6½ pounds.

No. 125 Each **$2.50**



No. 147, Full Collapsible

Flat steel frame 21½ x 14 inches, black enameled.

Wheels 10 inches diameter, enameled black, ⅜ inch rubber tires.

Seat and back enameled green, gold striped and stenciled.

Adjustable, folding handle, three positions for varying arm lengths.

Safety strap, nickel plated hub caps. Weight 18 pounds.

No. 147 Each **$7.50**

METAL BUILDING CORNERS

TAKE THE PLACE OF CORNER BOARDS
ON FRAME HOUSES

Suitable For Repairing Old Work That Has Warped Open, As Well As For New Construction

These Metal Corner Pieces Are used To Finish The Corners Of Buildings Where Lapsiding Is used

Cut Shows
No. 14 and 16 Outside Corner

Cut Shows
No. 34 and 36 For inside Angles used where two walls join.

Made of No. 28 Gauge Galvanized Iron so that they can be Painted same as Wood. Take the Place of Corner Boards, are Accurately Shaped to Fit Beveled Corner Forms, at the Siding and Painted with No. Dulux before being Put on Over the Paper and Nailed Right Solid at the Corner Edge of the Board. Corner Pieces nailed along each Board, About two inches making It Unnecessary to Square the Ends of the Siding. Compared with the Old Style Corner Board Construction, there is a Saving in Both Time and Material. No Special Nailing required. Use 4-penny Casing Nail for putting on.

WATER COOLERS

TWENTIETH CENTURY DE LUXE

No. 1570.

The "Twentieth Century De Luxe" is the handsomest water cooler made. The heavily nickel plated metal jacket covers the indurated fibre ice container. Between the fibre ware and the metal jacket is an air space which, together with the fibre ware itself, acts as a double conductor. This saves ice materially, keeping amount used down to a minimum.

With Substantial Leg Stand.

Indurated Fibre Ice Container, Embossed and Highly Polished Nickeled Jacket, White Glazed Porcelain Water Jar, Triple Silver Plated Faucets

Each

No. 1570—Ice Capacity About 15 Lbs., Height without Bottle 37½ in., Diameter 20 in., for 5 Gallon Demijohn, Nickel Plated Steel Stand with Glass Ball Feet, Nickel Plated Drip Cup, without Demijohn ..... $.

Shipping Weight About 30 Pounds.

Low Feet, for Counter or Stand.

No. 1157A—Ice Capacity About 15 Lbs., Height without Bottle 16½ in., Diameter 15 in., for 5 Gallon Demijohn, Nickel Plated Claw Leg Stand with Glass Ball Feet, without Demijohn .

Shipping Weight About 35 Pounds

No. 1157A.

SKATE SUNDRIES

SKATE SAILS

For real pleasure and excitement there is nothing in the way of winter sports that can equal to skate sailing. It requires a little skill and practice to handle the skate sail but it is an art easily acquired. Our sails are made in two grades, balloon silk and sheeting. With each sail we furnish two jointed spars. Silk sails weigh 1⅜ lbs., sheet sails 3 lbs., poles 3½ lbs., sails measure about 9 ft. from top to bottom and 10 ft. wide across.

No. **BS.** Balloon silk sail complete with poles **$7.50**
No. **SS.** Special sheeting sail, complete with poles **4.50**
Sail only, silk..... **5.00**
Sail, only sheeting..... **2.00**
Poles only, jointed bamboo **2.50**

SKATE BLADE SCABBARDS

These scabbards are intended to protect the blades of racing and hockey skates when not in use, or when walking to and from the ice.

Style A

No. **A.** All leather, for racing skates with 14, 15 or 16 inch blades. Per pair.**$.75**
No. **H.** All leather, for hockey skates. Per pair..... **.75**
No. **TG.** Detachable toe guards for rink racing, (tubular) skates, aluminum finish. Pair.....**$.25**

TUBULAR SKATE HOLDERS

A wood rack for holding tubular racing or hockey skates. It was designed principally for use in sharpening skates, but it is an excellent way of keeping skates when not in use. The rack is strong, well made and serviceable.

No. **35.** Skate sharpening rack.....Each **$1.00**
No. **36.** Combination India sharpening stone, size 7x2x1 ins.....Each **1.00**

Plain Buckle

SKATE STRAPS

Leather Straps

No. **8.** Plain tongue buckle, russet or black, 28 inch. Pair **.15** Delivered .18
No. **2N.** With patent buckle which requires no holes in strap, and is quickly and permanently fastened at any point, and as quickly released. Russet or black, 20 in. Per pair.....**$ .20** Delivered .23
No. **8N.** Russet or black, patent buckle, 28 in. Per pair.. **.25** Delivered .28

Web Straps

These straps are made of heavy webbing and are fitted with a patent buckle that can be fastened firmly at any point. Many prefer them to the leather strap as they do not become stiff and crack in cold weather. Are very strong.

No. **WS.** 20" long. Per pair...**$ .10** No. **WL.** 30" long. Per pair..**$ .15**

Delivery Prepaid in U. S. if Cash is Sent with Order at Above Prices

STEAM COOKERS

IDEAL

Extra Heavily Tinned Finest Grade IX Charcoal Tin Plate Top, Sides and Double Doors, Cold Drawn Solid Copper Seamless Tank or Bottom, Strong and Durable.

Each

No. 20—11¾ in. Square, 21½ in. High, Capacity 11¾ Gallons, 2 Double Doors, 4 Removable Shelves or Divisions and 4 Compartments, Complete with Whistle, 2 Pans and Cook Book, Will Cook Enough Food at One Time for 3 to 15 People, Holds 16 1-Quart Jars.....$

The grandest labor-saving invention ever offered for canning fruits and vegetables—cooks the fruit and vegetables right in the glass jars or cans themselves. No pouring hot preserves or jam into the jars after cooking, no scalded or burned hands, no broken jars, no boiling nor stewing in large kettle on the open stove, no heat, no drudgery, no loss by evaporation or boiling away, no scorching nor over-cooking.

Weight Each 12 Pounds.

STEAM PEANUT WARMERS

Polished Tin, with Galvanized Iron Base.

Each

These Roasters have wrought iron legs, made of heavy band iron, extending in one piece from the top on one side to the top of the other side, thus making it very strong and durable. The charcoal grate is removable.

FIRELESS COOK STOVES

IDEAL

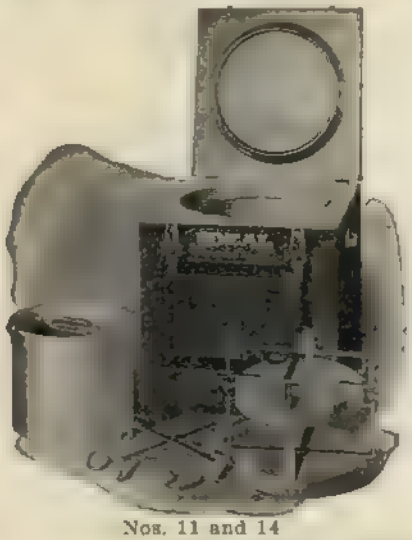
The "Ideal" Fireless Cook Stove is the embodiment of all that is best in fireless cook stove construction. The principle of fireless cooking finds in the "Ideal" its complete accomplishment

The fireless method of cooking resolves itself into one basic principle—heat retention

The 'Idea ' Fireless Cook Stove accomplishes this by scientific insulation strata-laid, fireproof, which not only retains the heat, but is a barrier to exterior influences

A patented device, the water seal top and a concomitant valve, effect positive heat imprisonment.

Pure aluminum of extra thick gauge lines the entire interior. The cooking compartments are manufactured seamless of the same heavy metal All unions seamed and double closed under heavy pressure Steel sub-frame interior supports of beam construction The whole confined in the final wall of rigidity the vulcanized, solid oak outer casing



Nos. 11 and 14

The seamless pure aluminum cooking compartment, or wells, are drawn from heavy sheets of pure aluminum and have no seams in the bottom or at the sides. This means that it is impossible for grease, water or moisture to enter the insulation through the bottom or sides of the cooking compartment. The wells of 12 quart capacity are united by double locked seams under heavy pressure to a thickness of pure aluminum or "sub-collar." The sub-collar gives the well the double grip which is needed to supply the strength necessary for a cooking compartment of such large capacity.

One Compartment.

Mr. Merchant, Here's Your Opportunity

Just what you want. Prepared particularly for you
A stimulator. A profit maker. Elaborately displayed

Ingersoll Assortment (No. 36)

contains all the big sellers of the Ingersoll line, in just the proportion in which your customers will buy them. It gives you at a minimum investment, a proposition that sells quickly, profitably and without trouble or expense.

—It offers you all the Ingersoll advantages—price protection, liberal guarantee, tremendous demand, together with the larger profits that a complete selection of models gives you, and free advertising that shows up the watches and is such a big factor in their sale.

The fixture is furnished only with this complete assortment and cannot be obtained separately, and only one assortment will be furnished to each customer.

This assortment costs you, list, $101.57

It sells for, list, $150.34

Your profit is, list, $38.77

One Velvet-Lined Wood Frame Fixture FREE

IMPORTANT:—These prices apply only where quantities of three dozen or more watches are ordered.

Following are the models in detail:

	$52.90	$69.48

This Assortment costs you, list $52.90

It sells for, list 69.48

Your Profit, list $16.58

Besides the above there is a smaller assortment which includes the new Ingersoll show case shown on this page.

The entire frame-work of the case is made of oxidized copper and double thick plate glass on top and four sides. The pad holding watches is covered with a black flock and all lettering is in high relief in a sparkling yellow. The case is durable and a most attractive means of displaying Ingersoll watches both on the counter and in the window.

Only the leading models of the Ingersoll line in this assortment—the watches that top all others in sales. The famous Dollar watch, newer and finer than ever, the Eclipse, thin model with its new antique bow, the Junior, thin and graceful in appearance, the dainty little Midget, ladies model, also with new antique bow—all combining to make both a big selling proposition and a most effective means of bringing customers into your store.

The show case is sold to you at one-half its cost to manufacture and all re-orders for watches give you a more liberal profit.

No. 1928 Assortment of 18 watches as enumerated in fine glass display case, list price $52.90

The Boyproof

There are many low priced watches on the market, but none possesses, together with high quality and attractive appearance the effective movement protection of the BOYPROOF.

While no thicker and no larger than those of the same price, this watch has over all others the advantage of a double back cover that conceals the movement entirely and renders it **dustproof** as well as **boyproof.**

It has a double roller escapement, a balance and a lever removable independently of the rest of the movement. It is stem wind and set, **16 size,** highly nickel plated and fully guaranteed for one year. To wind, you turn the stem to the right until it stops. To set, you push in the stem and turn hand in either direction while pressure on stem is applied.

Boyproof watches come packed a dozen in a striking combination box that can be displayed to the best advantage in your window or on your counter. They can be supplied in two finishes with no advance in price, **nickel, gun metal and gilt,** with **plain or fancy dials and plain or engraved backs.** A better set box can be supplied in one or more assorted finishes

Repair material furnished free of charge.

Stem wind and stem set 16 size. Plain or fancy dials. Supplied in three finishes.

OUR SPECIAL ADVERTISING OFFER UPON REQUEST ONLY.
BOYPROOF WATCHES.

In order to further the sale of "The American" Boyproof Watch to the trade, we will ship with every order for one dozen the hand some display box illustrated above, covered with Rembrandt Brown and containing, together with the twelve watches, several three-color posters of "The American" Boyproof Watch

Every box is packed for shipment in a reinforced, double corrugated board wrapper, and every watch is put up individually in a flannel lined and a tight fitting steel cover box. Nothing has been spared to make this assortment as attractive as possible. It is compact, neat and handy, and will double your sales on $1.00 watches wherever displayed

No. 1929 Price complete, with 12 Boyproof Watches, Nickel finish..... $13.85

No. 1930 Price complete, with 36 Boyproof Watches, Nickel finish..... 39.00

Note. If assortment of finishes is desired, state specifically your wants

ONE ASSORTMENT IN A WOOD BOX.

IRON PLUMBS AND LEVELS

STARRETT'S BENCH

6 to 12 inch.

18 to 24 inch

No. 132—Japanned Iron Frame, Polished Edges, Nickel Plated Level Glass Plate, Two Plumbs, with Longitudinal Groove in Seat of Base for Working on Cylindrical Work, Piping, Shafting, Etc.

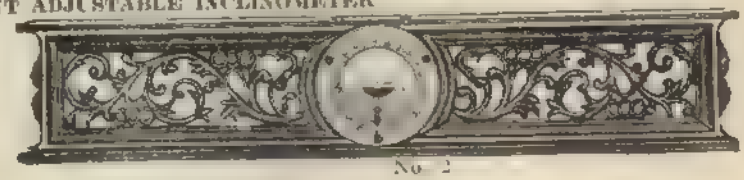
Length, Inches	4	6	9	12	18	24
Weight Per Dozen, Lbs.	6	9	14	23	35	50
Per Dozen	$16 20	18.00	19.80	21.60	24 00	27 00

One-twelfth Dozen in a Box.

IRON LEVELS

DAVIS PATENT ADJUSTABLE INCLINOMETER

No. 1



No. 2

Iron Frame, Handsomely Japanned.

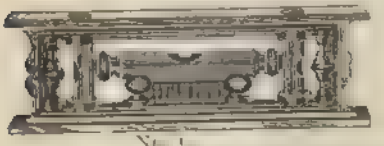
Nos.	1	2	3	4
Length, Inches	7	12	18	24
Weight Per Dozen, Lbs.	15	24	48	60
Per Dozen	$24.00	30.00	36.00	42.00

The above Levels are made for Machinists and Carpenters use, and are particularly useful in leveling up shafting or staircases, or anything that is to be at an angle. The dial is graduated to degrees and all that is necessary to do is to move the bubble case with the dial pointer attached to the desired degree and the Level is ready to be used. The adjustment is derived by the use of two screws on the top surface, tightening one and loosening the other will cause the bubble case to move

One-twelfth Dozen in a Box.

IRON PLUMBS AND LEVELS

DAVIS PATENT ADJUSTABLE DOUBLE



No. 6

No. 7.

Iron Frame, Handsomely Japanned, Polished Plumb and Level Cases, Plain Glasses, Adjustable.

Nos.	6	7	8	9
Length, Inches	8	12	18	24
Weight Per Dozen, Lbs.	12	24	36	51
Per Dozen	$24 00	27 00	30.00	36.00

The Plumb Tubes as well as the Level Tubes are adjustable. To adjust Level Tubes, tighten one and loosen the other screw entering Level Tube from bottom of frame. To adjust Plumb Tubes turn screw or eccentric on bottom of frame. In adjusting Levels care should be taken not to turn the screw down tight, as the adjustment sometimes becomes set when this is done.

One-twelfth Dozen in a Box.

STARRETT'S ADJUSTABLE BENCH

4, 6 and 8 inch Sizes. 12 inch Size. The 18 inch is Similar but with Double Plumbs

Japanned Iron Base, Ground and Graduated Vials, Nickel Plated Protecting Tube, with Longitudinal Groove in Seat of Base for Working on Shafting, Piping, Etc.

No. 85—With Plain Vial.

				With Plumb	With Dbl. Plumb
Length, Inches	4	6	8	12	18
Each	$1.00	1 25	1 50	2 00	3 00

No. 96—With Ground and Graduated Vial.

				With Plumb	With Dbl. Plumb
Length, Inches	4	6	8	12	18
Each	$2 50	3 50	4 00	5 50	8 00

These Levels are so constructed that they can be accurately adjusted, and when so adjusted are not liable to get out of true, the vials being set in tubes having solid ends which are firmly clamped to the base. The outer tube may be turned so as to protect the glass when not in use.

One in a Box.

PLUMBS AND LEVELS

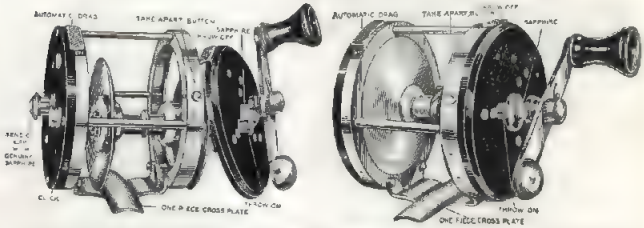
NOTICE.

Prices on the Stimulator pages are "special" and hold good ONLY until our April Catalogue is out. Do not blame us if your order reaches us too late to entitle you to these prices.

MEISSELBACH FREE SPOOL SURF REEL



An excellent salt water reel in design, construction, and practical usefulness.

Its automatic drag acts only when the fish runs—never while you are reeling in your line. Its adjustable tension screw gives any degree of pressure on the spool. That helps you counteract the tendency of the line to "over-run."

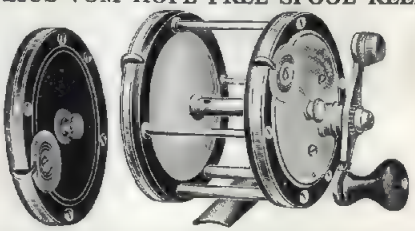
To take it apart—just push the button and twist your wrist. In two seconds you can get at the mechanism to clean or oil it.

Its rigid German silver rims (stamped—not cast) are riveted to the strong one-piece cross-plate. All the strain is on the metal; none upon the hard rubber plates.

Made in two widths of spool. The wide model will hold fully 300 yards of 9-thread cuttyhunk and the narrow model 230 yards.

No. 15. Free spool surf casting reel.....$18.00

JULIUS VOM HOFE FREE SPOOL REEL



The gears can be instantly disconnected making a "free spooler". The drag is automatic and normally set for light pressure. To make the drag heavier, after removing the back plate place the small screw within the half circle backward one or two holes according to the weight of drag desired. The proper way to use this reel is first to make it a free spool reel and after you have made your cast, then apply the brake which you find on the back plate. Do not connect the handle until the fish is hooked and has made its several rushes, then connect the handle with the button on the front plate.

THE "RABBETH" HANDLE DRAG

This drag is a great help when landing large fish, especially tarpon and tuna. It is intended as a substitute for the regular handle and by its use the reel is entirely under the control of the angler's right hand. It lessens the chances of a fish escaping for if the fish suddenly decides to run the drag will make the necessary allowance and even if you continue to turn the handle no harm can be done. When the rush is over the turning of the handle recovers the line in the usual way. It is made of German silver and regularly furnished with 7/32, 1/4 or 5/16 inch square hole or 7/32 inch screw thread. If the hole in your reel handle is different from the above sizes the next smaller one will fit if the hole in the drag is filed slightly.

No. 1. State size when ordering..... $4.50

THE "GOVERNOR" DRAG

This operates like the "Rabbeth" but is for lighter reels.

		Nickel	Ger. Silver
No. 2.	For striped bass, bluefish, muskallonge, etc.....		$2.00

HUNTING LAMPS

JUSTRITE ACETYLENE LANTERN

No. 10

It is small and compact—9¼ inches in height and 4¼ inches wide, nickel plated. Reflector is made of German Silver and is removable. It gives a 20 candle power light, 5 times as brilliant as a lantern. Uses ordinary carbide which is easily carried and is sold in air tight cans, so there is no danger of spoiling one's "grub" or duffle when packed.

No. **10.** In tin carrying box with carbide carrier.....**$3 00**

No. 2877

ELECTRIC CAP LAMP

The cap light is composed of a reflector, battery case (containing the battery) and connecting cord.

The battery case can be carried in the pocket, attached to the belt or carried in any convenient place. The reflector is supplied with a hook in the back for attaching to hat or cap. It throws a powerful light and is a great convenience for surveyors, inspectors and general camp purposes.

No. **2877.** Complete with cord.....**$5.00**

No. **734.** Extra Battery.....**$ .45** No. **1199.** Bulb.....**.13**

Postage on Battery if bought separately, 12c.

BRILLIANT SEARCHLIGHT

A good night companion for the camper, driver, miner, game observer and handy around home. Burns acetylene gas which is generated from calcium carbide. Will burn 8 hours on one filling. Throws a light 200 yds. Generator may be attached to belt and lamp to hat by means of band.

No. **K1.** Black finish. Made with single lens, which spreads the light.....**$5.00**

No. **K2.** With double lens, concentrates the light..... **6.00**

No. **K3.** With interchangeable single and double lens. **6.50**

COLUMBIA HUNTER'S LAMP

This is a neat compacthunter's lamp. It throws a powerful white light, easy to operate, and is strong and durable. Burns acetylene gas and the generator which can be carried on the belt or in the pocket will burn 5 hours on one charge. Outfit consists of a lamp with strap to fasten on hat, generator with belt attachment and rubber gas tubing.

No. **CJ.** Gun Metal Finish...**$4.50**

Delivery Prepaid in U. S. if Cash is Sent with Order at Above Prices

"EVEREADY" FLASHLIGHTS

OPEN AT END

Often the question is asked: "How long will a battery last?" The answer depends on the size of the battery and the amount of use. Take for example the No. 750 battery. If burned continuously the average life is over one hour but Flash Lights are usually called upon only for short periods of light and with the average service two or three months' use may be had from a battery.

The "permanent contact" attachment may be set to operate as a flash or as a continuous light.

OPENS AT SIDE

NICKEL PLATED POCKET FLASHLIGHTS

These we supply in two styles. One with a snap opening at the bottom for inserting the battery and the other hinged at the side, opening very much like a cigarette case.

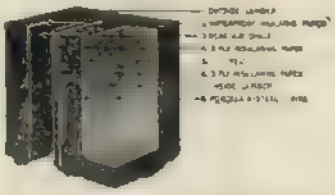
McKEE REFRIGERATORS

We carry a full line of McKee Refrigerators. For further information write us for special catalog illustrating and describing these Refrigerators.

No 721



Cut Shows Construction

Good insulation, such as is used in McKee Refrigerators, is obtained by building double walls, well protected by waterproof sheathing and hairfelt, and with a dead air space between them.

The dead air space prevents the passage of hot or cold air through the walls of the refrigerator, and the hairfelt, which is absolutely odorless and will not decay, offers additional resistance to changes of temperature.

The trap is one of the most important features of the refrigerator. Its function is to prevent warm air and odors as well as vermin, from rising into the refrigerator through the drain pipe.

The new McKee perfection trap is placed inside the provision chamber at the back, and consists of three parts, as shown in the cut. The parts fit into each other and shut off the passage of air completely, while allowing the waste water to drain off readily. The drain pipe fits into the top of the trap and the whole arrangement can be taken out and cleaned in a few seconds

Cut Shows Tray.

In order to obtain good results from a refrigerator it is essential that there be constant circulation of air within Such circulation is obtained in McKee refrigerators by properly arranging the ice rack and flues so as to take advantage of the fact that cold air is heavier than warm.

As soon as the air becomes warm it ascends through the flues till it comes in contact with the ice, then, cooled and purified, it again drops and passes into the provision chamber.

This circulation continues automatically as long as there is ice in the refrigerator, and insures a low temperature and absence of moisture or odors

The wire mesh shelves allow the air to circulate freely in all parts of the provision chamber.

ARLINGTON REFRIGERATORS

We carry a full line of Arlington Refrigerators. For further information write us for special catalog illustrating and describing these Refrigerators.

Arlington Refrigerators are fitted with heavy woven wire shelves. These shelves are coated with pure block tin, are rustless and sanitary, and afford a free circulation of air.

Insulation must be efficient to produce economical refrigeration. The walls of all Arlington Refrigerators have eight heat resisting surfaces, as follows, thereby cutting the ice consumption to a minimum

1—Exterior Case.
2—Waterproof Sheathing
3—Dead Air Space
4—Waterproof Sheathing.
5—Eel Grass
6—Waterproof Sheathing.
7—Interior Case
8—Interior Lining.

The fundamental principle of the heavier, cold air displacing the warmer and lighter air is, of course, the only way in which to secure a circulation. In Arlington Refrigerators the ice is always as near the top of box as practicable and large flues are provided to permit an easy escape of the cold air from the ice chamber

No. 102

A good circulation of air throughout the interior is imperative. It means a dry refrigeraor, which is quite as important as a cold one

AUTO SUNDRIES

"TIGER" HAND ACTUATED HORN.

K4566—A low priced general utility horn for all purposes. Screw mounting on steel spring base. Handle projects back of horn, permitting easy grasp of same at all times. Finished and well japanned. Highest grade black baked enamel, nickel bell. Complete with bracket. In carton. Ea. $2.50

"LONG" HAND ACTUATED HORN.

K4183—Large size, 9 in., black enameled outside nickel plated in side, deep long roll sound wave motor operated by push-rod bracket adjustable to any fore door car. Each, $5.60

"HIPWELL" ELECTRIC HORN.

✣ No. MBN	Black Enameled and Nickel	30 00
✣ No. MBS	Black Enameled	30 00
✣ No. MN	Nickel Plated	30 00
✣ No. MGM	Gun Metal	30 00

One in a Case, Weight 7 lbs.

KLAXON—HAND OPERATED

The Hand Klaxon Operates on the Klaxon Principle of a Steel Diaphragm set in Vibration by a Toothed Wheel. This Wheel is Rotated by a Train of Gears that Speed Louder Pressure on the Hand Ball Increases the Klaxon Warning Note and Quickens the Repeat Interval. The Hand Ball is Cushioned to Prevent Jar and Consequent Fatigue to the Operator. The Hand Horn is Identical with that on the Electric Klaxons.

FOR AUTOMOBILES

	Each
No. HBE—All Black Enameled	$11 30 7.50

One in a Case, Weight 8 lbs.

HAND KLAXONET

A real Klaxon—not the Klaxon note and Klaxon quality. Operates on an entirely novel principle. Its plunger is very short, a slight push gives an instantaneous response and a very loud note. Same power as Type L.

FOR AUTOMOBILES

	Each
No. KHBE—All Black Enamel	$8 50 4.00

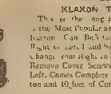
One in a Case, Weight 5 lbs.

FOR MOTORCYCLES

With Short Projector and Special Attaching Brackets

	Each
No. KHMN—Nickel	$8 50 4.00
✣ No. KHMBE—All Black	8 50 4.00

One in a Case, Weight 5 lbs.



KLAXONETTE—TYPE L

Is the True Klaxon Warning Note in Smaller Size. Is Loud, but Open to Some People as Especially Desirable for Small Cars. Complete with Long Push Button and 10 Feet of Insulated Wire.

		Each
No. KLB	Polished Brass	$23 50

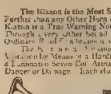
KLAXON REGULAR HORNS

Special Klaxon Horns Shown on Left of This Page

The Klaxon is the Most Startling and Effective Signal Ever Devised for Automobiles or Motor Boats. It is Far More Powerful and Can be Heard Further than any Other Horn or Whistle and by Reason of a Peculiar Alternate Tone Vibration Is Unmistakable As Other Sounds. The Note of the Klaxon is a True Warning Note — Not Pleasing or Musical, but Full of Meaning, Unmistakable, Compelling Respect, Demanding Attention. It Can Be Heard Through Every Other Sound — Is Instantly Recognized Without Conscious Need of Thought — Hence Its Value. May Be Heard a Mile or More Under Favorable Conditions. Only a Quarter of a Mile or More in Crowded Streets.

The Klaxon is a Harmonic Note Sounder operated by Alternating Current. It is Sounded Positively by a Touch Vibrating Diaphragm Set in Rapid Vibration by Means of a Hardened Tooth Wheel and Pinion Operated on a Spring Governor. Also Operates as Easily, Surely and Powerfully on Battery Current of a Locomotive Service Coil. Operates on a Commutator of Standard Type. Klaxon Horns are Dust and Waterproof, Can be Cleaned with a Hose without Danger or Damage. Each Horn is Supplied with Push Button to Match Finish of the Instrument Used and 10 Feet of Double Covered Insulated Wire.



KLAXON—TYPE L

This is the original Klaxon with the Long Projector and is Every Horn made there, thereby Keeping up with the Large and ever increasing Demand for Klaxons. Has a very sharp note. Can be Distinguished Miles away by a Touch of the Klaxon Quality. Is Beautifully in Keeping with any Car. Adds Quality Value to the Car. Is one of the Glass Hard Steel Wire, also to the Coast Guard Station on the Diaphragm for any Climate. Is the Only Warning Note, totally unlike any other Car Warning Note, totally unlike any other Car.

Complete with Push Button and Wire

		Each
No. LBB	Black Enameled and Brass	$30 00
No. LBN	Black Enameled and Nickel	30 00

One in a Case, Weight 20 lbs.

KLAXON—TYPE S

Made with the Same Number and of the Same Construction as the Type L, Only Has Short Horn Instead of a Long One. Is a Good Mate for Owners Preferring Short Horns. Is Same in Tone, Quality, Volume and Price as the Type L. Can be Operated on 6 Volts for Road or Light and Side or Tail. Comes to Suit Klaxon Warning Note as the Type L.

Complete with Push Button and Wire and 10 Feet of Cord

		Each
No. SBB	Black Enameled and Brass	$30 00
No. SBN	Black Enameled and Nickel	30 00

One in a Case, Weight 19 lbs.

KLAXONETTE—TYPE L

The Klaxonette operates on the same principle as the Klaxon. Has the true Klaxon Warning Note but at a higher or Flatter Pitch. Is suitable where the Best Loud Motor Note is not Desired. Is Very Loud. The Motor is wound for Six Volts and Consumes but Two and One-half Amperes at that Voltage. Four to Six Dry Cells are quite sufficient to operate more satisfactorily. Has Long Type Projector and Oval Bell.

Complete with Push Button and Wire

		Each
No. KLBB	Black Enameled and Brass	$22 50
No. KLBN	Black Enameled and Nickel	22 50

One in a Case, Weight 10 lbs.

KLAXET TYPE L

The Klaxet is a little smaller than the Klaxonette, but operates on the same principle by a Steel Diaphragm Vibrated by an Electric Motor. Produces the true Klaxon Warning Note—Abrupt, Imperative and to the Point. It is Especially well made and Reliable and is used on the Regular Klaxon Guarantee. Requires from Four to Six Dry Cells to Operate.

Complete with Push Button and Wire

		Each
No. KBB	Black Enameled and Brass	$12 50
No. KBN	Black Enameled and Nickel	12 50

One in a Case, Weight 5 lbs.

KLAXON—HAND OPERATED

The Hand Klaxon operates on the Klaxon Principle of a Steel Diaphragm set in Motion, Vibration by a Toothed Wheel. This Wheel is Rotated by a train of Gears that Speed up an High Speed under pressure on the Push Ball. The Harder you Push the more Klaxon Warning Notes are sounded per minute. The Hand Horn is identical with that on the Electric Klaxons.

FOR AUTOMOBILES

ONE IN A CRATE

GALLERY TARGETS.

No. 3—Round, diam. 12 in., ¼ in. thick, with bell and image, made of a grade of metal particularly adapted to stand cartridges, with ¾ in. diam. bull's eyes, wt 12 lbs. .....each CJJ $5.00

When bull's-eye is hit, a bird rises and the bell, similar in sound to an electric bell, rings a few seconds.

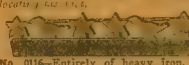
While designed for the use of 22 caliber cartridges, the spring may be quickly adjusted for service as an air rifle target.

We can furnish No. 3 Targets with ¾ in., ⅝ in. and 1 in. bull's eyes at same price for shipment from factory.

No. 19½—Plain round, 6 in. iron, diam., 12 in. [illegible] with ¾ in. bull's eye, for BB caps, ringing gong when bull's eye is hit, self-setting, wt 4 lbs., each AEJ $2.50

No. 19—Same as No. 19½, ¾ in. iron, with ¼, ⅜, ¾ and 1 in. open bull's eye, for 22 caliber cartridges, wt 20 lbs. .....each BAJ $3.50

The construction of the target surface breaks at each numbered circle clear, thus aiding the marksman in locating the hit.



No. 0116—Entirely of heavy iron, for 22 caliber cartridge, birds and stars falling back when hit, 6 objects to shoot at, made for gallery shooting, reset by rope from stand, wt 12½ lbs. .....each AHJ $3.00

No. 0118—Same as No. 0116 but larger, with 8 objects to shoot at, wt 15 lbs., each .....BDJ $5.00

These targets are of standard make and the most extensive users use them. The iron or metal [illegible] used is carefully distributed that the entire target is reset with a slight tug at the rope.

TRAPS.

GAME TRAPS.

Steel With Chain.

No. 100G —Rat, single spring, 3½ in. jaw, w't per doz. 8 lbs., per dozen ..... **AAE** $4.25

No. 101G —Muskrat, single spring, 4 in. jaw, w't per doz. 8 lbs., per dozen ..... **ACE** $5.00

No. 101½G —Mink, single spring, 4¾ in. jaw, w't per doz. 11½ lbs., per dozen ..... **BJE** $7.50

No. 102G —Fox, double spring, 4½ in. jaw, w't per doz. 14 lbs., per dozen ..... **JBHE** $10.50

No. 103G —Otter, double spring, 5½ in. jaw, w't per doz. 23 lbs., per dozen ..... **JCHJ** $14.00

No. 104G —Beaver, double spring, 6½ in. jaw, w't per doz. 27 lbs., per dozen ..... **JDDE** $16.50

Traps are of superior quality. The springs are made from spring steel, carefully tempered. When opened the trap lies very flat so that they can be easily secreted in the runways of animals. The chain is strong, well made and will stand the severest test.

NO. 100s, THIRTY-FIVE, NO. 101G TWENTY-FIVE, NO. 101½G TWENTY, NO. 102G TWELVE, NO. 103G EIGHT, AND NO. 104G FIVE DOZEN IN A BARREL.

No. 1G.

All Steel With Chain.

No. 0G —Rat or Gopher, single spring, w't per doz. 6½ lbs., per dozen ..... **ADE** $4.25

No. 1G —Muskrat, single spring, w't per doz. 8 lbs., per dozen ..... **AGJ** $5.00

No. 1½G —Mink, single spring, w't per doz. 10 lbs., per dozen ..... **BEE** $7.50

Traps of this pattern are popular with trappers because they are light weight, yet strong. They are easily transported and a greater number can be taken to the trapping grounds. Easily secreted in the narrow runways of animals because so compact in form. Traps are strongly made, carefully inspected and guaranteed.

TWELVE DOZEN IN A CASE.

TRAP CLAMPS.

No. 5G—For setting No. 5G, w't per doz. 10½ lbs. ..... per dozen **CDJ** $6.00

No. 6G—For setting No. 6G, w't per doz. 24 lbs. ..... per dozen **JEGJ** $10.00

NEWHOUSE WITH CHAIN.

No. 81G—Webbed jaws, spread of jaws 4 in., with chains, w't per doz. 11 lbs., per dozen ..... **CAE** $5.50

The animal can only gnaw off its leg at a point where the meeting edges. The flesh left above the point of amputation and below the jaws will swell, and make it impossible to pull the leg stump out of the trap.

12 DOZEN IN A CASE.

No. 91G—Double jaw, spread of jaws 5½ in., with chains, w't per doz. 11 lbs. ..... per dozen **CDJ** $6.00

No. 91½G—Double Jaw, spread of jaws 6½ in., with chains, w't per doz. 12 lbs. ..... per dozen **EAE** $9.00

For Muskrat, Skunk, Mink Raccoon, Fox or Woodchuck.

NO. 91G THIRTY DOZEN, NO. 91½G, TWENTY DOZEN IN A BARREL.

ONEIDA JUMP TRAPS.

Double Jaw with Chains.

No. 91G Muskrat or skunk, double spring, w't per doz. 8 lbs., per dozen ..... **BJE** $6.00

The double jaws take an easy and firm grip so high up on the muskrat that he cannot twist out, neither can the skunk gnaw out. Double jaws rarely break the leg bones because of the double surface.

TWELVE DOZEN IN A CASE.

Single Spring.

All Steel with Chain.

No. 0G—Rat or Gopher, 4 in., single spring, w't per doz. 5½ lbs., per dozen ..... **ADE** $4.25

No. 1G—Muskrat, 4¾ in., single spring, w't per doz. 8 lbs., per dozen ..... **AGJ** $5.00

No. 1½G—Mink, 5½ in., single spring, w't per doz. 10 lbs., per dozen ..... **BEE** $7.50

No. 2G—Fox, 5½ in., single spring, w't per doz. 14 lbs., per doz. **JCEJ** $10.50

No. 3G—Coyote or Badger, 6½ in., single spring, w't per doz. 22 lbs., per dozen ..... **JDHJ** $14.00

No. 4G—Otter, 7¼ in., single spring, w't per doz. 28 lbs., per doz. **JEFE** $16.50

Jump traps are light, compact and guaranteed as to quality.

NOS. 0G, 1G and 1½G, TWELVE DOZEN IN A CASE, NO. 2G, TWENTY. NO. 3G, TWELVE. NO. 4G, TEN DOZEN IN A BARREL.

VICTOR WITH CHAIN.

No. 4G—Beaver, 6½ in., double springs, w't per doz. 34 lbs., per dozen ..... **JDDE** $16.50

PACKED IN BARRELS, NO. 0G, FIFTY-FIVE DOZEN, NO. 1G, FORTY, NO. 1½G TWENTY-FIVE, NO. 2G, FIFTEEN, NO. 3G, TEN, NO. 4G SEVEN.

AUTOMOBILE LAMPS AND REFLECTORS.

COMBINATION OIL AND ELECTRIC SIDE LAMPS.

Nos. 5656, 5662, 5668. No. 5656, showing Reflector open.

COMBINATION.

No. 5656—All brass, side lamps, per pair★.....**JFFJ** $11.00

No. 5662—Black enameled and brass, per pair★.....**JGJE** $11.75

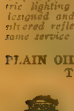
No. 5668—Black enamel and nickel, per pair★.....**JGEJ** $12.50

All lamps are 4½x4½x11 in.

Bulbs not included at above prices.

The view above illustrates the combination oil and electric side lamp, showing the beveled glass separating the oil and electric chambers, absolutely preventing tooting and smoking up of the parabolic reflector. This combination electric lamp is particularly high grade for electric lighting because of the especially designed and built highly polished and silvered reflector, giving practically the same service as an all-electric side lamp.

PLAIN OIL AND COMBINATION TAIL LAMPS.



No. 5657—All brass, combination electric and oil tail lamps, each★.....**CFJ** $6.00

No. 5649—Plain oil, each★.....**CJJ** 5.00

No. 5658—Combination electric and oil, black enamel and brass, each★.....**CGE** $6.25

No. 5653—Plain oil, black enamel and brass, each★.....**CAE** $5.25

No. 5659—Combination electric and oil, black enamel and nickel, each★.....**CIJ** $6.50

No. 5650—Plain oil, black enamel and nickel★.....each **CCJ** $5.50

No. 5655—Plain oil, all nickel, each★.....**CCJ** 5.00

All the above lamps are 4½x4½x11 in. Electric bulbs not included at prices named.

The bulb socket is set in the base of the oil chamber in the corner and far enough away from the oil burner to prevent undue heating or contact with the oil flame.

The same care is used in the manufacture of these as is used in the manufacture of the side lamps.

Combination prop for round or flat brackets, wind shields protecting oil burner from draught, latest oil pot con-

PLAIN OIL SIDE LAMPS.

No. 5660—All brass, per pair★.....**EDJ** $9.00

No. 5662—Black enamel and brass, per pair★.....**BHE** $9.75

No. 5661—Black enamel and nickel, per pair★.....**JFCJ** $10.50

No. 5654—Full nickel, per pair★.....**JFCJ** 10.50

All lamps are 4½x4½x11 in.

The above lamps are same as No. 5656, without the reflector or electric bulb.

Plain type without reflector, combines absolutely high grade workmanship and heavy material with smart design. The heavy stamped bracket is securely bolted through the brass sides of the lamp to a heavy solid steel back as large as the whole side of the lamp, absolutely assuring solidity and stability. These lamps are superior to anything now offered at any price.

OIL TAIL LAMPS.

HAM'S COLD BLAST.

Standard Size

No. 5648—Venus, height including bail 12 in., fitted with 6½ in. heavy polished plate beveled lens, 3 in. ruby lens, fount holds sufficient oil to burn 29 hours, wt 3 lbs.

each.....**DBJ** $7.00

This is a lamp that rough roads and strong winds cannot affect. "Cold Blast" means perfect ventilation and consequently an intense flame that floods the reflector with brilliant white light. Positively no smoke, odor nor soot nuisance. Glass chimney does not "sweat" grease, a simple and effective locking device, founts and bodies of heavy brass riveted throughout and reinforced with steel side plates to relieve all bracket strain. Serves as a trouble lamp by the use of bail. Certainly the most reliable oil tail lamp marketed.

ONE IN A BOX.

DUSTY TAIL LAMPS.

No. 5701—4 in. face, 8½ in. high, black enamel, wt 1½ lbs. each **ADJ** $2.30

This is the best tail lamp ever offered at this price. It is equipped with a patent oskuna lense which prevents blowing out or fouling.

Furnished in above finishes only.

ONE IN A BOX.

★FOR FACTORY SHIPMENT ONLY.

LAUREL.

No. 5647—Heavy gauge black and brass, size of body 4x5 in., a very good lamp at a moderate price, each **BIJ** $4.80

GAUGE LAMPS.

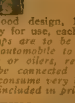
No. 5711—Round type, length 3 in., wired ready for use, each **JIJ** $1.50

No. 5712—Hood design, length 3 in., wired ready for use, each **JIJ** $1.50

Gauge lamps are to be used on the dash of an automobile to light clocks, speedometers or oilers, requiring little space, can be connected with storage battery and consume very little current.

Bulbs not included in price.

CONVERTING REFLECTORS.



Heavy Gauge Brass, Extra Heavy White Silver Plated, Coating Added, Unique and Simple Focusing Device Arranged to Take the Shock of Jolting from the Bulbs, thus Saving the Filament.

KIDDIE-KARS

The Kiddie-Kar is Propelled by Feet on Floor or Ground.

The only practical indoor car. Four different kinds of lumber are used, each piece best for the place.

All wheels are made from rock maple treated so as not to warp or shrink out of shape. Bearings of rock maple on steel are self-lubricating and easy running. Long sleeve bearing holds steering post steady. Carefully seasoned selected basswood seat, shaped and sanded smooth. Hardwood handle bar and steering post. All parts are put together with screws (no nails used.)

Finished in Imported Analine Dyes, Guaranteed Unfading, the Finish is Two Coats of Spar Varnish, no Paint is Used.

AIR-O-LITE LAMPS

The Air-O-Lite burns gasoline safer than any oil lamp made burns kerosene. Explosion is impossible. No danger if lamp is dropped or overturned. It greatly lessens danger of fire.

HYDRO CARBON GASOLINE

Handy, durable, beautiful, easy on the eyes, and requires little care. Gives a strong, powerful, white light, 300 candlepower, at a cost of 25 cents a month. Explosion is impossible.

Produces five times the light of a big center draft oil lamp at one third the cost.

This lamp may be suspended from ceiling for lighting stores and offices, an extra wire and ring for this purpose is furnished with each lamp

The Air-O-Lite burner is practically indestructible. Pure nickel which never burns out is used in burner caps. It soon saves its price in cost of operation. The Air-O-Lite is a clean lamp—no smoke—no smell—no dirty chimney—no greasy wicks to trim.

Lamp needs cleaning only once a year to produce a perfect light and is easily filled.

By air pressure the gasoline feeds from the bottom of fount up through the lamp standard and when the gasoline reaches the heated portion between the two burners it is changed into vapor. The gas tip is the cap on the upper end of the lamp stem or generator tube. The vapor feeds through a small orifice in this tip. The end of the tube inside the gas tip is screened in a way which prevents the orifice from stopping up. A round asbestos wick is placed in the upper end of generator tube. It is used only to absorb the impurities of the gasoline, and needs changing about once a year.

An extra wick and screen are furnished with each lamp, which are the only repairs that will be needed. The mantles are small and cheap and will last much longer than the ordinary gas mantles everywhere in use. Four mantles with each lamp.

Height over all 23 inches, diameter of fount at base 7 inches, standard 10 inch opal shade.

No. 40 Air-o-lite. Weight each 8 pounds, each.....**$10.00**

One in a carton

No. 40M Extra mantles, per dozen.....**$1.50**

One dozen in an envelope

KER-O-LITE LAMPS

No. 50 Ker-o-lite. It's the Air-o-lite built to burn kerosene. Gives 300 candlepower. Operates same as the Air-o-lite and has the same high quality of material. Weight each 8 pounds. . . . . each, **$10.00**

One in a carton

GASOLINE TORCHES

Adapted for use in factories, foundries, machine shops, rolling mills, blacksmith shops, warehouses, markets, etc. Reservoir holds one gallon. Height over all about 30 inches.

Weight per dozen about 55 pounds.....per dozen, **$30.00**

"MARATHON" 1915 MODEL BICYCLE

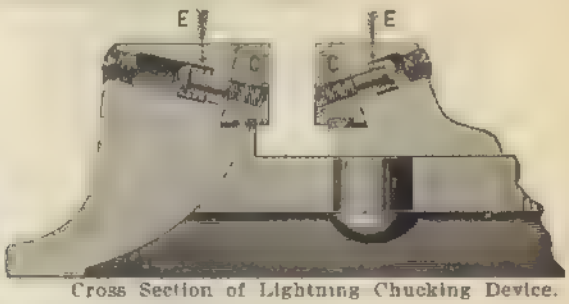
VISES

MASSEY PLANER, MILLING MACHINE, SHAPER AND DRILL PRESS



Cross Section of Lightning Chucking Device.

Equipped with Lightning Chucking Device.

The Lightning Chucking Device chucks all work automatically and instantly. When a piece of work either straight or taper is chucked beveled steel jaws are forced down and carry the work with them onto the bed of the vise Hence hammering squaring or setting is unnecessary A piece of work can be chucked and made ready for the tool to operate within thirty seconds

The front jaw is adjustable to all shapes of work

For drill press work the long slot in the center of the vise is open, thus giving the drill a free range.

This vise is particularly serviceable on a moving table for surface grinding.

ANVILS

PETER WRIGHT'S BLACKSMITHS'

Per Pound

80 to 350 Lbs.....Base, ¶.....

These Anvils are warranted and are made by Peter Wright & Sons, Stowbridge, England

HAY-BUDDEN BLACKSMITHS'

Per Pound

90 to 250 Lbs.....Base, ¶.....

Every genuine "Hay-Budden" Anvil is made of the best American wrought iron and faced with best crucible cast steel.

Every genuine "Hay-Budden" Anvil is made by the latest improved methods. Top and bottom are each one solid piece and welded at the waist

The steel faces to these anvils are all put on in one solid piece; not in two or more pieces, as is customary with most anvils.

APPROXIMATE DIMENSIONS OF GENERAL BLACKSMITHS' ANVILS

One-quarter Gross in a Box.

"BEST"

Hardwood Handle, Pressed Steel Ferrule.

The ferrule has a circular groove fitting a corresponding one in the wood handle. Locked in this manner, the ferrule and handle cannot be separated. The long ferrule, snugly fitting the handle, absolutely prevents the handle from splitting. At the end of the handle the ferrule forms a cap perforated with a slot, for its protection. This cap is pliable and designed to automatically fit the tang that is driven into it.

"MEILINK'S" HIGH GRADE STEEL SAFES

SHIPPED FROM OUR HOUSE so goods will reach you promptly.

NOTICE—Their walls are construction filled with light and dry cellular asbestos. One third less weight with same capacity. Economical in shipping—easy to handle—and occupy less space. Fireproof qualities do not depend upon ruinous swelling walls and interior dampness, which ruins business records, etc.

CONSTRUCTION—Best [illegible] and [illegible] special [illegible] of corner [illegible] and asbestos filling, light and dry [illegible] Are [illegible] with cement and reconstructive dampness and by their greater weight increase all [illegible] [illegible] [illegible]

MEILINK'S FIRE PROOF SAFES

A special line of safes designed for the protection of valuables silverware, papers, etc., in the home and for general business and private use.

The inside and outside bodies are formed out of one piece of steel welded at the bottom where the ends meet.

The front and back frames are anchored together through the walls by steel stay bolts. This forms a rigid structure of frames and bodies, solidly interlocking them with each other. This stay bolted construction does away with cross ribs in the outside leaving a smooth finished body all around the safe, and it is much stronger.

The outside steel wall fits inside the front and back frames and is firmly held there by the stay bolts anchoring the frames against it.

The caster blocks are a part of the frame. The wheels are made of malleable iron.

"Meilinks" Safes are guaranteed against Jimpress. The fire walls are a solid "thermo-cel" composition prepared under our own formula using asbestos fibre and binding mediums which contains no moisture and will neither sweat nor swell.

Weight Each 320 Pounds

MEILINK FILING SAFES

The front and back frames of the "Meilink" Filing Safe are heavy steel angles, each welded into one continuous piece. They are ¼ in. thick and face 2 in. on the front and back and 2 in. on the sides and bottom. The inside and outside bodies are 14 gauge steel. Each one continuous around the sides, top and bottom, welded where the ends meet. They set in channels inside the steel frames. The back plate is also set inside of the frame All joints are thus protected from warping and twisting effect of heat by angle frames. The front and back frames are anchored together through the walls by strong steel stay bolts. These bolts lock the frames solidly onto the inside and outside steel bodies.

The doors are provided with an asbestos tongue or flange, held in position by a steel moulding and cast into shape in the grooved frame, making an absolutely tight joint. The grooved frame is rolled out of heavy steel in one piece.

The fire walls are a solid "thermo-cel" composition of asbestos fibre and binding mediums.

ROBES, OVERCOATS AND HORSE COVERS.

AUTOMOBILE ROBES.

Spring Belt.

No. 3595H—Heavy rubber drill face, blue kersey lined, leather soled shoes, w't 6½ lbs.,....each **EIJ** $9.80

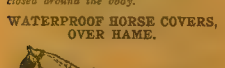
No. 3596H—Extra quality heavy rubber face, green plush lined, leather shoes, w't 8 lbs. .....each **JGGJ** $12.80

No. 3597H—"Combination Robe," fine black plush velour face, lined with same material, rubber interlined, lined, leather shoes, w't 5½ lbs., each .....**AJHJ** $18.00

No. 3596H Extra quality brown corduroy face, black plush lined, leather shoes, w't 8 lbs. ...each **JIJJ** $15.00

The Spring Belt in the above robes is made of fine tempered steel and applied to the upper edge of robe and made to shape itself to the body and hold the robe firm in place. The divided foot pockets or "shoes" are adapted for use in automobiles, the separation enabling the operator to reach easily the pedals at the same time. The feet are thus in separate partitions and completely covered all around, the robe falling together at the back when the spring belt is closed around the body.

WATERPROOF HORSE COVERS, OVER HAME.



Heavy 14 oz. White Duck Reinforced Front and Buckle Strap with Line Pockets and Rawhide Hame and Trace Leathers.

No. 5020—58 in. deep, made in two parts, seamed together in middle, for heavy express or teaming, w't per doz. 40½ lbs. .....per dozen **BDDJ** $40.70

No. 5023—66 in. deep, made in three pieces, for heavy express or teaming, w't per doz. 48 lbs.. per dozen .....**BGJJ** $45.00

No. 5015—Extra heavy brown oiled duck, with line pockets, extra large hame leathers, with trace leathers and buckle at ap, for heavy express or draft, w't per doz. 78 lbs., per dozen .....**BHHJ** $48.00

AUTOMOBILE ROBES.

No. 300R—Black Russian bear skin, lined with good quality quilted sateen, sleeves reinforced with leather shields, black Siberian marten storm collar, sizes 44, 46, 48 and 50 in. chest measurement, w't 13 lbs., each .....**BAJJ** $35.00

No. 310H—Black Siberian dog skin, lined with good quality quilted sateen, sleeves reinforced with leather shields, high storm collar of same fur, sizes 44, 46, 48 and 50 in. chest measurement, w't 12 lbs., each .....**BBEJ** $37.50

No. 315H—Black Siberian dog skin, lined with good quality quilted sateen, sleeves reinforced with leather shields, American musk hog storm collar, sizes 44, 46, 48 and 50 in. chest measurement, w't 12 lbs., each .....**BFCJ** $43.50

Above measurements indicate sizes necessary to fit 40, 42, 44 and 46 in. respectively, dress coat chest measurement.

When ordering be sure to state sizes desired.

WATERPROOF HORSE COVERS, OVER HAME

No. 5035—Heavy black oiled drill, fancy plaid fleece lined, with hood and body in one piece, reinforced at buckle strap and head, with line pockets and trace straps, for express or buggy, w't per doz. 61 lbs., per doz. **CPHJ** $61.30

SPARK PLUGS.

Mezger Sootproof.

No. 5237—½ in., Mezger porcelain plug, each ..... EJ $0.80
No. 5238—⅜ in., 18 thread, Mezger porcelain plug, each ..... EJ $0.85
No 5239—Metric ..... each EJ .80
No. 5240—Sootproof porcelain, extra, each ..... BE $0.40

Standard for country over and un[illegible]

RIVERSIDE.

No. 5246 RIVERSIDE—Porcelain, ½ in., standard..... each JEE $0.90
No. 5247 RIVERSIDE—Porcelain, ⅜ in., 18 thread, A. L. A. M..... each JEE $0.90
No. 5248—Porcelains for RIVERSIDE spark plugs, extra..... each BJ $0.30

The name RIVERSIDE stands for the best of everything in spark plugs; genuine imported porcelains. They will stand the heat of any high tension magneto. RIVERSIDE plugs are guaranteed to give satisfaction.

No. 5245-A RIVERSIDE—Special for Ford cars, ½ in., porcelain, w't each 4 oz., each ..... EE $0.90

This plug is the same size and model as No. 5246 RIVERSIDE, except that it has a long hexagon steel shell, permitting easy access to it with a wrench when plug is used in a deep-seated valve cage as is the case on Ford cars

ONE IN A BOX.

No. 5249—Cruso, porcelain, ½ in., standard..... each CE $0.60
No. 5250—Cruso, porcelain, ⅜ in., 18 thread, A. L. A. M.... each CE $0.60
No. 5250-A—Cruso..... each BJ .30

SPARK PLUG PORCELAINS.

Red Head.

No. 5251—½ in. porcelain, each EJ $0.80
No. 5252—⅜ in., 18 thread, porcelain, each ..... EJ $0.80
No. 5253—Metric porcelain, each ..... EJ .80
No. 5254 Porcelains, extra, each ..... CE .60

The Red Head is one of the best known and most popular plugs on the market, due to its simple, but effective construction.

"V-RAY."

No. 5292—½ in. ..... each JGJ $1.30
No. 5293—⅜ in., 18 thread, each ..... JGJ 1.30
No. 5294—Metric..... each JGJ 1.20

The "V-Ray," with its penetration of electrodes, delivers the spark to the gas-area. Other plugs await the belated delivery of the gas to the spark-area in cylinder-wall.

The "V-Ray" has the only self-cleaning device yet devised in plugs

The "V Ray" is the ideal "cold-weather plug" once over cranks your car or engine.

The "V-Ray" terminal cap fits every known terminal

The "V-Ray" won't soot or miss. The porcelain is too far away to permit the splashing of oil; the Phoenix alloy electrodes can't corrode from heat.

Every part unqualifiedly guaranteed for life. This includes porcelain and metal.

KINGSTON MICA.

No. 5300—½ in. ..... each EJ $0.80
No. 5301—⅜ in., 18 thread, each ..... EJ [illegible]
No. 5303—Metric, motorcycle special, each ..... EJ $0.80

These plugs are made from mica of best obtainable grade and are recognized as the standard of all mica plugs.

Reliance, "Sparks in Water," Porcelain.

No. 5255—½ in., standard, each ..... JIJ $1.30
No. 5256—Metric..... each JIJ 1.30
No. 5257—⅜ in., 18 thread, A. L. A. M., each ..... JIJ $1.30

Do not have to be removed from the cylinder, as they positively require no cleaning, are adapted for use in both air and water cooled motors.

Bougie Mercedes.

No. 5276—½ in..... each AAJ $1.80
No. 5277—⅜ in., 18 thread, each ..... AAJ 1.80
No. 5278—Metric..... each AAJ 1.80
No. 5279—Motorcycle.. each AJJ 1.70

Made of unbreakable stone, which being pressed and baked at a temperature of over two thousand degrees, will withstand the highest temperature without cracking.

"PIRATE."

No 5305 ½ in., w't 2 oz., each ..... BE $0.44
No. 5306 ⅜ in., 18 thread, w't 2 oz., each ..... BE $0.44

ONE IN A CARDBOARD CARTON.

No. 5266—Rajah, ½ in., porcelain, each ..... JIJ $1.50
No. 5267—Rajah, ⅜ in., 18 thread, porcelain..... each JIJ $1.50
No. 5268—Rajah, metric, porcelain, each ..... JIJ 1.50
No. 5269—Porcelains, extra, each ..... DE .76
No. 5270—Gaskets for Rajah porcelains, extra ..... each JB $0.03
No. 5271—Rajah Terminals, extra, each ..... JG .12

This plug is simple in construction, easy to repair or replace porcelain, and is thoroughly mechanical in every respect. Insulation—Highest grade imported hard fire porcelain of special pattern, securely packed, which insures against firing through. The new clip terminal does away entirely with the necessity for either thumb screw, nut or other device for attaching or securing wire or cable to spark plug.

Splitdorf.

No. 5272—½ in., standard, each ..... JGE $1.20
No 5273—⅜ in., A. L. A. M., each ..... JI 1.50
No. 5274—Metric..... each JIJ 1.50
No. 5275—Motor Cycle Metric, each ..... JIJ 1.50

Splitdorf common sense plug, taper pin wound with sheet mica, covered with mica washers drawn tight under pressure, impossible to become leaky, firing chamber, soot and oil proof sparking [illegible]

SPARK PLUGS AND CARBURETORS.

CHAMPION REGULAR PLUGS.

Highest Quality Porcelain Center Wire Baked in, No Chance for Leakage, Nickel Points Cannot Corrode, Oxidize or Carbonize.

No. 5284—1 in. ..... each EJ $0.84
No. 5285—A. L. A. M. ..... each EJ .84
No. 5286—Metric ..... each EJ .84
No. 5287—Porcelains only, each ..... CE .50

These plugs are not only one of the oldest makes on the market, but are one of the best. Will be used on regular equipment on 60% of the 1915 automobiles. Plugs guaranteed against imperfections in material or construction.

ONE IN A CARTON.

CHAMPION X PLUGS.

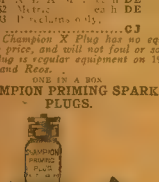
Best Grade Porcelain, Separable Core, Gasket Construction, Similar to Regular Champion.

No. 5280—1 in. ..... each DE $0.74
No. 5281—A. L. A. M. ..... each DE .74
No. 5282—Metric ..... each DE .74
No. 5283—Porcelains only, each ..... CJ .50

The Champion X Plug has no equal for the price, and will not foul or soot. This plug is regular equipment on 1915 Fords and Reos.

ONE IN A BOX.

CHAMPION PRIMING SPARK PLUGS.



No. 5310—1 in., with each ..... JHJ $1.30

This plug is particularly adapted to Ford cars.

Starts any motor any time on one-quarter turn.

ONE IN A BOX.

SPARK PLUG BUSHINGS.

No. 5352—Threaded with metric thread inside, standard ½ in. outside, each ..... JG .50

For repairing stripped spark plug holes.

SPARK PLUG BRUSHES.

No. 5354—Presco, wire bristles, hair tuft, 2 tempered thin flat steels, per dozen ..... AHJ $3.00

CARBURETORS.

Schebler, Model "D" Standard for Automobiles, Marine and Stationary Engines.

No. 5426—1 in. pipe size, each ..... JIFJ $16.00
No. 5427—1¼ in. pipe size, each ..... AJBJ $17.00
No. 5428—1½ in. pipe size, each ..... ACBJ $22.00
No. 5429—2 in. pipe size, each ..... BFDJ $4.00

Model "H" for Motorcycles.

No. 5430—¾ in pipe size, each ..... JIJJ $15.00
No. 5431—1 in pipe size, each ..... JIFJ 16.00

Schebler, Model "L" Water Jacketed Feed Automatically Controlled Finer Adjustments.

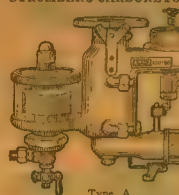
No. 5432—1 in. iron pipe size, each ..... AJHJ $18.00
No. 5433—1¼ in. iron pipe size, each ..... ABJJ $20.00
No. 5434—1½ in. iron pipe size, each ..... AEJJ 25.00
No. 5435—1¾ in. iron pipe size, each ..... AHJJ $30.00

The Model "L" carburetor has several new features. The air valve is interchangeable so that air can be drawn from either top or bottom.

The amount of fuel entering the mixing chamber is controlled automatically by means of a needle valve, directly connected to a roller operating on a cam spring adjustable to different angles by means of the cam spring adjusters. A standard throttle is used with this carburetor.

The carburetor is supplied with a water jacket on the throttle, and this with the main body is connected up with hot water connections from the exhaust.

STROMBERG CARBURETORS.



Type A.
Stromberg.

First—See that level of gasoline is opposite line on carburetors, if too high, turn nut down, if too low, turn nut up. This is set right at factory.

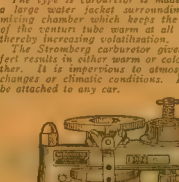
Second—Turn this nut up or down until you have a perfect mixture on low speed.

Third—If you have too much gas on high speed, turn this nut down, if not enough, turn it up.

No. 5450—1 in. ..... each AEGE $26.24
No. 5451—1¼ in. ..... each AHJJ 30.00
No. 5452—1½ in. ..... each BBJE 37.50
No. 5453—2 in. ..... each CFJJ 60.00

The type A carburetor is made with a large water jacket surrounding the mixing chamber which keeps the walls of the venturi tube warm at all times, thereby increasing volatilization.

The Stromberg carburetor gives perfect results in either warm or cold weather. It is impervious to atmospheric changes or climatic conditions. It can be attached to any car.



Type B.

No. 5454—1 in. ..... each AECJ $25.50
No. 5455—1¼ in. ..... each AGAJ 28.50
No. 5456—1½ in. ..... each BJGJ 34.50
No. 5457—1¾ in. ..... each BEBJ 42.00

The type B carburetor is made for use on motorcycles, motor boats, and other engines which are water cooled or that have the thermo syphon cooling system. The type B has the independent low and high speed adjustments the same as type A and will develop the same power and speed. It can be attached to any car.

IMPORTANT.

All Stromberg carburetors are sold without fittings. Fittings extra. In ordering, state name and model of car, size and style carburetor wanted, with [illegible]. Prices on fittings [illegible]

PORTABLE ACETYLENE LIGHTS

MILBURN

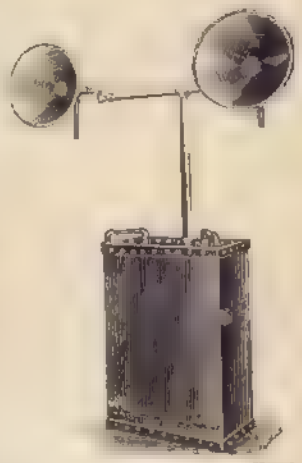
Absolute Simplicity, No Pumps, Globes or Moving Parts, Lights Instantly. Requires no Attention During Use.

The apparatus mainly comprises three parts, an outer tank holding water and an inner receptacle holding the carbide, and a burner stand pipe.

The lights are small and compact in size, being less than half the weight of oil lights of equal power. The light is made by water and carbide, burns more than half air and requires not the slightest attention during use

Can be instantly recharged by having an extra cylinder filled ready for use.

Smokeless, incandescent, absolutely storm-proof, unaffected by vibration, wind or weather. Flame can be regulated from the maximum light to a needle point.



Each

No. 2—Compaction, 10x10x30 in. Tank, 5 ft. High Over All, 12 in. Non-Tarnishing Parabolic Reflector, with Separate Steel Backing which Makes it Practically Indestructible, Absolutely Storm-Proof Burner, Gives a Light of 5,000 Candle Power, Lights 1,000 Feet, Weight Each Empty 50 Lbs., Complete with Extra Cylinder $62.00

Very useful for builders, contractors, railroads, mines and circuses.

Weight Each 75 Pounds.

Each

No. 4Z—Twin, 12x24x36 in. Tank, 6 ft. High Over All, Two 15 in. Non-Tarnishing Parabolic Reflectors, with Separate Steel Backings which Makes it Practically Indestructible, Absolutely Storm-Proof Burners, Gives a Light of 20,000 Candle Power, Lights 3,000 Feet, Weight Each Empty 160 Lbs., with Twin Cylinders..... $114.00

The reflectors swivel in any direction, making the light the farthest reaching and most powerful ever made for contractors.

Weight Each 223 Pounds.

BRATTICE CLOTH

Style A Waterproof

This is the original Rubbertex brattice cloth, and is available ... mines using open lights and having a minimum of dangerous gases ...

The Rubbertex process renders the raw fabric impervious to water; it protects ... from rot, ... makes it acid, oil, dust and slime proof; it increases the tensile strength of the raw material at least 25 per cent and its wearing qualities 100 per cent.

Practical mining men, who have tested this brattice cloth, are unanimous in the opinion that it is superior to any article of the kind heretofore produced.

Style A Brattice Cloth ... per square yard, $.

*Style B Fireproof

This style is recommended for use ... mines where there ... constant danger of explosions and where protection is desired against the ... carrying fire after being blown from a shot. Other elements have been sacrificed at the expense ... proofing and ... lately fireproof cloth.

The most severe tests to which it has been subjected prove that the ... on feature has been brought to a state of perfection ... heretofore ...

Style B Brattice Cloth ... .per square yard, $. .

Non-Inflammable

Non-Inflammable is a ... paper cloth than Styles A or B and is very durable..... ... per square yard, $

Brattice Cloth is put up in pieces of 50 lineal yards, and in 36, 48, 60 and 72 inch widths.

*Not carried in stock, can be shipped promptly from factory.

AUTOMOBILE CLOCKS AND SUNDRIES.

"MINOT" AUTO CLOCKS.

Cowlboard Type.

No. 5941—Black enamel, nickel rim, 8 day, rim wind and set, 2 in. silver dial, second hand, sets flush with dash, w't each 1 lb., each ..... **JGBJ** $12.00

No. 5942—3 in. silver dial, otherwise same as No. 5941, each **JGHJ** $13.00

Dashboard Offset Type.

No. 5940—Black enamel, nickel rim, 8 day, rim wind and set, 2 in. silver dial, second hand, w't each 1 lb., each ..... **JGBJ** $12.00

The movement in Minot Auto Clocks has quick train, straight line escapement, is reinforced, perfect in workmanship and fully guaranteed. Set by releasing safety lever and turning rim.

In all Minot Clocks, the winding and setting parts are assembled in the movement and have no connection whatever with the case. This eliminates all chance of variation between movement and case affecting the winding and setting mechanism.

ONE IN A BOX COMPLETE WITH FITTINGS.

No. 5931—Dunaw, one day, case heavy brass with off-set, 1½ in. dial, diam. 2⅜ in., w't 12 oz. ....each **AHJ** $3.00

AUTO CLOCKS.

No. 5934—New Ormond, nickel plated or gun metal finish on brass, 3 in. porcelain dial, dust proof case, large distinct black numerals, runs 8 days with one winding, diam. 4 in., w't 2 lbs. .....each **BAJ** $8.50

MIRRORSCOPES.

No. 6171—Argos, special plate glass mirror bound in brass, it has a ball and socket joint so that it may be moved in any position, so that the driver can see to the rear, each **BAJ** $3.50

Finished in black enamel only.

BRACKETS FOR LIGHT WEIGHT CARS.

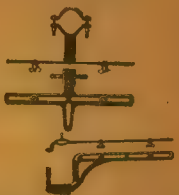
License, Stamped Steel, Black Enameled, Light Weight. Front License Bracket.

No. 5987—Attaches to headlight bracket on Ford cars when tag is not over 15 in. long .....each **CF** $0.60

Combination Rear Lamp and License Tag Holders for Light Weight Cars.

No. 5988—Interchangeable type, flat prop, made for tail pushbar do not have combination sockets and require flat prop.....each **CF** $1.00

NEVER OUT LICENSE BRACKETS.



No. 5981—Front, black enameled steel, each .....**DE** $0.76

Easily attached to radiator cap of car.

No. 5982—Rear, black enameled, each .....**DE** $0.76

Quickly attached to any standard lamp bracket, clinched quickly into a steady position that allows the tail light to fall freely on license number.

No. 5986—Never-out, attached to radiator cap, has large oval opening for attaching to cars having oval filler caps .....each **DE** $0.76

Rod License Brackets.

No. 5989—For attaching to any rod between headlights, single grip, can be used on curved or straight rods, each .....**CE** $0.60

ALUMINUM HEEL PLATES.

No. 6176—10½x6 in. ....each **JFJ** $1.00

These plates are to be fastened to the floor board directly back of the foot pedals, protecting the molding from wearing through. They are neat in appearance, and will save their cost in two times over in a single season's use.

STEWART MAGNETIC SPEEDOMETERS.

Stewart speedometers are undeniably superior to all others in construction, materials and design. Every possible device and refinement known to the speed of the shaft has been reduced 60 per cent—from 1,000 to 400 revolutions. The whole installation, from road wheel gear to the beautiful, one piece drawn brass case, will satisfy the most critical car owner. Clock combinations will be more popular than ever.

IMPORTANT FEATURES.

The Grade Indicator is an exclusive feature, and can be obtained with no other speedometer. The use of the grade indicator will teach the driver just what to expect from his car, telling him when to shift gears in climbing hills and in many other ways helps to get maximum efficiency out of the car.

The Odometer is a plain, hard bronze gear train, positively driven, each wheel positively locked into its proper position to eliminate all possibility of the dials skipping or failing to register the correct mileage—no subtraction required. A big, strong, worthy instrument that will run 10,000,000 miles and still be serviceable. The season odometer registers 100,000 miles and returns. The trip odometer registers 100 miles and can be reset at any time to any point of a mile.

The Stewart Drop Forged Swivel Joint is also an exclusive feature. Satisfactory service of speedometer and equipment will depend upon the swivel joint, which eliminates the need of short bends in the flexible shaft, and makes it independent of the road wheel when steering. The Stewart drop forged swivel joint will outwear any car to which it is attached.

The Flexible Shaft can be tied into a knot without breaking. The inner and outer walls are of special steel wire. The driving core is of steel links, one hooked into the other, the strongest and most durable flexible shaft supplied with any speedometer.

The Road Wheel Gear is of brass, cast steel, with milled teeth of broad profile, that will not cut the driving pinion. The gear is positively noiseless.

The Clocks used in Stewart combinations are the famous Seth Thomas, and are run wound and run set. To wind, you turn the rim. To set, you pull out and turn the rim. No key required. No taking off of the bezel to set the hands.

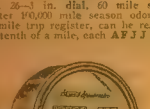
Every unit, every part of the instrument and equipment will bear the most critical analysis. No more suitable material can be purchased. No better workmanship is known. There is no better method of construction. No possibility of making an instrument more accurate or dependable for the purpose.

All Stewart Speedometers are finished in black and nickel.

Model 26—3 in. dial, 60 mile speedometer 100,000 mile season odometer, 100 mile trip register, can be reset to any tenth of a mile, each **AFJJ** $20.00

Speedometer with Grade Indicator.

Model B—Rotating dial, 4 in. dial, 60 mile speedometer, 100,000 mile season odometer, 100 mile trip register, grade indicator, no electric light, each ..... **DJJJ** $50.00



Three Inch Speedometer without Grade Indicator.

Model C—Rotating dial, 3 in. dial, 60 mile speedometer, 100,000 mile season odometer, 100 mile trip register, without grade indicator, each ..... **ABJJ** $25.00

Model C2—Rotating dial, 3 in. dial, 100 mile speedometer, 100,000 mile season odometer, 100 mile trip register with stem reset, each ..... **BAHE** $30.00

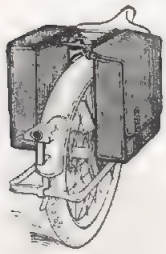
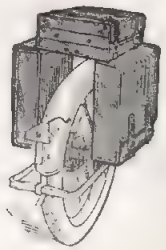
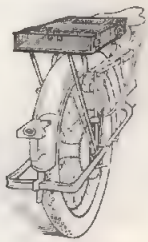
MOTORCYCLE PANNIERS AND CARRY-ALL



Panniers in Use
Fit all Motorcycles



Panniers and Carry-All
Fully Extended



Panniers Folded and
Packed in Carry-All

MOTORCYCLE PANNIERS

These pack bags or panniers are a great convenience when "trekking" with a motorcycle. By an ingenious arrangement of straps they can be attached to the carriers of all motorcycles. The bags are made of brown waterproof canvas 16 inches deep, 14 inches wide and 4 inches thick. The edges are bound and all straps are made of fatigo leather which will not become hard or crack. Two inside flaps, with a strap and buckle, are provided and the outside flap, inside of which is a large pocket, extends well over the pack. The attaching straps can be shifted in a lateral direction to provide for any variation in the style of the carrier, or supporting brace.

By the use of these panniers the weight of the duffle is brought well down, lowering the centre of gravity which tends to prevent skidding and the top of the carrier is left free for carrying additional luggage.

They may be used for innumerable purposes, by Tourists, Sportsmen, Salesmen, Messengers and Postmen on rural free delivery routes.

No **B10.** Motorcycle Panniers, Weight each 1¾ lbs. Each **$3 00** Per Pair **$6 00**

MOTORCYCLE CARRY-ALL

This Carry-All is attachable to the top of a Motorcycle luggage carrier and while of great capacity, it folds into a small space when not in use. It is 14 inches square and the extreme height is 7½ inches, but by an arrangement of welted seams and glove fasteners the height may be changed to 5 or 2½ inches or to the thickness of the material and still retain its neat, square appearance.

It is made of heavy brown waterproof canvas, and the corners and edges are strongly bound. There are two inside flaps with tapes to tie and the outside flap extends well over the pack when set at its extreme height or may be partly doubled back when a lower height is desired. There are two binding straps extending completely around the carry all and two straps and buckles conveniently arranged on the under side for attaching to the frame of the carrier.

The Carry All when used in connection with our Panniers makes an ideal touring outfit easily holding the contents of two 24 inch Suit Cases. When empty the two Panniers may be carried in the Carry-All occupying a space of 14 inches square by about 2½ inches high.

No **B15.** Motorcycle Carry All, Weight 1¾ lbs. . . . . Each **$3 50**

Delivery Prepaid in U. S. if Cash is Sent with Order at Above Prices

CAMP STOVES

Cooking by an open fire, while practical, has its drawbacks, especially in wet weather. A stove keeps the smoke out of your eyes, burns less wood and does better work than can be accomplished in any other way.

BOX STOVES

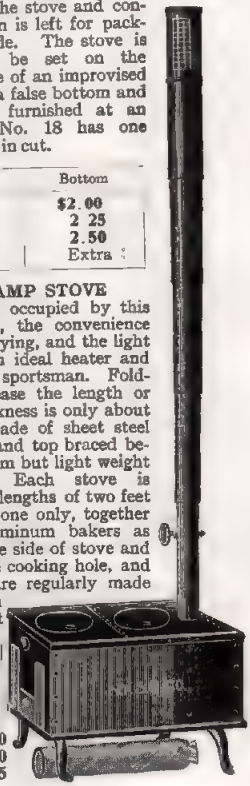
This stove is made of sheet steel, is light, durable and will burn green or dry wood. We furnish 10 feet of telescopic pipe and damper, which is carried in the stove and considerable room is left for packing other duffle. The stove is intended to be set on the ground, inside of an improvised sand box, or a false bottom and legs will be furnished at an extra cost. No. 18 has one cooking hole and No. 26 and 31 two holes as shown in cut.

No	Size, Inch	Weight	Stove	Bottom
18	10x12x18	14 lbs.	$4.50	$2.00
26	10x12x26	18 lbs.	5.00	2.25
31	10x12x31	20½ lbs.	5.50	2.50
B	Canvas Bag	1½ lbs.	1.00	Extra

Stove, Folded in Case

FOLDING CAMP STOVE

The small space occupied by this stove when folded, the convenience in packing and carrying, and the light weight makes it an ideal heater and cook stove for the sportsman. Folding does not increase the length or width and the thickness is only about one inch. It is made of sheet steel with wired edges, and top braced between holes and firm but light weight sheet steel lids. Each stove is supplied with five lengths of two feet each of telescopic pipe, occupying the room of one only, together with an adjustable spring damper. Our aluminum bakers as described on page 59 may be placed against the side of stove and will roast and bake perfectly. No. 18F has one cooking hole, and No. 26F and 31F two holes. These stoves are regularly made without a bottom, but we furnish a steel bottom with legs, as illustrated, if desired, at an extra cost



No.	Size Inch	Weight	Stove	Bottom
18F	10x12x18	15 lbs.	$5.00	$2.00

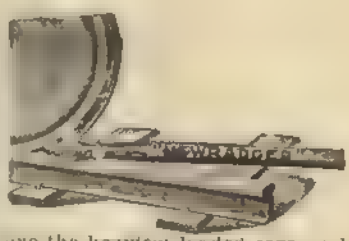
CAR MOVERS

NEW BADGER

Bottom View.



The "New Badger" is made "Slip-Proof" by Double Concave Never-Slip Spurs, which grip the very corners of the rail—where it is soft—and when pressure is brought to bear on the handle when moving a car they grip the rail firmly and the New Badger cannot slip even when the spurs are dulled by long wear.

Provided with a "Quick Acting" Compound Leverage that has push enough to move the heaviest loaded cars and on empty cars it is particularly fast in operation, owing to its lengthening cam action and its light weight.

The spurs are held in place by a new spur plate—one bolt to take out, and the spurs can be changed or new ones inserted if necessary, with the aid of a common wrench

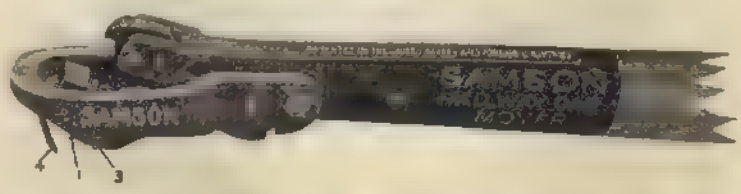
Each

New Badger—5½ ft. Long, Malleable Iron and Cast Steel Construction, Special Tool Steel Never-Slip Spurs, Large Selected Hard Maple Handle, Weight Each 17 Lbs. **$5.00**

Per Pair

Extra Never-Slip Spurs—Special Tool Steel..... **$0.25**

SAMSON



Each

Samson—5½ ft. Long, Compound Leverage, Annealed Malleable Iron Castings, One Refined Crucible Tool Steel Spur with Four Sharp Edges, Tool Steel Spring, Hard Maple Handle, Complete with One Extra Spur, Weight Each 15 Lbs..... **$5.00**

Extra Spurs—⅞ in. Square by 3 in. Long, for Samson Car Mover ..... .25

The leverage of this Mover being compound, as soon as pressure is brought to bear upon the handle the two points will come in contact with the car wheel at the proper rolling distance from the point where the wheel rests on the rail and in consequence the car wheel is immediately forced to turn instead of being lifted from the track as is the case with ordinary pinch bar.

IDEAL

Each

No. 800—5½ ft. Long, Refined Malleable Iron Castings, Mushet Steel Spurs, Hard Straight Maple Handle, Complete with One Extra Pair of Spurs, Weight Each 16 Lbs. **$5.00**

Per Pair

No. 5—Extra Spurs, Drawn Mushet Steel..... **$0.25**

The Ideal Car Mover is not only the most powerful mover ever designed for moving cars, but it moves a car 20 per cent further per stroke and has absolutely no lost motion..

It is of simple and durable construction, as it has but three elements, all assembled by tool steel hinge bolt.

Does not lift the wheel, but exerts all the great power of its compound leverage in pushing the car ahead. The top of the pushing knee and point of shoe both engage the wheel at proper rolling distance from where wheel rests on rail and force wheel to turn. There is no friction between the pushing knee and the wheel

SHELDON

Each

Sheldon—5½ ft. Long, Malleable Iron Lever and Shoe, Highest Grade Tool Steel Heel and Toe Plates, Interchangeable and Reversible, Weight Each 20 Lbs..... **$5.00**

The great advantage of this mover is in its compound leverage, which makes it easy for one man to move the heaviest car

TRACK LEVELS

Each

No. 10—6½ ft. Long, 5½x1¼ in. Made of White Pine with Three Coats of Paint, thus Overcoming the Tendency to Warp and Twist. Thoroughly Steel Bound. Sprit Glass Set in Top and Protected by Handle, without Insulation, Average Weight Each 9 Lbs. ..... $.

BOXING DUMMIES

No. 1

More exercise and fun can be had by using these dummies than any other form of gymnasium apparatus. No matter where the dummy is hit it will return to an upright position in readiness to be struck again.

It is very beneficial to the base ball or foot ball player, gymnast or any athlete, especially the boxer.

To get the best results when boxing the dummy, step away from and around it to strike it at different angles. This makes the exercise more interesting than striking it from one stand point only. To protect the knuckles use a pair ordinary gloves or a pair of striking bag gloves.

The dummy when detached from the base can be used as a lifesaver as it will support from three to five persons in the water.

This dummy consists of an inflated figure covered with heavy brown canvas, mounted on a hidden steel frame and fastened to a bowl shaped iron base, which can be removed by unbuckling the straps which hold the legs to the base.

BOXING DUMMIES

No. 1.	Men's size, 5 ft. 8 in.	$30.00

FEED CUTTERS

NO. 2

NONESUCH

Each

No. 2—Hard Wood Frame and Box, Natural Wood Finish, Varnished, Plated 13¾ in. Special Knife, Steel Circling Knife..... $5.50

A simple and durable machine. The device for adjusting the lever being removed from the pivot, enables us to have a stationary pivot firmly attached to the machine, and consequently not liable to get loose, as in other machines where the pivot is adjustable.

All parts are mortised together, making it rigid and strong, and not so easily tilted as many other makes.

Weight Each 58 Pounds

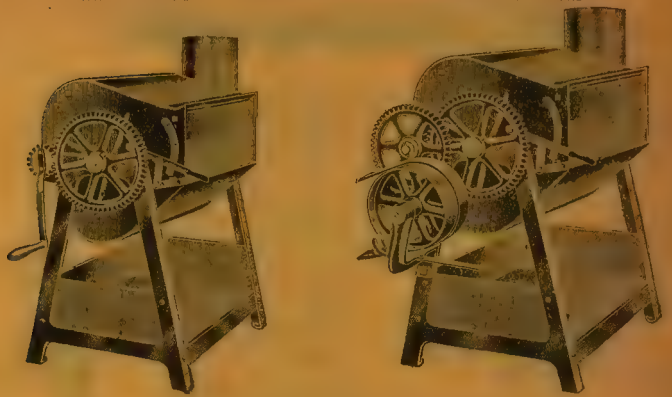
CONCRETE MACHINERY.

NORTHWESTERN TRIANGULAR MIXERS.

The Most Practical, Thorough, Rapid and Handiest Batch Mixers Made.

HAND MIXERS. POWER MIXERS.



Principle—Triangular type with automatic door, same as No. 1 Mixer on preceding page. In every turn of the drum, three complete mixings take place. The material is carried up well onto one side and then thrown in a shower over the contents in the bottom of the drum.

Time Required to Mix One Batch—From one to two minutes will thoroughly mix up a batch of concrete. The quality of the mix as well as the saving of time and labor will soon offset the cost of either machine.

Operation—The cement and sand or gravel is placed into the machine; the cover locked, and the machine revolved about fifteen times. This will require about one minute's time. The water is then turned on and the drum revolved until the mixture is of the proper moisture. The cover is then unlocked and the drum turned over once or twice which will thoroughly empty it. It is a good rule to continue mixing until an even color is obtained. In this way porosity is greatly reduced and the question of waterproofing in a measure is solved.

Cleaning—Any mixer should be washed out with water at the end of each day's work, else the concrete will stick and harden. With these mixers, water can easily be thrown in, and a few turns of the drum will thoroughly flush the interior.

HAND MIXER.

The hand mixer consists of frame, drum, gearing, water tank and wetting device. Length of drum, 30 inches; circumference, 34 inches, diameter, 26 inches; height over all, 4 ft., length over all, 4 ft.; capacity 4 to 5 cu. ft.; capacity of hopper bottom, two batches; speed, 15 revolutions per minute. Frames are heavy iron castings with steel hopper at the bottom to hold the mix after it is dumped from the drum. The drum is made entirely of steel and is triangular shape with rounded corners. The shell is made of 14 gauge cold rolled steel and fits into grooves in either drum head. The drum heads are made of heavy castings and grooved on the inside. The drum head and shell are held together by three rods running entire length of the drum which also serve as an elevating device to carry the material well up on the side before it drops. The left hand drum head has a cold rolled steel journal chilled to the center, which turns in a solid box on the frame and the gear wheels are fastened to this journal. The power is produced by a four-to-one set of gear wheels with a 30 inch sweep of the crank. The right drum head is a cast journal and is perforated to permit a pipe to run through it. The wetting device consists of water tank, which is fastened to a stand on the frame. Connected with this tank is a half inch pipe which runs through the journal and extends clear across the center of the inside drum head. This pipe is perforated and the water is regulated by a half inch globe valve. This method evenly distributes the water through the drum and evenness of moisture assured.

POWER MIXER.

The construction of this mixer is similar to the hand mixer but is larger and more powerful. Length of drum, 36 in.; circumference, 84 in.; diameter, 26 in.; height over all, 4 ft. 2 in.; length over all, 4 ft. 8 in.; capacity 5 to 6 cu. ft.; capacity of hopper bottom, two batches; speed 15 revolutions per minute. The frame, is made of heavy iron castings with steel hopper at the bottom. The power is transmitted through an iron pulley. It is also equipped with loose pulley for throwing off the power at any place for emptying. It requires about a 3 horse power engine to operate with full capacity. In ordering belt power mixers state what size pulley is wanted or the number of revolutions per minute of the engine and size of engine pulley.

No. 3—Hand power mixer, complete, w't each 425 lbs.★	..... each	**EFJJ** $ 93.35
No. 21—Belt power mixer, complete, w't each 600 lbs.★	..... each	**JFGBJ** 112.00

AND DOWAGIAC MINNOWS.

WEEDLESS UNDERWATER.

Two Spinners, One Belly Weedless Treble and One Tail Weedless Treble, Hollow Point Hook, W't 1 oz.

No. 6008—White body, dark shaded back, w't per doz. in carton 1½ lbs. ..per dozen **JFJJ** $11.50

No. 6001—Rainbow color, green back, red and yellow sides blending into white belly, w't per doz. in carton 1½ lbs. ..per dozen **JFIJ** $11.50

Identically the same high grade construction as the No. 1000 series, a wonderfully effective lure and fish getter.

SURFACE OR FLOATING.

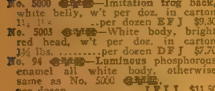
One Front Spinner 3½ in., ¾ oz. Body, One Belly and One Tail Large Treble Hook.

No. 5000—Imitation frog back, white belly, w't per doz. in carton 1½ lbs. ..per dozen **EFJ** $9.30

No. 5003—White body, bright red head, w't per doz. in carton 1½ lbs. .....per dozen **DFJ** $7.70

No. 94—Luminous phosphorous enamel all white body, otherwise same as No. 5000 **EFJ**, per dozen..... **JFIJ** $11.50

See No. 95 below.



No. 5004—1 oz. white body 4½ in. long with red head and collar, one belly and one tail large treble hooks, w't per doz. in carton 1¾ lbs. per dozer..... .....**DFJ** $7.70

No. 95—Luminous phosphorous enamel, otherwise same as No. 5004 . per dozen **JFIJ** $11.50

No 98—3 in., oz. body, weedless hooks, otherwise same as No 95 . per dozen **JFFJ** $11.00

It is that possesses the peculiar quality of asserting light, and reflecting the same in the dark. It emits a clear white light which is made more effective by the radiant power of the water.

The strong ripple created by the concave collar on these numbers attracts the fish from a great distance.

MUSKIE AND BASS CASTING.

Three Extra Strong Hollow Point Treble Hooks, Head and Tail Spinners, 3½ in., 1½ oz. Body.

No. M1000—Green cracked back, white belly, w't per doz. in carton 2 lbs. .....per dozen **JHCJ** $13.80

No. M1001—Rainbow, green back, red and yellow side blending into white belly, per dozen..... **JHCJ** $13.80

MUSKIE TROLLING.

Five Heavy Extra Strong, Hollow Point Treble Hooks, 5¼ in., 2½ oz. Body with Glass Eyes and Head and Tail Spinners.

No. M2001—Rainbow color, green back, red and yellow sides blending into white belly, w't per doz. in carton 3¾ lbs. . per dozen..... **AAEJ** $19.20

Highest grade material and workmanship throughout, extra strong in construction, perfect in shape and design.

COMBINATION.

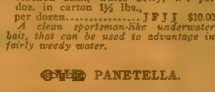
Combination Minnow and Buck Tail ½ oz. Bait, Buck Tail Tied on 2¼ in. Body Masks Large Tail Treble Hook, One Spinner.

No. 3006—Hexagon shape white body with red and green spotted decorations, red Buck Tail, w't per doz. in carton 1½ lbs., per dozen..... **JFJJ** $10.00

No. 3000—Round body, green cracked back, white belly, w't per doz. in carton 1½ lbs., per dozen..... **JFJJ** $10.00

A clean sportsman-like underwater bait, that can be used to advantage in fairly weedy water.

PANETELLA.



Two Spinners, Three Treble Hooks, 3½ in., ¾ oz. Body.

No. 7000—Green cracked back, white belly, w't per doz. in carton 1¼ lbs. .....per dozen **EFJ** $9.30

No. 7001—Rainbow color, green back, red and yellow sides, blending into white belly, w't per doz. 1¼ lbs. per dozen..... **EFJ** $9.30

The slender shape makes an attractive lure for the gamey ones.

PHYSICIANS' OR BATH ROOM SCALES.

No. 100 [illegible].

The [illegible] has no loose weights, all computing being done on the brass beams which are marked on both sides so that the weight may be noted from either side. The [illegible] can be furnished with or without the telescope measuring rod which is attached to the pillar by two nickel plated clamps with invisible joints.

The [illegible] has a single beam and loose weights, and is furnished only with the measuring rod. The materials used in this scale are a trifle lighter than the [illegible].

The [illegible] and [illegible] Physicians' and Bath Room Scales are [illegible] of the very best material throughout, and are finished in the most artistic and pleasing designs. Very highly adapted for the Hospital, Sanitarium, Office or Home. Especially useful in bathrooms to obtain true personal weight without clothing. This is in all cases desirable, and in many cases medically necessary. Individuals can readily note accurately and frequently any slight change in weight. They are guaranteed to be absolutely correct in every detail.

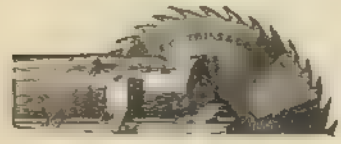
CIRCULAR SAWS

DISSTON'S

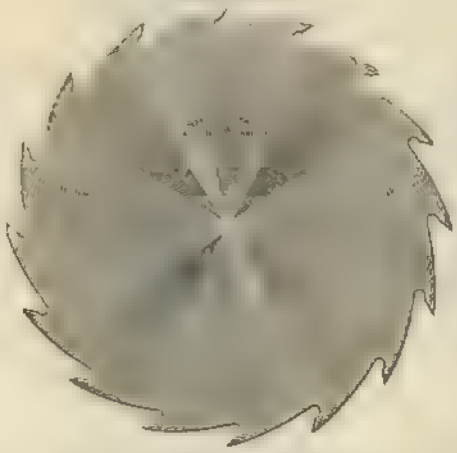


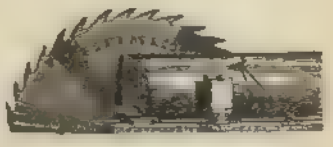
Right Hand Saw.

Hand of Saws

When in Use on Saw Mill.

Standing in front of a circular saw, with the saw revolving toward you, if the carriage upon which the log rests passes to the right of the saw, it is a right hand saw; if to the left, it is a left hand saw.





Left Hand Saw.

When Not in Use on Saw Mill.

Circular Saws 30 in. and smaller are made flat on both sides and are used as either right or left hand, saws larger than 30 in., when bevel ground, with the center thicker than the outer edge on one side and perfectly flat on the other, are "handed"; place the saw in front of you with the teeth running toward you, the flat side of saw names the "hand."

Solid Tooth, Patent Ground and Tempered, Extra Quality.

Note—When Ordering, be particular to state whether Rip or Cross Cut is wanted and Diameter of Saw in Inches

34	9	1⅝	27.00	1.50	1.55						

Circular Saws of uneven diameters not listed, take price of next larger size listed.

Circular Saws for Bone, Horn and Ivory, add 50 per cent to above list.

No extra charge for Saws one gauge thicker than list

No extra charge for Saws one, two, or three gauges thinner than list; when more than three gauges thinner, add 5 per cent list for each gauge.

Circular Saws 48 in. and larger, thinner than 10 gauge, not warranted.

Circular Saws 42 in. or less in diameter beveled one gauge without extra charge; 44 in. or larger, beveled two gauges without extra charge.

Circular Saws hollow ground or concaved, add for each gauge hollow ground or concaved double the price listed for beveling.

WHEN ORDERING SPECIAL CIRCULAR SAWS, THE FOLLOWING DIRECTIONS SHOULD BE EXPLICITLY GIVEN:

Diameter, in Inches, Thickness or Gauge at Center, Thickness or Gauge at Rim, Right Hand or Left Hand (see engraving); Number of Teeth, Style of Teeth, Size of Mandrel Hole; Size of Pin Hole, Distance from Center to Center of Pin Holes; Greatest Feed at each Revolution in Inches, Kind of Timber to be Sawed, Number of Revolutions per minute.

When ordering Bolting Saws state whether Rip or Cross Cut.

The speed of Circular Saws is one of the most essential things to be observed. If speed is too high it cannot do good work, as it generates, becoming touchy and limber. Too slow a speed has its objections, but it is not attended with such ruinous effects.

KEROSENE OIL STOVES

"OPTIMUS" OIL STOVE

It is wickless and converts oil, rapidly, into gas, which burns with a transparent blue flame, and intense heat. There is no smell, no smoke and no deposit of soot upon the cooking utensils. A single charge of one quart will burn at full flame five hours and a quart of water will boil in three minutes. The height is 8 inches over all and the top or grate 8 inches.

No. **10.** 2½ in. Burner, weight 3 lbs... .....**$3.25**

"TRAVELING-OPTIMUS" STOVE

Constructed so that it can be taken apart and packed in a steel box. The oil tank is fitted with a hermetical stopper and a place is provided for carrying an extra supply of kerosene.

No. **1.** Size of box 8¾x8¼x1½ inches; weight complete about 4¼ lbs....**$4.75**

JEWELL YACHT STOVE—SINGLE OR DOUBLE BURNER

The heat drum distributes the heat to both disc and grate making only one stove necessary or two stoves may be used by removing drum. Size of top 20x10 ins. with brass rail.

No. **30.** One stove, with disc and grate . . . . . **$ 9 00**
No. **32.** Two stoves, with two grates..... . . . . **12 00**

STARK KETTLE HOLDER

This pot or kettle hanger is a great convenience when cooking out of doors. It can be quickly adjusted so the kettle can be hung at any desired height from the fire.

The large hook at top, which is intended to hang from a crane, will support the weight of an ordinary 8-quart kettle and it is only necessary to use the connecting link when a heavier weight is to be suspended.

No. **63.** Weight, 2 ounces.....**$ .15**

SPECIAL "TWO-MAN" ALUMINUM COOKING OUTFIT

These outfits are of excellent quality, nest very closely, and are priced especially low on account of a favorable purchase from a firm whose business was disrupted by the war. Into the largest cooking pot, which is fitted with a leather carrying strap, may be nested the 21 separate utensils, making 25 pieces in all.

3 Cooking Pots,	1 Soup Ladle,	1 Tea Ball,	2 Forks,
1 Tea Kettle,	1 Frying Pan,	1 Alohol Stove,	2 Spoons,
1 Chain Bail,	2 Plates,	2 Plates,	3 Screw Top
1 Coffee Strainer,	2 Cups,	2 Knives,	Containers

No. **G2.** Two man Set, 8x8 in. Wgt. 4¼ lbs 25 pieces,.....**$6.95**
No. **G1.** One-man Set, 8x5½ in. Wgt. 2¾ lbs. 21 pieces,..... **5.00**
No. **GB.** Canvas carrying Bag for Either size .... **.50**

"PALACE" SODA FOUNTAINS

ACCESSORY SODA FOUNTAIN OUTFIT.

For those customers wishing to obtain accessories necessary to operate a fountain we recommend the following list

C2453—Contains everything necessary (except drum of gas) and nothing unnecessary. With this outfit in conjunction with any one of our fountains, one is able to serve soda 1 hour after arrival of shipment.

1 10 gal. soda Tank
1 charging outfit (gauge, regulator hose, wrench, rocker, wall bracket, washers & connections)
6 gal. ready made syrups (orange, vanilla, strawberry, lemon, pineapple and orange)
2½ gal. jar crushed fruit (pineapple and strawberry.)
1 in. phosphate acid
1 doz. 5 in spoons
1 " 8 " "
½ " silver plated soda holders
1 " 8 oz. Tumblers
1 doz. 12 oz. tumblers
1 " footed sherbets
1 box straws
1 onyx straw jar
1 " spoonholder
1 " pineapple bottle
1 " lemon extractor
1 " ice cream dishes
2 " enameled iron bodies

Complete outfit as above. **$44.00**

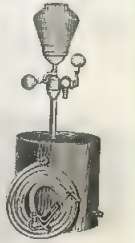
Note: Drum of gas can be obtained from dealers in almost every town of 3000 or more in the United States.

See following page for fruits, syrups, and all other every day fountain needs.

"MIRACLE" COOLER.

Intended for the merchant who wants to try out the Soda Fountain business at the lowest possible cost and in the smallest possible space. Can be placed under any convenient counter, draft arm standing above counter, providing an up-to-date clear-counter service. Will positively produce 36 40 from each gallon of syrup in 8c drinks (6 oz. glass), thus paying for itself in a short time. By using bottles for any desired number of syrups in connection with ice cream, any soda fountain drink can be served.

C2464—Fit over all 26 in., 12x19 in. round cooler box, galvanized iron, double shell, filled with 1 in. grass mat cork between inside and outside, including bottom, enamel painted and striped. **Patent mixing double draft arm,** handsomely mounted and nickel plated, 1 onyx and 1 hard rubber ball handle—through one faucet any specialty syrup is measured and mixed with a measured quantity of soda water; the other faucet delivers coarse or fine stream of plain soda. Contains 15 ft. block tin coil with fittings to draft arm, 5ft. block tin connecting pipe for use with steel tank of soda water, standard pressure gauge, clamp connection and clamp. Crated, 85 lbs. Each, **$25.00**



Miracle Cooler

GET INTO the AUTOMOBILE TIRE TUBE & ACCESSORY BUSINESS

Special Outfit

Special Selling Helps

You can break into the tire game with the K1 Tire Outfit listed below. Very little capital is needed, and you take NO RISK. Four of the tires are FORD SIZES, which are such quick sellers they are hard to keep in stock. The other fits the Overland, Buick and other cars. Take advantage of this offer and you'll be started in a business that pays big and quick returns.

The guarantee that proves quality —"PARAMOUNT" casings are guaranteed to give service up to 4000 miles under fair usage and all claims for insufficient mileage will be adjusted on a mileage basis, when casing on which claim is made is returned to us, freight or express charges prepaid, with full information as to name, model of car and weight. Of course, we will not allow claims on casings when rendered unserviceable through bottle cuts, rock cuts or being run flat.

Section of Bull Dog Grip Casing

This cut shows complete Display of Easel Tire, Picture and Sign as it will look in your window.

K1 —**"Paramount" Tire Selling Outfit** includes the following:

(a) Two 30x3 Smooth Tread Regular Clincher "Paramount" casings—adapted for Fords and other cars.

(b) Two 30x3½ Bull Dog Grip Regular Clincher "Paramount" casings—adapted for Fords and other cars.

(c) One 34x4 Bull Dog Grip, Q. D. Clincher "Paramount" casing—a staple size used on Overland, Buick and many other cars. Use this Tire for display purposes as illustrated at left.

ALSO THE FOLLOWING FREE SELLING HELPS

(a) One section of Bull Dog Grip casing to show construction. (Shown above.)

(b) One 14x21 Oak framed picture showing famous Bull Dog Grip trademark. (Shown at left.)

(c) One gilded steel display easel for displaying 34x4 casing, picture and sign. (Shown at left.)

(d) Fifty half tone folders from which you can sell full line of sizes and types. These folders show list (retail) selling prices. You can sell any size regardless of whether you have casing in stock or not. Ask about a moment's demonstration with Parcels Post.

(e) One Display Card—Gold on purple. (Shown at left.)

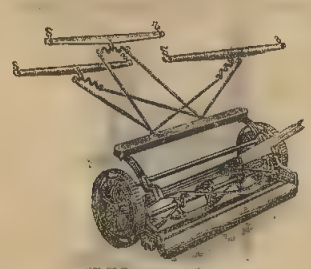
"DIAMOND EDGE IS A QUALITY PLEDGE"

PONY LAWN MOWERS

CRESTLAWN



The Construction of this Machine is Positively the very best on the Market and is as nearly perfect as can be made. The parts making the Frame are all Lathe Turned and the Cast End Plate is Machined into the Side Plates, Forming an Automatic Interlocking Adjustment which cannot be Jarred or Twisted out of Adjustment

Pony Mowers are often used by Hand Power and the Cut alone is particularly Good for this Purpose, as it has Ball Bearing Drive Wheels. This makes the Machine Easy Running and very Little Danger to operate, for many hand machines.

The Reel is made with Four Revolving Cutters and a Ball Bearing. The Ball Bearing Parts are Automatic in action and never need to be touched by the Operator. The Revolving Cutters are, therefore, held in position under all conditions and will give a Clean Shear Cut at all times.

The Steel Bed Knife is made with Raised Lip, which adds Strength and Rigidity.

All material is first grade and the very best that money can buy.

Drive Wheels 10½ inches high. Diameter of Reel 6 inches. Reel Axle ¾ inch. Adjustable to cut grass to lengths of ¼ to 1½ inch. Cuts grass standing 7 inches high.

Handle and Roller of Hard Wood Maple, thoroughly Seasoned and Painted.

Horse Attachment

Each Mower is equipped with our Patented Horse Attachment. This can be Adjusted Quickly and in such a manner that no connection to the Mower is held to the ground and the disagreeable "tripping up" of the rear of the Mower is impossible. The shafts on the Mower is just the same when operated by either horse or hand. With our Attachment the horse can walk in the middle, front or to either side of the Mower and yet maintain a correct draft on all cases.

Each

No. 6732—Width of Cut 30 inches, Extreme Width 37 inches, Weight, boxed, 115 lbs. Beautifully Finished. Sold on an absolute guarantee to give satisfaction. $55.00

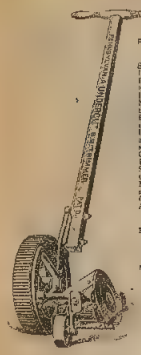
LAWN TRIMMERS



PENNSYLVANIA UNDER-CUT

The Machine as the One Sure to Successfully Replace the Use of Hand Shears. The Shearing Side Plate and Cutting Bar Make it Possible to Cut All the Grass Left by the Regular Side or Lawn Mower. The Unique Construction of the Under Cut Trimmer Permits Cutting Not Only Close up to a Wall, Fence or Trees, but Will Go Under a Fence or Rock or Base of Tombstones, House Foundations and Other Places Hitherto Out of Reach of Anything but Hand Shears. For Cemeteries it has the Special Advantages of Not Marking or Smudging the Tombstones as the Side Plate Does Not Come in Contact with the Stone Above the Grass Line.

PENNSYLVANIA

For Cutting Grass Left at the Edge of Lawns, Close up to Walls, Fences and around Trees, etc., after Mowing. Will Cut to Within ¾ Inch of Wall or Tree. Takes the Place of Grass Shears and Other Devices Employed for this Purpose

Painted Green and Red, Gold Stripes, Varnished Hardwood Handle.

Crucible Tool Steel Blades, Self Sharpening, Cast Iron Wheel and Side Plates. Malleable Reel Braces

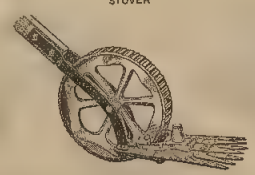
Each

No. PX—Drive Wheel 9 inches. Ball Bearing Cylinder with Four Tempered Crucible Steel Blades. Cuts 10 inch Cut. Shipping Weight Including Handle 32 lbs. Net Weight 23 lbs. Each, Including Handle $13 00

No. PLT—6 inch Cut, 4 Blades, Extreme Width 13½ inches, Weight Boxed 25 lbs. $8 50

One in a Box

STOVER



A perfect and Convenient Implement for Trimming Around Trees and Shrubbery and also Along Walls and Other Places that Cannot be Reached with the Lawn Mower. Does all the Cutting ahead of Drive Wheel and Cuts any Height Grass. Takes the Place of the Old Fashion, Hardworking, Unsatisfactory Hand Grass Shears, and when once used it and its Advantages are Understood it will be found an Indispensable Lawn Tool.

Per Dozen

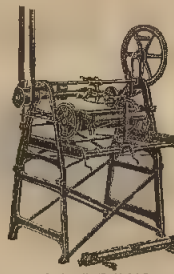
No. LT—Malleable Iron Wheels and Frame, Cast Steel Knives, Stained Hardwood Handle Bolted to Frame; Oil Holes to Keep Machine in Good Running Order; Neat and Attractive in Appearance, with Gold Bronzed Wheel and Curving Knives with Green Trimmings; Diameter of Wheels 7½ Inches; Width of Cut 6 Inches, Length of Knife Teeth 3½ Inches, Length of Handle 30 Inches; Weight per Dozen 75 lbs. $42 00

Third Dozen in a Carton. Handles Separate

LAWN MOWER GRINDERS

Suitable Also for Sharpening Skates, Small Tools, etc.

Largely Replacing the Slow and Indifferently Satisfactory Method of Sharpening Mowers with the Use of Emery or with Files; with these Machines the Work Can be Done in a Great Deal Less Time and with Much Less Labor and with Greater Accuracy and Uniformity



Cut shows No. 4B with Sub Base

IDEAL

Japanned Cast Angle Iron Frame, Full Steel Barrel Adjustable Carriage and Large Sprocket Wheel. **The Main Shaft and Grinding Wheel are Ball Bearing and Self Aligning.** The Carborundum Wheel is Mounted on a Ball Bearing Hub, which Moves Along the Shaft. The Arm is Pushed Along by a Screw Shaft and is also Constantly Moved by a Weight at the Back of the Machine furnished complete with a Skate Grinding Attachment, so that the Grinder can be used with Water and Suction.

The Carriage, which Holds the Mower, is Raised or Lowered by Means of a Cast Handle.

The Feed can be Stopped at any Point, being Thrown in and out by Means of a Trip Lever, which Throws the Feed Nut in Mesh with Screw Shaft.

Adjustable Supports Consisting of Adjusting Screws Make the Grinding Wheel Cc Equally at Both Ends of the Mower. They Allow the Wheels to Turn, which Prevents the Ratchets of the Wheels Interfering, and also Holds the Mower More Securely than the Method of Supporting the Mower on its Wheels.

Driving Shaft is 1¼ inches. **Grinding Wheel** is 5 inches in Diameter with ½ inch Face and is Driven by a 3-10 inch High Grade Bicycle Chain from Main Shaft. Length of Base 34 inches, Width of Base 8 inches, Height of Frame 30 inches, Height over All 37 inches.

For Mowers up to 24 inches Each

✣No. 2B—Hand, with Balance Wheel, with Sub-base 11 inches High, 24x18 inches at Base, on which the Regular Machine is Mounted, Weight 185 lbs. $70 00

✣No. 4B—Power, or it Tight and Loose Pulleys 4x1¾ inches, with Sub-base, 18 inches High, 34x18 inches at Base on which the Regular Machine is Mounted. Weight 260 lbs. 10 00

One in a Crate

LAWN MOWER PASTE

A Time Saver; Quick and Smooth Cutting Easily Used; Gives Satisfactory Results

Of the Right Consistency to Give the Best Results; its Use will be Found Far More Desirable than the Use of Powdered Emery and Oil.

✣ DIAMOND EDGE CARBORUNDUM

By Applying this Paste to the Edge of the Blade with a Brush and Revolving the Reel, a Sharp Cutting Edge can be Produced in a Few Moments. Per Dozen

No. DE35—Friction Top. Put Open Cans, 3½x3½ inches; Weight per Dozen 6 lbs. Loose $3 00

Items Marked ✣ Not Carried in Stock; Can Only be Furnished by Shipping Direct from Factory, Plymouth, Ohio.

"DIAMOND EDGE IS A QUALITY PLEDGE"

PENOBSCOT SNOWSHOES

Model "A" Model "B" Model "C" Model "E" Model "F"

These snowshoes are all hand made, the bows being split, not sawed, from the best white ash, smoothed and shaped by hand. They are intended for real service and while style and lightness are considered, quality is our first aim. Two styles of filling are used, No. 1 is by far the best and is guaranteed for a year. No. 2 is of good quality, being better than some merchants sell as best.

MEN'S SNOWSHOES

Penobscot Special. A graceful design, 1½ to 2 inch in. turn at toe, strong and excellent for general snow conditions.

No. **AS2.** 12 x 50 ins., medium filling **$5.00** No. **AL1.** 13x50 ins., best filling **$6.00**

Maine Trail. The strongest shoe made and popular with guides, lumbermen and trappers. Wider for its length than style "A" and with 1½-inch turn at toe.

No. **BS2.** 13x46 ins., medium filling **$5.00** No. **BL1.** 14x48 ins., best filling **$6.00**

Dunham Model. Made of the same high-grade material as above but with the width opposite the heel instead of the toe. Turn at toe 2 to 2½ inches.

No. **IS2.** 12x44 in., medium filling **$5.00** No. **IL1.** Best filling.....**$6.00**

LADIES' AND YOUTHS' SNOWSHOES

Lady Dunham. A light, graceful and strong shoe with long shapely turn at toe of about 2½ inches.

No. **CS2.** 11x40 ins., medium filling **$4.50** No. **CL1.** 12x42 ins., best filling **$5.50**

Penobscot Leader. In design it is like model "A" but of a size for light weight women, misses and youths.

No. **HS2.** 11x40 in., medium filling **$4 00** No. **HL1.** 12x42 ins., best filling **$5.00**

CHILDREN'S PENOBSCOT MODEL

This shoe is strongly made and of the same material as larger sizes. The filling is the medium quality and all are trimmed with colored tassels.

No. **ES2.** 9x30 inches.....**$3.00** No. **EL2.** 10x35 inches.....**$3.00**

"BEAR PAW" SNOWSHOES

A distinctive shape, particularly popular with mountain climbers, hunters and trappers. Toe is turned up about 1 inch.

MEN'S ADIRONDACK WHITE MOUNTAIN

No. **FM1.** 14x28 ins., best filling **$6.00** No. **SS2.** 13x26 ins., medium filling **$5.00**

SNOWSHOE FITTINGS

No. **85.** "Lampwick" Thongs.....Pair **$ .10** No. **87.** Leather Thongs.....Pair **$ .25**
No. **89.** Snowshoe binding or harness.. " **1.00** No. **90.** Extra quality, harness . " **1.50**

TINNERS' MACHINES

STOW'S PATENT IMPROVED ADJUSTABLE BAR FOLDERS

For No. 22 Iron and Lighter.

Nos.	62	63
Length, Inches	20¾	30
Will Form Closed and Open Locks, In.	⅛ to 1	⅛ to 1
Will Form Closed Locks to Receive Wire Up to, Inches	¼	¼
Weight Each, Lbs.	102	185
Each	$	

The gauge is adjustable and regulates the width of the fold by turning gauge wheel in front and center of machine; after gauge is set it is firmly held through lock screw with a wrench provided for the purpose.

WRIGHT'S IMPROVED SHEET IRON FOLDERS

For No. 22 Iron and Lighter

Nos.	*1	*0	12A	14
Length, Inches	30	42	30	42
Will Form Lock, In	¼ ⅜	¼ ⅝	¼ ⅜ ½ ⅝	¼ ⅜ ½ ⅝
Weight Each, Lbs.	85	135	90	140
Each	$			

*Note—Nos. 1 and 0 are not fitted with round steel rod attachment and are furnished without steel strips

These Folders will fold the edges of sheets formed in cylindrical shape. They will prove desirable machines for edging sheets while in the flat as well.

SHEET IRON FOLDERS

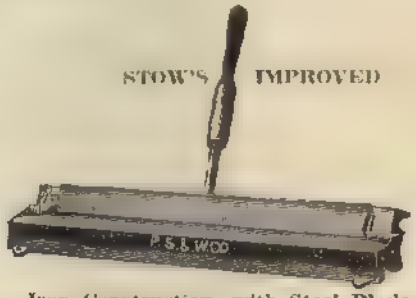
IRON BOTTOM

With Steel Blade.

Nos.	2B	3B
Length, Inches	30	41
For Iron Gauge, Nos.	22 & Lighter	24 & Lighter
Will Form Locks, Inches	⅝ to ⅝	⅛ to ¾
Weight Each, Lbs.	105	100
Each	$	

No. 3B has handle in center of machine. The most inexpensive practical and durable sheet iron folder manufactured. Intended for common ordinary use.

STOW'S IMPROVED



Iron Construction, with Steel Blade.

Nos.	10A	15
Length, Inches	30	42
For Iron Gauge, Nos.	22 & Lighter	24 & Lighter
Will Form Locks, Inches	⅛ to ½	⅛ to ½
Weight Each, Lbs.	85	107
Each	$	

These folders are fitted with machined steel bending blades and adjustable gauges

FORMING MACHINES PLAIN PATTERN

Grooves cut in rolls are intended to allow work with a wire to be formed; wire should only be formed between the grooves cut for that purpose

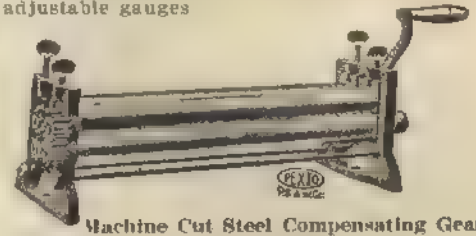
Cast Iron Gears.
For Stove and Tin Pipe.

Nos.	355	356	357	358
Length Rolls Inches	37	42	30	30
Diam. Rolls, Inches	2	2	2	1¾
Weight Each, Lbs.	170	180	140	120
Each	$			

For Tin Pipe.

Nos.	359	360	361
Length of Rolls, Inches	20½	16	12
Diam. of Rolls, Inches	1½	1½	1
Weight Each, Lbs.	60	50	30
Each	$		

The rolls are made from special rolled hard steel, finely finished, free from indentations and imperfections.



Machine Cut Steel Compensating Gears
For Stove and Tin Pipe.

Nos.	372	373	374
Length of Rolls, Inches	37	31	31
Diameter Rolls, Inches	2	2	1¾
Weight Each, Lbs.	165	140	120
Each	$		

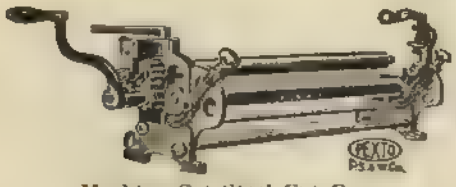
For Tin Pipe

Nos.	375	376
Length of Rolls, Inches	15	20½
Diameter of Rolls, Inches	1½	1½
Weight Each, Lbs.	50	60
Each	$	

Machine cut steel compensating gears run more smoothly than cast iron cogs without danger of slipping or breaking with whatever thickness of metal is used.

TINNERS' MACHINES

FORMING MACHINES



SLIP ROLL PATTERN

Machine Cut Steel Cut Gears.
For Stove and Tin Pipe.

Nos.	0381	381	382	383
Length Rolls, Inches	42	37	31	31
Diam. Rolls, Inches	2	2	2	1¾
Weight Each, Lbs	200	180	165	140
Each	$			

For Tin Pipe.

Nos.	384	385
Length Rolls, Inches	20	16
Diameter Rolls, Inches	1½	1½
Weight Each, Lbs	80	65
Each	$	

The grooves cut in rolls intended to allow work with a wire to be formed, wire should only be formed between the grooves cut for that purpose.

These machines are easily adjusted by means of a quick acting lever on each end in rear of machine and can be set for forming any desired size of cylinder.

Heavy, Back Geared.

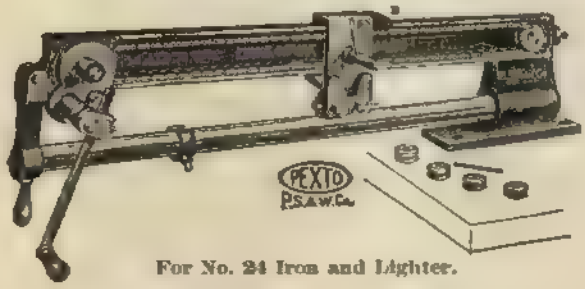
Nos.	399	400
Length Rolls, Inches	37	31
Diameter Rolls, Inches	2½	2½
Ratio of Gearing	2 to 1	2 to 1
Weight Each, Lbs	330	275
Each	$	

Note—Above machines can be fitted for power with tight pulley or tight and loose pulleys and furnished with iron floor legs when specified.

Substantially constructed with finely finished rolls made from special rolled hard steel. These machines are easily adjusted by means of quick acting levers on each end in rear of machine and can be set for forming any desired size of cylinder.

GROOVING MACHINES

IMPROVED AUTOMATIC RAPID



For No. 24 Iron and Lighter.
Reversible Lower Bar or Horn.

Each

No. 518—Will Groove Work 30 in. Long, with Five Grooving Rolls, One Each, 1/16, 1/8 and 1/16 in., and Two 1/8 in. and One Flattening Roll, Weight Each 200 Lbs. ..... $ .....

The traveling carriage has two rolls, one for grooving and one for flattening the seam at the same operation.

IMPROVED

For No. 22 Iron and Lighter.
Reversible Lower Bar or Horn.

Each

No. 504—Will Groove Work 22½ in. Long. Diameter of Smallest Pipe that can be Grooved 2 in., with Three Grooving Rolls, One Each, 1/8, 3/16 and 1/4 in., and One Flattening Roll, Weight Each 133 Lbs. ..... $ .....

No. 505—Will Groove Work 32 in. Long. Diameter of Smallest Pipe that can be Grooved 2 in., with Three Grooving Rolls, One Each, 3/16, 1/4 and 5/16 in. and One Flattening Roll, Weight Each 153 Lbs. ..... $ .....

An adjustable stop collar fitted on lower horn prevents work slipping while being grooved

GRANNIS PATENT

For No. 20 Iron and Lighter.
Reversible Grooving Horn.

Each

No. 514—Grooving Horn 41¾ in. Long. Will Groove Work 37 in. Long. Diameter of Smallest Pipe that Can be Grooved 2⅝ in. Ratio of Gearing 2 to 1 will Three Grooving Rolls One Each 1/16, 3/16 and 1/4 in. and One Flattening Roll, Weight Each 285 Lbs. ..... $ .....

An adjustable stop is provided on bar to prevent work from slipping while being grooved.

STOW'S PATENT BRASS MOUNTED

For No. 24 Iron and Lighter.

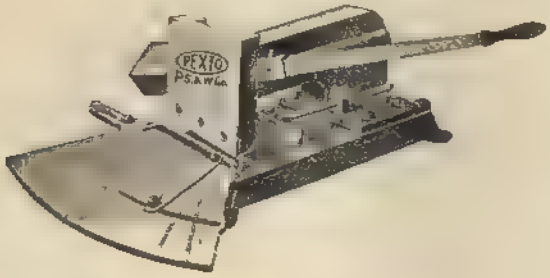
Each

No. 302—Will Groove Work 20 in. Long. Size of Grooving Horn, Large End 3 in., Small End 1⅝ in. with Three Grooving Rolls One Each, 1/16, 1/8 and 1/4 in. Weight Each 102 Lbs. ..... $ .....

Constructed with steel bar and milled horn, will be found serviceable for grooving the seams on tin cans, pails, boilers, etc.

TINNERS' TOOLS

COMBINED BENCH AND SLITTING SHEARS



Stationary Lower Blade, Adjustable Upper Blade, Removable Front Table, with Gauge.

Each

No. 248—For No 18 Iron and Lighter, 6½ in. Cutting Blade, 9½ in. from Cutting Head to Gauge, 10 in. from Cutting Head to Frame, 12x15½ in. Table, Weight Each 165 Lbs. . . . . $ . . . .

No. 249—For No. 16 Iron and Lighter, 9 in. Cutting Blade, 15 in from Cutting Head to Gauge, 16 in. from Cutting Head to Frame, 17x18 in. Table, Weight Each 490 Lbs. . . . . .

Will do the work of ordinary Bench Shears, over which they have the following advantages: the length of cut is longer to the same movement of the hand, the same pressure will cut thicker stock, and cut with the same ease at all points of the cut.

SLITTING SHEARS

For No. 16 Iron and Lighter.

Hardened and Tempered Special High Grade Forged Tool Steel Cutters. Adjustable Crank. Mounted on Heavy Cast Iron Legs

Each

No. 255—3⅛ in. Diameter Cutters, Depth Cutting Head to Frame 19 in., Depth Cutting Head to Gauge 18 in., 20x8 in Table, Weight Each 325 Lbs. . . . . $ . .

The tool steel cutters have two cutting edges, making them reversible, have adjustable bearings to take up the wear of the cutters, permits of rapid and easy slitting of iron used in cornice furnace blowpipe ventilation work etc.

LEVER SHEARS

For No. 10 Iron and Lighter.

Will Cut Iron Bars ⅜ in. Square and ¼x½ in., Adjustable Lower Blade, Reinforced Upper Blade.

Each

No. 296—8 in. Cutting Blade, 23 in Gauge Rod, Weight Each 130 Lbs. . . . . $ . . . . .

The blades are made of best material and are ground to a perfectly true cutting edge

The upper blade is fastened to a plate that is reinforced by the frame of machine making same very rigid and overcoming any spring in cutting Patterned to allow sheets to pass freely.

ECCENTRIC LEVER SLITTING SHEARS

Eccentric Lever.

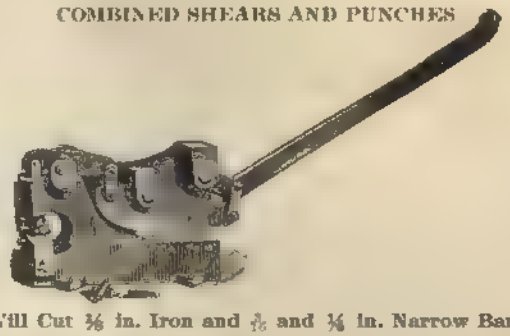
For Iron or Steel ⅛ in. and Lighter.

Each

No. 253 18 in. Long Over All Including Lever, 3½ in. Blade, 10½ in Bed, 6½ in. High, Weight Each 17 Lbs. . . . . $ . . . . .

So constructed as to cut sheet stock with the greatest of ease. Its eccentric cutting device requires very little effort to cut sheet metal up to the full rated capacity A handy machine for the shop and light enough to be easily carried to the job to be done outside.

COMBINED SHEARS AND PUNCHES



Will Cut ⅛ in. Iron and ⅛ and ¼ in. Narrow Bars.

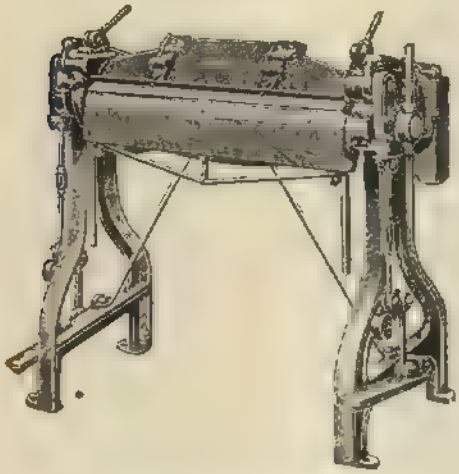
Each

No. 678—4¼ in. Cut, with One Combination Die and Four Punches, One Each, ⅛, 5/32, ¼ and ⅜ in., Will Punch ⅛ in. Iron and Lighter, Punching Cap 2⅝ in. Deep, Will Punch the Center of a Circle 5¼ in. in Diameter, Weight Each 100 Lbs. . . . . $ . .

No. 679—4⅝ in. Cut, with One Combination Die and Five Punches, One Each, ⅛, 5/32, ¼, ⅜ and ⅜ in., Will Punch ⅛ in Iron and Lighter, Punching Cap 2¾ in Deep, Will Punch the Center of a Circle 5½ in in Diameter, Weight Each 120 Lbs. . . . . .

TINNERS' TOOLS

HARE'S PATENT FOUR LEAF CORNICE BRAKES



For No. 20 Iron and Lighter.

Nos.	681	682
Length, Inches	37½	42½
Clamping Jaws, Open, Inches	1	1
Weight Each, Lbs	650	850
Each	$	

Furnished complete with one forcing bar and seven formers for making circular and semi-circular bends, viz., 3, 2½, 2, 1¾, 1½, 1¼ and 1 in. No. 682 has one weight on bending leaf.

Work can be formed on these machines which cannot be formed on any other machine or combination of machines. They are being used extensively by tinsmiths, sheet metal workers and art brass workers.

CORNICE BRAKES

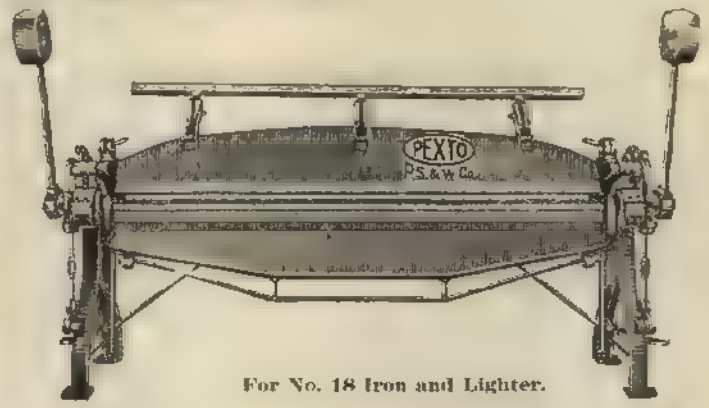
For No. 18 Iron and Lighter.

Nos.	1000	1001	1002	1003
Length, Inches	61	73	97	121
Weight Each, Lbs	750	800	1060	1005
Each	$			

For No. 14 Iron and Lighter.

Nos.	1009	1010	1011	1012
Length, Inches	36½	48½	97	121
Weight Each, Lbs	650	800	2000	3000
Each	$			

These brakes are of pressed steel construction and owing to their light weight they are handy to move around for outdoor construction work.



For No. 18 Iron and Lighter.

Nos.	683	684	685
Length, Inches	52	74	98
Clamp Jaws, Open, In.	1	2	2
Ap. Weight Each, Lbs	1070	2300	3650
Each	$		

Furnished with one forcing bar and seven formers for making circular or semi-circular bends, viz., 3, 2½, 2, 1¾, 1½, 1¼ and 1 in.

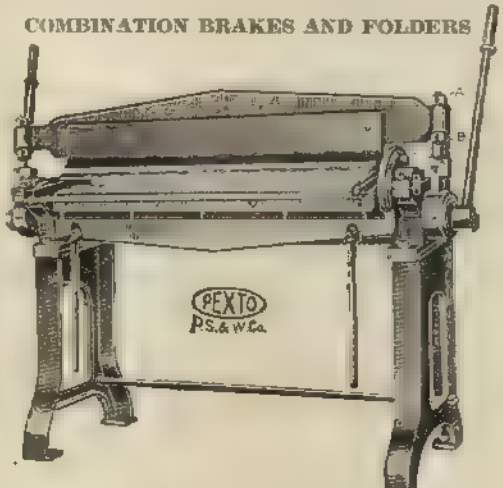
Note—No. 683 has one Weight on Bending Leaf; Nos. 684 and 685 have two.

These brakes will form long sections easily and quickly and are well adapted for heating, ventilating and cornice work for forming gutters, valleys, etc.

The bending leaf is properly balanced by weights and is provided with a forcing bar for bending heavy iron.

The parts subject to wear or strain are protected and strengthened in the most substantial manner. The journals have roller bearings reducing the friction to a minimum. The stop bracket on right hand end of brake can be quickly and easily adjusted to bend any angle wanted.

COMBINATION BRAKES AND FOLDERS



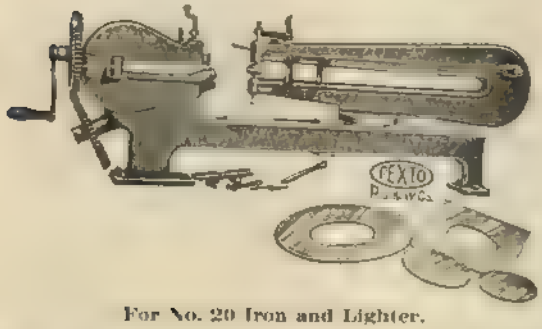
For No. 16 Iron and Lighter. Each

No. 93—42 in. Long, Clamping Jaws Open 1¾ in., Will Form Open or Closed Locks ⅛ to 1¾ in. in Width, ⅛ to 1¾ in. on No. 16 Iron, ☆ to ⅜ in. on No. 18 Iron, ¼ in. on No. 20 Iron, ☆ in. on No. 20 Iron and ⅛ in. on No. 24 Iron, Weight Each 450 Lbs. $

Furnished with seven formers for making circular and semi-circular bends in cornice work, etc., viz., 3, 2½, 2, 1¾, 1½, 1¼ and 1 in. When machine is used for 16 gauge iron two men are required to operate the machine with greater ease.

TINNERS' MACHINES

RING AND CIRCULAR SHEARS



For No. 20 Iron and Lighter.

Nos.	298	299
Diameter of Cutters Inches	1⅝	1⅝
Diam. of Clamping Discs, In.	2¼	2¼
Depth Cutting Head to Gauge, Inches	9⅛	9⅛
Depth Cutting Head to Frame, Inches	10	10
Depth Circle Arm, Inches	16¼	30½
Will Form Square Blanks, In.	3¼ to 22	3¼ to 42½
Weight Each, Lbs.	195	290
Each	$	

A very useful and efficient bench Ring and Circular Shears intended for cutting circles or internal rings and irregular curves. In circular cutting the blanks are clamped between rubber covered discs by means of a quick acting, eccentric, lever device adjustable for exerting extreme uniform pressure to prevent the work from slipping and insuring more acurate cutting. This method permits for the clamping and removing of blanks with greater rapidity than with old Crank Screw method. The bed on which the Tail Piece slides is graduated in inches and fractions of inches for quick setting of the Tail Piece for the size circle to be cut. The angular position of Cutters allows for as clean cutting on the inside as on the outside of circle

WAUGH'S IMPROVED CIRCULAR SHEAR.

For No. 22 Iron and Lighter.

Each

No. 278—2⅛ in. Diameter Cutters, 2 in. Diameter Rubber Covered Clamping Discs, Depth of Cutting Head to Gauge 9¼ in., Depth of Cutting Head to Frame 10¼ in., Depth of Circle Arm 16¼ in., Will Cut Circles from 2⅜ to 22 in Squares, with Polished Graduated Scale Weight Each 125 Lbs. ..... $.

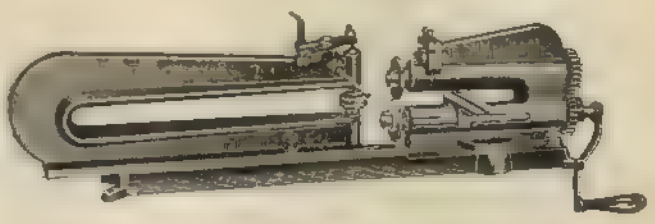
These Shears are widely known and have won an enviable reputation. They are most suitable for cutting outside circles, trimming or squaring tin plate, sheet iron, brass and copper.

A polished Graduated Scale is attached to the Bed for the purpose of securing quick and accurate adjustment of the Sliding Arm

They are fitted with Quick-Acting Eccentric Lever, which clamps material between Discs with great rapidity, and releases the blank instantly.

Rubber covered Discs which prevents the possible slipping of blanks is an exclusive Pexto feature.

WAUGH'S CIRCULAR SHEARS



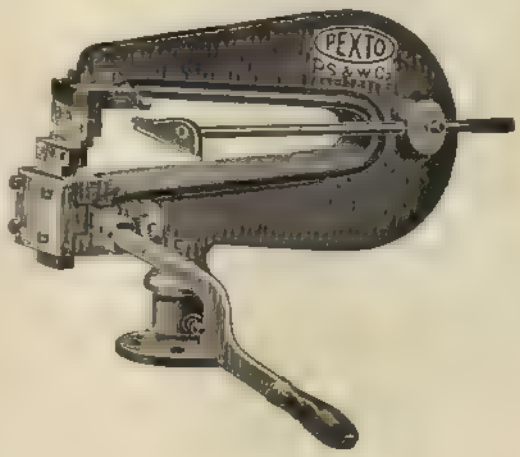
For No. 18 Iron and Lighter.

Each

No. 280—3½ in. Diameter Cutters, 2¾ in. Diameter Rubber Covered Clamping Discs, Depth of Cutting Head to Gauge 9¾ in., Depth of Cutting Head to Frame 10½ in., Depth of Circle Arm 22¼ in., Will Cut Circles from 3 to 31 in. Squares, with Graduated Scale, Weight Each 200 Lbs. ..... $ ....

A distinctive Circular Shears of unusual quality, of great strength and correct design, fitted with Quick Acting Eccentric Lever to clamp material between discs with great rapidity and releases the blank instantly. A graduated scale is attached to the bed for the purpose of securing quick and accurate adjustment of the Sliding Arm. The clamping discs are rubber covered which prevents any possible slipping of the blanks insuring more accurate cutting.

IMPROVED SCROLL SHEARS



For No. 20 Iron and Lighter.

Nos.	268	269
Length Cutting Blades Inches	4	4¼
Depth Cutting Head to Gauge, In.	10¾	17
Depth Cutting Head to Frame, In.	12	18¼
Weight Each, Lbs.	90	155
Each	$	

These Shears will cut Circles, Ovals, Ogees and all irregular shapes with the greatest ease. They are well adapted for cutting from the center of a sheet

Mounted in a Standard which screws to the bench and adjustable to any angle required is another Pexto feature

The length of cut is regulated by means of a Set Screw in frame back of lower Blade. To shorten cut, turn screw in; to lengthen cut, turn screw out.

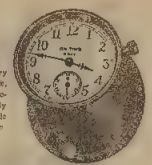
Upper Blade can be adjusted for wear by means of the two Rear Adjusting Screws

AUTOMOBILE CLOCKS

FULLY WARRANTED

SHAPLEIGH HARDWARE CO.

ON T ME



These Clocks are Made of the Best Grade of Materials and are Very Handsome in Appearance and Workmanship; Very strong and Durable, Built Especially to Withstand the Hard Usage and Vibration of Automobile Travel. Perfect in Construction and Good Time Keepers, Easily Attached to Dash by Three Wood Screws, and Contain every High Grade Thoroughly Tested Movements that are not Subject to Jar or Vibration

For Use on Straight Dash Board

	Each
No. 8N— [illegible] Case	$3 00
No. 8 [illegible] Nickel Rim	3 00

[illegible] Movement with Straight [illegible] Case, [illegible] Dash Bracket with Nickel [illegible] Silvered Dial with Black Figures, [illegible] Glass Crystal, Height 2¾ inches, Width 2¾ inches, Depth 1¾ inches. Weight per Clock 12 oz.

Note—The Movement is [illegible] Clock Runs Eight Days [illegible] Clock Movement [illegible]

	Each
No. 18N—Black Enamel with Nickel Rim	$3 50

[illegible] Movement with Concealed Outside Adjusting Screw [illegible] Bracket, Glass Bezel with Nickel Rim, Silvered Dial with Black Figures and 2 Screw Hands, Height 3½ inches, Width 2¾ inches, Heavy Plate Glass Crystal, Weight per Clock 20 ozs.

Note—The [illegible] Wind and Set to Wind Clock Turn Key, [illegible] to the Figure Six, to Set Time in Knob on Side of Clock and turn in either Direction, to Regulate, Pry off the Inner Bezel that holds the Glass in the Front [illegible] Pointer Counterclockwise to Regulate Slow; to the [illegible] under to direct

For Use on Cowl Dash Board

The Movement [illegible] Clock Runs Eight Days [illegible] Nickel Plated Case, [illegible] Having the Same High Grade Appearance and Special Construction except that it contains a 30 hour movement.

Each
No. 8N—Nickel Plated Case $5 50

Note—This Clock is the Same in Every Respect as the No. 8N, Having the Same High Grade Appearance and Special Construction except that it contains a 30 hour movement.

The Same Eight Day Movement is Used in This Clock as is used in the No. 18N, and has a [illegible] Dial with Black Figures, [illegible] Nickel Plated Case, [illegible] Glass Crystal [illegible] Clock [illegible]

Each
No. 8N—Nickel Plated Case $4 50

Note—A new Catch Holds the Movement Firmly in Position. This Catch is a Convenient Means of Detaching the Movement from the Case.

NEW ORMOND

Heavy Brass Case, Finished in Polished Brass, Nickel Plated or Black Enamel Finish with Fine Quick Beat 8 Day Time Movement, Jewel Bezel, Plate Glass Crystal, Solid White Porcelain Dial, Height 4 inches, Width 4 inches.

One in a Box Weight per Clock 15½ lbs.

JERICHO

[illegible] Brass Case, [illegible] Polished Brass, Nickel Plated or Black Enamel Finish with Fine Quick Beat 8 Day Movement, Jewel Bezel, Plate Glass Crystal, Solid White Porcelain Dial, Height 4¾ inches, Width 4¾ inches.

Adjusted Top, Japanned.

	Per Dozen
No. 00—Weight Each 1 Lb. 2 Oz.	$1 92
No. 0—Weight Each 2 Lb. 10 Oz.	4.20

One-half Dozen in a Box

HOLD FAST

High Carbon Hexagon Steel, Nickel Plated, Tempered Point, Complete with 7½ ft. Braided Linen Twine.

Nos.	14	16	18
Weight Each, Oz.	4	6	8
Per Dozen	$2.25	2.40	2.50

One in a Carton, Six Cartons in a Box.

BRASS

Cast Brass, Hardened Cast Steel Point, Screw Top.

Nos.	2	3
Weight Each, Oz.	6½	12
Per Dozen	$5 00	7.50

One-half Dozen in a Box.

STANLEY'S ADJUSTABLE

Bronze Metal, Polished, with Reel and Line.

Nos.	1-S	2-S
Length, Inches	3½	4
Weight Each, Lbs.	⅝	¾
Per Dozen	$18.00	21.00

A spring, which has its bearing on the end, will check and hold the bob firmly at any point on the line.

One in a Box.

STARRETT'S MERCURY

No. 87—Nickel Plated Knurled Steel Body, Filled with Mercury, Hardened Point, Complete with Braided Silk Line.

Weight Each, Oz.	3½	6	12	16
Length, Inches	4	5	5½	6
Diameter, Inches	½	⅝	⅞	1
Each	$1.75	1.75	2.25	2.75

Fitted with a patented device for fastening the string without a knot to tie or untie, simply by drawing it into the peculiarly slotted neck at the top, after unwinding the required length, when the bob will hang perfectly true.

One in a Box.

B. & S. MERCURY

No. 790—Nickel Plated Steel Body, Filled with Mercury or Quicksilver, Hardened Point, Complete with Braided Silk Line.

Weight Each, Oz.	3½	6	12	16
Length, Inches	4	4½	5⅜	6
Diameter, Inches	½	⅝	⅞	1
Each	$1.25	1.75	2.25	2.75

An important feature is the device for fastening the string without a knot, to any desired length. After unwinding the required length, the cord is inserted in a slot in a taper stud, and the knurled cap, which has a taper hole, is forced over it, thus making the bob hang true.

One in a Box.

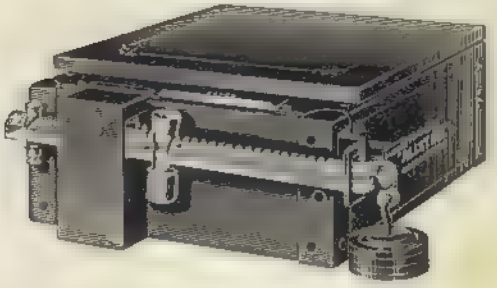
Where a mill is ordered without saw, be sure to give size of saw to be used; also speed of engine and size of drive pulley; also speed for which saw to be used is hammered.

Saw swage is furnished with all solid tooth saws ordered with mills, but not with inserted tooth.

*Not carried in stock; can be shipped promptly from factory.

PARCEL POST SCALE

TRINER'S



The "ALLSTEEL" 100 pounds capacity, Beam Platform Parcel Post Scale is made throughout of cold rolled steel, absolutely no castings used, and is dust proof and almost indestructible.

It is accurate, sensitive and compact. The beam is below the platform at an angle of 45 degrees, easily read, and makes it very convenient for the weigher, as no part of the scale projects above the platform, and any shape or size of package can be weighed with absolute accuracy.

The scale is furnished with a computing chart up to the 50 pound limit, which is independent of the weighing part of the scale and can be changed by anyone at a very small cost, should further changes take effect in parcel post rates.

It is handsomely enameled in black and decorated in gold. The brass beam and poises are highly polished and lacquered.

Triner's "ALLSTEEL" Parcel Post Scale Capacity 100 pounds. Specially designed for parcel post and adopted by the United States Government for equipping their entire parcel post service. Furnished with a computing chart up to the 50 pound limit ..... each, **$24.00**

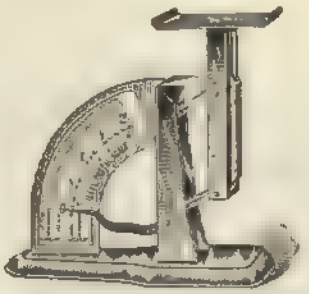
POSTAL SCALES

DISPATCH

An up-to-date scale for weighing packages for parcel post. Capacity, 20 pounds by ounces. Has computing chart, automatically giving amount of postage in different zones. Numbers of zones are printed in black; figures showing amount of postage are in red

Each **$4.00**

IDEAL



The **"Ideal"** Postal Scale is well suited for offices and stores. Weighs up to two pounds by one-half ounces for foreign postage.

Instantly indicates in plain figures the exact cost of postage in cents on all classes of mail matter to all possessions of the United States, Canada, Mexico, Cuba, etc.

Substantially built of the best cold rolled steel, and beautifully finished in black enamel, oxidized copper, or full nickel plate. Size, 6 inches high, 4 inches wide, 6½ inches deep. Weight boxed, 20 ounces

Each **$2.00**

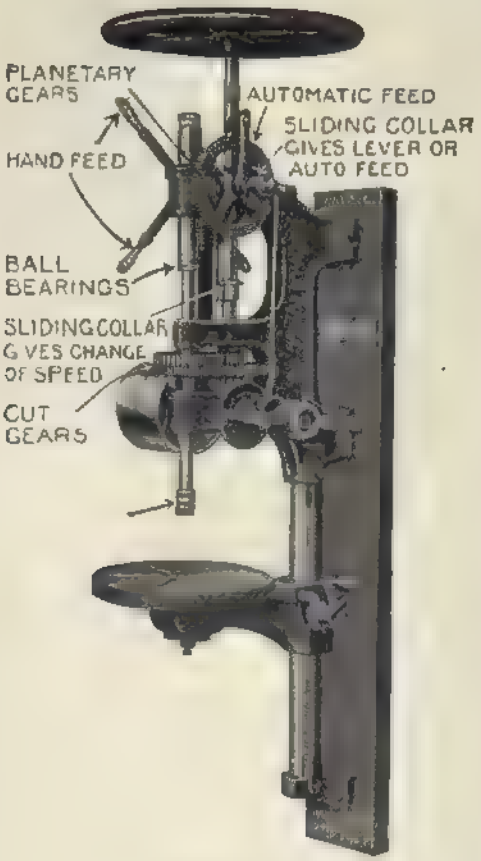
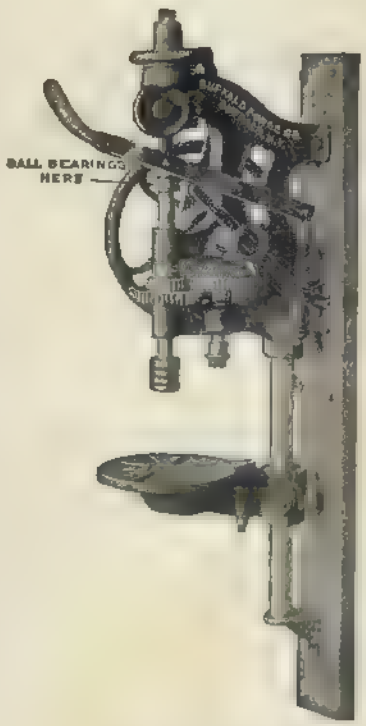
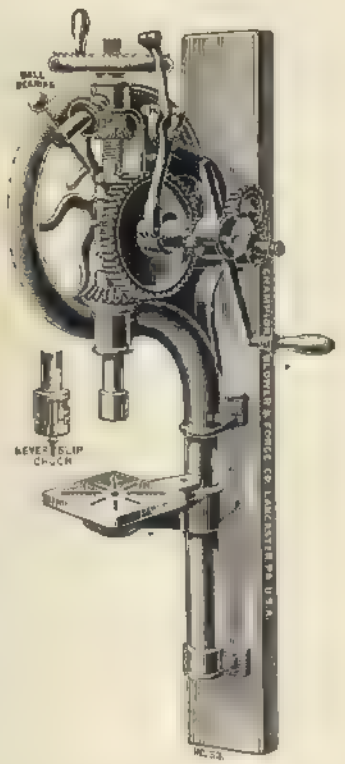
POST DRILLS



No. 91A Buffalo Ball Bearing



No. 96, 96A
Buffalo Ball Bearing



No. 4½
Champion Ball Bearing

No. 91A A Drill with every convenience characteristic of modern practice, yet of greatest simplicity

1. Every gear throughout the drill is machine cut.
2. Standard Buffalo Ball Bearings.
3. "Suregrip" Chuck.
4. Two speeds of spindle.
5. The Automatic Feed is adjustable to four speeds
6. "Quick Return" of spindle—no turning back of feed wheel after drilling
7. Change of Feed or Speed by Sliding Collar.
8. Table Rack: To raise or lower table, simply turn small crank
9. Wheel holder free with each drill

Specifications

Drills 1½ inch hole to center of 24 inch circle. Run of feed, 8 inches. Run of table 20 inches. Size of pulley, 8x3 inches. Spindle bored for ½ inch straight shank bits. Also furnished for ¾ inch or No. 2 taper, without extra charge. Weight 400 pounds. Height 72 inches.

No. 91A With tight and loose pulleys for power. . . . . each, $51.00

No. 96-96A Two feeds, automatic and lever, with full and instant return of drill spindle. Equipped with the "Buffalo Suregrip" Chuck, the chuck without a set screw—that does not require a wrench or other tool. Just insert the drill bit; a slight turn of chuck collar to the right or left locks it fast. A half turn of wheel changes feed from automatic to lever. This wheel is located at right of feed screw head and in line with the lever, convenient to operator. Less than a second is required to release the automatic feed, give lever control and instant full feed run return. Automatic feed is adjustable to three speeds, a few turns of screw, located on left side, back of feed screw head, gives the change.

Specifications

Drills 1½ inch hole to center of 18 inch circle. Run of feed 4½ inch. Run of table, 18 inches. Diameter of drill spindle, 1¼ inch. Takes ½ inch straight shank bits. (Also furnished for ¾ or ⅝ inch bits on special order.) Length over all 62 inches. Wheel holding attachment free.

		Each
No. 96	Without pulleys, weight each 220 pounds	$30.00
No. 96A	Tight and loose pulleys, with 8 inch diameter, weight each 245 pounds	34.00

IMPROVED CUTLERY SHOW CASES.

FLOOR DISPLAY CASES.

Our No. 900 show cases are made of selected white oak thoroughly hand made and of natural oak finish, highly hand polished, the top is ½ in. bevel French plate glass laid in plush on green felt cushions, selected of the strength that will fit and round glass sliding dust proof doors in the back that move on ball bearings and steel track.

The inside has 10 in. and 14 in. paneled oak shelves, the front edges of which are fitted with an oak lip extending ¾ in. above the shelf to prevent the goods from being pushed off the shelves, these shelves are supported by adjustable nickel plated brackets, cloth lined paneled bottom.

One of the most improvements in these cases are the steel strength metal joints, which means that the metal joints in our cases are reinforced with steel, making the weakest part the strongest—this is a most important point to be considered.

Made to set low odoan or set up and of standard measurements, 42 in. high, and 20 in. wide outside dimensions.

No. 900 5 ft. long, free of charge with $300.00 worth of cutlery, shipping w't 285 lbs., value of case★ $35.00

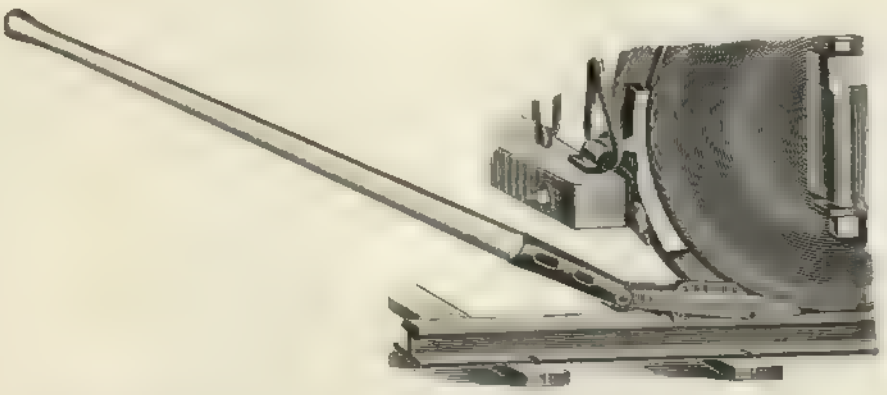
Per pound ..... $.

CAR MOVERS

THE ATLAS



This compound lever arrangement acts on the car wheel so far from its contact with the rail that the moving force is utilized to roll it forward, instead of wasted in an effort to raise it from the track.

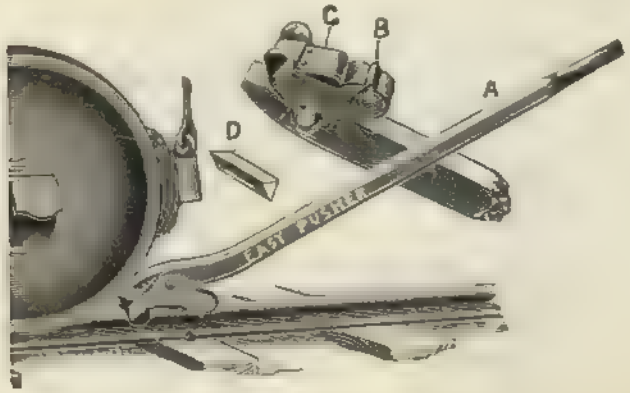
The metal parts are malleable iron and steel, and are guaranteed. The handle is of the best selected hard or sugar maple. It can be turned and all four corners used. One extra spur with each mover.

Will move a car farther at a stroke, and with less effort, than any other car mover. Gets under the lowest brakes.

Atlas Car Mover Fine tool steel spur, with extra spur, weight about 18 pounds.....each, $7.50

Extra spurs .....each. .35

THE EASY



The Easy is of best material. The bar is steel; the shoe malleable, the bit is the finest tool steel; also the spring.

The heel has lugs extending downward on both sides of the rail so as to hold it firmly in position and prevents its slipping sideways. The triangular bit or steel cuts into the rail when pressure is applied and prevents slipping backward even though the rail is icy, greasy or wet.

This bit can be inverted. Each one has three sharpened edges. When the pressure is released, the steel spring lifts the steel bit from the rail, thus preventing it from being dulled by sliding over the rail when following the wheel. Two triangular steels with each pusher.

The Easy 5½ feet long, weight 20 pounds, steel bit ..... each $7.50

Extra steel bits ..... each, .35

REACH FIELDERS' GLOVES

All mitts and gloves are made in rights and lefts. Lefts are regular and are used on the left hand by players who throw with the right hand. Rights are called full-right and are used on the right hand by players who throw with the left hand. Lefts will be sent except when specified that rights are desired.

"REACH SPECIAL" FIELDERS' GLOVES

These gloves were originated and designed many years ago and are now being used by all the professional players throughout the country. They have numerous advantages over the other models, but the principal one is in the formation of the deep pocket. This effect is gained by the arrangement of the padding on the inside of the glove and the little finger being made wider and more heavily padded, this leaves the outside surface smooth and insures a glove that will prove satisfactory in every way. They must he seen to be appreciated.

Only the highest quality of leather, felt and other materials used in their construction. They are made by the most skillful operators. Made in all sizes. Packed one in a box.

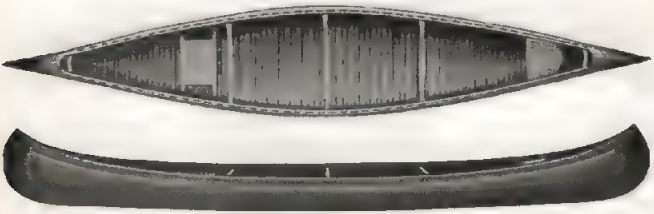
ROBINSON MODEL CANOE



"GOLD ARROW" BRAND. MAHOGANY FINISH

For beauty of lines, excellence of material and finish this model stands in a class by itself. It was designed by and made under the supervision of the President of our company (a canoeist of many years' experience), and constructed exclusively for us by the best builders of canoes in the world—E. M. White & Co., Old Town, Maine.

A GRACEFUL, STEADY, BEAUTIFULLY FINISHED CANOE

Perhaps in no other kind of watercraft is quality and method of construction, and design considered less by the general public than in the canvas covered canoe, and manufacturers who depend upon extensive advertising and gaudy paint to cover up defective material and workmanship, have enjoyed a popularity for their product out of proportion to its merits.

The method of attaching the planking on "White's make" canoes alone doubles the actual value, as the edges of the cedar board are beveled and lapped, making a practically watertight joint, before the canvas is stretched over. In other makes the edges of the plank are square and "butted" against each other, and when the canoe swells or shrinks, sand works in and the canvas soon gives way.

ONLY SELECTED MATERIAL IS USED

Every piece of material that goes into this model is specially selected, for strength and while light in weight our "Gold Arrow" brand is the stiffest, strongest and most durable canoe built.

As will be seen from the illustration the gunwales are of the open pattern, so when turned on its side water and dirt will run out freely. The mahogany finished thwarts are made of selected stock, hand finished and the gunwales and decks are of the same material, the latter being bowshaped, twenty inches long. The ribs are steam shaped and taper from center to ends, fitted with half ribs between the regular ribs.

The stern seat is fastened flush with the under side of the inwales, and the bow seat is about four inches lower, but can be adjusted to a higher position if required. The finish is a beautiful "Indian Red," with a gold arrow painted on both sides from bow to stern. The bow is fitted with a brass plate and ring for attaching anchor or tie rope.

PRICE OF "GOLD ARROW" CANOES

No. R1. 17 feet long, with keel carried in stock. at New York..... $45.00

CANOE FACTS

The One Best Make

I have paddled canoes so long, and watched their construction so carefully, I know some canoe facts that, perhaps, the average buyer of canvas covered crafts doesn't realize.

From the start I noticed that some canoes paddled hard, and "hung back" while others, even when heavily loaded, seemed to glide through the water. Some models tipped easily and could not be successfully handled in rough water, while others acted as steady as a ferryboat. Then again when I got mixed up with rocks and shallow water, some canoes seemed to snag and leak easily, while others took an amount of punishment far in excess of what I thought possible.

Ask Any Guide In Maine

On a two months' trip to Maine I watched every canoe I passed on lake or river and nearly every one paddled by a guide was of a single model or general design. I became interested to find out the whys and wherefores. I tried all the different makes I got a chance to step in. I called at many factories, and saw the molds or forms they were made on, the kind of material used, and the way the workman put them together. At last I found the one shop—a comparative small one—where design, material and workmanship seem to me to be about as near perfect as a human could expect. My observation confirmed what many a guide had told me—that one make of canoe was far and away ahead of all others.

There was nothing fancy about this little shop or the sturdy proprietors, but they were making the best canoe, from every standpoint money could buy, and they weren't making any big noise about it either. I am referring to

E. M. White & Co., Old Town, Maine

I made a proposition to Mr. White to join hands and we did. I secured the agency for our company for a large territory and the general public began to realize what the guides in Maine knew all along. The sales began to increase and the capacity of the little shop was overtaxed. There was nothing to do but build a larger factory and this was done five years ago. Notwithstanding the big increase in the factory—three times the size of the old one—the demand for "White made" canoes is still far in excess of the supply. This only goes to prove the old saying that merit wins in the long run.

Every Seam is Beveled and Lapped

There is just one point I want to tell you about in detail. It's the way White puts on the planking, and, by the way, no short boards are used. Instead of butting the boards up against each other, as all other makers do, White bevels and laps every seam, thus making a practically water-tight craft, before the canvas is stretched on. This method prevents cracks caused by shrinking or swelling, and keeps out the sand which is the ruination of canvas.

When buying a canoe, ask the salesman "Is the planking beveled and lapped?" If he knows what you are talking about, and is truthful, he will hesitate and answer "No"—unless it's a "White."

Powhatan Robinson President

"DIAMOND EDGE IS A QUALITY PLEDGE"

EXCLUSIVE FEATURES OF RUGBY BICYCLES

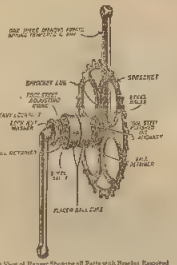
DESIGN "ORIGINATED BY US"

Our Three-Piece Hanger Assembled in Bracket

The Best Bicycles have One-Piece Hangers—as adopted this Feature on Rugby. Wherein as Soon as we found the Strongest and Most Simple Design on Safe Rugby Quality.

The One-Piece Hanger is so Far Ahead of the Old Style Two-Piece Hanger that there Is No Comparison.

There Is No Side Play or Wear—No Continuous Adjustments Required, No Threads on the Cups—Just Press Into Bracket—Nothing Simpler—Nothing Stronger—Nothing More Secure.



Sectional View of Hanger Showing all Parts with Bracket Removed

Note the Compactness of the One Piece Rugby Hanger when Assembled in the Frame—Note how it fits in the Mast and Chain Stays—Note how the Bearings are enabled to run in Dust-proof Oil-tight Chambers—Note how Simple it is to Adjust Bearings—Note how Simple and how Strongly Chain is Adjusted—Note the Simple Rugby Method.

This Illustrates the Extreme Simplicity of our One-Piece Hanger. Note the Few Number of Parts, also the Sturdiness of Construction. Cranks and Crank Shaft in One Coincidental Piece of Best Quality Spring Temper Chrome Vanadium Hardened and Ground. Cuvelble Steel Cups and Cones Size 9/16 inches.

FRONT HUB

REAR HUB

Our Unique Arrangement of the Locknut and Taper Bearing Cone enables all parts to come Hub. The Left Hand Cone is Screwed Tight Against the Ball Retainer and Locknut Against the Cone. Thus Locking the Cone and Ball Retainer Together. The Right Hand Cone is Screwed Tight Against the Ball Retainer and Locknut Against the Cone. Thus Locking the Cone and Ball Retainer Together. The Right Hand Cone is Screwed Tight Against the Ball Retainer and Locknut Against the Cone. Thus Locking the Cone and Ball Retainer Together.

Sizes of Frames

In ordering Rugby Bicycles, it is necessary to state the Size of Frame desired. Frames are made in Even Inches only, from 20 to 24 inches, measured from the Bottom Bracket to the Top of the Seat Post Lug. Frames are also made to measure.

EXTENS ON HANDLE BAR STEM

How to Measure a Bicycle Frame

To Determine the Size of Frame, Measure from the Top of Seat Post Mast to the Center of Hanger Bracket.

Bicycle Tubing is Always Measured on the Outside and Not on the Inside, like Gas Pipe.

SEAT POST

Sizes of Rims

A Rim known as 28 inch Motsinger Motsinger 25 inches and so each size is known by Rims are used in Each Size Frame. The Tire Diameter varies. The same principle holds good with all other sizes of Rims.

Heavy Steel Pedals. The "Never-Slip" Lug Always Maintains the Desired Height of the Saddle. No Reasonable Weight or Vibration Caused by Riding Over Rough Roads will Loosen it. When Tightened it Stays Tight.

Best Quality Throughout. "Never-Slip" Lugs Guaranteeing Absolute Security

EXCLUSIVE FEATURES OF RUGBY BICYCLES

DESIGN "ORIGINATED BY US"

FRAME REINFORCEMENTS

All Frame Reinforcements are Extra Long and Well Brazed. The Joints are Carefully and Smugly Filled Before Brazing, thereby Insuring a Smooth, Tight, Joint. All Joints are True so that there will be no Undue Strain on Any One Part and to Prevent Any Weakness of Same.

ENAMEL

Four Coats Baked on and Hand Rubbed. We Use the Best Quality Long Wearing Durable Enamel, Will Not Check or Chip.

HEAD FITTINGS

These Fittings are Made of the Best Quality Material Throughout. The Cups Especially are Made from Solid Cones. Note the Grooves as here where the Most Wear and Wear Comes.

FORK

This Illustration Shows the Different Parts of a Single Crown Fork. This Style Fork is More Commonly Used, but to keep pace with Improvements we have made in other sizes of Bicycle we now Equip our Rugby Nos. 370R, 376R and 378 with Triple Crown Forks making the Strongest Construction ever brought out on a Bicycle. Fork Sides are Reinforced with a Rib—this Rib is now Brazed or Soldered on, but as Part of the Fork Side and a Drawn Out so as to give Extra Strength to the Fork.

SEAT POST MAST AND STAYS

Note the Neatness of the Finished Flush Joint. A Construction Above this way. We don't use the Unsightly Lugs with a Flush Joint and Brazing Only the Head and Seat Lug Metal. The Tubes is Filled Out to Fit Head, the Seat Post and Connections. Inner Reinforcements Brazed to Prevent Any Chafing.

HANGER BRACKET CLUSTER

We Use an Extra Large Hanger Bracket Barrel, which Permits the Use of Large Cups and Balls. This is Good Mechanical Practice as it Reduces Friction to a Minimum.

SEAT POST CLUSTER

All Frame Joints, Taper Fitted and Well Brazed. Best Quality Material Used so as to Give a Rigid Frame Connection.

Our Rear Forks are of Oval Tubing. Experience has taught us that this is the best shape to Use in Rear Forks. It is Extremely Strong and Rigid, and presents a Clean, Finished Appearance.

How to Determine Leg Measurement or How to Select a Bicycle with Correct Size Frame for Any Rider

Distance from Top of Saddle to Pedals, Correct Point

20 inch Frame, Seat Lug 19 inches
22 inch Frame, Seat Lug 21 inches
24 inch Frame, Seat Lug 23 inches

Seat to Top of Saddle 3½ inches

Don't overlook our Nos. 809FGC and 809FHC Rugby Bicycles with Spring Front Fork. These Wheels are the Last Word" in Bicycle Construction.

Made to Ride Easy and Stand Hard Wear. See Our Spring Fork Features elsewhere.

"DIAMOND EDGE IS A QUALITY PLEDGE"

HORNS, WHISTLES, PISTOLS AND BELLS.

MOTORCYCLE HORNS.

Samson Electric.

No. 229, Complete with Battery Case and Batteries.

No. 228—Brass, heavily nickel plated, extremely simple in construction, consisting of a heavy vibrator, with two substantial coils, diaphragm and striking rod, all adjustments locked, metal outside case waterproof, neat and substantial, can be operated with two or three dry cells I complete with push button, cord and bracket for attaching to handle bar, as shown in illustration, w't 2 lbs., each .....DEJ $7.50

No. 229—Horn complete with brackets, push button and fibre battery holder, with batteries, with clips to attach to frame, otherwise same as No. 228.....each JFJJ $10.00

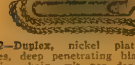
ONE IN A BOX.

WHISTLES.

No. 12—Universal, nickel plated, two tubes, giving a very deep tone, with 10 in. chain, length of tubes and mouthpiece 2½ in., w't per doz. ½ lb., per dozen.....ABJ $3.00

No. 11—Universal, large size, length 3½ in., with 11 in. chain, otherwise same as No. 12, w't per doz. ¾ lb., per dozen.....BJE $3.40

No. 72—Duplex, nickel plated, two tubes, deep penetrating blast, with 10 in. chain, w't per doz. ⅞ lb., per dozen.....ABJ $3.00

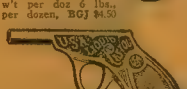


No. 16—Echo, nickel plated bowl and mouthpiece, with ring to fasten on chain, w't per doz. ½ lb., per dozen.....AEJ $1.50

ONE DOZEN IN A BOX.

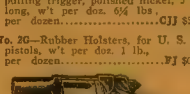
LIQUID PISTOLS.

No. 5G—Sokum, white metal, nickeled, recharges and fires by pressure on the bulb, w't per doz 6 lbs., per dozen, BGJ $4.50



No. 1G—U. S. A., fires over 20 shots in one loading, fires and recharges by pulling trigger, polished nickel, 5 in. long, w't per doz. 6¾ lbs., per dozen.....CJJ $5.00

No. 2G—Rubber Holsters, for U. S. A. pistols, w't per doz. 1 lb., per dozen.....FJ $0.95



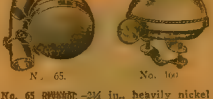
No. 3G—Wizard, fires over 20 shots with one loading, polished nickeled metal, 5¼ in. long, w't per doz. 7 lbs.....per dozen CJJ $5.00

ONE IN A BOX; ONE DOZEN IN A CARTON.

Extra Bulbs.

Extra bulbs for 1G and 3G, per dozen.....ABJ $2.00

BELLS.



No. 65. No. 160

No. 65—2¾ in., heavily nickel plated and polished, *bell metal gong,* continuous ringing chime, rotary electric alarm; alarm continues during forward and backward action of the lever, w't per doz. 6½ lbs., per dozen .....DEJ $7.50

No. 160—2¾ in. bell, nickel plated with bevel and rope beading, bell metal gong, rich clear tone, rotary electric mechanism operated by lever, w't per doz. 6½ lbs., per dozen .....CDJ $3.70

ONE DOZEN IN A BOX.

No. 70—2¼ in., nickel plated and polished, wrought metal gong, bevel beading, push button, continuous alarm, w't per doz., 6½ lbs., per dozen .....CDJ $3.70

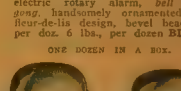
ONE DOZEN IN A BOX.

No. 45 No. 140.

No. 45—2¼ in., fancy top, nickel plated, two wrought gongs of different tone, producing a loud alarm, w't per doz. 4½ lbs., per dozen .....BAJ $3.50

No. 140—2 in., nickel plated electric rotary alarm, *bell metal gong,* handsomely ornamented with fleur-de-lis design, bevel head, w't per doz. 6 lbs., per dozen BIJ $4.80

ONE DOZEN IN A BOX.



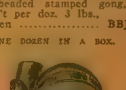
No. 125. No. 25.

No. 125—2 in., nickel plated and polished, rotary electric alarm, bevel beaded *bell metal gong,* w't per doz. 2½ lbs., per doz. ACJ $2.20

No. 135—2¼ in., otherwise same as No. 125, w't per doz. 3¼ lbs., per dozen .....ADE $2.40

No. 25—1¾ in., nickel plated and polished, rotary electric alarm, bevel beaded stamped gong, loud tone, w't per doz. 3 lbs., per dozen .....BBJ $3.70

ONE DOZEN IN A BOX.



No. 175—Scorcher, 2¼ in., nickel plated rotary alarm, bell metal gong, w't per doz. 6½ lbs., per dozen .....JFCJ $10.50

ONE IN A BOX.

BICYCLE BELLS AND ALARMS.

CHIME ASSORTMENTS.

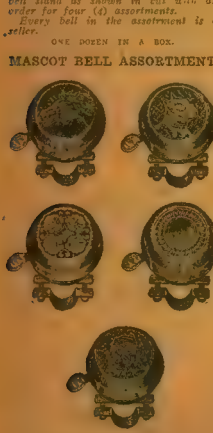
No. 2—Consisting of 12 bells, ten different designs, including three multiple stroke chime bells, a large double stroke bell, the popular flag bell in both the push button and the rotary type, and several other first-class designs, all bells are new 1914 stock with improved mechanism, w't per doz. 5½ lbs., per assortment . . . . . **CFJ $6.00**

We will include with this a bell stand as shown in cut with an order for four (4) assortments.

Every bell in the assortment is a seller.

ONE DOZEN IN A BOX.

MASCOT BELL ASSORTMENT.



No. 3—Each dozen made up of three each Horse and Bulldog design, two each Greyhound Scroll and Pushbutton bells, all per asst., 5 lbs., per doz. . . . . **BDJ $4.00**

ONE DOZEN IN A CONTAINER.

BELLS.

High Grade Multiple Tone Chime, Bell Metal Gongs.

No. 30CG—Diam. 3 in., w't per doz. 8 lbs. ..... per dozen **AFJJ $26.70**

No. 34CG—Diam. 2¾ in., w't per doz. 7½ lbs. .....per dozen **AJBJ $17.00**

No. 35CG—Diam. 2¼ in., w't per doz. 7 lbs. .....per dozen **JHAJ $13.50**

The hammer strikes the gong many times at one stroke of the lever producing a loud alarm in chime effect.

No. 30CG is particularly adapted for motorcycles.

ONE IN A BOX.

BRONKO BELLS.

No. 185—Bronko, 3 in., nickel plated and polished bell metal gong, rotary electric alarm, operated by a lever, fastened to handle bar by lock clamp, w't per doz. 8 lbs., per dozen . . . . . **JGBJ $12.00**

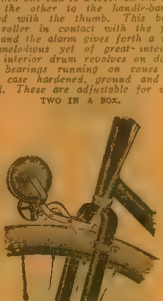
ONE IN A BOX.

SIREN ALARMS.

No. 53—High grade stamped steel frame, highly polished, outer drums of polished brass, nickel plated, ball bearing shaft with heavy fibre roller which runs on tire, being practically indestructible, chain attachment, screen pressed in, all parts interchangeable, w't per doz. 15 lbs., per dozen ..... **JGBJ $12.00**

A Siren will clear the road farther ahead and clear it more quickly than any other alarm made. A heavy chain attached one end to a lever on the siren and the other to the handle-bar, is pulled with the thumb. This brings the roller in contact with the front tire and the alarm gives forth a whistle melodious yet of great intensity. The interior drum revolves on double ball bearings running on cones and cups case hardened, ground and polished. These are adjustable for wear.

TWO IN A BOX.



No. 54—Sandow Siren tire bell, nickel plated steel, attached to front fork of bicycle, operated by a cord fastened to the handle bars, by pulling cord the fly wheel is brought in touch with the tire causing interior drum of bell to revolve, giving a loud penetrating alarm, w't per doz. 15 lbs.,.....per dozen **DEJ $7.50**

No. 50—Pirate Tire Chimes, an alarm similar to **No. 54,** except smaller, fly wheel is brought into contact with the front tire, causing the small wheel to revolve rapidly, this revolution throws small hammers against the two sides of the gong, which are attuned to different pitches, the result is a very pleasing chime, and loud enough to be heard a block away, w't per doz. 9 lbs., per dozen . . . . . **CCE $6.20**

ONE DOZEN IN A BOX.

SCREW PLATES

Per Set

No. T61 Cuts 1-20, ⅜-18, ⅝-16, ¾-14 ... 12 inches ... No. 4 Hercules tap wrench, weight about 13 pounds, complete in case ... $12 00

No. T65 Cuts ...20, ⅜-18, ...16, ...14, ...12, ⅝-11 ... 10 inches ... No. 5 Hercules tap wrench, weight about 22 pounds, in case ... 17 50

No. T67 Cuts ¼-20, ⅜-18, ⅜-16, ⅜-14, ½-12, ⅝-11, ¾-10, ⅞-9, 1-8, set including two tap wrenches, weight about 40 pounds, in case ... 29.00

Set No. 40 Double Set 11 sizes.

Per Set

Stock 14 inches long for the first four sizes and 27 inches long stock for larger sizes. Contains 11 sizes taps and dies. Cutting ...20, ⅜-18, ...16 to ⅝-14, ½-12, ⅝-11, ¾-10, ⅞-9, 1-8, 1⅛-7, 1¼-7, dies 1⅛ inches diameter by ⅛ inch thick, for first four sizes and 2½ inches diameter by ⅜ inch thick for larger sizes, weight about 50 pounds, price complete in case ... $38 00

No. 1124 ¼ to ¾ inch, 5 sizes, weight about 12 pounds, in case, per set ... $11 25

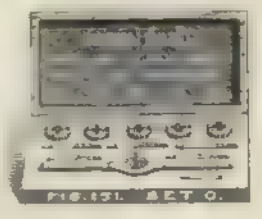
Stock 22 inches long. Adjustable Tap Wrench No. 58. Taper Taps, Dies and Guides cutting ¼-20, ⅜-16, ½-12, ⅝-11, ¾-10.

No. 1112 ¼ to 1 inch, 9 sizes, weight about 28 pounds, in case, per set ... $24 00

Stock 29 inches long. Adjustable Tap Wrench No. 58. Taper Taps, Dies and Guides cutting ¼-20, ⅜-18, ⅜-16, ½-14, ½-12, ⅝-11, ¾-10, ⅞-9, 1-8.

No. 115 ¼ to 1¼ inches, 11 sizes, in case, weight about 33 pounds ... per set, $34 00

Stock 35 inches long. Taper taps, dies and guides cutting ¼-20, ⅜-18, ⅜-16, ½-14, ½-12, ⅝-11, ¾-10, ⅞-9, 1 inch-8, 1⅛-7, 1¼-7. Diameter of dies in this set 2½ inches.

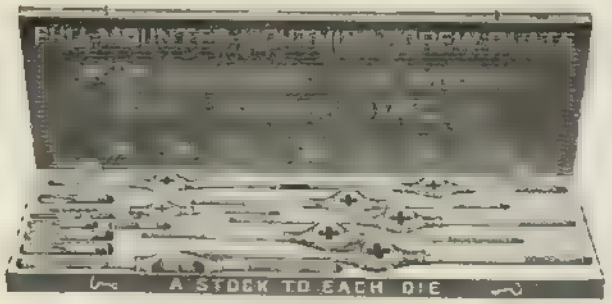


Adjustable Dies, ⅞ Inch Diameter, Case Hardened Guides

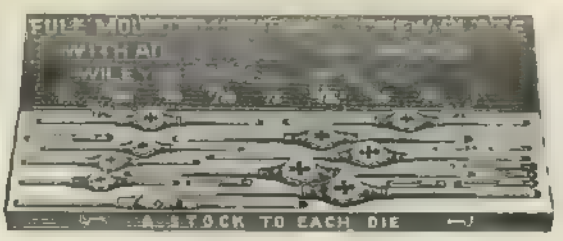
No. 150 With stock, tap wrench (fitting in stock) and 5 sizes taps, dies and guides, ⅛, ¼, ⅜, ½, inch, V standard thread, weight about 12 pounds, complete in case, per set ... $5 50

No. 151 With stock, tap wrench (fitting in stock) and 5 sizes taps, dies and guides, screw groove sizes 4, 6, 8, 10, 12, weight about 12 pound complete in case, per set, $5 50

SCREW PLATES



No. 1223 ¼ to ¾ inch, 7 sizes, in case, per set.....$17.00
A stock to each die. Adjustable Tap Wrench No. 53 Taper Taps, Dies and Stocks cutting ¼-20, 5/16-18, ⅜-16, 7/16-14, ½-12, 9/16-11, ¾-10, weight about 27 pounds.



No. 1229 ¼ to 1 inch, 9 sizes, in case, per set.....$27.50
A stock to each die. Adjustable Tap Wrench No. 58, Taper Taps, Dies and Stocks cutting ¼-20, 5/16-18, ⅜-16, 7/16-14, ½-12, 9/16-11, ¾-10, 7/8-9, 1-8, weight about 43 pounds.

No. 234 ¾ to 1¼ inches, 11 sizes, in case, per set.....$41.00
A stock to each die. Taper Taps, Dies and Stocks cutting ¾-20, 5/16-18, ⅜-16, 7/16-14, ½-12, 9/16-11, ¾-10, 7/8-9, 1-8, 1⅛-7, 1¼-7, weight about 56 pounds.

NEW ADJUSTABLE TAP WRENCH

Nos.	57	53	58
Length inches	10½	15	20
For taps, inches	1/8 to ½	¼ to ¾	⅜ to 1
Weight each about pounds	1	2	3
Each	$2.00	2.50	3.50

LIGHTNING ADJUSTABLE TAP WRENCH

No. 329 Holding taps Nos. 2 to 14, and 5/16 to ¼ inch, weight per dozen about 2 pounds, each.....$0.50
No. 333 Holding taps Nos. 14 to 24, and ⅜ to ½ inch weight per dozen about 5½ pounds, each.....1.00

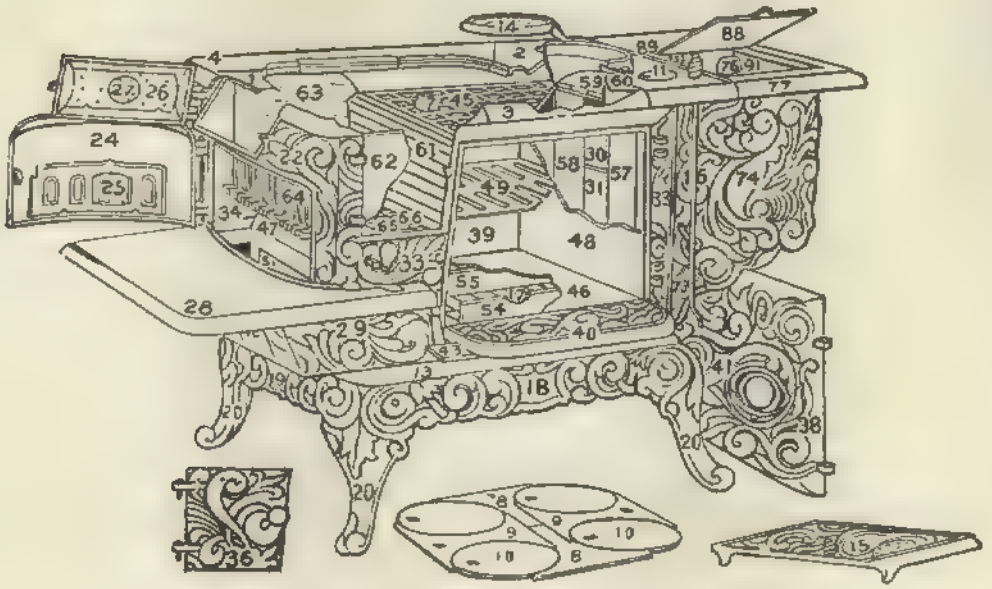
LIGHTNING BURRING REAMER

Size at point 7/16 inch, size at large end 1¼ inch, length of flute 1⅞ inch, will burr ⅜ to 1 inch.
No. 544 Bit brace shank, weight per dozen about 4 pounds, per dozen.....$14.00

BLACKSMITHS' STOCKS AND DIES

No. 15 Cuts 1¼ inch to ½ inch, right hand, 8, 10 and 12 threads to inch, 5 taps and 3 sets of dies, weight about 15 pounds..each, $10.00
No. 21 {Cuts 1 inch to ½ inch, right hand, 9 and 12 threads to inch / Cuts 1 inch to ¾ inch, left hand, 9 and 12 threads to inch / 4 taps and 3 sets of dies, weight about 9½ pounds.....each 6.00
No. 23 Cuts 1 inch to ⅜ inch, right hand, 9, 10 and 14 threads to inch, 3 taps and 3 sets of dies, weight about 8¼ pounds..each 5.00
No. 34 Cuts ¾ inch to 7/8 inch, right hand, 10, 12 and 16 threads to inch, 3 taps and 3 sets of dies, weight about 5 pounds..each 4.50
No. 41 Cuts ½ inch to ⅝ inch, right hand, 16, 20 and 26 threads to inch, 6 taps and 3 sets of dies, weight about 2½ pounds..each, 3.25
No. 53 Cuts ⅜ inch to 7/16 inch, right hand, 16, 20, 24 and 32 threads to inch, 4 taps and 4 sets of dies, weight about 1 pound.....each, 2.75

SECTIONAL CUT OF COOKING STOVE



When ordering stove repairs take position facing hearth. First give FULL NAME AND NUMBER, also state if stove has RESERVOIR OR WITHOUT and whether for COAL OR WOOD. Give NAME as well as number of pieces as per list below (we will not ship by number only).

No
1 Front Top
2 Collar Top. (Specify whether has stove reservoir or without.)
3 Right Top.
4 Left Top.
7 Center Rest.

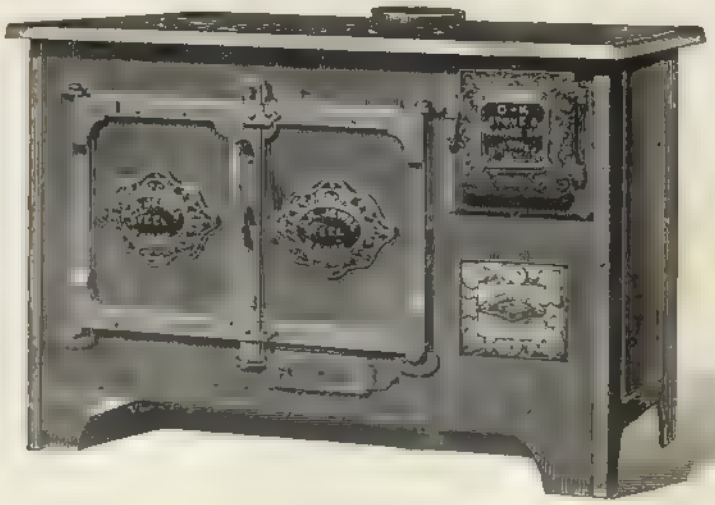
O. K. JEWEL WROUGHT STEEL RANGE



For Coal or Wood

Heavy, substantial, strongly built and specially made to stand hard wear and rough usage either in the house, camp, wagon or rail. It is just the thing for construction camps, plantations, building crews, ranches, or anywhere that a plain good and extra double range is wanted. Has very large fire box, heavy grate bars, heavy key plates and lids; or can be furnished with French top with one [illegible] Bottom is also [illegible]

For coal and for that [illegible] and cannot be surpassed [illegible] it will cost over other makes in durability alone.

Number	With Cast Linings	With Water Box	Size Oven Inches	Size Top	Cooking Surface Inches	Height	Weight Pounds
8-25	$92.00	$100.00	25 x 25	Six 8-inch holes	34 x 45	20 inches	520
9-25	92.00	100.00	25 x 25	Six 9-inch holes	34 x 45	20 inches	520

KNOXALL STEEL RANGE

Knoxall, with Reservoir and High Closet

WITH GALVANIZED RESERVOIR, HIGH CLOSET AND TOWEL BAR

For Coal or Wood

[illegible]ply is made of polished blue steel. All rivets are driven cold, [illegible] which insures an air-tight construction. Bottom edge [illegible] range is reinforced by wrought steel band. Oven is made of wrought steel with cast anchor plate securely bolted to oven bottom, which prevents warping. Drop oven door, balanced by steel spring.

Top is made into four sections to allow for expansion and contraction. Panel plates furnished. Equipped with heavy cover [illegible] Fire box is large and well ventilated. Reversible duplex grates. When grates are reversed they form a perfect bottom for the burning of wood. Wood feed door is full width of fire box. Back [illegible] with cast shoe at bottom. High [illegible] polished blue steel.

Nickeled Parts: As are shown in cut

Number	Size Oven Inches	Size of Top Inches	Number and Size of Holes	Weight Pounds	Each
8-14R	14 x 18 x 10½	26 x 37	4 x 8	285	$38.00
8-18R	18 x 18 x 10½	26 x 41	6 x 8	300	42.00

No. 8-14 is same range without reservoir, weight 265 pounds, each $34.00

No. 8-18 is same range without reservoir, weight 275 pounds, each 38.00

CRANBERRY WITH PLANISHED COPPER RESERVOIR

With High Closet, for Coal or Wood

Order by This Number	Number of Holes	Size of Ware Inches	Size of Oven Inches	Shipping Weight Pounds	Size of Pipe Inches	Ea
CR48-16	6	8	16 x 18	350	7	**$55.00**
CR48-18	6	8	18 x 18	365	7	**60.00**

The Cranberry Cast Iron Range is built for service. Every feature that will make for durability, convenience and economy has been included in its manufacture. It is especially designed for those who want a serviceable modern Range at a low price. Selected materials put together by skilled stove builders, smooth and well made castings patterned along scientific lines, have produced a Range that for ease of operation and economy of fuel cannot be surpassed

CONSTRUCTION

There are six holes, giving a roomy space on top. The main top is in four sections to prevent breakage by expansion from the heat. The fire box is arranged for use with coal or wood. The linings are of extra heavy material. The ventilated fire back is in three pieces, giving it longer service and making repairs simple, easy and economical. Solid revolving shaker grate, easy to turn, hard to warp. Oven is roomy and of correct proportions to bake well. The door works on a coil spring, specially tempered for the purpose. A modern thermometer measures the heat in the oven, and is of great assistance and a labor and fuel saver. The high closet is well made of high grade Wellsville polished steel. The body is made of selected iron, best adapted to the purpose of stove building.

The Reservoir has cast iron lug extending direct into fire box, thus heating the water very quickly and boiling hot in the simplest manner.

This Cranberry Range is protected by our guarantee that it will draw and bake perfectly when properly connected with a good flue.

PORTABLE OVENS

For Gas, Gasoline, Alcohol and Oil Stoves.

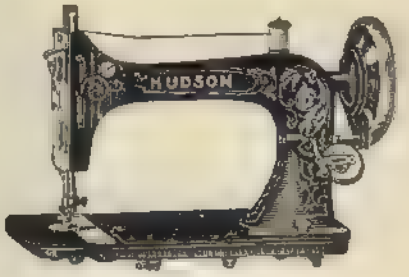
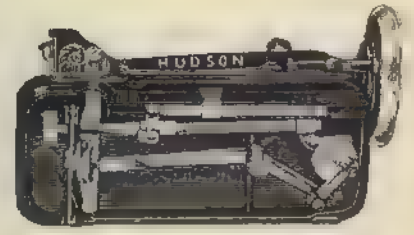
SEWING MACHINES

"HUDSON" AUTOMATIC, DROP HEAD



Top View of Sewing Head.



Bottom View of Sewing Head.

Ball Bearing, Automatic Tension, Fully Warranted for Ten Years.

In General This model although moderate in price, is, we honestly believe, the most magnificently equipped and the best finished sewing machine the present market affords. It certainly is the full equal in every way of the Singer Wheeler & Wilson White Domestic, New Home, etc., which machines being sold by the old fashioned expensive agency methods, necessarily retail at what are truly exorbitant prices when compared with the prices of our machines.

The Sewing Head The Sewing Head forms the reliable and time tested double lock stitch It has an extremely high arm and in every respect it is modern and well equipped with improvements and labor-saving devices as the following list will show Self-Regulating Tension with automatic release, Steel Forged, Double Width, Positive Four Motion Feed Steel Capped Needle Bar and Presser Bar, Improved Automatic Stitch Regulator on Face of Arm Automatic Bobbin Winder, Positive Cam Driven Take up, Gear Releasing Device, Self Threading Shuttle, and Oil Hardened Steel Working Parts.

The Case— The Case of this new model is decidedly superior in construction and different in appearance from any and all others As illustration shows it is built on graceful and beautiful lines which immediately appeal to the eye of the discriminating. Each drawer is fitted with lock and key by means of which the four full length side drawers and their contents are secure from loss The beautifully curved drop front piece the massive construction the easily operated, tested steel chain automatic lifting device and the hand rubbed mirror finish of the entire quarter sawed case are excellent features not incorporated in any other machine.

The Stand –Our New Ball Bearing Stand (just out) is a marvel of simplicity, noiselessness and speed The accurately ground steel balls are encased in improved retainers where they revolve idependently of each other The New Steel Pitman has non binding, easily adjusted connections at either end The Belt Retaining Guard is a wonderfully ingenious device and one of much merit It eliminates all the fussing and straining incident to belting machines less fortunately equipped

The Attachments The Steel Attachments are packed in an elaborate, velvet lined metal box They are very complete as the following indicates Tucker, Ruffler, Braider, Binder, Four Hemmers of different widths Shirring Slide, Feller, Quilter, Cloth Guide, Six Bobbins, Twelve Needles, Two Screw Drivers, Filled Oil Can and Illustrated Book of Directions.

*SILVER'S 20 INCH SWING DRILL

COMBINED LEVER AND WHEEL FEED

Round or Square Base

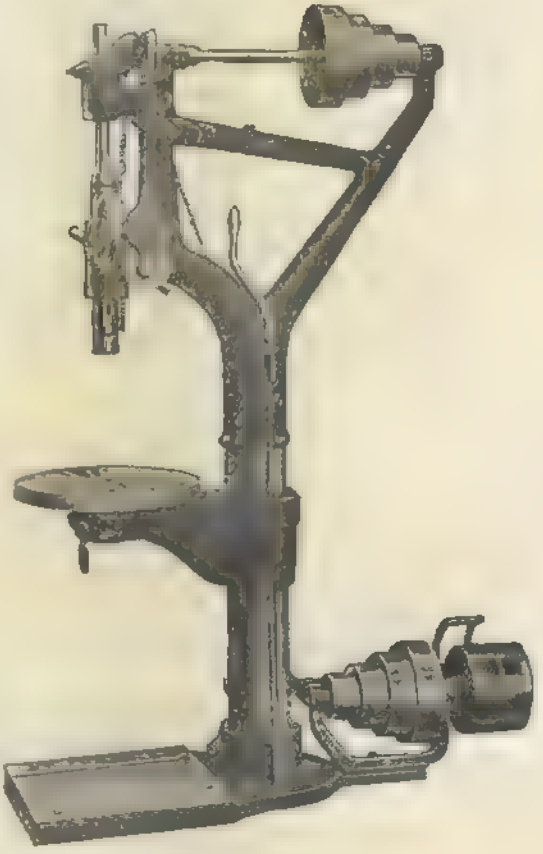

Fig. 858

DESCRIPTION OF FIGS. 857 AND 858 DRILLS

The Combined Lever and Wheel Feed Drills permit either the lever or the wheel to be used, without affecting the other. Aside from this they are not different from the Plain Lever Feed.

[illegible] from which these drills are made are entirely new and the designs insure great strength and efficiency, also convenience [illegible] They are well adapted to meet the up to date and exacting requirements of modern machine shop practice

Their superiority in quality, design and finish stands right out so you cannot help seeing it

As indicated in price list, Figs. 857 and 858 differ only in the style of base (whether round or square).

Bevel [illegible] are accurately cut from solid blanks, the cog rack is forged from steel and the teeth are milled to gauge.

The quality of the Drill is indicated by its substantial appearance. Every part is finished with special care and the materials used are the best procurable. All details have been carefully worked out. The top shaft has split bearings to permit of taking up wear.

Back Gears can be furnished with this style drill when desired, as indicated in price list

Table has easy up and down adjustment and swings to either side

When the tool is wanted only for drilling, the countershaft for [illegible] provided with tight and loose pulleys, 8 inches diameter by 2 inch face, as shown in the accompanying engraving, and should make 200 revolutions per minute. For tapping and drilling a friction countershaft is required.

Drive Shaft has tight and loose pulleys; turns 1⅔ times to 1 turn of spindle.

DIMENSIONS OF FIGS. 857 AND 858

Height, inches	68¼	Distance from spindle to table, inches	36
Diameter column, inches	5¼	Diameter of crown gear, inches	5
Diameter table, inches	16	Diameter of bevel pinion, inches	3
Diameter spindle, inches	2½	Diameter large pulley on cone, inches	9¼
Vertical travel of spindle, inches	20	Diameter small pulley on cone, inches	4
Vertical travel of table, inches	16	Cone carries 2 inch belt.	
Spindle bored for No. 3 Morse taper		Tight and loose pulleys, inches	8 x 2¾
Distance from column to center of table, inches	10¼	Floor space—square base, inches	40 x 16
Distance from spindle to base, inches	41⅛	Floor space—round base, inches	36 x 20

PRICES

	Each
*Fig. 858 With square base, complete as shown, drive shaft with tight and loose pulleys, weight crated 700 pounds	$85 00
*Fig. 857 With round base, otherwise same as Fig. 858; weight crated 660 pounds	90 00
Back gears for either style, extra	20 00
Friction countershaft for tapping, either style, extra	60 00
V shaped attachment to fit in supporting arm, for holding wheels to drill those shown in Fig. 857	2 00
Wheel holding attachment to clamp to column, with spindle to go through wheel, as in Fig. 857	5 00

*Not carried in stock; can be shipped promptly from factory.

*SILVER'S 20 INCH SWING DRILL

POWER FEED AND AUTOMATIC STOP

Round or Square Base

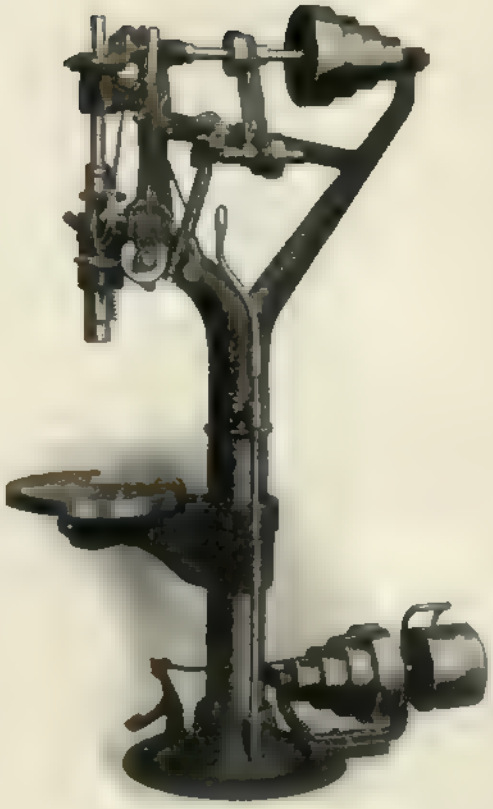

Fig. 859

DESCRIPTION OF FIGS. 859 AND 860

The Power Feed Drills with Automatic Stop, Figs. 859 and 860, are exactly the same in construction and design, with the exception of the style of base, as indicated in price list under illustration.

Simple and convenient operation, and strong construction are some of the features of the new designs that make for splendid efficiency

The Power Feed and Automatic Stop requires only to be started and will stop automatically wherever set, at any required depth. This action is entirely independent of the wheel or the lever feed: either of these can be used in addition

The substantial appearance denotes quality—new patterns throughout every detail carefully worked out—materials the best procurable. Bevel gears accurately cut from solid blanks, the cog rack is forged from steel and the teeth are milled to gauge. The top shaft has split bearings to permit of taking up wear

Table has easy up and down adjustment and swings to either side

When the tool is wanted only for drilling, the countershaft for it is provided with tight and loose pulleys 8 inches diameter by 2¾ inch face, as shown in the accompanying engraving, and should make 200 revolutions per minute. For tapping and drilling a friction countershaft is required.

Drive Shaft has tight and loose pulleys, turns 1¾ times to 1 turn of spindle

CLARIONETS

Nos. 931-934

International or New Standard Pitch is LOW PITCH
American or Concert Pitch is HIGH PITCH

In the whole field of music few instruments call for greater care in manufacture than the Clarionet. A good Clarionet becomes almost priceless to its player. Something more than is apparent at a casual glance must be comprised in a Clarionet, in order that it may afford satisfaction when in use. The instruments carried by us were selected because an experience of over forty years has proved to us that they are the best value on the market.

SMITH HAMMERLESS GUNS—NEW DESIGNS

HUNTER ONE-TRIGGER

The Hunter one-trigger mechanism is simple in construction, being made with only three parts. This action is simplicity itself. The selective button controlling the order of firing is conveniently located at the side of the trigger Pushing the button backwards exposes the letter L, indicating "left first." Moving it forward, concealing L and exposing R, indicates "right first." The sportsman can fire right and left, left and right, all rights, all lefts. As the button is never moved unless the order of firing is to be reversed, there is exactly the same control over the firing as in a two-trigger gun. Any Smith gun, new or old can be fitted with Hunter one trigger.

SPECIALTY GRADE

A fine gun in every detail and built to last a lifetime. It is a well made, well fitted gun of symmetrical lines and handsomely engraved. We have every confidence in recommending this arm to the discriminating gunner who appreciates high quality and is not desirous of investing a large amount.

With two triggers..... **$64.00** With Automatic ejector..... **$75.00**
With one trigger..... **89.00** With auto ejector and one trigger .. **100.00**

EAGLE GRADE

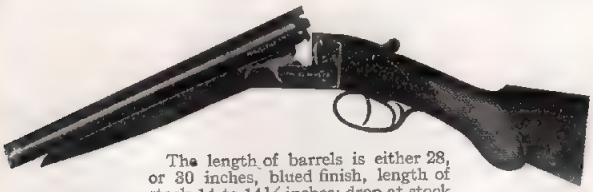
An entirely new type of ornamentation is presented in this grade. The top and bottom of frame and the lock plates are frosted and a ring-necked pheasant and duck in flight are engraved on the sides. The material is carefully selected and the workmanship excellent. Like all Smith guns it is guaranteed to shoot well, look well and wear well.

With two triggers..... **$115.00** With automatic ejector..... **$126.00**
With one trigger..... **140.00** With auto ejector and one trigger .. **151.00**

Delivery Prepaid in U. S. if Cash is Sent with Order at Above Prices

HUNTER ARMS CO'S "FULTON" GUN

While new in name this arm has stood the test of many years service as it was formerly sold by us under the name of "Sterling". Beginning with 1915 the makers, the Hunter Arms Co. decided to publically acknowledge that the gun is made in the same factory as the well known "Smith", and the brand "Fulton" has been adopted as a distinguishing mark. It is designed for those who expect a gun of great efficiency, handsome appearance and fine work throughout, at a moderate price.



The length of barrels is either 28, or 30 inches, blued finish, length of stock 14 to 14½ inches; drop at stock 2⅝ to 3 inches; weight from 7¼ to 8¼ lbs. Both barrels are regularly choke bored, but right barrel modified choke if preferred.

Made with half pistol grip stock of imported English walnut attractively checkered with fore-end to match. The action contains few parts, strong and reliable. The safety is positive, preventing accidental discharge.

No. **18.** Fulton Hammerless Gun, 20, 16 or 12 gauge.....Net **$18.00**

FOX-STERLINGWORTH HAMMERLESS SHOT GUN

Coil top-lever and main springs, guaranteed against breakage. The mechanism is simple, strong and warranted not to shoot loose. Barrels of Fluid Compressed Steel are guaranteed for smokeless powder. Stock is fine walnut, full pistol grip. Supplied in 12, 16 and 20 gauge.

No. **72.** **"Standard"** grade. 30-inch barrel only, weight 12 gauge 7½ to 7¾ pounds, 16 gauge, 6¼ to 6½ pounds; 20 gauge, 6 to 6 ¼ pounds; both barrels full choke, or right barrel modified and left choke, stock 14-inch long with 2¾-inch drop.....Net **$25.00**

No. **74.** **"Field"** grade. 28-inch barrel only, weight 12 gauge, 7 pounds; 16 gauge, 6 to 6¼ pounds, 20 gauge, 5¾ to 6 pounds, right barrel modified, left full choke, stock 14-inch with 3-inch drop.....Net **25.00**

No. **76.** **"Brush Gun"** 26-inch barrels only, weight 12 gauge, 6½ to 6¾ pounds; 16 gauge, 5¾ to 6 pounds; 20 gauge 5½ to 5¾ pounds; length of stock 14-inch, drop about 3-inch, right barrel cylinder, left barrel modified.....Net **25.00**

No. **78.** **"Trap" Gun.** 32-inch barrels; 12 gauge, weight 7¾ pounds; drop 2¾ inch; length of stock 14 inches.....Net **25.00**

Automatic ejectors on any model, extra.....Net **7.50**

SMITH & WESSON REVOLVERS

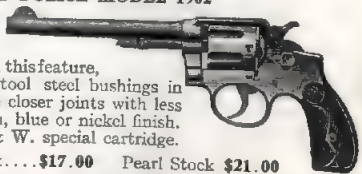
These are made with solid frames, swing-out cylinders, and hand ejectors.

PERFECTED .22 CALIBRE

This is a new small calibre revolver so constructed that an easy pull is obtained. Supplied with square wood grip which fits the hand nicely. Seven shots, nickel or blue finish. The ammunition best adapted is the .22 S. & W., which is practically the .22 long rifle cartridge slightly crimped and strengthened. Regular .22 short cartridges may also be used.

No. **48W.** 3 inch barrel, solid sight, blue finish..... **$13.50**
No. **48WN.** As above but nickel finish..... **13 50**
No. **48T.** 6 inch barrel, target sights, blue only..... **15 00**
Extra for Pearl Stock on No. 48 W and WN, $3.50. Pearl Stock on No. 48 T, $3.00
No. **48B.** 6 inch barrel, target sights, heavy frame. ... **17.50**

MILITARY AND POLICE MODEL 1902



The front lock is operated by a thumb-piece, making a most perfect locking mechanism. All wear is automatically overcome, and this feature, in connection with the hardened tool steel bushings in frame and cylinder, makes possible closer joints with less friction; 6 shots, barrels 4 or 6 inch, blue or nickel finish.

No. **51.** For .38 long Colt's or S. & W. special cartridge.
Blued finish, Rubber stock....**$17.00** Pearl Stock **$21.00**
No. **51N.** Nickel finish, Rubber stock.....**$17.00** Pearl Stock.....**$21.00**

MODEL 1903 .32 CALIBRE

Similar to the .38 Military Model shown above and adapted to regular .32 calibre S. & W. long central fire cartridges, 6 shots.

No. **49.** Blued finish, 3¼, 4¼ or 6 in. bbl. Rubber stock **$15.00**. Prl. Stk.**$17.75**
No. **49N.** Nickel finish, Rubber stock.....**$15.00** Pearl Stock **17.75**

MILITARY AND POLICE MODEL 1905

This revolver is identical with the Model 1902 except that it is fitted with a square handle of checkered wood, making a firmer grip.

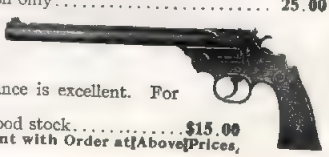
No. **53.** For .32-20 rifle. 4 or 6 in. barrels. Blued finish..... **$17.00**
No. **53N.** Nickel finish..... **17.00**
No. **54.** For .38 Long Colt's or S. & W. Special cartridges. Blued finish. **17.00**
No. **54N.** Nickel finish..... **17.00**

MODEL 1908 .44 CALIBRE

The same as Model 1905, but chambered for the .44 S. & W. Special, although the .44 S. & W. Russian can be used; barrel 6½ inches.

No. **55.** .44 S. & W. Special, or .44 S. & W. Russian. Blued steel.....**$19.00**
No. **55N.** Nickel finish..... **19.00**
No. **56.** With target sights, blue finish only..... **25.00**

PERFECTED SINGLE SHOT .22 CALIBRE



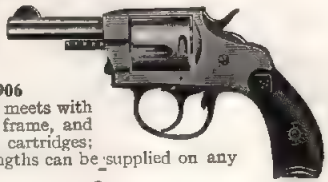
This arm supersedes the old model and is much improved. The new lock work gives a perfect pull and the balance is excellent. For long or long rifle .22 calibre cartridges.

No. **57T.** 10 inch Blue finish barrel, wood stock.....**$15.00**

Delivery Prepaid in U. S. if Cash is Sent with Order at Above Prices.

H. & R. REVOLVERS

Harrington & Richardson Arms Co. guarantee in the manufacture of their arms that the best materials and skilled labor are employed.



DOUBLE ACTION MODEL 1906

A double action 7-shot revolver which meets with favor everywhere. It has a small, light frame, and handles either .32 short or long rim fire cartridges; 2½-inch barrel is regular, but longer lengths can be supplied on any model. See "Extras" below.

No. **80.** .22 cal., Nickel.....**$1.95** Blue.....**$2 20**

DOUBLE ACTION MODEL 1905

A little different in design from the model 1906, but of the same general construction; 5 shot, 2½ in. barrel regular.

No. **81.** .32 cal., R. F., Nickel.....**$1.95** Blue.....**$2.20**
No. **82.** .32 cal., C. F., Nickel.....**1.95** Blue.....**2 20**

DOUBLE ACTION MODEL 1904

Similar to but much heavier than Model 1905. Weight 16 ounces.

No. **83.** .32 cal., 6 shot, C. F., Nickel.....**$1.95** Blue.....**$2 20**
No. **84.** .38 cal., 5 shot, C. F., Nickel.....**1.95** Blue.....**2 20**

Extras: with 4½-in. barrel, 25c.; 6-in. 50c.; Pearl Stocks, $1.25.

PREMIER AUTOMATIC DOUBLE ACTION

This is a popular model, having a small light frame, the .32 calibre weighing only 12 ounces. By opening the revolver in the usual manner, "breaking" the barrels the shells are ejected automatically. It works smoothly and is an accurate shooter.

No. **89.** .22 cal. R. F. 7 shot, 2 or 3 in. barrel, Nickel **$3.25** Blue **$3.55**
No. **90.** .32 cal. C. F. 5 shot, 2 or 3 in. barrel, Nickel **3.25** Blue **3.55**

AUTOMATIC DOUBLE ACTION

Similar to the Premier but with a heavier and larger frame.

No. **91.** .32 calibre, 6 shot, 3¼-in. barrel.....Nickel **$3.25** Blue.....**$3.55**
No. **92.** .38 calibre, 5 shot, 3¼-in. barrel.....Nickel **3.25** Blue.....**3.55**

POLICE PREMIER AUTOMATIC DOUBLE ACTION

Can be drawn from the pocket without catching in the clothes and can be thumb-cocked by pulling the trigger until the hammer catches on the halfcock notch. Same general construction as above, but with safety style hammer.

No. **93.** .22 cal., R. F., 7 shot, 3-in. barrel, Nickel **$3.25** Blue.**3.55**
No. **94.** .32 cal., C. F., 5 shot, 3-in. barrel, Nickel **$3.25** Blue.**3.55**
No. **95.** .32 cal., 6 shot, 3¼-in. barrel .....Nickel **$3.25** Blue **$3 55**
No. **96.** .38 cal., 5 shot, 3¼-in. barrel.....Nickel **3.25** Blue **3.55**

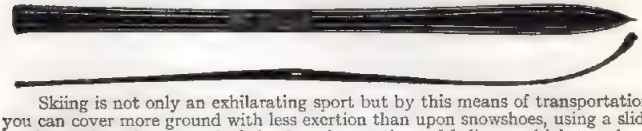
SKIS



Skiing is not only an exhilarating sport but by this means of transportation you can cover more ground with less exertion than upon snowshoes, using a sliding forward motion instead of the dragging motion. Medium or high top shoes with heavy soles are best for skiing.

"AMATEUR" QUALITY NORWAY PINE SKIS

Made from absolutely clear No. 1 selected stock; finished in boiled oil and varnish. They are intended for boys or girls who do not want to invest a larger amount. Equipped with metal side plates, toe straps and rubber foot rests.

No. **4P.** 4 feet long. Pair.....**$1.00** No. **6P.** 6 feet long. Pair.....**$1.50**
No. **5P.** 5 feet long. Pair..... **1.25** No. **7P.** 7 feet long. Pair..... **2.25**

MAPLE SKIS IN MAHOGANY FINISH

These are made of the best quality selected maple, in a beautiful mahogany finish, with fancy grooved white stripes. They are supplied with metal side plates, heavy toe straps, and corrugated rubber foot rests.

No. **6M.** 6 ft. long. Pair.....**$2.50** No. **76M.** 7½ ft. long. Pair...**$3.50**
No. **7M.** 7 ft. long. Pair..... **3.00**

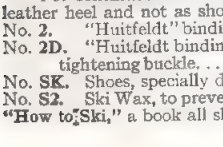
STANDARD QUALITY ASH SKIS

Made of selected quality, white ash, finished in black with grooved white stripes. They are supplied with metal side plates, toe straps and corrugated rubber foot rests.

No. **7A.** 7 feet long. Pair.....**$4.25** No. **8A.** 8 feet long. Pair.....**$5.25**
No. **76A.** 7½ feet long. Pair... **4.75**

SKI POLES

No. **3A.** White ash, with rigid washer.....**$ .75**
No. **3B.** Bamboo, with flexible washer.....**1.00**



"HUITFELDT" SKI BINDING

Our ski harness is practical, easily adjusted and thoroughly satisfactory. The heavy metal side irons give the skier a rigid and perfect control of his skis at all times, the harness being adjustable in every way so as to fit any size of foot.

For continuous service the correct position of the strap is around the solid leather heel and not as shown in illustration.

No. **2.** "Huitfeldt" binding, single leather with tongued buckle. Per set..**$1.75**
No. **2D.** "Huitfeldt binding," doubled and stitched with Hoyer Ellefstens tightening buckle..... **2.25**
No. **SK.** Shoes, specially designed for Skiing. Pair..... **7.00**
No. **S2.** Ski Wax, to prevent Snow sticking. Tube..... **.25**
"How to Ski," a book all skiers should have, postpaid..... **.50**

SLEDS AND TOBOGGANS

FLEXIBLE FLYER SLEDS

"Flexible Flyers" are a decided improvement over the ordinary sled on account of the spring steel runners and the cross bar which controls the direction of the sled by a simple pressure against the steering bar. The runners are grooved to prevent skidding and are much speedier than flat or rounded runners.

No. **1.**	38	inches	long,	for one child..... **$2.50**
2.	42	"	"	for one adult or two children..... **3.00**
3.	47	"	"	for two large children or two adults..... **3.75**
4.	52	"	"	for three children or two heavy adults..... **4.50**
5.	63	"	"	for three adults or several children..... **6.00**
R.	56	"	"	Racer, built low and light for speed..... **4.25**
J.	49	"	"	Junior Racer, for young Boys..... **3.50**
T.	60	"	"	Tuxedo. Racer, light, strong, racy..... **6.00**

THE "METEOR" TOBOGGAN

This new model is a first-class, high-grade toboggan, for those who want the best. It is light, springy and built for hard service. Made from the best of selected stock and finished with the greatest care. The two outside and the middle ribs are made of oak or white ash and are heavier and thicker than the other strips or slats between, thus reducing the friction of the snow and making them more speedy. All sizes are finished with the best of varnish. The illustration shows wooden side rails, but rope handles will be regularly furnished unless otherwise specified.

No. **22.** 6 feet, **$8 00** No. **23.** 7 feet, **$9.00** No. **24.** 8 feet, **$10.00**

THE "STAR" TOBOGGAN

This is a medium priced toboggan that will give a good measure of satisfaction. The wood is well selected, and carefully put together. The low wooden side rails are strong and the curved front is well shaped and held down by leather thongs.

No. **11.** 5 feet, **$3.50** No. **12.** 6 feet, **$4.00** No. **13.** 7 feet, **$4.50**

TOBOGGAN CUSHIONS

These cushions are covered with good quality brown canvas, well padded and tufted. Supplied with leather straps for attaching to toboggans.

No. **C3.** 3¼ ft. long, for 5-ft. toboggans **$1.50** No. **C5.** 5¼ ft. long, for 7-ft. toboggans **$2 50**
No. **C4.** 4¼ ft. long, for 6 ft toboggans **2 00** No. **C6.** 6¼ ft. long, for 8-ft. toboggans **3.00**

SCALES FOR EXPORT

PORTABLE PLATFORM SCALES

MOUND CITY

A Good, Serviceable Scale at a Moderate Price. Black Japanned Cast Iron Frame and Wheels, Pit and Cap are Painted Blue, Steelyard and Varnished Brass Beam and Sliding Poise; Cast Iron Weights.

Marked in Kilos

Capacity Size, 600 Kilos Platform. Weight by 20 Grams, Each Centre Inch Dia. Each

No. M600M—180x240 1.00 $40 00

One in a Box

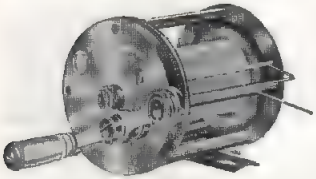
COUNTER SCALES

DIAMANTE

Discriminate Counter Scales are Designed and Built Especially to Meet the Requirements of the Hardware Dealer

The Beam is Made of Brass, Nickel Plated and Tested. Shafts Made of Steel, Carefully Ground and Fitted. The Beam is Graduated on Both Sides, Giving Accurate Weights in Either Direction. All Steel Knife Edges are Case Hardened and Ground. The Scale Has Adjustable Metal Screws Which Can Be Used to Level the Scale. The Beam is Provided with a Device to Prevent Accidental Displacement of the Poise. The Beam is Furnished and Can Be Used on Both Sides. The Upper Edge of the Beam is Smooth and the Sliding Poise Is Guided. The Poise

SOUTH BEND ANTI-BACK-LASH CASTING REEL



This "anti-back-lash" reel works just as if it were thumbed by an expert, the spool being free when the bait is going out and the brake is automatically applied without any attention from the user with just the proper force as the line slackens at the end of the cast. When the bait is attached for casting, the brake should be adjusted by the adjusting screw on the crank side of the reel. Screwing in this adjusting screw increases the brake action, while screwing it out decreases it or the brake may be entirely released.

Solid German silver frame; very light, strong and rigid. The spool and gear journals are of special steel, accurately turned, ground, lapped and burnished to mirror-like surface, turning in solid phosphor bronze bushings. The end thrust is supported by adjusted jeweled spool-journal caps of screw-off pattern.

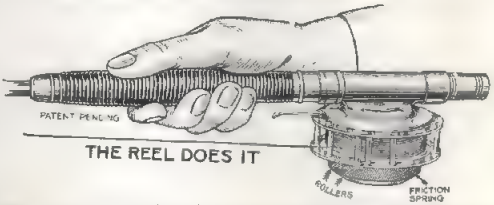
The gearing consists of a special hunting tooth train, the gear of which is cut from hard drawn brass and the pinion from special tool steel which, in action, produces a powerful, yet quiet, free running reel.

No. BB. Capacity 100 yards.....$7.50

"MEISSELBACH" AUTOMATIC REELS

It is automatic in its action, reeling in the line upon a slight pressure of the controlling lever, keeping the line taut at all times after fish is hooked.

The reel can be used on reel-seat above or below. Particularly desirable for brook trout or fly fishing, where the line has to be lengthened and shortened so many times in fishing around brush, etc. A fish once hooked can never get any slack line, if the finger is kept on the brake controller. The spring is not supposed to be strong enough to reel in a large fish, the primary object being to do away with hand reeling. It can be wound up at any time by turning the milled spring box, without danger of overwinding.



No. 33. Size of spool, 3x¾ inch. Capacity, 100 yards of No. 5 line.....$3.25

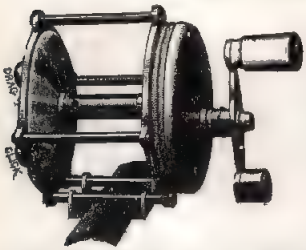
THE KELSO AUTOMATIC REEL

Similar in design and mechanism to the "Meisselbach" but with aluminum case. It is large enough for bass fishing and light enough for trout, as it can be wound up to give desired tension on line. It requires very little winding as the stripping of line, when controlling lever is not used, rewinds the spring.

No. 44. Spring capacity 150 feet, spool holds 100 yards, each.....$3.25

Delivery Prepaid if Cash is Sent with Order at Above Prices

SALT WATER REELS



THE "BRIGHTON"

These are fair quality reels, double multiplying, and adapted to ordinary salt-water fishing. They have raised pillars and are put together with screws. Supplied with balance handles, back sliding clicks and drags. They are well finished in polished nickel plate.

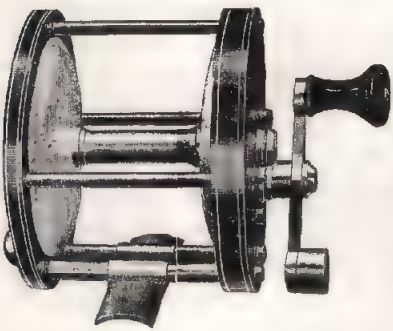
No. **666.** 150 yds..**$1.00** Delivered **$1.10**
No. **667.** 200 yds.. **1.25** Delivered 1.35

THE "CLIMAX"

These Double Multiplying Reels are particularly suitable for heavy salt water fishing, the gears being cut extra heavy. They all have balanced handles, adjustable sliding click and drag.

They are made all metal with heavy nickel plated side plates.

No. **206.** All metal, 150 yds....**$1.45** No. **208.** All metal, 250 yds....**$1.75**



THE "CORONADO"

This is a very good quality reel, being made with solid rubber side plates and nickel plated spools. The pivots are fine quality steel which insures long life and easy running qualities. It is double multiplying and the crank is evenly balanced. The handle is made of rubber and is the correct shape and size for handling heavy fish. The sliding click and reel seat plate are built extra strong.

No. **406.** 150 yards. Pillar 2 inches, disc 2 13/16 inches, each.....**$2.75**
No. **407.** 200 yards. Pillar 2 inches, disc 3 1/16 inches, each..... **3.25**
No. **408.** 250 yards. Pillar 2 1/16 inches, disc 3 5/16 inches, each..... **3.75**
No. **409.** 300 yards. Pillar 2 1/16 inches, disc 3⅝ inches, each..... **4.25**

THE "IDLEWILD" SURF CASTING

Similar to the "Coronado", but with strong metal side plates.

No. **107.** 200 yards. Pillar 2 inches, disc 3⅛ inches.....Each **$2.50**
No. **109.** 300 yards. Pillar 2 inches, disc 3¾ inches.....Each **3.00**

Smooth

No. 603C 8 inches, 1¾ inch cutter, weight each 3 pounds, each $2 30
No. 604C 9 inches, 2 inch cutter, weight each 3½ pounds, each 2 50
No. 604½C 10 inches, 2¼ inch cutter, weight each 4½ pounds, each 3 00

Jack, Fore and Jointer

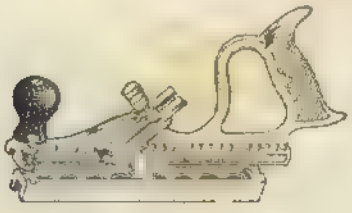
No. 605C Jack, 14 inches, 2 inch cutter, weight each 4½ pounds, each $3 00
No. 606C Fore, 18 inches, 2⅜ inch cutter, weight each 7½ pounds, each 3 75
No. 607C Jointer, 22 inches, 2⅜ inch cutter, weight each 7¾ pounds, each 4 40

STANLEY MISCELLANEOUS PLANES

Improved Rabbet

No. 190 8 inches, 1½ inch cutter, with spur, weight each 2½ pounds each $1.25
No. 191 8 inches, 1¼ inch cutter, with spur, weight each 2¼ pounds, each 1.25
No. 192 8 inches, 1 inch cutter, with spur, weight each 2 pounds, each 1.25
Extra cutters, each ..... .20

This plane will lie perfectly flat on either side and can be used equally well with right or left hand while planing into corners or up against perpendicular surfaces. Fitted with detachable depth gauge



Tonguing and Grooving

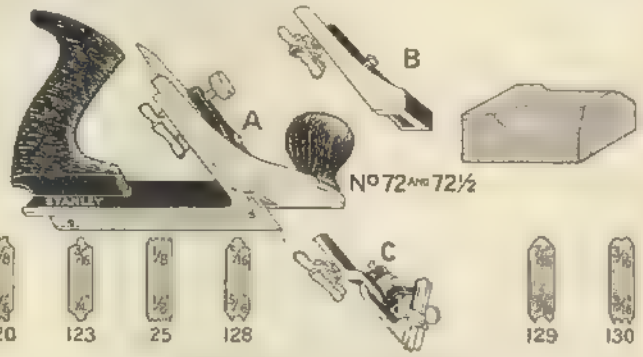
No. 48 Cuts ⅜ inch groove on ¾ to 1¼ inch boards, weight each 3 pounds each $2 75
No. 49 Cuts ⅜ inch groove on ½ to ¾ inch boards, weight each 3 pounds each 2 75
Extra cutters, each ..... .20

This form has two plow cutters of the same width, and one extra wide cutter. The fence in one setting exposes two cutters for cutting the tongue, and, when reversed, leaves only one exposed for cutting the groove. On thicker boards than the plane works on center, the extra wide cutter is substituted for groove cutter when cutting tongue. Nickel plated. Rosewood knobs.

Rabbet and Filletster

No. 78 8½ inches, 1⅛ inch cutter, weight each 3 pounds, each $1.65
Extra cutters, each ..... .20

This plane has two seats for the cutter, one for regular work and the other where a bull nose is required. It has a spur and a removable depth gauge. The adjustable fence can be used on either side and slides under the bottom, regulating the width of the cut.



Adjustable Chamfer Plane

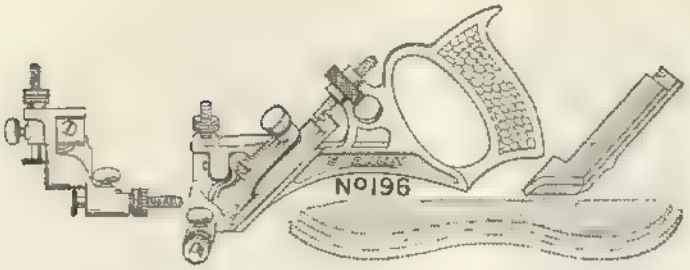
No. 72 9 inches, 1⅝ inch cutter, japanned, weight each 3½ pounds, each $2.20
No. 72½ 9 inches, 1⅝ inch cutter, 6 moulding cutters, weight each 4¼ pounds, each 3.30
Extra cutters, each ..... .05

This plane will do perfect chamfer or stop-chamfer work. It has a ninety degree V bottom which acts as a mitre guide. To this is attached an adjustable front "A" having a flat bottom which carries the cutter; this front can be set for different sizes of chamfer. Front "A" can be readily detached and a bull nose front "B" (furnished with the plane) substituted, permitting the plane to be worked close up into corners. Rosewood handle and knob

An additional front section "C" can be substituted for either "A" or "B." This attachment, together with 6 moulding cutters sharpened at both ends, makes possible the working of a variety of ornamental forms. With this front the plane is known as No. 72½. Extra moulding cutters 5 cents each.

STANLEY MISCELLANEOUS PLANES

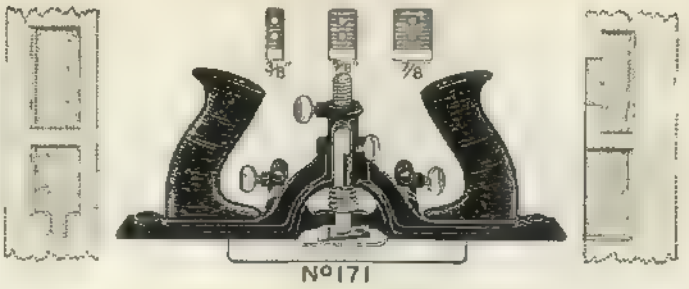
CURVE RABBET PLANE



This tool will cut rabbets on circular or other curved and irregular edges. It works equally well whether the rabbet is to be cut on the outside edges of the work or on the edges of openings cut out of the surface of the work. It is provided with two cutters fastened together by a screw in such relation one to the other as the work in hand requires. The upper cutter acts as a spur for the lower and also cuts the side of the rabbet. The lower cutter is a skew cutter which follows the spur and cleanly cuts the bottom of the rabbet. The stock and handle are cast in one piece. The plane is fitted with an adjustable depth gauge. The fence is also adjustable and has a curved face.

No. 196 9 inches long, nickel plated, weight 3 pounds, each $4 00

STANLEY DOOR TRIM PLANE



This new plane will make mortises for butts, face plates, strike plates, escutcheons, etc., up to a depth of ⅝ and a width of 3 inches. Its original feature is the method of mounting the cutter, which can be instantly set to work from either end of the plane or across it. In addition, the cutter is cushioned by a spring which prevents taking a heavier chip than can be easily carried. A fence regulates the position of the cut and insures the sides of the cut being parallel. The depth of the cut is governed by a positive stop.

By removing the fence and locking the cutter post with the thumb screw instead of using the spring a very superior router plane is obtained. The bottom is designed so that an extra wooden bottom of any size desired can be screwed on, enabling the user to router on large openings. The two handles as shown in the illustration are of rosewood. Three forged steel cutters ⅜, ½ and ⅝ inch wide are furnished with the tool.

No. 171 11 inches long, japanned, weight 3 pounds, each.. $2 75
Extra cutters, per set... 40

SKEW CUTTER FILLETSTER AND RABBET PLANE

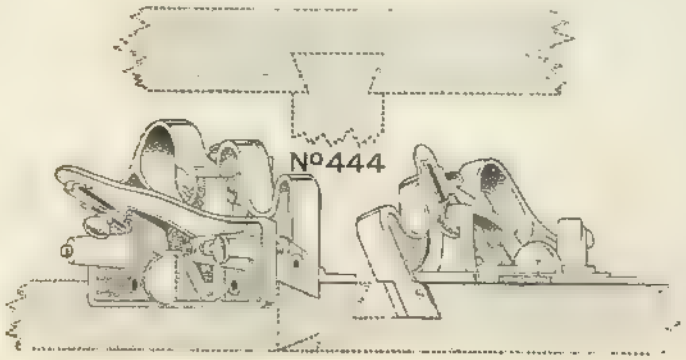
This plane has an extra wide skew cutter. An adjustable spur is fitted to each side. The fence and depth gauge can be attached to either side; the plane is therefore suitable for right or left hand work. The adjustable fence slides under the bottom, regulating the width of the cut. Remove arms and fence, and a skew cutter rabbet plane is obtained.

No. 289 8½ inches long, 1¾ inch cutter, japanned, weight 3¼ pounds, each..... $1 75
Extra cutters, per set... 30

STANLEY EDGE TRIMMING PLANE

Designed especially for trimming or smoothing the ends of boards such as sidings, etc., for a square or close fit. It has a right angle rest or guide from the cutter edge and the cutter works on a skew, giving an easy shaving cut. In the rest or guide are two screw holes to which wood blocks of various bevels may be attached, enabling the user to make a slanting cut.

No. 95 6 inches long, ⅜ inch cutter, japanned, weight 1¼ pounds, each $1 15
Extra cutters, per set.... 30



STANLEY DOVETAIL TONGUE AND GROOVE PLANE

This novel tool accomplishes a result sought for many years by woodworkers in general, namely, to form a dovetail tongue and groove with one hand tool.

It will cut any size grooves and tongues to fit with sides at flare of 20 degrees, where the width of the neck is more than one-quarter of an inch and the depth of groove not more than three-quarters of an inch. The tongue and groove are cut separately, and can be made with parallel or tapering sides. A circular containing instructions for assembling and operating is packed with each tool, or will be sent upon request. This circular also gives valuable suggestions as to the use of dovetail joints.

The compactness of the tool is shown in the illustration, where the cut on the left shows the plane assembled for cutting the tongue, and that on the right the plane assembled for cutting the groove.

No. 444 9 inches long, nickel plated, weight 6 pounds, each $6.00

STANLEY MISCELLANEOUS PLANES

BELT MAKERS' PLANE

No. 11 Adjustable, 5½ inches long, 2⅛ inch cutter, weight each 3½ pounds, each $2.20

This plane is used by belt makers for chamfering down the ends or laps of belts before fastening them together.

VENEER SCRAPER

No. 12 Adjustable, 6¼ inches long, 3 inch cutter, weight each 3¾ pounds, each $2.40

Rosewood handles with double grip. Blades are adjustable endwise and for angle, and can be firmly locked in position desired.

WOODWORKERS' ROUTER PLANE

This plane is adapted to smooth the bottom of grooves, panels or all depressions below the surface of any woodwork. It has an adjustment for regulating the thickness of the chip, and a screw attachment for closing the throat for use on narrow surfaces. A ¼ and ⅛ inch cutter are furnished with each plane. Cutters have screw adjustment, and can be held as shown in illustrations or on the back of the cutter post for bull nose work.

No. 71 7½ inches long, nickel plated, weight 2⅝ pounds . . . . . each, $2.05

VENEER SCRAPER PLANES

This tool is used for scraping and finishing veneers or cabinet work. It can be used equally well as a Tooth Plane, and will do excellent work in scraping off old paint or glue. It is also useful in roughing up the surface of wood preparatory to applying veneer.

No. 112 Adjustable, 9 inches long, 3 inch blade, weight each 4 pounds . . . . . each, $2.10
Extra blades for scraping . . . . . each, .20
Extra tooth blades, 22, 28 or 32 teeth to the inch . . . . . each, .30

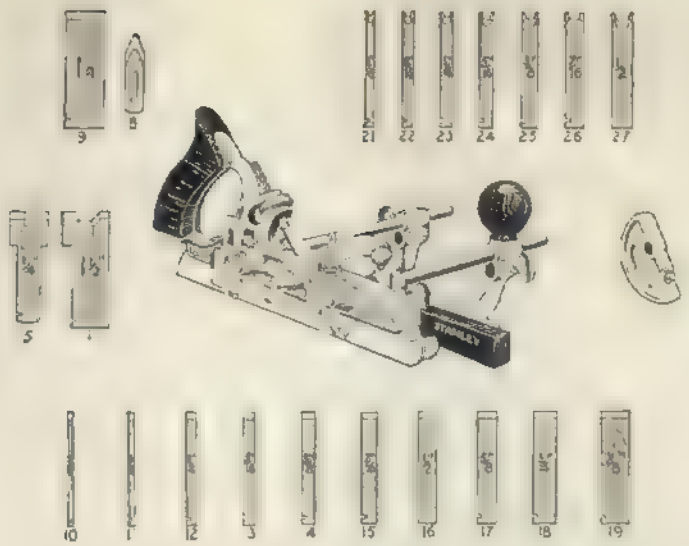
STANLEY "FORTY-FIVE" PLANE



Seven tools in one in compact and practical form. 1 Beading and Center Beading Plane. 2. Plow. 3. Dado. 4. Rabbet and Filletster. 5. Match Plane. 6. Sash Plane. 7. Slitting Plane.

The plane has two principal parts, a main stock and a sliding section. The main stock carries the handle, cutter adjustment, a slitting tool, depth gauge, and forms a bearing for one edge of the cutter. The sliding section slides on two arms secured in the stock and has a bearing for the other edge, allowing cutters of different widths to be used. A fence also slides on these arms for use when working as a plow, beader or filletster, to gauge the distance from the cutter to the edge of the board, and to keep the cutter at right angles to same. When used as a filletster, the fence slides under the bottom of the plane and determines the width of cutter exposed to the work.

The plane is fitted with spurs for use across the grain, etc., and can be used either right or left hand. The handle, knob and fence are made of selected rosewood.

For beading at a distance from the edge of a board, attach cam rest (see cut at right of plane) to the front arm between the sliding section and fence to prevent the fence sagging. In certain work it is useful to attach the cam rest to the rear arm to prevent the plane from rocking. The plane together with its 21 cutters is packed in a steel box.

No. 45 Nickel plated, with 21 cutters, weight each 9¼ pounds, each $7 00

CUTTERS FURNISHED WITH "FORTY-FIVE" PLANE

The following cutters are furnished with each plane. The price is given in case duplicates should be required.

		Each
No. 1	1⅜ inch sash tool.	$0 [illegible]
No. 5	⅝ inch match tool	.50

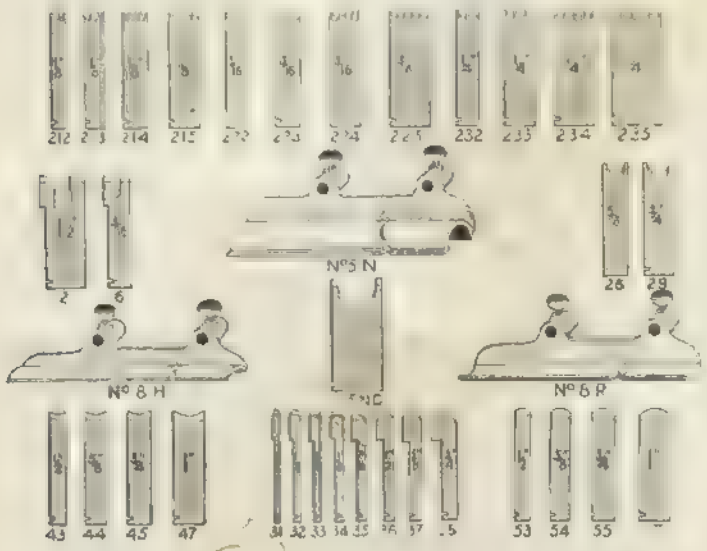
No. 26	⅛ inch beading tool	25
No. 27	½ inch beading tool	25



SPECIAL BOTTOMS FOR "FORTY-FIVE" PLANE

In order to work hollows and rounds, or a nosing cutter in the No. 45 plane, it is necessary to substitute for the sliding section specially formed bottoms which are called by the same name as the cutters they are designed to carry, that is: Hollows, rounds or nosing tools.

A hollow and its cutters will form a ROUND on the moulding being worked. A round and its cutters will form a HOLLOW. A nosing tool and its cutters will form what might be called an exaggerated round. It is very largely used for shaping the edges of stair treads. Hollows and rounds are made in four sizes and are usually sold in sets, a set comprising one hollow, one round and two cutters. The price of a nosing tool includes one cutter. Extra nosing tool cutters (5 N C) $0 25 each.

No. 6 Hollow and round, ½ inch cutters, work [illegible] circle, per pair $1 40
No. 8 Hollow and round, ⅝ inch cutters, work [illegible] circle, per pair 1 40
No. 10 Hollow and round, ¾ inch cutters, work [illegible] circle, per pair 1 50

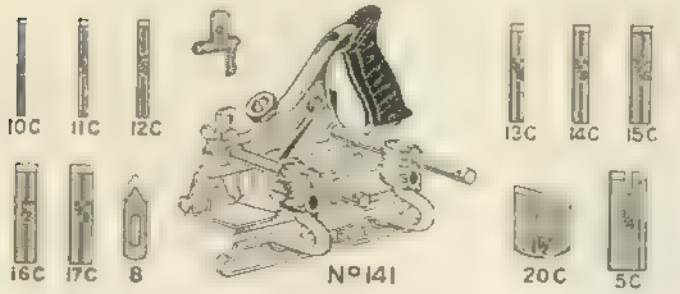
STANLEY COMBINATION PLANES

BULL NOSE PLOW, FILLETSTER AND MATCHING PLANE



This plane has two interchangeable front parts that make it either an ordinary plow or a bull nose plow. With the bull nose attachment the cutter will easily work up to and into a ½ inch hole or any larger size, as in sash fitting, stair work, etc. It consists of a main stock, carrying a spur, depth gauge and slitting cutter (this stock accommodates plow cutters of different widths), a fence which can be set for either plow or filletster work, and a separate filletster bottom. It has a rosewood handle.

The cutters comprise 8 plow bits, 1/16, 1/8, 3/16, 1/4, 5/16, 3/8, 1/2 and 5/8 inch, a 1½ inch filletster cutter, a ¼ inch tonguing tool, and a slitting cutter.

No. 141 9¼ inches long, nickel plated, 11 cutters, weight 5½ pounds, each.....$5.00

PLOW, DADO, FILLETSTER AND MATCHING PLANE

Skew cutters are the feature of this plane. It consists of a main stock carrying a spur, a depth gauge and a slitting cutter, a sliding section carrying a spur and forming an extra sole for the plane, and a fence (rosewood face) which can be set for either plow or filletster work. It has a rosewood handle and knob

The cutters comprise 8 plow and dado bits, 1/16, 1/8, 3/16, 1/4, 5/16, 3/8 and 1¼ inch, a 1½ inch filletster cutter, a ¼ inch tonguing tool, and a slitting cutter.

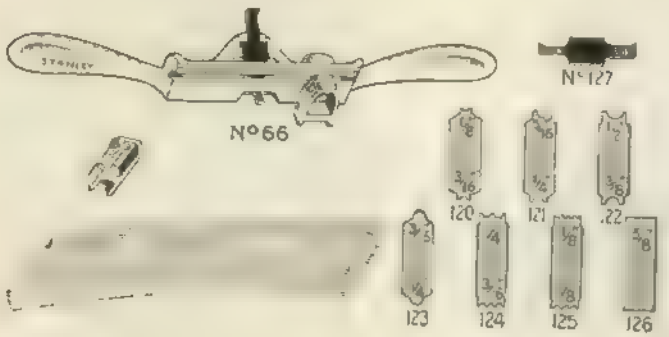
No. 46 10½ inches long, nickel plated, 11 cutters weight 5¼ pounds, each.....$5 00

DADO PLANE

This is the main stock with spur, slitting tool, depth gauge, and the sliding section with spur, used in plane No. 46, but without the fence, and with fewer cutters.

The cutters comprise 5 dado bits, 3/16, 1/4, 5/16, 3/8 and 1¼ inch, and a slitting cutter.

No. 47 10½ inches long, nickel plated, 6 cutters, weight 3¾ pounds, each.....$4 00



"UNIVERSAL" TWO HANDED BEADER

This is an excellent tool for beading, reeding or fluting straight or irregular surfaces, and for light routering. The sample illustrated shows some of the work that can be done with its use. With each beader are furnished a square gauge for straight work and an oval gauge for curved work. There are also furnished eight cutters sharpened at both ends and embracing the following assortment, 6 single beads, 1/16, 1/8, 3/16, 1/4, 5/16 and 1/2 inches, 2 fluting tools 1/8 and 1/4 inches, 4 reeding tools (2 beads 1/8 inch, 3 beads 1/4 inch, and 3 beads 1/8 inch, and 4 beads 1/8 inch), 2 routers 1/8 and 1/4 inch, and a 3/8 inch blank, which latter cutter the owner can file up as he desires.

The handles are curved so as to insure ample room between the workman's hands and the surface of the work. Made entirely of metal. Extra moulding cutters 5 cents each.

No. 66 11½ inches long, 8 cutters, nickel plated, weight 1⅜ pounds, each.....$1.00

STANLEY RABBET PLANES

CARRIAGE MAKERS' RABBET

No. 10½

Especially adapted for the heavy framing required in mining work, for carriage or wagon building, or any work of similar nature

No. 10½ 9 inches, 2⅛ inch cutter, weight each 3 pounds, each.....$2 50

SIDE RABBET PLANES

These will be found to be very convenient for side-rabbeting and trimming dadoes, mouldings and grooves of all sorts A reversible nose-piece gives the tool a form whereby it will work close up into corners when required. They have rosewood knobs and are nickel plated.

No. 98 4 inches long, ½ inch cutter, right hand, weight ½ pound, each.....$1 00

No. 99 4 inches long ½ inch cutter, left hand weight ½ pound, each.....1 00

ADJUSTABLE IRON PLANES

STANLEY'S BED ROCK

This Plane, owing to its solidity and variety of adjustments, surpasses all others for fine work on all woods.

The cutter, frog and bottom are so designed, machined and fitted that they are practically one solid piece of metal, thus preventing any chance of vibration.

Particular attention is called to the shape of the sides. This new and distinctive feature adds greatly to the strength of the plane as well as affording large bearing surfaces when the plane is used on its sides

The frog may be adjusted either forward or backward without removing the lever and cutter, simply slacken the tension of the two frog clamping screws "B", and with a screw driver adjust the frog desired by means of the frog adjusting screw "C" in the center, and then tighten the frog clamp screws (see cut.)

The frog is held to its seat by means of two pins "A" of large diameter, each of these has a tapered hole near the lower end

The two frog clamping screws "B" have tapered points. These points fit in the holes in the pins "A". The center of the tapered hole in these pins is slightly above the center line of the frog clamping screws, so that when these screws are driven in, they produce the effect of a wedge drawing the pins downward and clamping the frog absolutely rigid in its place.

If, for any reason, the frog pins "A" should be taken out of the plane, care must be used in replacing them to see that the tapered holes come in line with the points of the frog clamping screws "B".

The cutter is the regular "Bailey" cutter and is adjustable both endwise and sidewise.

The handle and knob are of well seasoned rosewood. The shape of the knob has recently been changed, the new shape allowing a firmer and easier grip.

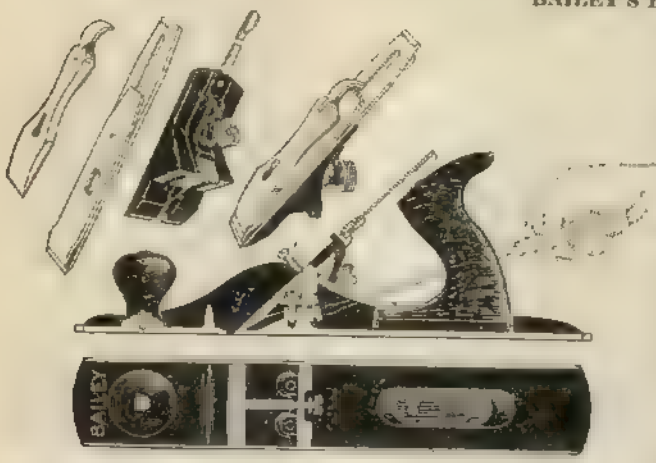
All Above, One in a Box.

ADJUSTABLE IRON PLANES

BAILEY'S BENCH



The Planes described below, generally known as Bench Planes, are divided into four classes, namely: Smooth, Jack, Fore and Jointer.

A Smooth Plane is for finishing or smoothing off flat surfaces. Where the uneven spots are of slight area, its short length will permit it to locate these irregularities, leaving the work with a smooth surface when finished.

A Jack Plane is used to true up the edges of a board in the rough and prepare it for the Force or Jointer

A Fore Plane is simply a short Jointer, and being lighter, is preferred by some workmen to the longer plane.

A Jointer is a finishing Plane for large surfaces and is invariably used to true up the edges of boards so that they can be closely fitted or joined together.

"Bailey" Iron Planes have been in use for nearly fifty years and are the recognized standard for planes of this type While retaining all the original features, many valuable improvements in construction have been added from time to time. Only the finest materials and the best workmanship are used in their manufacture.

In the illustration the detail of construction is very clearly shown. Note that the frog has a support directly at the rear of the mouth, making practically one solid piece from the cap to the bottom. The sides and bottom of the plane are stiffened by means of the cross ribs The screw bosses on each side of the center rib are very deep allowing a number of threads to engage, thereby securely holding the frog The design prevents the plane being drawn out of true when the face of the frog is screwed up hard

The width of the mouth may be regulated and made wider or narrower as coarse or fine work may require First remove the lever and cutter and loosen the two frog screws that fasten the frog to its seat With a screw driver turn the center adjusting screw (see cut) to the right to close the mouth, and to the left to open it When the frog is in the position desired, tighten the frog screws and replace the cutter and lever.

The cutter which is thin and of uniform thickness, is a prominent feature of the "Bailey" Plane

Briefly its advantages are 1 Ease in grinding 2 Less grinding, as a thin cutter can be kept in condition by honing 3 Less tendency to 'stub off' the cutting edge when honing hence the original bevel is kept much longer

The cutter is adjustable endwise by means of the adjusting wheel at the back of the frog It is also adjustable sidewise by lever located near the top and at the back of the cutter.

It is made of the finest quality English steel, tempered and ground by an improved process, and honed ready for use

The handle and knob are made of highly finished, thoroughly seasoned rosewood.

All genuine "Bailey" Planes have the name "Bailey" cast in the bottom, and the name Stanley is stamped on the cutter

AUTOMOBILE SUPPLY SIGNS.

A PATHFINDER TO PROFIT.

WEAR AND TEAR BRING ACCIDENTS ACCIDENTS DEMAND REPAIRS.

"Where can I get supplies?"
"That hardware store had a sign."

A wide field has opened to the hardware man. Motor travel has spread through the cities of each state and countrywards. Power driven vehicles crowd the city boulevards. Each village has a dozen cars or so. The SALE comes right to YOUR door.

Bright windows attract prospective customers. The hardware window is everywhere. Tires tool boxes, weed shields, tops horns robes, speedometers, spark plugs, funnels goggles, racks, patches, pumps, clocks lamps, magnetos, batteries for "this rapidly growing class of trade." Surely this is YOUR trade.

We have a stock that is fresh and varied. Our experience insures you right prices. To succeed ourselves we must have your success. We're going to help you.

THIS IS OUR OFFER.

We will give the handsome sign illustrated above to each of our customers who will place with us an order for Automobile Accessories amounting to $75.00 or more.

This sign is of durable steel, 19x60 in., lithographed in toned colors and edged in a selected wood frame. The Pennsylvania vacuum cup casing appears in its natural gray, the words "Auto Supplies" are lined in yellow, shaded in borders of red and black. The Stewart speedometer as shown in brass finish, and the whole backed up on a field of rich green. Each sign is worth $15.00. The quantity is limited and they are going fast. Exhaustion of our present supply will terminate this offer. Please place your orders now.

"DIAMOND EDGE IS A QUALITY PLEDGE"

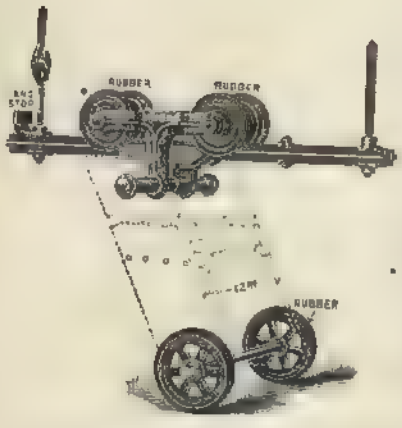
*STORE LADDERS

THE MYERS CUSHION TIRE



Ladder and trolley, complete, each.... .. $20.00
Track complete, with hangers, per foot. . . .30

The ladder is constructed of the best clear Georgia pine, nicely finished and varnished, showing the natural wood. Has open panel sides, 5 inches wide. Steps have 3½ inch tread. The ladder measures 12 inches over all in width.

The track is double angle steel rail, which is very neat and strong, and is suspended from ceiling by means of lag screws, either jointed or rigid, or by flanged plates and wood screws.

The trolley is self adjusting, fitted with turned steel bearings and 3 inch anti rattler wheels, turned and bored on lathe and fitted with special rubber tires.

The floor travelers are 5 inches in diameter, composed of metal discs with rubber cushion tires clamped in such a position as to be impossible to get off or come loose. These wheels are placed on a steel axle.

Directions for Fitting Store Ladder

Give the exact height of the ceiling and the length of each track, and all the fitting will be done at the factory. If the height of the ceiling varies, give the height of ceiling at each end and center of each run of track.

Cut illustrates a view of the Myers Cushion Tire Store Ladder, showing the track, hanging hook, end-stop, upper and lower trolleys, all complete mounted ready for use.

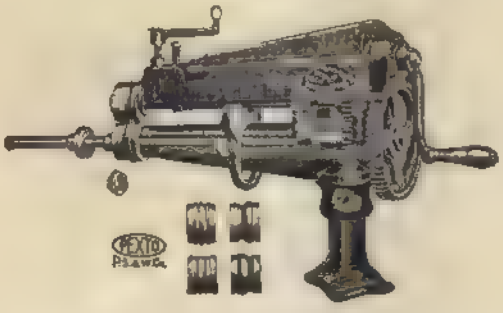
TINNERS' MACHINES

BEADING



For No. 20 Iron and Lighter.

Each

No. 617—Depth of Throat to Frame 13 in., to Gauge 13 in., Distance Between Shaft Centers 2⅝ in., with Three Pairs of Rolls, 2¾ in. Diameter, 1⅛ in. Wide, Ratio of Gearing 3½ to 1, Size of Beads, ⅜ in. Single, 1 in. Ogee, 1 in. Triple, with Wedge Bench Standard, Wt Each 140 Lbs. . . . . $. . .

No. 619—Depth of Throat to Frame 7½ in., to Gauge 6¾ in , Distance Between Shaft Centers 2¼ in., with Three Pairs of Rolls, 2¼ in Diameter, 1⅛ in. Wide, Ratio of Gearing 2½ to 1, Size of Beads, 1/8 in. Single, ⅛ in. Ogee, ⅜ in. Triple, with Wedge Bench Standard, Wt. Each 85 Lbs. . . . . .

RAPID CRIMPING AND BEADING MACHINES

The construction throughout of this machine is exceedingly strong and rigid, and permits of easy and rapid adjustment

Actual tests have demonstrated that for crimping or beading stove pipe, elbows, furnace pipe etc , this type of machine is vastly superior to any other built for the purpose

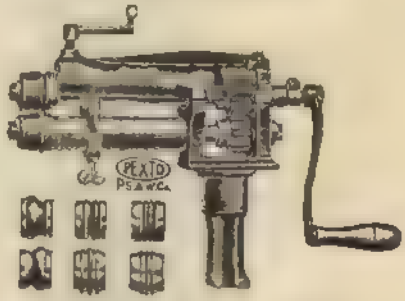
The depression of rolls is accomplished by a foot treadle The contact of the upper beading roll is adjusted by a lever, and this lever also gives an independdent adjustment for raising upper beading roll, taking same out of contact with lower roll, in case crimping only is desired The adjustment of this lever is effected by means of an eccentric device, and is instantaneous in action. This greatly increases the simplicity of this machine, as crimping alone can be done without substituting blank collars for beading rolls. The crank is adjustable for light or heavy work.

For No. 24 Iron and Lighter.

Each

No. 602—With Standard, Weight Each About 38 Lbs . . . . . $. . .

STOW'S BEADING



For No. 26 Iron and Lighter.

Each

No. 620—Depth of Throat to Frame 6¼ in., to Gauge 5½ in., Distance Between Shaft Centers 1⅞ in., with Four Pairs of Rolls, 1¼ in. Diameter, 1⅛ in Wide, Size of Beads ⅝ in. Ogee, ⅝ in. Triple, ½ in. Coffee Pot, 1/8 in Single, with Standard, Weight Each 50 Lbs. . . . . $ . . .

No. 621—Depth of Throat to Frame 4¾ in . to Gauge 4 in., Distance Between Shaft Centers 1 1/16 in., with Five Pairs of Rolls, 1½ in. Diameter, 1 in. Wide, Size of Beads 1/16 in. Ogee, ⅜ in. Triple Coffee Pot, ⅛ in. Double, 1/8 in Astragal and ⅛ in. Single, with Standard. Weight Each 40 Lbs. . . . . $. . .

COMBINED STOVE PIPE CRIMPER AND BEADER

Cut Shows Crimp and Bead as Made on Crimper and Beader No. 585.

For No. 20 Iron and Lighter.

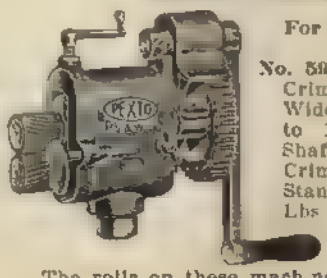
Each

No. 585—1⅜ in Diameter Bead Rolls, 1 in Wide, 1¼ in. Diameter Crimping Rolls, 1¾ in. Wide, 1/8 in. Ogee Bead, Ratio of Gearings 3 to 1, 1¾ in. Between Shaft Centers, Spiral Crimping Rolls, with Standard, and One Pair Blank Collars to Substitute for Beading Rolls when Crimping Alone is Desired, Wt. Each 65 Lbs. . $. . . . .

No. 586—With Straight Crimping Rolls, Otherwise Same as No. 585 . . . . . .

These machines are adjustable for two speeds. Geared for heavy work and may be run direct on light iron.

CORNICE MAKERS' CRIMPER



For No. 20 Iron and Lighter.

Per Dozen

No. 591—1¼ in. Diameter Crimping Rolls, 1¾ in. Wide, Ratio of Gearing 3 to 1, 1¾ in. Between Shaft Centers, Spiral Crimping Rolls, with Standard, Weight Each 63 Lbs . . . . $ . . .

The rolls on these machines are attached to arbor in a manner that leaves the ends or faces of the rolls flush for crimping close up to a bead or angle

TINNERS' MACHINES

COLUMBIAN WIRING

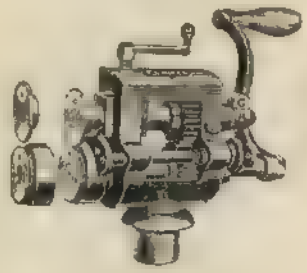
These machines are made from heavy patterns and with the proper rolls and gauges they are suited for a variety of operations. Machine cut steel connecting gears are used and the driving gears are cut from solid cast iron. Frames are extra heavy and the machine throughout is proportioned for giving the very best satisfaction up to the full rated capacity.

COLUMBIAN TURNING



For No. 22 Iron and Lighter.

Small.

2⅛ in. Diameter Rolls, for ⅛ in to ¼ in Wire, with Extra Upper and Lower Roll.

In Presenting to You our 30 Styles de Luxe Special Attention to a Few Facts for Your Careful Consideration in Deciding on what Toys will meet with a Ready Sale and Give the Best Satisfaction. We Guarantee our Toys to Come Up to Your Highest Expectations in Every Respects for the following Reasons.

We Use Only [illegible]

Our Double Friction Toys are [illegible] New Double Size Runners Wheels, which are the Best and Most Substantial Ever Used on Friction Toys, and as a Result are Perfectly True, Assuring Absolute Toys to Operate Successfully.

Our Double [illegible] are Enameled inside as well as Outside, [illegible] ing them a Complete Finish and Fine Appearance when in use Position.

Our Toys are [illegible] Supplied with Steel Flagpoles which can be [illegible] Successfully Fastened to the Toys If Desired.

Our Toys [illegible] are Kept Strictly Up-to-date in Every Particular.

In Short Our Double Friction and Mechanical Toys are Popular and in Demand Because of their Newness, Modern Mechanical Construction, Complete Finish, Warranted Durability and Superior Running Qualities.

DIRECTIONS FOR OPERATING DOUBLE FRICTION TOYS

Start the Toy Slowly by the Floor or Carpet by Giving it a Gentle Down Push, so that the Wheels do Not Slip. Lift the Toy off the Floor or Carpet at the End of Each Push and Repeat the Operation. The Faster Each Time until the Desired Speed is Secured, the better [illegible]

ASHLEY & JAMES

[illegible] Made in the Newest and Most Popular Design. Each Locomotive is Fitted with a Set of Double Friction Power Movement. Each Locomotive is Fitted with a Set of Double Friction Power Movement. Each Locomotive is Fitted with a Set of Double Friction Power Movement

Make the little boy or girl happy—just what they want—durable, well constructed and of good quality—prices exceptionally low

SNARE DRUMS

These Drums are positively the Best made and are fully guaranteed. Those listed are our own make and are the product of the largest musical instrument factory in existence. They contain certain features (covered by letters patent) which are not found in other makes, although they are closely imitated on all sides. We use only the very best material obtainable and hoops and flesh hoops are properly fitted, so that there is hardly a possible chance to warp or get out of shape. They are used and endorsed by the World's Greatest Concert Bands and Leading Professionals. Drummers consequently their reputation is achieved solely on their intrinsic merits.

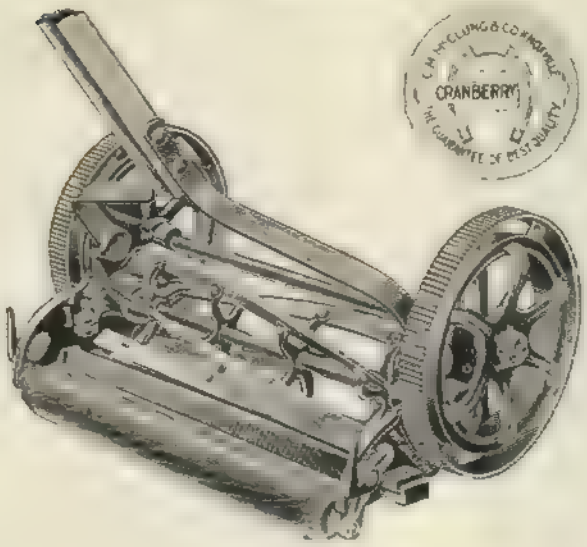
LAWN MOWERS

NEW CRANBERRY

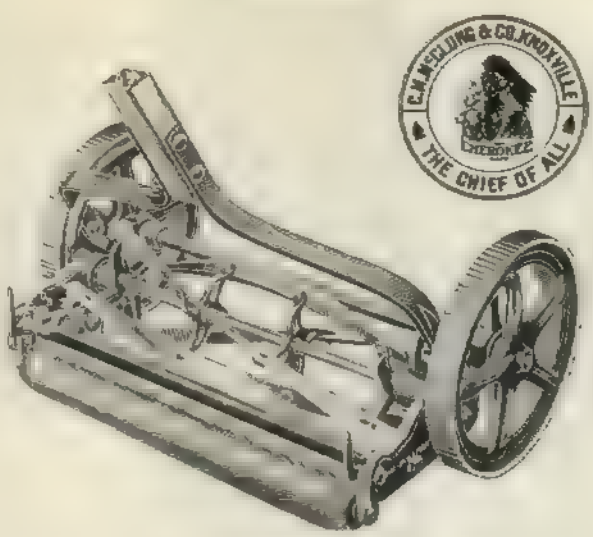


Ball Bearing, Five Blade Reel

Size, inches	14	16	18	20
Weight, pounds	78	82	86	92
Each	$12.50	13.50	14.50	15.50

Eleven inch drive wheels, reel and blades of special manganese steel. The cutter bar blade is made of crucible tool steel. It has a turned up, hardened lip, making it self sharpening. The balls, cup and cones are hardened steel, dust proof. Has extra strong ratchet clutch. Easily set and locked. An easy running, strictly high grade machine. Handsomely painted

CHEROKEE

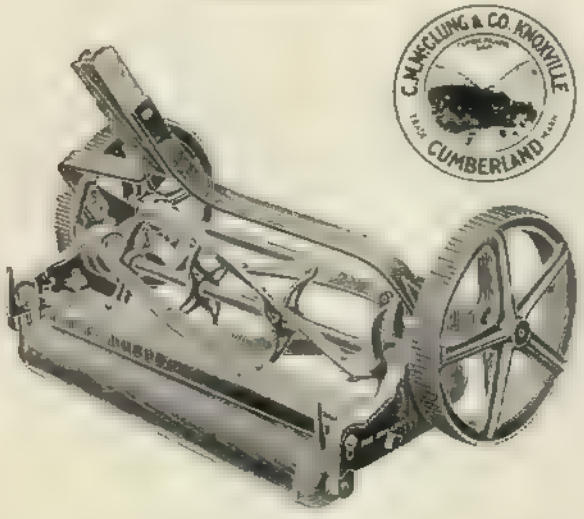


Ball Bearing, Four Blade Reel

Size, inches	14	16	18
Weight, pounds	68	70	73
Each	$10.00	10.50	11.00

Ten inch drive wheels, patent ball bearing adjustment, extra strong ratchet clutch with full length pins. Wheels are fitted with solid hubs and oil retaining chamber. Handles are selected hard maple. These machines are pleasing in design and finish, first class in all particulars.

CUMBERLAND

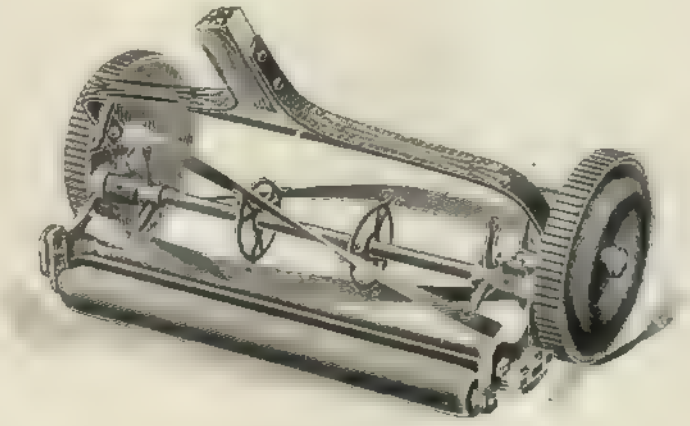


Ball Bearing, Four Blade Reel

Size, inches	14	16	18
Weight, pounds	50	52	54
Each	$8.00	8.50	9.00

Nine inch drive wheels. A fair price mower of exceptional merit. Well made throughout and finished.

JACKSON



Three Blade Reel

Size, inches	12	14	16
Weight, pounds	45	47	49
Each	$4.50	5.00	5.50

Eight inch drive wheels. This is a well built mower of good material at a low price. Nicely finished and will give satisfactory service.

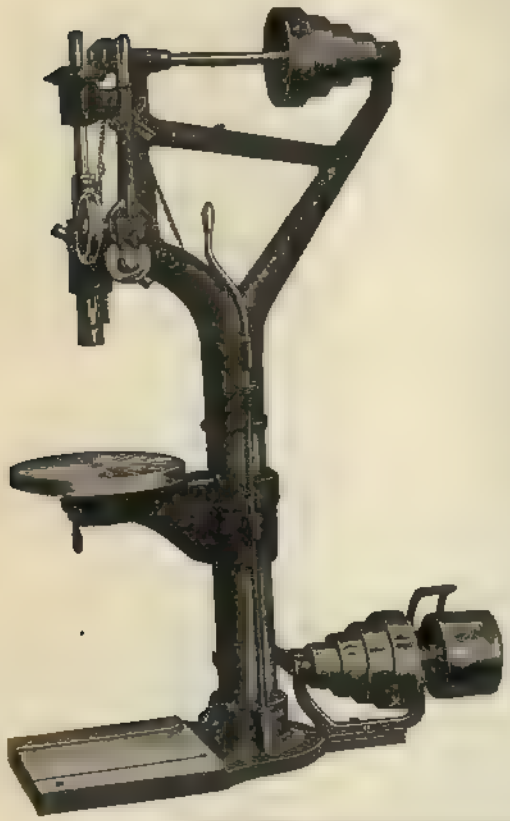
UPRIGHT POWER DRILLS

SILVER'S 20 INCH SWING DRILL

Combined Lever and Wheel Feed.



The Combined Lever and Wheel Feed Drills permit either the lever or the wheel to be used, without affecting the other.

The patterns from which these drills are made are entirely new and the designs insure great strength and efficiency, also convenience of operation. They are well adapted to meet the up-to-date and exacting requirements of modern machine shop practice

Bevel Gears are accurately cut from solid blanks, the cog rack is forged from steel and the teeth are milled to gauge.

The Quality of the Drill is indicated by its substantial appearance Every part is finished with special care and the materials used are the best procurable. All details have been carefully worked out. The top shaft has split bearings to permit of taking up wear.

Table has easy up-and-down adjustment and swings to either side.

When the tool is wanted only for drilling, the countershaft for it is provided with tight and loose pulleys, 8 in. diameter by 2¾ in. face, as shown in the accompanying engraving, and should make 200 revolutions per minute. For tapping and drilling, a friction countershaft is required.

Drive Shaft has tight and loose pulleys; turns 1⅜ times to 1 turn of spindle

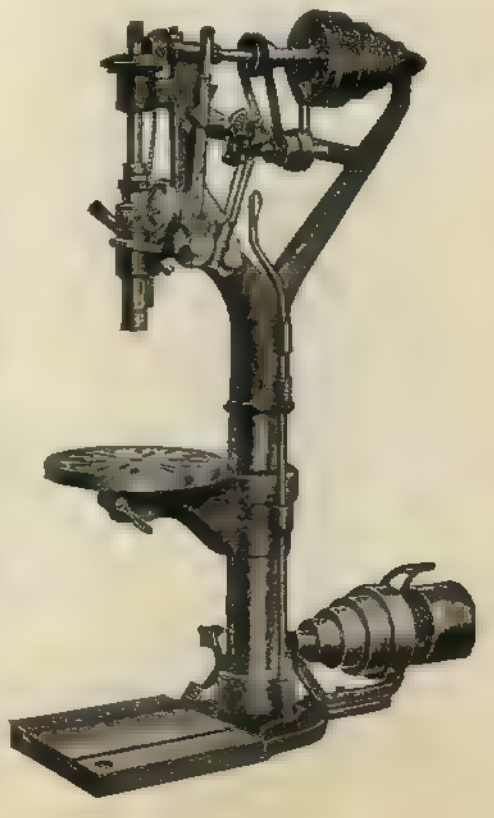
Square Base, Complete as Shown, Drive Shaft with Tight and Loose Pulleys.

Each

No. 858—68¼ in. High, 5½ in. Diam. Column, 16 in. Diam Table, 1⅜ in. Diam. Belt, 8x2¾ in. Tight and Loose Pulleys, Floor Space 46x16 in., Weight Each Crated 700 Lbs.....**$95 00**

SILVER'S 20 INCH SWING DRILL

Power Feed with Back Gears and Automatic Stop.



Particularly designed and adapted to meet the up-to-date and exacting requirements of modern machine shop practice.

The Back Gear Mechanism provides four slow speeds for heavier work, making a total of eight different speeds.

The Automatic Stop requires only to be started and will stop automatically wherever set, at any required depth. This action is entirely independent of the wheel or the lever feed; either of which can be used in addition.

In Quality, Design and Finish, these drills stand out strongly. New patterns throughout—every detail carefully worked out—materials the best procurable. Bevel gears are accurately cut from solid blanks, the cog rack is forged from steel and the teeth are milled to gauge. The top shaft has split bearings to permit of taking up wear.

Table has easy up-and-down adjustment and swings to either side

When the tool is wanted only for drilling, the countershaft for it is provided with tight and loose pulleys, 8 in. diameter by 2¾ in. face, as shown in the accompanying engraving, and should make 200 revolutions per minute. For tapping and drilling, a friction countershaft is required.

Drive Shaft has tight and loose pulleys; turns 1⅜ times to 1 turn of spindle.

Square Base, Complete as Shown, Drive Shaft with Tight and Loose Pulleys.

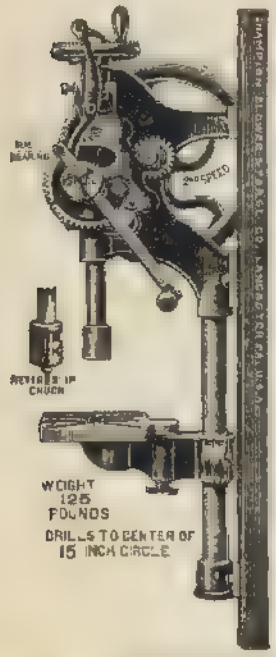
POST DRILLS



CHAMPION SELF-FEED

Ball Bearing.

A high grade up-to-date Back-Geared Drill with Double Journal Bearings to all gears.

Has two speeds

Spindle has end thrust ball bearings

All bearings are ground out of the solid metal.

No babbitt used on this drill.

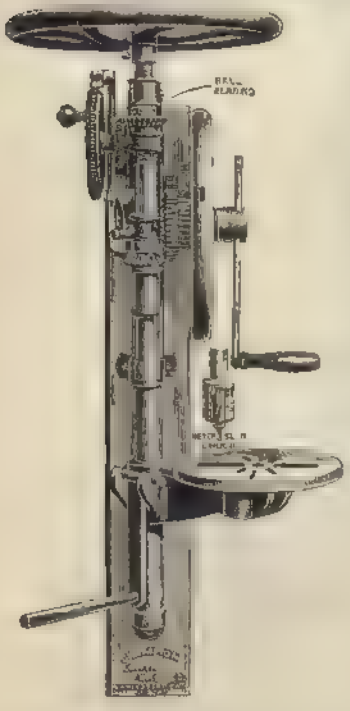
The end thrust ball bearings save 30 to 50 per cent in power and are made from the highest grade of lathe-turned tool steel.

Has automatic self-feed.

Champion Drills are all machine jigged, therefore all parts are absolutely standard and interchangeable.

	Each
No. 93 46½ in. High, Drills Holes Up to 1¼ in., Drills to Center of 15 in. Circle, 1⅛ in. Diameter Spindle with Up and Down Run of 3 in., Lathe Turned and Slotted Table Spindle Bored Like "Neverslip" Chuck for ½ in. Round Shank Drills, Weight Each 125 Lbs.	**$10.00**
Extra 6x2 in. Tight and Loose Pulleys—For Power, Should Run 250 Revolutions Per Minute	**3.00**

CHAMPION NEW BALL BEARING BLACK DIAMOND BLACKSMITH SELF-FEED



The gearing is designed for easy and quick running, being compounded for increasing power, making it a very powerful and desirable drill.

The side fly wheel in connection with the top fly wheel is very practical, when taking into consideration that both the fly wheels make two revolutions to each turn of the crank.

Has two speeds.

Crank turns same direction on first and second speed.

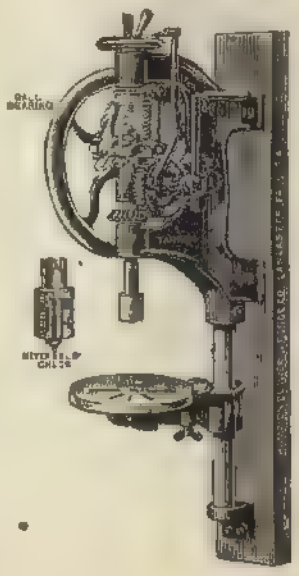
Spindle has end thrust ball bearings.

Has automatic self-feed.

No babbitt used on this drill

	Each
No. BB 56 in. High, Drills Holes Up to 1½ in., Drills to Center of 18 in. Circle, 1¼ in. Diameter Spindle with Up and Down Run of 4 in., Lathe Turned and Slotted Table, Spindle Bored Like "Neverslip" Chuck for ½ in. Round Shank Drills, Complete with Wheel Holder, Weight Each 255 Lbs.	**$24.00**
Extra 6x2 in. Tight and Loose Pulleys—For Power, Speed 105 R. P. M.	**4.00**

CHAMPION COMBINATION AUTOMATIC SELF-FEED AND DOUBLE COMPOUND LEVER FEED



Ball Bearings.

The automatic self-feed and double compound link and rack lever-feed are both independent of each other and are changed from one to the other in the fraction of a second

With either feed the drill spindle has instantaneous return of the drill bit out of the hole drilled and again instantaneous return on the material for the next hole hole.

This drill spindle and bit are positively always raised up or down while using either feed, by the use of a quick acting lever

It has two speeds with three gears, in order to give the second speed same turning direction of the crank as the first speed

The lever makes it especially convenient for wood boring.

	Each
No. 200 51 in. High, Drills Holes Up to 1¼ in., Drills to Center of 18 in. Circle, 1¼ in. Diameter Spindle, Up and Down Run of Spindle 4 in., Up and Down Run of Table 11 in., Spindle Bored Like "Neverslip" Chuck for ½ or ¾ in. Round Shank Drills, Weight Each 180 Lbs.	**$25.00**
Extra 6x2 in. Tight and Loose Pulleys—For Power, Should Run 250 R. P. M.	**3.00**

CYCLOMETERS, PEDOMETERS, SPEEDOMETERS, ETC.

CYCLOMETERS.

No. 16.

No. 17.

No. 6—Veeder, 28 in., registers 10,000 miles, nickel plated, length 1½ in., per dozen ..... JHAJ $13 50

No. 16—Veeder, trip 28 in., 10,000 miles, with independent trip cyclometer, which registers 100 miles and can be quickly set back to zero, nickel plated with 1⅝ in., per dozen ..... ABJJ $30.00

No. 17—Veeder, for motorcycles, 26 or 28 in., registers up to 10,000 miles, nickel plated, length 2 in., w't per doz. 4¼ lbs....per dozen BGJJ $45.00

The cyclometer mechanism is made stronger than the regular bicycle cyclometer and is designed to withstand the harder usage due to the high speed of motorcycles.

A much stronger type of star wheel is supplied and special friction is used which prevents the star wheel from spinning when going at a high rate of speed.

ONE IN A BOX.

BOY SCOUT HIKEMETERS.

Front. Back.

No. 77—Hikemeter and compass combined, gun metal finish, registers 100 miles, also each trip and can be reset, w't each 3 oz.,..each ABJ $2.00

This instrument measures accurately the distance you walk, and the compass indicates the direction. Will slip into vest pocket or garter. Can be accommodated to any length of step. Accurate and reliable, nothing to get out of order.

PEDOMETERS.

No. 7—American, nickel plated, diameter 1¾ in., registers 100 miles, each ..... ABJJ $1.70

Each step vibrates automatic mechanism, thus setting the cog wheels in motion and recording the distance walked by the wearer.

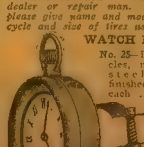
ONE IN A BOX.

CORBIN-BROWN MOTORCYCLE SPEEDOMETERS.

Model A M—Made of specially hardened steel and brass, cable is of best hardened steel, either front or rear attachment, w't each 9 lbs., each ..... ABJJ $15.00

This speedometer has no "die-cast" parts. The indicator registers with absolute accuracy, and is not affected by the temperature or electrical action. It is so adjusted that it will not wobble on a rough road and always remains steady. The speed indicator registers up to 80 miles an hour, has a season mileage recorder which totals one hundred thousand miles, and a trip odometer which registers up to 100 miles and resets by pressing reset pin at side. The Corbin-Brown speedometer is sold under a one year guarantee that is absolutely free from technicalities. Can be attached by any dealer or repair man. In ordering, please give name and model of motorcycle and size of tires used.

WATCH HOLDERS.



No. 25—For motorcyclet, nickel plated steel, bead fluffy finished, w't ½ lb., each ..... JDB $0.70

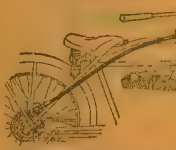
Substantially made for motorcycle or bicycle handle bars.

LOOSE.

STEWART MAGNETIC MOTORCYCLE SPEEDOMETERS.

Model 101—Front wheel drive is equipped with the new "solid tube" casing around the driving shaft. This "solid tube" obviates the trouble and breakage formerly experienced with the flexible shaft front drive, w't each 9½ lbs., each ..... JIFJ $12.00

ONE IN A BOX.



Model 101A—Rear wheel drive is absolutely unaffected by vibration or road shocks. The driving shaft is enclosed in a flexible shaft casing. All parts made of the same high quality of material and workmanship that enters into the construction of all instruments for automobiles, w't each 10 lbs., each ..... JIFJ $12.00

All Stewart Speedometers are made upon the magnetic principle. There is only one moving part. This is a circular magnet, mounted on the top of the shaft. Fitting over and around this circular magnet is an aluminum cup. On the edges of this cup are the numbers, from 0 to 75, which indicate the number of miles per hour your motorcycle is traveling. There is absolutely no connection between the circular magnet and the dial cup. The turning of the rear wheel turns the flexible shaft and this causes the circular magnet to revolve. As this revolves it acts with magnetic force on the aluminum dial cup. The faster the magnet turns, the more the dial cup is pulled around, and whatever number on the dial cup is opposite the pointer, that indicates the number of miles per hour. It is the most simple mechanism in the world. There is practically no wear whatsoever to the Stewart Magnetic Type Speedometer.

GYMNASIUM CLOTHING

Our athletic shirts are furnished in three grades, heavy weight worsted, medium weight worsted, and medium weight cotton.

Worsted goods are made of all wool yarn, knit to correct size and shape, and are warranted not to rip. While these shirts are soft and comfortable, the peculiar twist in the yarn gives a toughness that enables them to stand the roughest kind of service.

The cotton shirts are made of selected sea island cotton. They are strong and durable and are just the thing for gymnasium work.

In ordering please be careful to use our numbers, stating size wanted, and to facilitate prompt shipment in the busy season, give first and second choice of colors. Plain navy, black, gray, maroon and white are always carried in stock, and during the season black and red, black and orange, navy and white, gray and red, maroon and white and a number of other popular combinations.

A Dueber-Hampden Special

AN IDEAL GENTLEMAN'S WATCH

14 Karat Solid Gold Case

(ACTUAL SIZE)

17 Jewels Adjusted Movement

A 14 KARAT SOLID GOLD WATCH. THE BIGGEST ADVERTISER AND TRADE BRINGER EVER OFFERED THE MERCHANT

Case. This is *full 14Kt. solid gold*—(not gold filled)—12 size, open face, dust proof, solid back case, has jointed front with hinged movement holder. Can be had either plain polished or Roman finish.

Dueber made the case. The name in the case guarantees quality, style, finish and workmanship.

Movement. Nickel, bridge model, adjusted, 17 ruby and sapphire jewels in settings, *steel escape wheel*, compensation balance, Breguet hair spring, patent regulator, patent safety center pinion, highly finished exposed winding wheels, bright bevel head screws, elaborately damaskeened, gold lettering, double sunk glass enamel dial with red marginal figures and *double roller escapement.*

The Hampden Watch Works made the movement, the manufacturers of watches used in railway service. Their name is on it and they guarantee it.

We Have Contracted with the manufacturers to sell a large quantity of this particular watch. They have made *such a close price*, and we in turn are satisfied with so a small margin, that the price we ask is practically a revelation in watch industry.

If You Want to sell a good watch, treat your customers right, and know that competition cannot touch this watch—*here is your opportunity.*

GUARANTEED BALL BEARING WRINGERS.

On this and the following page we illustrate several patterns of Wringers, under the brands [illegible] and REVONOC. The rolls in [illegible] wringers are guaranteed for five years, those in the REVONOC are guaranteed for three years, otherwise they are identical.

These wringers embody two very important improvements, namely, the "Enclosed Cog Wheels" and "Ball Bearings," but in connection with these are a number of other points which contribute to their superiority.

Frame—This is made of seasoned hard wood, in the simplest manner, carefully joined and bolted, all of the working parts encased leaving nothing to be desired in the appearance and convenience of the wringer. It is carefully varnished, painted, and well finished in every detail.

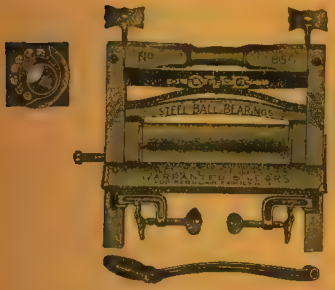
Rolls—These are of exceptional quality and will last the term of years for which they are guaranteed, if used for family washing. The [illegible] are made from the best solid white rubber, the same quality from outside of cover to shaft, are soft and have the proper elasticity to do good wringing. The rolls of the REVONOC are second only to the [illegible].

Covered Gearing—This is a very important improvement—there is no danger of clothing catching in the cogs. The appearance is vastly improved. The spring is longer, removing the strain on the rollers when rolls are separated, and the danger of children getting their fingers crushed is entirely removed.

Ball Bearings—These are located on the outside of the cog wheels, and therefore removed a considerable distance from the rolls, so that no water can reach them from wringing of clothes. The ball race is so constructed that should any water reach the bearings, it will drain out immediately, avoiding rust. The bearings can be oiled without any danger of the oil reaching the rolls. The balls are solid steel of uniform size. The bearings are of large size and reduce friction to a minimum, and [illegible] or REVONOC wringers can be operated with one half the effort of an ordinary wringer.

Other Points—Everything about these wringers is high grade and made for use. The thumb screws are large and easy to handle. The spring is made of the best quality of steel, adapted for the purpose. The clamps are extra strong, easy to apply, and are made to be attached to wood or galvanized tubs, either round or square.

[illegible]



No. 850 [illegible]—10x1¾ in. finest quality rolls, warranted for five years, encased cog wheels, with ball bearings, large frame, folding apron, adjustable clamps, for either wood or galvanized tubs, w't per doz. 275 lbs., per doz. **DFHJ** $76.00
Nos. 12, 16, 51 and 52 rolls will fit No. 850 [illegible].

No. 851 [illegible]—11x1¾ in. finest quality rolls, warranted for five years, otherwise same as No. 850 [illegible], w't per doz. 300 lbs., ... per dozen **EAFG** $84.00
Nos. 41, 42, 61 and 62 rolls, will fit No. 851 [illegible].

ONE QUARTER DOZEN IN A CASE

REVONOC

JACKS AND SUNDRIES FOR FORD CARS.

WEAVER "AUTO TWIN" JACKS.

Showing Jack in Use.

No. 6152—High carbon steel and malleable iron, castings are capable of withstanding weights far in excess of any strain which will ever be applied, ball and roller bearing throughout, raising leverage 400 to 1, 1½ in. steel lifting screws, capacity 4,000 lbs. each, w't per ½ set 48 lbs.,

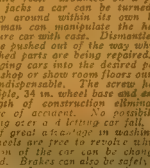
Per Set, two complete jacks, one for each axle★ .....AHJ $30.00

Per ½ Set, single jack, for one axle★ .....AJHJ $18.00

They embody the combined advantages of a turn table, transport, lifting jack and tire rest. Mounted on a pair of these jacks a car can be turned completely around within its own length. One man can manipulate the heaviest pleasure car with ease. Dismantled cars can be pushed out of the way while the detached parts are being repaired. For arranging cars into the desired position upon shop or show room floors our jacks are indispensable. The screw hoisting principle, 34 in. wheel base and extreme strength of construction eliminate all chance of accident. No possibility of turning over a lifting car jack. They are of great advantage in washing cars as wheels are free to revolve while the position of the car can be changed as desired. Brakes can also be safely tested while car is supported on these jacks.

STEWART SPEEDOMETERS.

Special for Ford Cars.



Model 100-G—Rotating dial, 60 mile speedometer, 10,000 mile season odometer, 100 mile trip odometer, can be reset, black enamel case, etched silver dial with 3 in. face, w't each 12 lbs., ... complete ..... AWH $30.00

ONE IN A BOX

★F. O. B. SPRINGFIELD, ILL.

ENDLESS FAN BELTS

No. 6241 No. 6242.

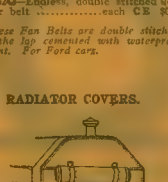
No. 6241—Hand woven from selve twine, impervious to heat and oil, will not scratch, w't each 12 oz.,
each .....DJ $0.70

These belts will outlast several leather belts.

No. 6242—Endless, double stitched weather belt .....each CE $0.60

These Fan Belts are double stitched, and the lap cemented with waterproof cement. For Ford cars.

RADIATOR COVERS.



No. 6244—Ford size, enameled rubber cloth outside, heavy blanket material lining, adjustable curtain in front, fits radiator perfectly, w't per doz. 18 lbs. .....per dozen ADDJ $24.00

This bonnet is made to be left during the cold weather. It is hard to get service out of a motor without proper protection against the cold winds of winter. The curtain may be adjusted according to the temperature, so that only the right amount of space can be left open to keep the radiator from steaming. This is one of the best cooling devices ever shown. By making in large quantities these may be had as cheaply as an improvised cover.

ONE IN A BOX

AUTO LOCKS

No. 6195—Bronze lock and attachment, instantly and securely applied to front axle of Ford car, locks starting crank in engagement with crank shaft—impossible to start motor, length 4 in., complete with instructions and two keys, w't per doz. 9 lbs., per dozen .....AJHJ $18 (0)

ONE IN A BOX

PICK UP PLIERS.

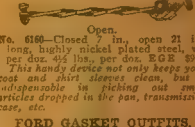
Closed.

Open.

No. 6160—Closed 7 in., open 21 in., long, highly nickel plated steel, w't per doz. 4½ lbs., per doz. EGE $9.60

This handy device not only keeps your coat and shirt sleeves clean, but is indispensable in picking out small articles dropped in the pan, transmission case, etc.

FORD GASKET OUTFITS.



Gasket Sets.

No. 6238—Copper and brass, high grade asbestos, same as smaller gaskets, complete, each.....JFE $1.10

Outfit consists of the following

1 Cylinder Head Gasket,
1 Cylinder Head Outlet Gasket,
1 Cylinder Head Inlet Gasket,
1 Carburetor Flange,
2 Inlet Pipe Gaskets,
4 Exhaust Pipe Outlet Gaskets,
4 Metal Seal Plug Gaskets.

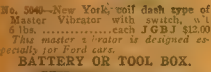
This gasket outfit should be stocked by every repairman as the gaskets, after removing a cylinder head is not adapted to replace with the old gasket when a new perfect one can be had fitted to a fraction of an inch.

SUNDRIES FOR FORD CARS.

MASTER VIBRATORS FOR FORDS.

No. 5040—New York coil dash type of Master Vibrator with switch, w't 6 lbs. .....each JGBJ $12.00
This master vibrator is designed especially for Ford cars.

BATTERY OR TOOL BOX.



No. 6607—Black enameled pressed steel and double snap fasteners, electric welded, beaded edge around bottom, size 22x9 in., w't 12 lbs., each .....BDJ $4.00
Made to fit on running-boards.

OIL GAUGE FOR FORD CARS.

No. 6737 Turned top, a solid brass [illegible] diameter, fitted [illegible] leather washer packing and improved air vent, w't 8 oz., each .....BE $6.40
Improved construction makes oil readable at a distance, old pet cock can be screwed into bottom of gauge for drawing off oil, and insures the right amount in the crank case at all times.

BUMPERS FOR FORD CARS.

No. 6219—Special double strength steel bar with malleable fittings, finished in black enamel only, w't complete 25 lbs. .....each CEJ $6.00
This bumper has been designed especially for Ford cars which have no projecting frame, it clamps to the spring, is easy to install, and is very serviceable

OIL BOXES FOR FORD CARS.

No. 7130—Per set complete CFJ $6.00

These oil boxes are a proven necessity, are easily attached, and force oil to spread between the leaves of the springs, thereby not only preventing rust which makes your car ride hard, and eventually leads to broken springs, but also prevents the squeaking common to rusty springs. With well oiled springs a car glides along smoothly and quietly, due to the greater flexibility of the springs.. No. 7130 made for Ford cars only.

TIRE HOLDERS FOR FORDS.

No. 6010—Running board brackets, rubber finish, w't 15 lbs., per set .....BEJ $4.20

Finished in a dull black known as a "rubber finish," very durable and easily attached.

No. 6008—Rear end tire brackets, w't 20 lbs. .....per set CDJ $5.64

These are made of malleable iron, can be attached to the rear cross member of car, are adjustable as to height, hold the casings in a vertical position, and will accommodate one or two casings.
SETS COMPLETE WITH STRAPS AND BOLTS.

FOLDING ROBE RAILS.

No. 6004—Steel rod rail, heavily japanned, 32 in. long, folding brackets, for metal bodies, w't 3 lbs., each .....JGB $1.20

This rail adapted particularly for Ford cars.

JERICHO HORNS FOR FORDS.

No. 6075—Ford Jericho, aluminum exhaust horns, w't complete 4 lbs., each .....DEJ $7.50

The Jericho horn produces a distinctive, penetrating sound heard clearly above the noise of the street. Its warning note demands the right of way without giving offense.

ONE OUTFIT WITH EVERYTHING NECESSARY FOR ATTACHING TO CAR, COMPLETE IN A CARDBOARD BOX.

LONG HAND HORNS.

No. 6074—Black and nickel special for Ford cars, w't each 5 lbs., each .....EDJ $9.00

The horn that is reliable, nothing to get out of order. Projector is one piece without seam, all gears are cut, housing is made of fine heavy grade metal. All parts enclosed and protected from rain, snow or mud. With a few drops of oil now and then will outlast any car built.

ONE IN A BOX.

WESTERN HOLSTERS AND SCABBARDS

When ordering holsters give make, model and length of barrel of revolver to be fitted. When Scabbards are ordered, give length of barrel of the rifle.

MEXICAN PATTERN HOLSTERS

This holster was designed for large frame revolvers, such as Colt and S. & W. 38 or .44 calibre. They are usually carried on the belt.

The very best saddle leather is used and they are one of the best and most serviceable holsters made. Can be supplied to fit revolvers with 4¾, 6 or 7½ inch barrels.

Plain finish, hand sewed

No. M4. For large revolvers with 4½" bbls. Ea. $ .70
No. M6. For large revolvers with 6" bbls. Ea. .75
No. M7. For large revolvers with 7½" bbls. Ea. .90

Embossed finish, rawhide laced

In style and workmanship they are the same as above but are handsomely embossed and instead of being sewn are laced with rawhide thongs.

Mexican Flap

No. M4E. For .38 or .44 calibre revolvers with 4½ inch barrels.....Each $ 2.25
No. M6E. For .38 or .44 calibre revolvers with 6 inch barrels.....Each 2.50
No. M7E. For .38 or .44 calibre revolvers with 7½ inch barrels.....Each 2.75

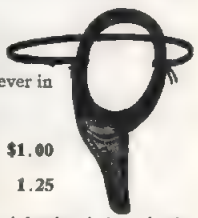
EMBOSSED "FLAP" STYLE HOLSTERS

For the heavier frame revolvers like Colt and S. & W. Are made of heavy saddle leather, finely embossed and laced with rawhide.

No. 38E For large frame revolvers with short barrels.....Each $2.00
No. 44E For large frame revolvers with long barrels.....Each 2.25

SHOULDER HOLSTERS

The loop slips over the shoulder and the strap fastens around the body and the holster hangs just under the arm. A very convenient position and the revolver can be quickly drawn. While it is always easy to reach, is never in the way. Popular for use on horseback.



No. 638. Shoulder holster, made of good quality leather with strap and buckle. Suitable for .38 calibre or small revolvers with 4-inch barrel.....Each $1.00
No. 639. Like No. 638 for .38 and .44 calibre revolvers with 6 or 7½ inch barrels.....Each 1.25

CARBINE SCABBARD

A leather holster is the most convenient manner of carrying a rifle while on horseback. Supplied with sling straps to be attached at the pommel and cantel of saddle. Furnished for 20 or 22 inch carbines and for 24 or 26 inch rifles or shot guns.

No. 53. Heavy russet leather, finely finished with saddle slings.....Each $3.00
No. 10. Best grade cowhide machine sewed and hand embossed.....Each 5.50
No. 10R. Same quality and finish as No. 10, but laced with rawhide thongs.....Each 6.50

Delivery Prepaid in U. S. if Cash is Sent with Order at Above Prices

LEATHER RIFLE CASES

In ordering rifle cases either "full length" or "take down" style, always give make, model and length of barrel of rifle to be fitted.

"FULL LENGTH" COVERS

This leather rifle cover is far more serviceable and affords better protection than one made of canvas or any other material. It is practically waterproof and is a sure safeguard against bumps and knocks. Much more economical, outwearing a number of canvas cases and with an occasional use of an oily rag will look clean and fresh until it wears out.

Made in three grades of leather, brass trimmings with sling and handle, for 20, 22, 24 and 26 inch rifles.

No. **1152.** Soft black grain leather.....Each **$2.25**
No. **052.** Extra heavy russet cowhide..... " **3.50**
No. **52.** Stiff moulded russet leather, flannel lined, with inside flap, hand sewed and finely finished..... " **6.00**

"TAKE DOWN" CASES

Leg-of-Mutton Style

Made of a superior quality good russet sole leather, leg-of-mutton shape, for Stevens, Winchester, Remington, Savage and Marlin take-down rifles. Sewed leather handle, sole leather sling strap, lock, buckle and name plate. When ordering specify make, model and length of barrels.
No. **X6**.....Each **$3.00**

Auto-Loading Rifle Cases

For Remington Auto-loading or Winchester automatic rifles. Heavy brown leather, with square corners, felt lined, brass trimmed, lock; buckle and name plate and leather handle.
No. **160**.....Each **$4.00**

STOCK AND BARREL COVERS

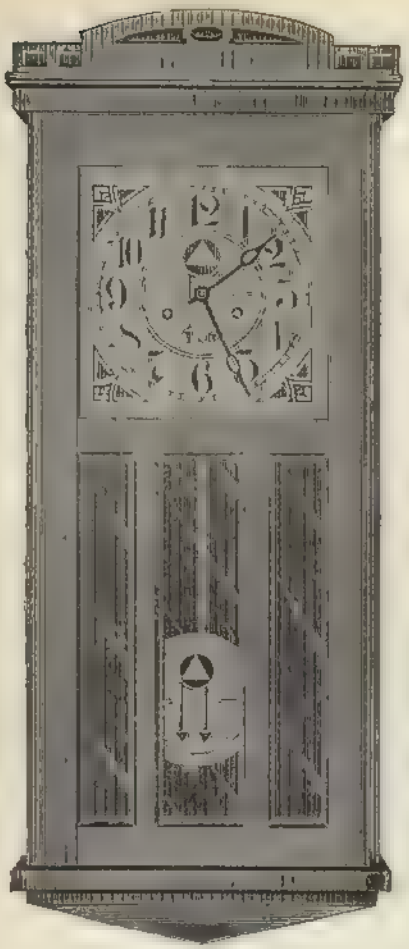
CHAMOIS BARREL AND STOCK COVERS

These are intended simply to slip over the barrel or stock of a rifle or shotgun as a protection against dust or from becoming scratched or marred. It is a good idea to put them on before putting away in the leather case. When ordering state whether for shot gun or rifle.

No. **74.** Barrel cover, green felt, with tape fastening.....**$ .30**
No. **74S.** Stock cover, green felt, with tape fastening..... **.30**
No. **75.** Barrel cover, French chamois skin, with tape fastening..... **1.00**
No **75S.** Stock cover, French chamois skin, with tape fastening..... **1.00**

Delivery Prepaid in U. S. If Cash is Sent with Order at Above Prices

Fine Imported Chime Regulators, Harp Gong, English Cabinet and Quarter-hour Strike Mantel Clocks



PADUA

Westminster Chime regulator, genuine mahogany or oak case; height 30 inches, width, 13 inches; silver-plated dial, 8x8 inches, with raised numerals; bevel bead with bevel glass; full Westminster Chime on five tube-staffs; eight-day quarter-strike movement.

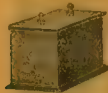
COILS, VIBRATORS AND ROWBOAT MOTORS.

SPARK COILS.

No. 5004—Cico, 1 cylinder, each .....DCJ $7.20

The material used in the construction of a spark coil is most important, and in the manufacture of the Cico no expense has been spared and only the best material used throughout.

Every coil is tested with twice its working voltage before leaving the factory. The windings are of non-absorbent enameled wire. The best coil made at a moderate price.



SPLITDORF, Standard Vibrating.

No. 5005—1 cylinder, each JGBJ $12.00
No. 5006—2 cylinder, each ADDJ 24.00

The standard boat type coils are made up of the very best grade of material and are mounted in nicely finished oak boxes. These coils are especially adapted for stationary and marine engine use. They are equipped with the latest type of Bogert Vibrator and ratchet screw and are guaranteed to give a full fat one-half inch spark on a very small consumption of battery current.

SPLITDORF DASH, Peerless Unit Construction, Mahogany Case.

No. 5008—1 cylinder, each JJJJ $15.00
No. 5009—2 cylinder, each AFBJ 27.00
No. 5010—4 cylinder, each CBDJ 54.00
No. 5011—6 cylinder, each DCBJ 72.00
No. 5012—Units, extra, each .....JGBJ 12.00

Cut-out switches furnished on all the

"MASTER" VIBRATORS.

No. 5040—New York, dash coil type of Master Vibrator, with switch, each .....JGBJ $12.00

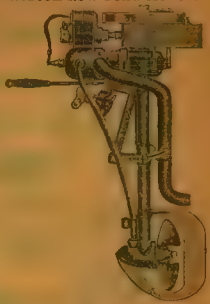
This Master Vibrator is designed especially for Ford Cars, and has proven satisfactory after years of trial. The coil consists of a powerful condenser which is connected in series with the regular coil the whole being inclosed in a neat, compact mahogany case. This coil interrupts the current or becomes the Master Vibrator for all your coils, insuring uniform and perfectly timed ignition from each coil. But one adjustment is necessary, reducing your ignition system to the simplicity of a single cylinder car at the same time increasing speed, power and flexibility.

MAKE AND BREAK COILS.

No. 5085—Square ends, winding, 8 in. long, w't 10 lbs.....each ADE $2.40

These coils are for use with make and break engines, farm engines, traction and all types of stationary engines. Made simple, strong and substantial.

WILCOX ROW BOAT MOTOR.



No. 6600.

No. 6600—Complete, crated for shipment with battery and coil ignition, each .....DFBJ $77.00

Diameter Connecting Rod Bearings, ⅞ in. Carburetor—our own design. Bronze Water Pump. Crank Shaft drop forged, all bearings ground. Capacity of Fuel Tank, 1 gal.

Factory Guarantee.

We guarantee our machines to develop more than the full rated power, to be free from defects in workmanship and material and to be absolutely as represented in every way.

Should any part prove defective due to any cause other than ordinary wear and tear, abuse or neglect, we agree to replace it free of charge at any time within one year from date of purchase, provided such part is returned to us for examination, transportation charges prepaid, and plainly marked with the shipper's name and address.

FOR FACTORY SHIPMENT ONLY.

TELESCOPE RIFLE SIGHTS

WINCHESTER

Adapted to all Makes of Repeating and Single Shot Rifles. When Ordering, Give the Make, Caliber and Model of Rifle.

The Winchester Telescope Rifle Sight represents the combination in an optically and mechanically correct manner of all the features essential in a practical and satisfactory instrument of precision. It also embodies in its design several valuable improvements which correct faults common to other telescope sights. Notable among these new features are the micrometer adjustment of the objective lens which makes it simple and easy to take advantage of the possibilities of this type of sight to the fullest degree, and an aperture reticule furnishing the smallest aperture with the least obstruction of the field of any ever offered.

	Each
Style A—With No. 1 Mounts, 5-Power, 5 ft. 8 in. Field at 100 Feet, 2 in. Relief, Length 15⅞ in., Weight 10 Oz.	**$34.00**
Style B—With No. 1 Mounts, 5-Power, 3 ft. 9 in. Feild at 100 Feet, 3½ in. Relief, Length 15⅞ in., Weight 9¼ Oz.	**23 75**
Style B—With No. 1 Mounts, 4-Power, 3 ft. 8 in. Field at 100 Feet, 3½ in. Relief, Length 14½ in., Weight 9 Oz.	**23.75**
Style B—With No. 1 Mounts, 3-Power, 4 ft. 10 in. Field at 100 Feet, 3½ in. Relief, Length 14⅝ in., Weight 8¾ Oz.	**23.75**

The Winchester Telescope Sight is easily attached to or detached from the barrel of a rifle without changing its adjustment for elevation or windage. The base for the front and rear mounts are of steel, having a dovetail cross section, and are sent out drilled and countersunk and accompanied with screws for attaching them to the barrel. They are intended to be attached to the barrel permanently so as to insure the proper position of the telescope whenever used.

The tube is not drawn, but bored and turned from a solid piece of steel. This gives it great rigidity and consequently a more perfect alignment for the lenses is secured.

These reticules are interchangeable and one can be substituted for another without difficulty. The standard style is the single cross hairs and will be sent on all orders unless a different style is specified. When apertures, double cross hairs, or triangles are ordered, the range of size of bull's-eye for which they are to be used should always be given.

Single Cross Hairs

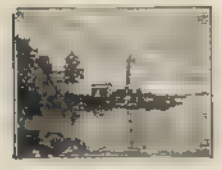
Bull's-Eye

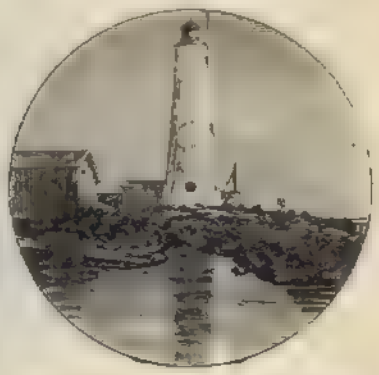


View Seen by the Naked Eye.

As Seen Through Style B 5-Power Telescope, Same Magnification as Style A 5-Power Telescope

As Seen Through Style B 4-Power Telescope

As Seen Through Style B 3-Power Telescope.



Same View Seen Through Style A 5-Power Telescope

To fulfill ideal conditions a reticule is sometimes required having a very small aperture with the least possible obstruction to the field. This requirement is provided for by an aperture reticule made from a single piece of wire and comprising a ring and a twisted stem. A reticle made in this way has a much smaller area than one stamped out of sheet metal, and consequently offers the least possible obstruction to the field. Another decided advantage a reticule of this kind has over one made of sheet metal is the smoothness of its surface. Stamped-out aperture reticules have ragged edges, which under the lenses are so greatly magnified as to be objectionable and an interference with clear vision.

The mountings are light and well shaped without the sacrifice of strength. All of the front mounts are made of nickel steel as is also the No. 2 rear mount. The No. 2 rear mount allows a greater adjustment both for elevation and windage that the No. 1 mount which makes it suitable for long as well as short range use. The limit of utility of the No. 1 rear mount is from 200 to 500 yards according to the caliber of the rifle to which it is attached. The front mount is so designed as to afford the tube a bearing on a convex surface instead of on rivets or screws. This prevents indentation or injury to the tube, so apt to occur in shooting heavy loads where point bearings are used, as has heretofore been done. Contained in the front mount is a bevel-nosed plunger, which engages in a long groove on the under side of the tube and keeps the tube from rotating, but allows it to move longitudinally. This device insures the axis of the tube remaining constant when once adjusted.

BARREL REFLECTORS

For Examining the Inside of Winchester Rifle Barrels.

	Each
No. 1W—Made in Different Sizes, When Ordering Specify Model of Rifle	**$0.50**

Directions—Withdraw the breech block. Place the glass on top of the carrier, the mirror toward the chamber. Hold the muzzle of the gun toward the light, and the inside of the barrel will be seen reflected in the mirror.

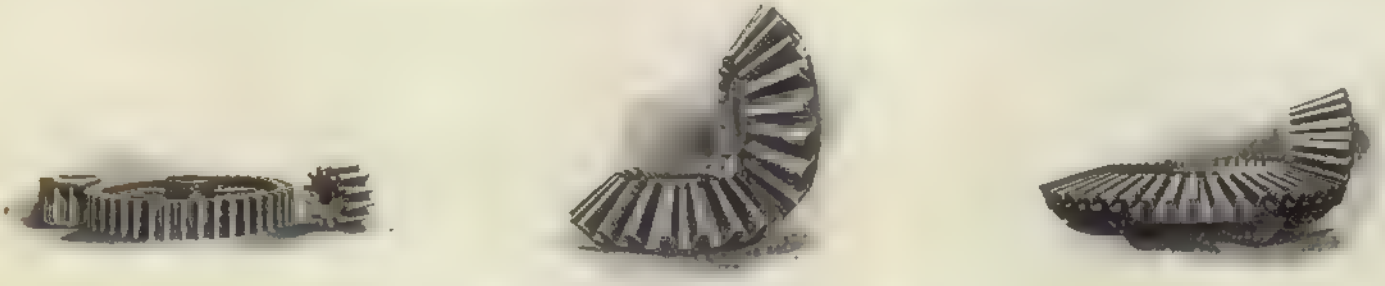
Heavy Lines Indicate Speed Limits

These Chains are interchangeable with other makes of Standard Link Chains of corresponding styles and numbers
Chains Nos. 33, 34 and 62 to be given preference for transmitting power, and used also for conveyers and elevators
†Chains to be preferably used as attachment chains for conveyer and elevator service
‡Working strengths in table are for steady service only, for unsteady service and shocks use but [illegible] of values listed

SPUR MITER AND BEVEL GEARS



Prices and Complete Data on Application

When ordering Spur Miter or Bevel Gears it is necessary to give diameter from out to out of teeth, width of face, distance from center to center of teeth, size of shaft. When ordering a new gear to run with one already on hand, send a tracing of the teeth in the old one.

If keyway is wanted give depth and width.

SPROCKET WHEELS

To order Sprockets specify the following:
1. Number of Sprocket Wheels required.
2. Pitch diameter
3. Number of teeth
4. Chain number
5. Exact bore or shaft size
6. If hubs are offset or special, give full information—sketch if possible
7. Driving (A) or driven (B). If not specified, driven (B) will be furnished
8. Keyseated or set screwed (or both)
9. Size of keyway (unless Standard).

Prices on application

WE SPECIALIZE BUILDERS HARDWARE.

Go through this catalog—make a mental note of the class, character and variety of Builders Hardware shown—and you will be compelled to consider us Builders Hardware Specialists in the broadest sense.

We learned some years ago that the concern who handles new designs—who would keep the prices down and the quality up and who would have the stock ready for immediate shipment—would take the lead as distributors of Builders Hardware. We have been adjusting our business to this policy ever since.

We now offer you the merchandise listed here absolutely confident that it will completely satisfy you on every demand from a quality standpoint as well as a price standpoint.

Supplying many thousand dealers throughout the United States, we are justified in carrying this large open stock, and the very knowledge that we do carry such an immense stock brings us new business from every part of the country every day.

This new business comes because the dealer has learned that we actually carry the stock and ship at once.

Items Marked ✠ Not Carried in Stock, Can Only be Furnished by Shipping Direct from Factory, New Britain, Conn., or Chicago, Ill.

Schoenhut ALL-WOOD Dolls

AN AMERICAN INVENTION

MADE IN U. S. A.

An Invitation to Meet Miss Dolly Schoenhut

Who Can Do Almost Everything But Talk

No, Miss Dolly is not a real girl, but you can hardly tell the difference. See Miss Dolly, her brothers and sisters and all her Schoenhut playmates at the best store in your town.

They are the most attractive and lovable little folks in the world—and the healthiest. They are made all from wood and are practically indestructible. Even the heads are modeled of solid wood. Some are beautiful character heads modeled by artists. All are artistically painted with natural oil colors, giving a finish superior to any other doll heads.

Schoenhut All-Wood Perfection Art Dolls are fully jointed—not with elastic cord, but with our patent steel springs with swivel connections. The parts are held tightly, but are flexible enough so that the dolls will hold any pose. Having no elastic cord, they never need restringing. They come with the finest quality mohair wigs or with hair carved on wooden head painted natural colors.

Schoenhut Dolls never break and cause heartaches. Your little ones cannot know the all joy and pride of doll possession until they own a Schoenhut. Our illustrated book shows Schoenhut Dolls of all sizes and prices. You ought to have this book to help you to select a doll that your child will love and use for years. Send for it now. The Schoenhut Dolls, being a new invention, are not stocked by all dealers, therefore, we will supply you direct from the factory if your dealer cannot supply you.

Schoenhut's Humpty-Dumpty Circus Toys

Toys that gladden the hearts of our dear little ones—Appeal to boys and girls alike, of any age

The funniest thing you ever saw. The elephant can do tricks you never heard of. The donkey outdoes her animal Barnum ever had. The clowns can make grown-up people, as well as children, laugh to beat

The figures are made of solid wood, fully jointed with elastic cord, painted in oil colors, the clowns are dressed in fancy costumes. Will stand the roughest kind of treatment. There's no end to the fun these merry, each more grotesque than the last, are constantly delivering. You can watch Humpty-Dumpty through and you'll find nothing to approach Humpty-Dumpty's Circus. Ask to see it at any Toy or Department Store

Schoenhut Toys for 43 years have been made by American labor in an American toy factory—the largest in the world—modern, sanitary and well-lighted.

This button-shaped trade mark on the front of every genuine Schoenhut doll.

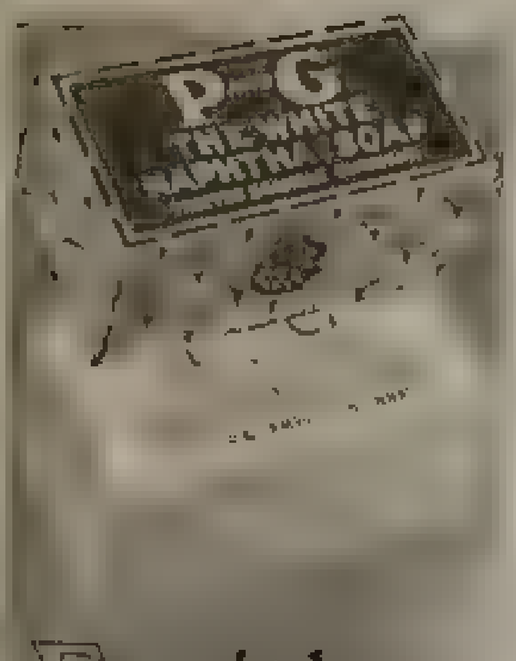
Makers of the world-famous Schoenhut Toy Piano

Schoenhut's "Modlwood" Toys

All-wood construction toys for the small youngster whose unskilled hands cannot master the more complicated toys. They are made from clean white wood (not painted). Easy to construct and dismantle at will, satisfying the boyish craving to know "what's inside." Locomotives, Automobiles, Turning Cars and Racing Cars, etc., can be made.

Get your dealer to show you these toys, also the Humpty Dumpty Circus Toys. If he cannot supply you, send us his name, and we will mail you illustrated literature, etc.



Faultless washings without tiresome work.

Sweet, clean clothes without back-breaking rubbing and troublesome boiling. Clothes free from worn spots due to the action of the soap. That is the way of **P. and G.—The White Naphtha Soap.**

P. and G.—The White Naphtha Soap washes clothes as sweet and clean while they soak that hard rubbing and boiling are unnecessary. Yet it is harmless—cannot injure the clothes. It does the work successfully and safely because it is high grade soap, white soap, naphtha soap.

Likewise in general cleaning, **P. and G.—The White Naphtha Soap** saves time and gives complete satisfaction, not merely because it is naphtha soap, but because it is such superlatively good naphtha soap

THE SCHOOL AT CHRISTMASTIDE

All the selections here listed have been carefully examined and are suggested for presentation at Christmas entertainments.

Some Musical Features

"A Merry Christmas." Eight-line chorus, good for close entertainment.

"Constant Christmas," by Phillips Brooks. Trio for high-school girls.

"The Jolly Christmas." Chorus for grammar grades.

"Beautiful Christmas Eve." Girls' chorus.

"Recipe for Christmas Pudding." Eight-line song for a little girl.

"Christmas Eve at the North Pole." Solo for a boy, a lively parody on "The Night Before Christmas."

Pantomimed song, "Christmas Secrets," to the tune of "Auld Lang Syne," to be enacted by four or more primary children, while the song is sung by a chorus off the stage.

"The Night Before Christmas." Pantomimed play to music. "Here We Go 'Round the Mulberry Bush"; "We are the Fairies Who Knit the Socks, Knit the Socks."

Drills and Motion Exercises

"The Christmas Tree." March, drill and chorus for thirteen pupils. A tree is donated to the evergreen boughs they carry.

"The Snow Brigade." A winter drill for twelve boys.

"A Christmas Bell Drill." For eight little girls with wands to which bells are attached.

"Christmas Finger Game." For children from four to six: "This is the pine tree that grew in the wood."

"Christmas Patriotic Drill." Uncle Sam, Miss Christmas, six boys and six girls.

"The Christmas Tree." A motion-song exercise for five or ten small children: "How your Christmas tree grew from a seed."

"Stocking Drill." Humorous, for eight small boys. All sorts of stockings—on heads for caps, and on hands and arms. Four lines for each boy.

"Poinsettia March and Drill." Twelve girls of the higher grammar grades. Red carnations. Poinsettia is formed to which a girl's face appears.

"A Christmas Dinner in Alphabet." Twenty-six primary children.

Recitations and Monologues

"The Christmas Tree." Twenty-four lines for a boy to recite before a Christmas tree is dismantled.

"A Very Exceptional Edition." Thirty lines for a primary boy.

"The Beautiful Garden of Toys." Forty lines for grammar grades.

"Merry Christmas Greeting." For a very little girl, eight lines.

"Father Christmas Message." Eighteen-line speech for a boy to close Christmas entertainment.

"Christmas Stocking Tales." For four children. Each speaker appears to be in a stocking, with head only protruding.

"The Birdies' Christmas." Twenty-four nature poems for a small child.

"Kitty's Stocking." Little child holding a stocking cut to fit a cat's head; twenty lines for a small child.

"Bells of Christmas." Forty lines, rhythmical, and prettily picturing the first Christmas in the Holy Land; for a high-school girl.

"Good Enough." Four lines for a tiny girl.

"Christmas Eve in Wildwood Hollow." What the animals got for Christmas. Sixteen-line recitation for a boy.

"Christmas Over All the Earth." The true Santa Claus; sixteen lines: "My truest and holiest name is love."

"Aunt Polly's Christmas Gift." Monologue for high-school girl.

"A Christmas Story." Short monologue by a boy carrying a small package.

"Fred's Christmas Shopping." Monologue for a boy of twelve.

Holiday Plays

"The Story of the Christ Child." For primary grades. Selected children and school.

"On the Eve of Christmas." Intermediate grade; an many boys and girls as convenient.

"Christmas at the Crossroads." A one-hour humorous play for high-school pupils.

"Daddy Darwin's Christmas." An hour's play for grammar grade boys and girls.

"The King of the Holiday." At the court of the children; with special arrangement for Canadian readers.

"A Christmas Joke." Twelve boys and twelve girls, grammar grade. A Christmas tree is planned for Mother Goose's children, and Jack Frost changes the labels.

"The Christmas Idea" (giving not getting). Ten-minute sketch. Four high-school girls and an old-fashioned lady.

"The Pink Scarf." A short, lively sketch for six girls, grammar or high school.

"The Gifted Givers." Four boys and four girls, high-school age.

"Grandpa's Christmas Stocking." A ten-minute play for ten characters, mostly small children.

"The Christmas Sunshine Society." A number of grammar grade children.

"The Birdy Christmas Card." Kate Douglas Wiggin's own dramatized version and five additional outdoor amusement. A royalty fee must be paid.

NOTE.—The selections mentioned in this column are all readily obtainable in inexpensive form. The addresses from which they may be obtained, and the prices, will be sent upon request to an addressed, stamped envelope sent to the School Entertainment Editor, in care of The Ladies' Home Journal, Philadelphia.

Schoenhut ALL-WOOD Dolls

AN AMERICAN INVENTION

Schoenhut Toys

Made in U. S. A. since 1872. American ingenuity and invention

THE TOYS you give this Christmas—where will they be a year from now? One well-made toy, still in affectionate use, is better than a wastebasket full of fragile cast-offs.

That is why reliable toy departments recommend Schoenhut toys. They have been staunchly made by American craftsmen since 1872, when Mr. Schoenhut opened his small toy factory in Philadelphia. Today there are thousands of fascinating Schoenhut toys. They are the standard by which all toys are judged.

Whether you spend 50c or $50 on Christmas toys, it will pay you to look for the Schoenhut name.

Schoenhut All-Wood Dolls

All-Wood Girl Doll

No. 16/317C/574

Illustrating an All-Wood Doll, 17 inches high, with closing eyes and curly wig; nicely dressed with White, Pink or Blue poplin.

Will be mailed to any address in the U.S. upon the receipt of $9.00. Can furnish without dress at $6.50.

are made entirely of wood, firmly jointed with patented swivel connections and steel spring hinges having a double spring tension. They do not come apart. They are practically unbreakable. Children love them dearly because they will stand or sit in practically any position, a metal foot-stand being furnished with each doll. They are painted with enamel oil colors that do not come off. They come with either finest quality mohair wigs or

with hair carved and painted on the wooden head, and may be had with either conventional or natural child faces. Eyes movable or fixed. A whole family to choose from—the world's only educational doll. Send for our illustrated doll booklet. If your dealer cannot supply you with Schoenhut's Dolls, we shall be glad to do so direct from the factory.

All-Wood Infant Doll

No. 14/107W/550

Illustrating an All-Wood Doll, 14 inches high, stationary eyes and bob cut wig; nicely dressed in white lawn.

Will be mailed to any address in the U. S. upon the receipt of $6.00. Can furnish without dress at $3.50.

Alphie Blocks

The Schoenhut Alphie Blocks are cute, chubby, attractive little creatures, each of which has a separate personality to endear itself to the childish mind. In shape, the blocks present the semblance of human figures. They are handsomely lithographed on both sides; one side a cute little child, the other a funny little animal; each block a different design. A different letter of the alphabet appears on the front and back of each block; so arranged that a half set provides a complete alphabet. They are made of hard-wood—5" high, 2½" wide, and about ⅞" thick. Flat on the tops, bottoms and sides, they can be used in innumerable ways for building, spelling, ten pins, etc. Several rubber balls come with each set.

Toy Pianos

The Schoenhut Toy Piano has accurate notes. Real tunes can be played upon it. The keys are the same width as on grown-up pianos, so that the child learns to spread her fingers properly. Schoenhut Toy Pianos are sold by practically all toy dealers and music stores. There are 42 variations of sizes and styles, ranging in price from 50 cents to $40.00 each. They should not be ordered from the factory, as it is not practical to ship them by parcel post. Get them from your dealer, and make sure that the name "Schoenhut" is on the front of the piano. Schoenhut's toy pianos have been famous for 50 years.

Humpty-Dumpty Circus (*illustrated below*)

Here are the toys that every boy and girl in the United States is longing for this Christmas. Schoenhut's Humpty-Dumpty Circus Toys are made of solid wood, firmly jointed with strongest elastic cord. They are attractively enamelled in natural colors. With a Humpty-Dumpty Circus you can have all the thrills of the big tent right in your own home. The toys can be put through all kinds of contortions. Here is the elephant standing on his hind legs and there is the clown balancing himself on a ladder. They will stay that way, too, until you take them down. Schoenhut's Humpty-Dumpty Circus Toys can be bought in sets from $1.00 to $35.00, according to the number of pieces. You can start a circus with a few pieces and then keep adding to it until you have "the greatest show on earth" right on your play room floor—horses, dogs, donkeys, elephants, everything that goes to make up a real circus. It is more fun than you can shake a stick at, and mother won't get mad, because there is nothing that will soil your clothes or mar the furniture. If you can't get these toys at your regular toy shop, send us its name and we will mail you an illustrated catalog free.

"The Greatest Play Toy in the World"

Look for the Name "Schoenhut"

With Schoenhut Toys in all good stores, no mother need put in the hands of her child carelessly conceived or cheaply constructed toys that break a few days after Christmas; toys with paint that comes off; toys that confuse the child's growing thoughts. Every Schoenhut Toy means education cleverly interwoven with amusement. Look for the name "Schoenhut" which appears on every toy or package.

MURAD

GREETING—you smokers of MURADS, wherever you are!

In the offices, banks, mills, factories, of the big cities and little towns.

Or doing the work of the world in the big open—

In frozen Alaska, where every ounce counts, where substitution and "half-good" are dangerous.

In tropical jungles.

In navy ward-rooms, on far-off army posts, where a whiff of the right cigarette is a "wireless" from Home.

On ranches, golf links, ocean liners, campuses, in mining camps, clubs, studios, newspaper sanctums, hotels, stock exchanges, legislatures, or wherever the layman or professional man gathers.

Wherever the FLAG flies or American genius has penetrated.

Greeting!

MURADS *are* THE Turkish cigarette, aren't they?

They DO stand the test.

They DO smooth over the rough places and make the smooth ones more delightful.

You have smoked MURADS, and YOU KNOW.

And you have told the man working or playing shoulder to shoulder with you, about MURADS.

It is YOU who have made MURADS the greatest-selling 15-cent Turkish cigarette in the world.

THE TURKISH CIGARETTE

Everywhere—Why?
